CATEGORY: Address/Barcode Printers

PRODUCT: Print One Fixed and Variable Printing System

COMPANY: Postmatic, 711 Weaver Blvd, Anoka, MN 55303 Phone: (763)-784-6046. Email: info@postmatic.net Contact: Sales. Web: www.postmatic.net.

DESCRIPTION: The Postmatic Print One Printing System is a cost-effective solution to printing Mailer's addresses, precancelled permits, tag lines, text messages, permits, date & time, etc. using standard HP technology. Windows based software and a completely self-contained print head makes printing easier and more affordable than ever. Simply download image or text via USB from your PC or Laptop to the print head and unit is ready to print fixed or variable images. Changing from one job

Postmatic Print One Fixed Image Printers

to another takes less than a minute to complete.

CONTACT: For details call (763)-784-6046, visit www.postmatic.net or email: info@postmatic.net.

PRODUCT: Monochrome & Full Color Inkjet Printing Systems

COMPANY: Quadient, 478 Wheelers Farms Rd., Milford, CT 06461. Phone: 800-636-7678.

QUADIENT ADDRESS PRINTING SYSTEMS:

AS-150: The AS-150 small media printer is an affordable and compact unit is a great solution for small mailrooms that need to address. Originally developed for non-mailing markets, this versatile machine can print small coin envelopes at little as 2-1/8" x 4" but still runs #9s, #10s and 6x9 envelopes. The printer is very easy to setup with a fixed head and four print qualities from 150 to 600 dpi. It has fixed thickness and is designed for unstuffed envelopes. The AS-150 uses standard HP45a inkjet cartridges and our EASYInk legacy inks (for coated or aqueous varnish). It has fast output of 5,500 #10 envelopes/hr to quickly handle small to medium sized mailings, USB 2.0 that works seamlessly, and more. The system has an advanced microprocessor and the 64MB of RAM crunch data at high speed.

Quadient AS-150

AS-450: The AS-450 sits at the entry-level of production out of the three newest monochrome units that we introduced at the end of 2019. But don't let that fool you – this machine is a true workhorse in every way.

The first thing you will notice is the sleek touch screen on the front panel. This is a first for our monochrome line and it's a sign of the times as technology is evolving, so we have to evolve too! Access dozens of menus and functions in a quick and easy fashion. Printing at production speeds of up to 30,000 postcards and 22,000 #10 envelopes per hour, large jobs are no match for this printer. The AS-450 uses our new EASYInk product line of proprietary inkjet supplies for maximum performance – even on UV coated materials. The hopper can hold 500 #10 envelopes at a time. It can also take materials up to 1/4" thick. The AS-450 has a completely redesigned firmware architecture that is more stable and easier to use than ever before. It even has newly redesigned feed rollers for better material control and feeding consistency.

AS-650: Weighing in as the mid-level production unit, the AS-650 offers all the same features as the AS-450 and more. It has the same wonderful touchscreen for user-friendliness and easy menu navigation. The durable, heavy duty AS-650 will quickly become your go-to machine that you can depend on to tackle just about anything. It has dual independent heads with a 3 pen stitched + 3 pen stitched design which allows for 3" of print to cover a large surface area and a large variety of design options. The new EASYInk product line of proprietary inkjet supplies gives you all the tools you need to handle any material (even UV varnished stocks!) your customer puts in front of you and the AS-650 is built to do it all. With production-level speeds up to 34,000 postcards and 26,000 #10 envelopes per hour, the AS-650 is a power house of productivity. Load up to 750 envelopes in the high capacity hopper and you're good to go!

Quadient AS-650

AS-850/AS-850R: The feature-leaden AS-850 from Quadient offers great advantages with its exceptionally affordable price, high operating speeds, innovative design, and bulletproof construction. The production-level unit of our new line has a 2 pen stitched + 4 pen stitched + 2 pen stitched configuration and versatile in-line design. That's 4" of print that you can use anywhere on the mail piece for ultimate design flexibility. Print the mailing address, barcodes, indicia, return address, graphics, logos, fixed data and variable data, all in one pass! Manually adjust the thickness to allow printing on material up to 1/2". That means corrugated cardboard boxes, padded envelopes, stuffed envelopes, and more. The variety of material is endless and opens up more than just mailing applications for smart buyers that invest in the AS-850. It runs our new EASYInk product line of proprietary inkjet supplies for maximum performance – even on UV coated materials. The AS-850's AccuTrak transport system is improved and refined from previous models. Simplified for better feeding and quieter operation, it comes in Left-To-Right or Right-To-Left configurations. The AS-850 can run in-line with other products (like our tabbers) or coupled with our new EASYFeed 140 with an intelligent interface that ties the components together for maximum productivity and control. This offers production level performance at tabletop price and footprint.

Quadient AS-850

MACH 5 DIGITAL COLOR PRINTER & MCOLOR RIP: The MACH 5 Digital Color Printer is a full process color printer that is powered by 1600 x 1600 dpi Memjet technology and can print on materials up to 9.5" wide by 17" long at high speed. This incredible technology can also print full bleed (edge-to-edge) on materials up to 8.5" wide. How fast? Full sheets at 3,600/hr and #10 envelopes at 7,500/hr. The MACH 5 is designed to boost

Quadiant MACH 5 Digital Color Printer

productivity dramatically, but it is very cost-efficient as well. The five ink tanks each hold 250 ml of ink for long job runs and keep cost per piece as low as possible. Compared to existing systems, the MACH 5 can run 3 times longer on a set of ink tanks that cost substantially less than toner. The MACH 5 does this all without any fragile drums or fuses to replace. The no-contact print technology won't emboss envelopes and can be used with any windowed envelope — not just the costly laser-safe kind. Moreover, the company's specially formulated ink can print on coated stocks. Combined with optional mColor RIP & Workflow software, the result is professional level color control. It incorporates color management tools, product job presets, hot folders and the powerful Harlequin RIP engine into a single workflow product.

MACH 6 DIGITAL COLOR PRINTER: The MACH 6 Digital Color Printer is based on Memjet® technology. The MACH 6 is the next step up from their best-seller, the MACH 5, including new features such as a 7-inch color touch screen interface and a wider feed throat. The all-new design is able to handle thicker and wider applications that were previously not possible, such as 10x13 envelopes, stuffed envelopes, chipboard, corrugated

Quadiant MACH 6 Digital Color Printer

cardboard, flat cartons and much more. In fact, it can print on material up to 3/8" thick with the height-adjusting service station. Like the previous generation, the MACH 6 is capable of printing full color graphics and variable data and has two print modes. Normal mode runs at 60 feet per minute and 1600x800 dots per inch for faster production and less ink utilization. Best mode allows for 30 feet per minute and 1600x1600 dpi for higher output quality. The MACH 6 also continues to deliver the same low total cost of ownership and extraordinary profitability and productivity. Combined with optional mColor RIP & Workflow software, the result is professional level color control. mColor incorporates color management tools, production job presets, hot folders and the powerful Harlequin RIP engine into a single workflow product. It delivers predictable and repeatable standardization of color and improves overall image output quality.

MACH 7: The MACH 7 is our newest color envelope printing solution that leverages the latest advanced HP pagewide thermal inkjet technology. High throughput speed up to 10,000 envelopes per hour takes the productivity to a whole new level. It produces vibrant, full-color images with durable, pigment inks that resist fading, scratching, and water damage. Digital thickness control and a wider feed path allow for media applications up to 1/2-inch thick and 11 inches wide by 17 inches long when paired with our new intelligent belt feeder. The MACH 7 effortlessly handles a variety of mailing and packaging applications such as envelopes, stationery, and special event invitations. It also prints on 10x13 flats, chipboard, corrugated cardboard, folding cartons and so much more.

Quadiant MACH 7

MACH 9DS: The Quadiant MACH 9DS is an intelligent and dynamic inline color inkjet envelope printing system. More than just a printer, the MACH 9DS is a technology system that includes a fully automated, full color inkjet HP print engine, a heavy duty vacuum transport, a powerful Dell PC with Intel Core vPro processor and an intelligent software management system called MACH Symphony. Create brilliant, custom envelopes with variable graphics all in the same run. It delivers the color consistency required by creative and production-oriented users. The MACH 9DS integrates seamlessly with Quadiant's production-level DS folder inserters to supercharge your workflow and provide fast, dynamic, matched print finishing for inserted materials. It adjusts to thickness on the fly and optimizes speed to complete jobs faster in fewer steps with less labor.
