Digital Mail Systems

Divert Systems

Tritek Compact Elite

tion or email delivery. The small footprint Compact Elite features large scale imaging in a compact machine size. The Compact Elite is less than 8 feet in length. The machine uses standard electrical power 115 volt AC. The Compact Elite interfaces with Tritek's Email Delivery System and Tritek Rule Editor Database Management Software. The Compact Series can be fitted with an ink jet printer or any number of Tritek sort bins or optional features. The standard machine has two sort bins for sorting processed items or rejected pieces.

INBOUND SORTING SYSTEMS: No matter how you flip it, Tritek equipment can read it, sort it, store it and track it. The Tritek sorting machine is designed to read the address of all mail pieces regardless of what direction they are fed into our machine. Tritek has the only mail processing equipment that can read envelopes, magazines, newspapers, poly-wrapped pieces in any direction in a 12" x 17" viewing area, without adjustments, even on the front and backside of the mail piece! The recognition software captures an image of the entire document in grayscale (other reading applications can be integrated if desired). The image can then be stored and tracked.

NOMAD - HIGH RESOLUTION PORTABLE DOCUMENT SCANNER: The Nomad is portable, plugs into 120V AC receptacles, and can read any type of document or envelope. It handles odd shapes such as handwritten notes, forms, or letters and any thickness ranging from single sheets to magazines. The high resolution 300 dpi imaging creates TIFF, PEG or PDF files in black & white or color. The workflow of all Tritek document scanning machines is highly configurable and integrates well with third-party software applications. While Tritek includes Doc-U-Search – our own leading-edge storage and retrieval software - the operator can select alternate applications to perform image capture, post-scan processing or document indexing and storage.

DIGITAL EMAIL DELIVERY: An ideal solution for when you are out of the office and need to retrieve your mail. The Tritek Digital Email System is designed to deliver email notification of inbound mail to its recipients, as it is received each day, for internal company-mail distribution. You can also use the Tritek Digital Email System to deliver by email scanned images of contents of any mail piece.

Tritek Oasis Digital E-Mail Delivery Sorter

FEATURES: The Tritek Digital Email System: 1) Scans and captures images of both sides of an incoming mail piece; 2) Stores each image in a TIFF, JPEG, or PDF file; 3) Labels each image with the time and date received; 4) Labels each image with a unique identification number.
