

Die Cutting Systems

Insignia5 with 40' Feed Capacity

FEATURES: Built with a purely mechanical functionality in mind, the Insignia machines do not rely on servo motor timing or complicated electronic sensors to remain in phase. From the double sheet detector to the true "press register" system, the Insignia functions on a geared, chain-linked movement cycle, so the timing of the machine is ensured to remain constant day in and out. Utilizing flexible die technology, the Insignia machines are capable of being changed from job to job in a matter of minutes. Featuring a press-style register system and top suction air feeder, the Insignia can process a range of materials and stocks anywhere from 50LB cover weight papers all the way up to 30pt card.

OPTIONS: The Insignia machines feature two different delivery modules to best suit each customers' individual production requirements and demands. A waste stripping unit is the first, this system will remove the skeleton or matrix from a sheet of die cut product using mechanical trim deflectors and air knives. The second option is a high capacity receding stacker, which is designed to accept a full sheet of either kiss cut work, or die cut products that are tick-tied into the sheet to keep the full sheet in-tact. Both delivery systems are interchangeable within five minutes.

§ Tritek Technologies, Inc.

CATEGORY: Digital Mail Systems

PRODUCT: Tritek Digital Mail Sorting & Processing Equipment

COMPANY: Tritek Technologies, Inc., 1-B Medori Boulevard, Wilmington, DE 19801. Contact: Sales Email: info@tritektech.com Phone: 302-239-1638.

TRITEK COMPACT: The Tritek Compact Series Equipment features a small footprint size for letter mail, flats and document processing. The compact design allows for large imaging over 300 dots per inch scanned omni directionally. Tritek's 12" inch by 17" inch scan area enables entire 8.5" by 11" inch documents to be scanned. It also scans legal sized documents. The Compact series is designed to time and date stamp documents and mail. It is Sarbanes Oxley compliant - a record is created and stored to a file. These records can then be searched or emailed whenever required. The mail piece is duplex scanned front and back side as well as documents.

COMPACT ELITE: The Compact Elite is designed for email processing and imaging. The scan area enables complete front and back side imaging. These images are stored, time and date stamped for records retention or email delivery. The small footprint Compact Elite features large scale imaging in a compact machine size. The Compact Elite is less than 8 feet in length. The machine uses standard electrical power 115 volt AC. The Compact Elite interfaces with Tritek's Email Delivery System and Tritek Rule Editor Database Management Software. The Compact Series

Digital Mail Systems

can be fitted with an ink jet printer or any number of Tritek sort bins or optional features. The standard machine has two sort bins for sorting processed items or rejected pieces.

INBOUND SORTING SYSTEMS: No matter how you flip it, Tritek equipment can read it, sort it, store it and track it. The Tritek sorting machine is designed to read the address of all mail pieces regardless of

Tritek Compact Elite

what direction they are fed into our machine. Tritek has the only mail processing equipment that can read envelopes, magazines, newspapers, poly-wrapped pieces in any direction in a 12" x 17" viewing area, without adjustments, even on the front and backside of the mail piece! The recognition software captures an image of the entire document in grayscale. (Other reading applications can be integrated if desired.) The image can then be stored and tracked.

NOMAD - HIGH RESOLUTION PORTABLE DOCUMENT SCANNER: The Nomad is portable plugs into 120V AC receptacles and can read any type of document. It handles odd shapes such as handwritten notes, forms, or letters and any thickness ranging from single sheets to magazines. The high resolution 300 dpi imaging creates TIFF, PEG or PDF files in black & white or color. The workflow of all Tritek document scanning machines is highly configurable and integrates well with third party software applications. While Tritek includes Doc-U-Search - our own leading edge storage and retrieval software - the operator can select alternate applications to perform image capture, postscan processing or document indexing and storage.

Tritek Oasis Digital E-Mail Delivery Sorter

DIGITAL EMAIL DELIVERY: An ideal solution for when you are out of the office and need to retrieve your mail. The Tritek Digital Email System is designed to deliver email notification of inbound mail to its recipients, as it is received each day, for internal company-mail distribution. You can also use the Tritek Digital Email System to deliver by email scanned images of contents of any mail piece.

FEATURES: The Tritek Digital Email System: 1) Scans and captures images of both sides of an incoming mail piece; 2) Stores each image in a TIFF, JPEG, or PDF file; 3) Labels each image with the time and date received; 4) Labels each image with a unique identification number.
