

Mail Accounting Systems

PitneyAnalytics

§ Pitney Bowes Inc.

CATEGORY: Mail Accounting Systems

PRODUCT: PitneyAnalytics®

COMPANY: Pitney Bowes Inc., 27 Waterview Drive, Shelton CT 06484. Contact: PitneyBowes.com/omg

DESCRIPTION: PitneyAnalytics® is a secure, cloud-based solution that consolidates data across your shipping, mailing, receiving and distribution operations. It provides proactive insights to quickly improve operational efficiency across your organization, regardless of user, carrier or location. Configure all your cost accounts in one place to ensure you get consistent chargeback reports centralizing your postal and carrier spend as well as usage activity across devices, solutions, locations and a remote workforce. While providing a near real time high-level view of your organization's KPIs, activity and spend, it goes one step further and makes recommendations on how to achieve cost savings based on your data.

See Pitney Bowes listing in the Postage Meters Mailing Systems section.

Mail Monitoring/Visioning

§ Bell and Howell

CATEGORY: Mail Monitoring/Visioning

PRODUCTS: IQ Software Suite; JETVision

COMPANY: Bell and Howell, 3791 S. Alston Avenue, Durham, NC 27713. Web: bellhowell.net. Phone: 800-961-7282.

JETVISION FACTORY INTELLIGENCE ENABLER: The JETVision machine vision system combines hardware and software solutions. Vision and sensing hardware attach to a production line, collecting data in real time. These data points help control processes by validating with an external file source or reporting to operation management. JETVision's robust inspection software reads, interprets and normalizes production control marks. These include features such as barcodes, serial numbers, or colors, and it mines data from virtually any document or object. Featured technologies enable both manufacturing and distribution supply chains to capture data at extreme speeds, with 100 percent integrity. This dynamic system combined with our next-generation Automated Document Factory platform provides the complete solution.

Mail Monitoring/Visioning

IQ FACTORY PRODUCTION INTELLIGENCE: IQ is a comprehensive software suite that provides workflow management and real-time tracking of your entire production environment's data, from across multiple facilities and down to an individual item. IQ is a modular and scalable solution that securely tracks data and job efficiency anywhere across your organization. Three major components completely eliminate the need for the tedious process of data collection, instead providing invaluable real-time visibility that allows for streamlined production mail environments and improved operational decisions.

NAVIGATOR(tm) INTELLIGENT SYSTEM INTERFACE: Bell and Howell's Navigator(tm) Intelligent System Interface is a powerful, operator-friendly control platform used on their inserter systems. It centralizes machine control, real-time diagnostics, and job management into one intuitive interface - streamlining setup, reducing downtime, and improving productivity. Navigator is scalable, integrates with vision systems and reporting tools, and supports a wide range of mail piece formats - making it a key driver of efficiency, accuracy, and throughput in high-volume mail operations.

Clear Image Technology End of Process Camera

§ Clear Image Technologies

CATEGORY: Mail Monitoring Services

PRODUCT: Picture Perfect Match System

COMPANY: Clear Image Technologies, 94 Pebblebrook Lane, St. Louis, MO 63146. Contact: Larry Miyasaka. Phone: 314-853-5867.

DESCRIPTION: With Picture Perfect's End of Process verification, a camera placed at the end of the inserter, or any other machine, can capture names, account numbers, sequence numbers, etc. using optical character recognition or barcodes. This data is written to a file and can be converted to an Excel file at the end of the job. Sequence checking can be enabled also, stopping the machine if any piece are missing or out of order. This system can be used simultaneously with our other products.

FEATURES: Barcode recognition, can decode IMB, QR and 2D (data matrix) and some 1D barcodes.

CONTACT: For more information, call 314-853-5867 or email larry@clearimagetechnologies.com.
