

§ Agissar Corporation

CATEGORY: Mail Openers/Extractors

PRODUCTS: Mail Opening/Extraction/Handling Systems

COMPANY: Agissar Corporation, 526 Benton Street, Stratford, CT 06615-7351. Phone: 800-627-8256. Web: www.agissar.com Contact: info@agissar.com.

DESCRIPTION: Agissar is the leading supplier of envelope extraction equipment including:

TRIPLE CUT SERIES: These mail extraction workstations are available in Single Operator, Dual Flex Operator, Tr-Station, and Quad Station systems used in remittance processing applications (Coupon/Check).

TRIPLE CUT SERIES - ACE AUTO EXTRACTOR: ARC and Check 21 migration means no need to encode checks, as the physical documents don't get returned to the bank of first deposit. ACE is operated by one person achieving 9,000+ per hour auto extractions.

TRIPLE CUT SERIES 3 SIDED ENVELOPE OPENER & AUTO STACKER: This Triple Cut is used by operations with extreme peaks and valleys in their incoming mail volume.

AGISSAR APS AUTOMATED ENVELOPE SORTERS: The fastest and most accurate automated envelope sorters available with models processing from 9,000 to 45,000 per hour capability on 7" envelopes.

Neopost IM-16 Letter Opener

§ Neopost USA

CATEGORY: Mail Openers/Extractors

PRODUCT: Neopost Mail Openers & Extractors

COMPANY: Neopost USA, 478 Wheelers Farms Rd., Milford, CT 06461. Phone: 800-NEOPOST (636-7678).

IM-16: The IM-16 Letter Opener is designed to maximize office productivity by distributing incoming mail faster throughout your organization. Whether processing checks, orders, remittance pieces or incoming mail, the IM-16 saves time and leaves no waste. Users can maximize productivity and improve cash flow by opening incoming mail at speeds up to 300 letters per minute — delivering mail faster. Extremely reliable, it opens a wide range of envelope sizes from No. 10's up to flats. Employees are free to work on more valuable tasks, resulting in improved productivity. This translates into improved cash flow as incoming payments get processed quicker, while orders are processed immediately to help improve customer satisfaction and enhance one's business image. Simply place a stack of incoming mail in the hopper and press the start key.

IM-30: Providing increased efficiency at a low cost, the IM-30 opens one, two or three sides of an envelope. Without presorting, adjustments or

Neopost IM-306s

waste, mixed mail can be processed efficiently. The contents are protected and document integrity is maintained. As few as 400 pieces of incoming mail per day can justify an IM-30 Letter Opener from Neopost.

IM-35: The Neopost Model IM-35 Letter Extractor opens and extracts envelopes and delivers the contents to the operator. Using the exclusive 3-side slicing, the envelope is opened without creating any paper waste while protecting the contents. Mixed mail can be processed without any presorting or adjustments; envelope sizes can range from 3-1/2" x 6-1/2" to 6" x 9".

IM-2112: The Neopost IM-2112 Envelopener is the latest advancement in envelope-opening technology. Utilizing milling cutting and a self-adjusting feeder to open a variety of mixed mail sizes and thicknesses, this compact envelopener opens up to 400 envelopes per minute, allowing for quick extraction.

Neopost IM-2112 Envelopener

IM-306 & IM-306s: The IM-306, with its ability to operate at a rated speed of up to 40,000 envelopes per hour, contains the latest mail opening technology setting a new standard for high volume mail processing. Using milling cutter technology with 8 cut-depth positions removes chips as small as 0.01" from the envelope edge, producing a soft, feathered edge while protecting valuable envelope contents. Even overnight delivery envelopes are no match for the Model 306. Equipped with a robust operator control software interface, job setup can be done with ease and flexibility. Most significantly, the IM-306 is also available with enhanced sorting capabilities as the IM-306s. Envelopes can be output to two locations based on programmable criteria such as thickness, length, and height. Optional batching capability allows items to be grouped together in pre-selected lot sizes. Sorting options make the IM-306s a perfect fit for applications that require verification of contents either before or after extraction like claims processing, remittance, and vote-by-mail. Because of its ability to identify "clean mail" from "exception mail," the Model 306 also helps to insure maximum productivity from mail extraction equipment by allowing operators to concentrate on extracting envelope contents from "clean" batches instead of trying to handle exceptions at the same time.

FEATURES: Milling cutter, high-speed processing, three mail tray supports, operator controlled software interface, automatic jam detection, automatic chaff collection, stand and waste bin included, no sharp edges — no paper cuts.
