§ Rollem International

CATEGORY: Folding Machines

PRODUCT: Mailstream Direct Mail Finishing System

COMPANY: Rollem International, 1650 S Lewis St., Anaheim, CA 92805-6413. Phone: 800-272-4381. Web: www.rollemusa.com/mail.

MAILSTREAM: Print, finish, and mail 10-in-one. Mailstream, a new direct mail finishing system, converts press sheets to finished mail products while maintaining zip code order. Apply 10 processes in one operation including hot, cold and fugitive glue; tear-off coupons; tip-on cards; trimming, slitting, scoring, pattern-perforations, and scratch-off labels. Mail integrity is maintained creating folded, glued products ready for delivery to mail bins. Glue closures meet USPS requirements and eliminate need for wafer seals. In-line and near-Line configurations are available. See Rollem in Die-Cutting, Document Processing, and Inserter sections.

§ Spedo US, Inc.

CATEGORY: Forms Processors

PRODUCT: SPEDO Cutters, Stackers, Buffers, Conveyors

COMPANY: Spedo US, Inc., PO Box 1032, Reisterstown, MD 21136-1032 Contact: James Wroe Email: support@spedo.us. Phone: 866-773-3687 or 410-517-1690. Web: www.spedo.us

SPEDO 2200 FORMS CUTTER: This new cutter offers a simple finishing solution while maintaining Spedo's well proven quality, reliability and flexibility. The modular design of the entry level 2200 allows each machine to be tailored to suit each application. Running at speeds of up to 90 m/min (300 ft/min), the Spedo 2200 forms cutter is the perfect solution to offline or near line finishing applications.

SPEDO 2400 FORMS CUTTER: In addition to the base model 2300, the new SPEDO 2400 Forms Cutter offers more. An intuitive touch-screen operator panel includes on screen parts catalogue and gives total control over all aspects of the machine's functionality. Exact speed settings, to a tolerance of one foot per minute for easier system interface. Over lifetime total counter and language interpretation. A new infeed system improves cut accuracy and web control. The most noticeable addition is the open side for easier waste removal when running online or in system. Equally important is what hasn't changed: long-service life.

SPEDO 2500 HIGH SPEED FORMS CUTTER: The SPEDO 2500 High Speed Forms Cutter allows the user to process continuous forms at up to 125 A4 forms/minute (approximately 400ft/min). Using Spedo's

justable while running), and a backlit LCD control panel. It can store up to 20 jobs, load on the fly and has optional cross-folding and high-capacity stacker capabilities. With the optional cross-folding kit, you can create a second fold perpendicular to the first. This makes it easy to fold large format,

Forms Processors

Spedo 2500 Forms Cutter

well proven control system and intuitive touch screen the SPEDO 2500 offers total control and flexibility while running both off and on-line. Store up to 30 different jobs from 64mm up to 4000mm, with or without strip cut, using various line increments. OMR recognition is fitted as standard which means viable batch sizes can be processed easily using marks issued by the printer. The SPEDO 2500 is available in single blade and double blade options to allow the operator to remove up to 7.8mm strip in one hit thus improving productivity.

SPEDO 2600 PINLESS CUTTER: The SPEDO 2600 Pinless Forms Cutter allows the user to cut continuous forms without the need for marginal punching. Using Spedo's proven control system and intuitive touch screen the SPEDO 2600 offers total control and flexibility while running both off and on-line. Store up to 30 different jobs from 1/16th of an inch up to 13 feet, with or without strip cut, using line increments of 1/6th, 1/8th, 1/10th, 1/12th, 1/16th and metric millimetres. Easy optical mark set-up means that form registration can be done using any repeatable print area anywhere on the form, removing the need for the printer to add specific registration marks.

SPEDO 8200 DESCENDING STACKER: The Spedo 8200 Descending Stacker has been designed to run in-line with the Spedo range of continuous forms cutters. Cut sheets are accepted from the forms cutter and shingled and stacked to produce a neat stack ready for finishing. Using the Spedo cutters boost / batch function, stacks can be taken away quickly with only a minimum delay thus increasing productivity.

SPEDO 9400 WEB BUFFER: The Spedo UK 9400 web buffer surpasses the boundaries of continuous forms processing whilst improving the flexibility, accuracy and reliability demand by today's applications. The Spedo 9400 uses the latest generation of Spedo's well proven control system. This system has now been refined and expanded to provide spare capacity for the users every need. Our new web buffer will take control of your high speed printer and cutter to ensure smooth operation.

SPEDO 8500 CONVEYOR STACKER: The Spedo 8500 Conveyor Stacker designed for both off and on-line applications. Operator adjustable height, for greater form control. Systems control allows the operator to pause the system from the output conveyor. Optional Down-stacking for extra capacity.

Spedo 9400 Web Buffer

Optional Boosting and Batching facility allows greater flexibility.

SPEDO 8100 CONVEYOR STACKER: The Spedo 8100 Conveyor Stacker designed for both off and on-line applications. Smaller footprint than standard conveyor stacker. Systems control allows operator to pause from the output conveyor. Optional Down-stacking for extra capacity.

See Spedo's listings in the Self Mailing Systems section.
