KR215 Labeling System

§ Kirk-Rudy, Inc.

CATEGORY: Labeling Systems

PRODUCT: KR215, KR540, KR565

COMPANY: Kirk-Rudy, Inc., 125 Lorraine Parkway, Woodstock, GA 30188. Key Contact: info@kirkrudyc.com. Phone: 770-427-4203.

KR555 LABELMASTER: The latest generation of Kirk-Rudy's popular LabelMaster labeling system, the KR555 uses their extremely popular KR519 base with extruded aluminum T-slot rails that allow the label head to move freely and easily across the table allowing a wide variety of product positioning. Like all Kirk-Rudy products, this unit is built for production. It holds high capacity label rolls (up to 18" in diameter) and can apply labels to flat products up to 30,000 pieces an hour.

KR540 LABELER/TABBER: Use the KR 540 to apply coiled pressure-sensitive labels as well as other labels of various size and shape onto a wide assortment of products. Industry standard motors and controls ensure fast and accurate placement while also making it economical to maintain. Applies up to 2 labels in a single pass. Also runs fan-folded labels using the optional fanfold kit. The KR 535 is designed for versatility and to perform with less operator training and setup time.

KR565 LABEL SPLICING UNIT: Designed to provide nonstop, uninterrupted labeling when used with the KR Tabbers. The continuous feed dual unwind acts as a stand-alone standard loose-loop powered unwind unit. When the supply roll unwinds to a certain level, a sensor activates a warning light and signals the drive to feed the remaining labels into a holding bin. The second roll of labels is then spliced to the end of the web as the labels in the bin are consumed.

KR565

applies computer form, pre-printed address labels. Forms are loaded into the label head, slit, cut and glued onto the mail piece. The KR 215 is a good choice form mailers that address a wide variety of paper products. Use the KR 215 on jobs not suited for inkjet addressing such as magazines, polywrapped items, and newspapers.

CONTACT: For more information, call 770-427-4203 or email info@kirkrudyc.com.

Mail Accounting Systems

PitneyAnalytics

§ Pitney Bowes Inc.

CATEGORY: Mail Accounting Systems

PRODUCT: PitneyAnalytics®

COMPANY: Pitney Bowes Inc., 3001 Summer Street, Stamford, CT 06926-0700. Contact: PitneyBowes.com

DESCRIPTION: PitneyAnalytics® is a secure, cloud-based solution that consolidates data across your shipping, mailing, receiving and distribution operations. It provides proactive insights to quickly improve operational efficiency across your organization, regardless of user, carrier or location. Additionally, configure all your cost accounts in one place to ensure you get consistent chargeback reports centralizing your postal and carrier spend as well as usage activity across devices, solutions, locations and a remote workforce. While providing a near real time high-level view of your organization's KPIs, activity and spend, PitneyAnalytics goes one step further and makes recommendations on how to achieve cost savings based on your data.

See Pitney Bowes listing in the Postage Meters Mailing Systems section.
