Clear Image Technologies Picture Perfect Read and Print

§ Clear Image Technologies

CATEGORY: Addressing Accessories

PRODUCT: Picture Perfect Match System

COMPANY: Clear Image Technologies, 94 Pebblebrook Lane, St. Louis, MO 63146. Contact: Larry Miyasaka. Phone: 314-853-5867.

DESCRIPTION: Picture Perfect's Read and Print system utilizes one camera to read a barcode from a mail piece and sends the data downstream to the inkjet printer to address the envelope after the inserter exit. Any bad reads can be diverted for hand inspection. Our Read and Print system can be run simultaneously with our matching system.

FEATURES: Clear Image has partnered with Norwix (formerly inc.jet) to provide the highest quality HP ink jet printing system and software. By adding a friction feeder, this system can be moved from the inserter and used as a standalone inkjet system also!

CONTACT: For more information, call 314-853-5867 or email larry@clearimagetechnologies.com.

§ Postmatic

CATEGORY: Addressing Accessories

PRODUCT: Inline Vacuum Transport Bases; Feeders

COMPANY: Postmatic, 711 Weaver Blvd, Anoka, MN 55303 Phone: (763)-784-6046. Email: info@postmatic.net Contact: Sales. Web: www.postmatic.net.

Inline Vacuum Transport Bases

DESCRIPTION: The Postmatic Inline Vacuum Base is a compact, high volume vacuum transport base specially designed to be used with ink-jet systems, cameras, labeling systems or other peripheral equipment. Fully self-contained with high volume blower and high-powered drive motor to provide constant control of the piece as it passes through. Variable speed for 0 to 400 feet per minute. Available in 6x9 or 10x13 configurations and in lengths of 16", 36" and 48" long from input to output. May be configured for Left to Right or Right to Left transport. All are 115VAC.

C 1250 FRICTION FEEDER: Stream-feeder's C 1250 Friction Feeders are designed for dependable one-shot and batch count feeding for packaging operations pursuing greater productivity through automation.

Streamfeeder Reliant Inserter Feeder

This feeding machine is made to feed a wide variety of products, from flat to multi-thickness, and operates on-demand one at a time or in batch sets up to 99 pieces.

RELIANT INSERTER FEEDER:

Streamfeeder's Reliant Inserter Feeder is designed for 6x9 swing-arm inserters. It combines flexible performance and variable speed with superior feeding capabilities while precisely separating, singulating, and presenting many types of mail inserts to the gripper jaw of swing arm inserters. This friction feeder can also run continuously on inkjet and tabber bases by simply repositioning the sensor out of the product path.

V-SERIES INKJET FRICTION FEEDERS:

Streamfeeder's V Series of Inkjet Friction Feeders are the most reliable and safest continuous feeders in the market today. V Series Feeders are capable of feeding a wide variety of flat and multi-thickness products consistently at high speeds with exceptional alignment qualities. The importance of straight feeding and minimizing skewing can help improve USPS® MERLIN™ verification results, leading to significant savings for our customers.
