## DSL streamlines the logistics of drop shipping

DSL has streamlined the logistics of drop shipping to all US Post Offices. Our operational system has been perfected to provide consistent and successful deliveries for E-induction mailings or drop shipments with 8125s.

DSL has established long standing relationships with America's leading ground and air service transportation providers. Our customers benefit by receiving partner pricing discounts while maintaining excellent on time delivery performance. This powerful combination is critical for maintaining a long term business model for our customers.

### Quick Entry Menu

DSL's quick entry menu system makes quoting jobs and submitting drop ship orders a snap! All shipping documents are generated instantly and all drop ship appointments are made using FAST. Scheduling pick ups is no longer a chore.

**We do not hold trucks to build loads, consolidate, or commingle your mail with other mailers.**

Just submit your order by 3:00 PM and a truck will automatically be dispatched to pick up your mail on the same business day.

After the pick up, live tracking will show exactly the location of your mailing. Drop shippers have complete transparency from pick up to delivery. Unlike other companies, DSL always expedites your mail directly to the Post Office. We do not hold trucks to build loads, consolidate, or commingle your mail with other mailers.

### Customer Service

We speak Postal, most carriers do not. Your mail is very time sensitive and on time delivery is critical to a successful promotion. If there is ever an issue, we are on it! DSL customer service is always handled by live professionals. If you have any questions, we are always available. You can call (877) SHIP-DSL or email support@dropshiplogistics.com for service anytime.

## The Best Way To Manage Drop Shipping

Developed exclusively for direct mailers to simplify the logistics of drop shipping to U.S. Post Offices. Our proprietary system provides transportation quotes and analysis, schedules pick ups, processes payments, and updates shipment status automatically.

DSL has secured partner pricing with America's leading ground and air service transportation providers to offer competitive prices and the highest on-time percentages available in the industry.
