CONNECTRIGHT MAILER LIST MANAGEMENT SOFTWARE:

Cleanse addresses, update moves and presort mail for the best possible USPS discounts with a single click. ConnectRight Mailer list management software from Pitney Bowes makes it easy to cleanse and process mailing lists by giving you access to the latest USPS address information and full service NCOA Link. Our USPS CASS and PAVE address data software combines a local app for saved jobs and fast processing with the power and flexibility of the cloud to ensure you always have the latest USPS address data and reports. There's no need to manually update any local software. You also get access to various USPS commercial rates including First Class, Standard, mixed-weight processing, and other services. Additional features include list suppression from DMA (Do Not Mail and Prison Suppression), a job presets and hot folder function that allows anyone to submit and process lists across your organization and leveraging the power of Intelligent Mail Barcode for mail tracking. The software has been updated to support the newest postal initiatives such as Informed Delivery®. You have a lot invested in creating the perfect communication- don't waste it with poor data. ConnectRight Mailer is an easy-to-use software to help ensure your mail is delivered at the best rate possible.

Die Cutting Systems

Insignia6 Die Cutter

§ Rollem International

CATEGORY: Die Cutting Systems

PRODUCT: Insignia Die Cutting Machines

COMPANY: Rollem International, 1650 S Lewis St., Anaheim, CA92805-6413. Phone: 800-272-4381. Web: www.insigniadiecut.com.

DESCRIPTION: The Insignia machines are offered in a variety of configurations to best suit each users individual production needs. The machine is offered in three sheet size capacities; Insignia5 handles up to a 20x15" or 51x38cm sheet, Insignia6 handles up to a 20x20" or 51x51cm maximum, and the largest Insignia7 will run a B2 size 30x24" or 76x61cm sheet. The New InsigniaX3 handles up to 24x24" (61x61cm) and stock weights up to 30 pt. thickness.

Die Cutting Systems

Insignia5 with 40' Feed Capacity

FEATURES: Built with a purely mechanical functionality in mind, the Insignia machines do not rely on servo motor timing or complicated electronic sensors to remain in phase. From the double sheet detector to the true "press register" system, the Insignia functions on a geared, chain-linked movement cycle, so the timing of the machine is ensured to remain constant day in and out. Utilizing flexible die technology, the Insignia machines are capable of being changed from job to job in a matter of minutes. Featuring a press-style register system and top suction air feeder, the Insignia can process a range of materials and stocks anywhere from 50LB cover weight papers all the way up to 30pt card.

OPTIONS: The Insignia machines feature two different delivery modules to best suit each customers' individual production requirements and demands. A waste stripping unit is the first, this system will remove the skeleton or matrix from a sheet of die cut product using mechanical trim deflectors and air knives. The second option is a high capacity receding stacker, which is designed to accept a full sheet of either kiss cut work, or die cut products that are tick-tied into the sheet to keep the full sheet in-tact. Both delivery systems are interchangeable within five minutes.

Digital Mail Systems

§ Tritek Technologies, Inc.

CATEGORY: Digital Mail Systems

PRODUCT: Tritek Digital Mail Sorting & Processing Equipment

COMPANY: Tritek Technologies, Inc., 1-B Medori Boulevard, Wilmington, DE 19801. Contact: Sales Email: solutions@tritek.com Phone: 302-223-4065

TRITEK COMPACT: The Tritek Compact Series Equipment features a small footprint size for letter mail, flats and document processing. The compact design allows for large imaging over 300 dots per inch scanned omni directionally. Tritek's 12 by 17 inch scan area enables entire 8.5 by 11 inch and legal-sized documents to be scanned. The Compact series is designed to time and date stamp documents and mail. It is Sarbanes Oxley compliant - a record is created and stored to a file. These records can then be searched or emailed whenever required. The mail piece is duplex scanned (front and back-side).

COMPACT ELITE: The Compact Elite is designed for email processing and imaging. The scan area enables complete front and back side imaging. These images are stored, time and date stamped for records retention.
