

USPS Ship

USPS Ship Update - eVS Migration

Starting February 1, 2025, USPS will start auto migration of eVS shippers to USPS Ship

USPS Ship Migration Process

- **Migration** - USPS will begin migration of remaining eVS, PFS, and CNS BPro shippers on February 1, 2025
- **Exception Process** - shippers may request an exception by sending an email to USPS_Ship@usps.gov with a subject line of “USPS Ship Migration Exception Request – [Insert Company Name], [Insert Company CRID]” including:
 - Company Name
 - CRID
 - List of MIDs
 - Reason for extension
 - New date of migration

USPS Ship Update - eVS Migration

System

Premium Forwarding Service Commercial (PFSC)

- Users create forwarding requests through the PFSC Application
- USPS generates label used to ship the container
- Manifest generated and processed through eVS
- Reports accessed through PostalOne!.

Click-N-Ship Business Pro (CNSBPro)

- Users generate labels through the downloadable CNSBPro GUI
- Payment made via Enerprise Payment Account (EPA)
- Manifest generated and processed through eVS
- Shortpaid assessed on sampled packages

Change

- Manifest is generated and processed through USPS Ship
- Reports accessed through the online USPS Ship reports portal
- Manifest generated and processed through USPS Ship
- Postage adjustments for weight, dimensions, packaging and miss shipped are collected/disbursed in near real-time

USPS Ship

One platform for postage payment, adjustments, validations and reporting for all package types and payment methods.

Key Features

Advanced Pricing Logic with Automated Postage Adjustments maximizes number of priced packages and results in fewer rejected packages and corrections files.

- Pieces with rate ingredient errors are auto-corrected & repriced as manifested, or recorded as unmanifested (manifest errors eliminated)
- Advanced duplicate logic relying on multiple scans

Census Postage Validation results in timely and accurate pricing using weight, dimensions, entry, and packaging captured from Mail Processing Equipment.

- Near real-time assessment for over-paid and short-paid packages
- Mis-shipped, Packaging, Destination Entry Zone based on scans from MPE

End to End Visibility access daily transaction and assessment details through daily online reports or data feeds

- Online reports for small volume offer summary and detailed reports
- Customized Data Feeds for large volumes can be tailored with package level detail, transaction details, and more

USPS Ship/eVS Differences

Validation

eVS

USPS Ship

Manifest (No change to manifest submission)

Packages that cannot be priced from rate ingredients in manifest get manifest errors.
Timing: Manifest is processed and charged upon receipt of manifest; Manifest Errors collected on 21st of the next month.

Packages that cannot be priced from rate ingredients are auto-corrected, or flagged as unmanifested in the case they cannot be auto-corrected.
Timing: Manifest (incl. auto-corrected) will be aggregated and immediately charged to EPA.

IMpb Compliance

Shippers assessed noncompliance fees when manifests are submitted with Address, Barcode, & Manifest Quality Errors that exceed the allowable thresholds.
Timing: Collected on 21st of the next month.

IMpb process remains the same.
Timing: Collected on the 15th of the next month.

Census

MisShipped, Incorrect packaging, Shortpaid, and Destination Entry (Zone) are performed and charged as separate verifications.
Shortpaid process uses weight, dimensions, packaging, and entry location information collected to validate a limited number of package prices.
Data Source: Sample
Timing: Collected on 21st of the next month.

MisShipped, Incorrect Packaging, Short-paid, and Destination Entry (Zone) are combined into one Census assessment charge. Charge categories can be located in the Census Attributes IV-MTR data feed.
New census process uses weight, dimensions, packaging, and entry location information collected during processing to validate package prices.
Data Source: Automated Machine Scans
Timing: Charged or refunded daily.

Sampling

Samples collected are used to verify manifested postage and charge additional postage due as necessary.
Timing: Collected on 21st of the next month.

Samples of Destination Delivery Unit entered packages are used to verify manifested postage and charge additional postage due as necessary.
Timing: Collected on the 15th of the next month.

Duplicates

Automated and manual process to validate multiple packages with the same barcode.
Timing: Collected on 21st of the next month.

Automated process to identify multiple packages with the same barcode.
Timing: Collected on the 15th of the next month.

Unmanifested

Packages with scan events that do not have an associated manifest record are flagged and charged as unmanifested.
Timing: Submit manifest by 10th of the month. Collected on the 21st of the month.

Packages with scan events that do not have an associated manifest record are flagged and charged as unmanifested.
Timing: Submit manifest by 7th of the month. Collected on the 15th of the month.
