Buskro Digital Label Press

§ BUSKRO, LTD

CATEGORY: Labelling Systems

PRODUCT: Digital Label Printer ii

COMPANY: BUSKRO LTD., 1738 Orangebrook Court – Unit # 1, Pickering, ON L1W 3G8 Canada. Contact: Michelle Sanz / Shawn Caldwell Email: sales@buskro.com Phone: 888-8BUSKRO or 905-839-6018.

DESCRIPTION: The Buskro DLP125-M is a fully integrated, servo driven digital label press which combines Buskro's proven inkjet and control software capabilities with over 40 years of mechanical and material handling experience to create a simple yet powerful variable inkjet personalization system specifically designed for the label production environment. The DLP125-M is designed to accommodate labels up to 125mm wide with a maximum roll diameter of 482mm on a standard 76mm core, operating at speeds up to 60 m/min. Incorporating all elements of a digital production label printing system in a compact integrated package with user-friendly job management through simple

touchpad web controls and intuitive Compose software making it perfect for production runs of all sizes. All critical elements from the precise servo-driven web drive system to the variable print control and piezo inkjet printing engine have been engineered to provide an efficient, fast, and reliable print solution intended for late-stage, near-line label personalisation.

FEATURES: Supports 4.25" (108mm) wide print up to 600 x 1200 DPI resolution; Simple media path with Unwind/rewind servo web-drive at speeds up to 100 cm/s; UV-curable black and security ink formulations for printing on the most challenging substrates; Fully integrated inkjet printer includes automated maintenance and LED curing lamp; Media rolls from 1/2" (13mm) to 5" (127mm) wide and up to 19" (483mm) diameter with standard 3" core; Quick job change-over with simple media roll installation and software job management; Touch screen with remote production monitoring; Advanced optional capabilities include: read/print, label position tracking, RFID/print matching, camera inspection/verification, waste management; Compose IQ supports fixed and variable text, 1D, 2D and QR Barcodes, as well as common Packaging Barcodes.

KR215 Labeling System

§ Kirk-Rudy, Inc.

CATEGORY: Labeling Systems

PRODUCT: KR215, KR540, KR565

COMPANY: Kirk-Rudy, Inc., 125 Lorraine Parkway, Woodstock, GA 30188. Key Contact: info@kirkrudy.com. Phone: 770-427-4203.

KR555 LABELMASTER: The latest generation of Kirk-Rudy's popular LabelMaster labeling system, the KR555 uses their extremely popular KR519 base with extruded aluminum T-slot rails that allow the label head to move freely and easily across the table allowing a wide variety of product positioning. Like all Kirk-Rudy products, this unit is built for production. It holds high capacity label rolls (up to 18" in diameter) and can apply labels to flat products up to 30,000 pieces an hour.

KR540 LABELER/TABBER: Use the KR 540 to apply coiled pressure-sensitive labels as well as other labels of various size and shape onto a wide assortment of products. Industry standard motors and controls ensure fast and accurate placement while also making it economical to maintain. Applies up to 2 labels in a single pass. Also runs fan-folded labels using the optional fanfold kit. The KR 535 is designed for versatility and to perform with less operator training and setup time.

KR565

KR565 LABEL SPLICING UNIT: Designed to provide nonstop, uninterrupted labeling when used with the KR Tabbers. The continuous feed dual unwind acts as a stand-alone standard loose-loop powered unwind unit. When the supply roll unwinds to a certain level, a sensor activates a warning light and signals the drive to feed the remaining labels into a holding bin. The second roll of labels is then spliced to the end of the web as the labels in the bin are consumed.

KR215 LABELING SYSTEM: The KR 215 applies computer form, pre-printed address labels. Forms are loaded into the label head, slit, cut and glued onto the mail piece. The KR 215 is a good choice form mailers that address a wide variety of paper products. Use the KR 215 on jobs not suited for inkjet addressing such as magazines, polywrapped items, and newspapers.
