Fluence Criterion Elevate

§ Fluence Automation

CATEGORY: Incoming Mail Sorters

PRODUCT: Incoming Mail Sorters & Software

COMPANY: Fluence Automation, 3323 N Kennicott Ave., Arlington Heights, IL 60004. Email: info@fluencemail.com. Phone: 888-832-4902.

CRITERION ELEVATE: The Criterion® Elevate sorter has been designed to meet high-speed mail processing needs of organizations with strict space limitations. The Elevate is ideal for processing various types of mail including vote by Mail envelopes/mail ballots, incoming mail, outgoing mail, and flat mailpieces. It features: Smallest footprint with multi-tier bins; Handle the widest range of mail – postcards to flats; Compact with built-in casters for ease of relocation between peak processing periods; Single-phase and three-phase power options.

FEATURES: The Elevate sorter greatly reduces the amount of space needed to run a sorting operation, while still processing at high speeds. With two-tier bins, the sorter has one of the smallest footprints in the industry. It is portable for easy relocation so you can move the sorter to where you need it, when you need it. The Elevate sorter handles a wide range of mail types from postcards to flats and a variety of processes from simple barcode sorting to complex database lookups and image processing. It supports all the devices from our larger sorters, resulting in the most comprehensive processing capabilities on a sorter. Processes 18,000 p/h (for #10 envelopes, MLOCR mode).

FLATSMGR SORTING SYSTEM: The Fluence FlatsMgr™ solution automates the task of sorting outgoing or incoming flat mailpieces using the most efficient technology available on the market today. This system can displace the need for manual processing or less efficient flat mailpiece processing while increasing the quality and traceability of each mailpiece. For permit indicia and barcode printing, our patented labeling technology blows labels onto the mailpiece, which virtually eliminates damage caused by stamping or "full touch" required by other vendors' labelers. Additionally, our linerless labels reduce label consumption by using virtually every inch of label stock and eliminate waste caused by label liners. Pre-barcoded mailpieces are read and processed without labeling. FlatsMgr is built with our latest parcel-sorting capabilities but is designed for sensitivity—from the smallest mailpiece to the largest flat acceptable by USPS®. Using this technology, mailers can take full advantage of USPS Full Service discounts by providing unique Full-Service barcodes and electronic documentation through the USPS PostalOne!® gateway.

WINSORT INPROCESSING: WinSort INProcessing is sorting software designed for Inbound Sorting Systems. With several decades of industry leading experience in sorting systems, Fluence has the widest range of capabilities for sorting incoming mail, covering several segments, including: Lockbox/remittance processing; Response manage-
