

# **Publication 199: Intelligent Mail Package Barcode (IMpb) Implementation Guide for Confirmation Services and Electronic Payment Systems**

## **Version 33 – 7/10/2025**

United States Postal Service Document

2025 United States Postal Service

## TABLE OF CONTENTS

1	General Information .....	15
1.1	Purpose .....	15
1.2	Background .....	15
1.2.1	Package Quality Compliance Rules .....	17
1.2.2	ACS for Parcels .....	23
1.3	Reference Materials .....	24
1.4	Mailer ID (MID) and Mail Ownership .....	25
1.4.1	Assignment of MID .....	25
1.5	Test Environment for Mailers (TEM) .....	26
1.6	Facility Access and Shipment Tracking (FAST) and Facility ZIP Codes .....	26
1.7	Customer Services .....	26
2	Getting Started .....	28
2.1	New and Existing Customer Certification Processes .....	28
2.1.1	Transitioning from Shipping Services File Version 1.6 to Version 1.7/2.0 .....	28
2.2	Confirmation Services Customer Certification Process .....	29
2.3	Electronic Verification System (eVS) .....	29
2.4	USPS Ship .....	29
2.5	Parcel Return Service (PRS) Customers .....	29
2.6	Forms .....	29
2.6.1	Certification Forms .....	29
2.7	Enterprise Payment System .....	30
2.7.1	General Information .....	30
3	Shipping Services File .....	32
3.1	Process .....	32
3.1.1	Things to Know About the Shipping Services File .....	34
3.1.2	Printed Manifest Forms Used When Entering Mail .....	35
3.1.3	International .....	36
3.1.4	Additional Products and Services Requirements .....	36
3.2	File, Manifest and Record .....	37
3.2.1	Customs Detail Records 3 and 4/Global Detail Records 1 and 2 .....	37

3.3 Key Fields ..... 37

    3.3.1 Header Record Key Fields ..... 37

    3.3.2 Detail 1 Record Key Fields..... 40

    3.3.3 Detail 2 Record Key Field ..... 44

    3.3.4 Customs Detail Records 3 and 4/Global Detail Records 1 and 2 ..... 45

3.4 Shipping Partner Event File..... 45

4 Barcode Requirements ..... 48

    4.1 Barcode Element Differences ..... 48

    4.2 Tracking Number ..... 48

    4.3 Channel-Specific Barcode Construct ..... 49

        4.3.1 Sample Commercial Mailer Construct ..... 50

    4.4 Online Mailer Constructs ..... 52

    4.5 Barcode Banner Text ..... 56

    4.6 Calculate MOD 10 Check Digit for the Package Identification Code (PIC) / Electronic File Number (EFN) . 57

    4.7 Print Quality Requirements ..... 58

        4.7.1 Printer Resolution ..... 58

        4.7.2 Reflectance/Symbol Contrast ..... 58

        4.7.3 Barcode Quality..... 58

    4.8 Physical Barcode Requirements ..... 59

        4.8.1 Dimension ..... 59

        4.8.2 Barcode Length ..... 59

        4.8.3 Barcode Height ..... 59

    4.9 Barcode Identification and Layout Requirements..... 59

        4.9.1 Human-readable Text ..... 59

        4.9.2 Human-readable Number ..... 60

        4.9.3 Parsing ..... 60

        4.9.4 Identification Bars..... 60

    4.10 Quiet/Clear Zone Requirements..... 61

        4.10.1 Horizontal Barcode Quiet/Clear Zone..... 61

        4.10.2 Vertical Barcode Quiet/Clear Zone ..... 61

    4.11 IMmb Intelligent Mail Matrix Barcode ..... 61

4.12 Documentation..... 62

5 Customer Interface Files..... 64

5.1 File Retention..... 64

5.2 Shipping Services File Confirmation/Error/Warning Reports..... 64

5.2.1 Shipping Services File Confirmation/Error/Warning Report - Version 1.5 ..... 64

5.2.2 Shipping Services File Confirmation/Error/Warning Report - Version 1.7 ..... 65

5.3 Shipping Partner Event File Confirmation/Error/Warning Report – Version 2.0 ..... 65

5.4 eVS Postage Payment Extract File - Version 1.1/2.0 ..... 65

5.4.1 File Naming Convention..... 66

5.5 Reconciliation Extract File – Version 1 ..... 66

5.5.1 File Naming Convention..... 67

5.6 Scan Event Extract File – Versions 1.5, 1.6, and 2.0 ..... 67

6 Communications..... 70

6.1 Transmission Methods..... 70

6.1.1 Things to Know about File Transmissions ..... 72

6.2 Production Sending/Retrieving File Instructions..... 73

6.2.1 Secure Protocol Options ..... 73

6.2.2 Communication Using Internet Server SFTP for TEM ..... 75

6.3 Accessing eVS TEM ..... 77

7 Manifest Error Process ..... 78

7.1 Duplicate Records..... 78

7.2 Corrections Process ..... 78

7.3 Unused Labels..... 79

7.4 File Retransmission..... 80

8 Product Specific Information..... 82

8.1 Adult Signature Required and Adult Signature Restricted Delivery ..... 82

8.1.1 File Specification Information..... 82

8.1.2 Adult Signature Label Examples ..... 83

8.2 Certified Mail ..... 83

8.2.1 General Information ..... 83

8.2.2 File Specification Information..... 84

8.2.3 Barcoded Form ..... 85

8.2.4 Private Printing Instructions ..... 86

8.3 Commercial Cubic..... 87

8.3.1 Commercial Cubic Priority Mail - File Specification Information ..... 88

8.3.2 Commercial Cubic USPS Ground Advantage - File Specification Information ..... 90

8.4 Hold For Pickup..... 91

8.4.1 Labeling and Data Reporting Requirements..... 91

8.4.2 Hold For Pickup - File Specific Information ..... 93

8.5 Insured Mail..... 94

8.5.1 General Information ..... 94

8.5.2 Barcoded Form ..... 94

8.5.3 Private Printing Instructions ..... 96

8.6 Collect on Delivery (COD) — PS Form 3816..... 98

8.6.1 General Information ..... 98

8.6.2 Barcoded Form ..... 98

8.6.3 Private Printing Instructions ..... 99

8.6.4 Collect on Delivery (COD) Hold For Pickup Label..... 102

8.7 Registered Mail — Label 200..... 105

8.7.1 General Information ..... 105

8.7.2 Barcoded Label ..... 105

8.7.3 Private Printing Instructions ..... 106

8.8 Return Receipt — PS Form 3811 ..... 107

8.8.1 General Information ..... 107

8.8.2 Form..... 108

8.8.3 Private Printing Instructions ..... 109

8.9 Return Receipt for Merchandise — PS Form 3804..... 110

8.9.1 General Information ..... 110

8.10 Signature Confirmation— PS Form 153..... 111

8.10.1 General Information ..... 111

8.10.2 Barcoded Labels..... 111

8.10.3 Private Printing Instructions ..... 113

8.11	Open and Distribute .....	113
8.11.1	Priority Mail Open and Distribute (PMOD) Service .....	113
8.11.2	Priority Mail Express Open and Distribute (PMEOD) Service .....	116
8.12	USPS Returns .....	120
8.12.1	Description.....	120
8.12.2	Barcoded label .....	120
8.12.3	Private Printing Instructions .....	121
8.12.4	Instructions .....	121
8.13	Cremated Remains .....	121
8.13.1	General Information .....	121
8.13.2	Barcoded Cremated Remains Label.....	121
8.14	Merchant Override USPS Electronic Signature Online (eSOL).....	122
8.14.1	General Information .....	122
8.14.2	Shipping Service File Specifications .....	122
8.15	USPS Tracking Plus™ .....	125
8.15.1	General Information .....	125
8.15.2	Shipping Services File Specifications .....	125
8.15.3	Prices (per package).....	125
8.16	Hazardous Materials.....	126
8.16.1	General Information .....	126
8.16.2	Barcoded Hazardous Materials Label .....	127
8.16.3	Service Type Codes .....	130
	Appendices .....	137
	Appendix A: Shipping Services File Version 1.6 .....	138
	Appendix A-1: Shipping Services File Version 1.6 File Layout Specification.....	138
	Appendix B: Shipping Services File Version 1.7 .....	176
	Appendix C: Shipping Services File Version 2.0 .....	257
	Appendix D: Shipping Partner Event Files.....	328
	Appendix D-1: Shipping Partner Event File Version 4.0 File Layout Specification .....	328
	Appendix D-2: Shipping Partner Event File Version 5.0 - File Layout .....	335
	Appendix E: Confirmation/Error/Warning Files.....	354

Appendix E-1.1: Shipping Services Confirmation/Error/Warning Data Version 1.5 File Specification..... 354

Appendix E-1.2: Shipping Services Confirmation/Error/Warning Report Version 1.5 Formatted Specification.. 356

Appendix E-1.3: Shipping Services Confirmation/Error/Warning Data Version 1.7 File Specification..... 362

Appendix E-1.4: Shipping Services Confirmation/Error/Warning Report Version1.7 Formatted Specification ... 364

Appendix E-2.1: Shipping Partner Confirmation/Error/Warning Data Version 2.0 File Specification..... 370

Appendix E-2.2: Shipping Partner Confirmation/Error/Warning Report Version 2.0 Formatted Specification ... 372

Appendix E-3: Confirmation/Error/Warning Message List ..... 375

Appendix F: eVS Postage Payment Extract Files..... 410

    Appendix F-1: Version 1.1 File Layout Specification..... 410

    Appendix F-2: Version 2.0 File Layout Specification..... 414

Appendix G: Scan Data Extract Files..... 419

    Appendix G-1: Scan Data Extract File Version 1.5 File Layout Specification ..... 419

    Appendix G-2: Scan Extract File Version 1.6 File Layout Specification ..... 423

    Appendix G-3: Scan Extract File Version 2.0 File Layout Specification ..... 436

    Appendix G-4: USPS Domestic Tracking Scan Events ..... 450

    Appendix G-5: Scan Event Codes – International Mail..... 451

Appendix H: eVS Reconciliation Extract File..... 456

Appendix I: Intelligent Mail Package Barcode Service Type Codes ..... 489

Appendix J: Reference Tables..... 491

Appendix K: Transitioning from Shipping Services File Version 1.6 to Shipping Services File Version 1.7/2.0..... 510

Appendix L: Terms and Definitions..... 514

Appendix M: Abbreviations ..... 518

Appendix N: Confirmation Services Customer Checklist..... 520

Appendix O: Electronic Verification System (eVS) Customer Checklist..... 524

Appendix P: Parcel Return Service (PRS) Customer Checklist..... 530

Appendix Q: Publication Change Notes..... 534

## EXHIBITS

Exhibit 1: Shipping Services File Data Flow.....	33

7/10/2025	Version 33	<ul style="list-style-type: none"> <li>• Expand list of payment methods to include new entries for third party</li> <li>• Remove incorrect information from Expected Delivery Date field of Scan Extracts</li> <li>• USPS Domestic Tracking Scan Event list (Appendix G-4) has been removed from this document and replaced with a link to Postal Pro</li> <li>• Intelligent Mail Package Barcode Service Type Code list (Appendix I) has been removed from this document and replaced with a link to Postal Pro</li> <li>• Updated information for SSF v1.7/2.0 Package Value field for documents</li> <li>• Updated Hazardous Material Service Type Codes charts</li> <li>• Added new extra service codes for Nonstandard Characteristics (879 and 886)</li> </ul>

## 1 General Information

---

### 1.1 Purpose

*The Implementation Guide to Intelligent Mail Package Barcode (IMpb) for Confirmation Services and Electronic Payment Systems Mailers* provides technical guidance for the implementation of the Intelligent Mail package barcode (IMpb) and file formats. These rules enable customers to meet IMpb requirements for packages and shipments with Extra Services.

This guide provides additional information that will be helpful to mailers as a supplement to Publication 205, Electronic Verification System (eVS) Business and Technical Guide. It provides information on the Shipping Services File formats used by commercial and online package or Extra Services customers who communicate electronically with USPS in order to meet IMpb requirements and receive electronic pricing or to participate in such programs as eVS or USPS Ship.

### 1.2 Background

New customers and customers converting to the IMpb must use version 1.6 or higher of the file format. Details may be found in Chapter 3, Shipping Services File.

The IMpb has the following benefits:

- Barcode formats to promote the use of a concatenated barcode structure (routing information and package identification code) in a single barcode.
- Addition of a channel-specific Application Identifier (AI) that allows a package to be matched to a specific payment channel, which supports revenue assurance and analysis.
- Support for both six-digit and nine-digit Mailer IDs (MIDs).
- Three-digit service type codes (STCs) that uniquely identify the mail class and extra service(s) combination in a single, integrated barcode to increase efficiency in mail transportation, handling and reporting.

Versions 1.7 and 2.0 of the Shipping Services File, which also feature Detail 3 (D3), Detail 4 (D4), Global 1 (G1) and Global 2 (G2) records, enable mailers to include International Customs information. When shipping services files are processed validations occur to confirm that all items include complete electronic data for customs when required. Information is provided to the mailer identifying data that is not compliant via Confirmation Error Warning messages. The two versions of the Shipping Services file contain the same data elements; version 1.7 records are fixed length and version 2.0 records are pipe-delimited variable length records.

As part of the Postal Service's 100% Visibility initiative, USPS launched a class-specific barcode for virtually every product and combination of Extra Services available to retail and commercial customers across all payment channels. The IMpb and associated files satisfy a wide range of data and product requirements for businesses, consumers and the Postal Service through the comprehensive information it contains.

The IMpb or unique tracking barcode is required for all parcels shipped through the Postal Service.

When customers ship packages and/or participate in programs such as electronic Confirmation Services, eVS or USPS Ship, they are required to transmit data to USPS regarding each package or extra service(s) mailpiece they tender. In return, USPS will provide mailers with two types of files: a scan event extract file and a confirmation/error/warning file. The scan event extract file contains tracking information about the movement of packages through the USPS mail stream. The confirmation/error/warning file identifies issues associated within the Shipping Services File record.

Previously, customers were permitted to choose their method of file transmission: Internet FTP, Secure FTP or EDIINT AS2. The Postal Service no longer allows Internet FTP as an option and is requiring customers to select a secure transmission method in order to ensure data security and integrity of its systems and those of our customers.

eVS and USPS Ship currently require secure transmission of all files.

The confirmation/error/warning file contains information regarding the processing of Shipping Services File records by the Product Tracking and Reporting system (PTR). Customers should carefully review the confirmation/error/warning file to confirm that no records have been rejected (errors) and that any problems with the data (warnings) are corrected and resubmitted. For Electronic Payment System customers, USPS will also provide two additional files: a postage payment extract, and a reconciliation extract. The postage payment extract files contain all rate ingredients reflecting any updates or changes made by the electronic payment system along with the postage rate calculated and charged for each item. The reconciliation extract file provides status and payment information to Electronic Payment System/PRS mailers for proposed and actual monthly adjustments. Customers must request both the payment extract and reconciliation extract files.

The final rule *New Standards To Enhance Package Visibility*, published in the Federal Register on December 18, 2013 (78 FR 76548), required both eVS and non-eVS customers to include the Transaction ID from the Shipping Services File on its corresponding Postage Statement. Effective January 25, 2014, this requirement became mandated. This creates a link between electronic files and file transmissions and helps to identify payment irregularities and errors. See Chapter 3, The Shipping Services File, section 3.4 for more information.

The final rule *Changes to Validations for Intelligent Mail Package Barcode*, published in the Federal Register on September 21, 2018 (83 FR 47839) amended the DMM to update IMpb requirements relative to Compliance Quality Validations for Address Quality, Shipping Services File Manifest Quality, and Barcode Quality. These validations allow the Postal Service to further improve service, tracking, and visibility, all of which will facilitate the identification of noncompliant mailpieces and customer experiences.

The final rule *Intelligent Mail Package Barcode Compliance Quality*, published in the Federal Register on August 10, 2023 (88 FR 54239) amended the DMM to add an additional Intelligent Mail® package barcode (IMpb®) validation under the “Barcode Quality” compliance category. The additional validation requires that an IMpb must include a valid, unique 3-digit STC that accurately represents the mail class, product, and service combination on the physical label affixed to the package. Additionally, the IMpb on the package must also correspond with electronic package level details and Extra Services Code(s) contained within the Shipping Services File (SSF).

### 1.2.1 Package Quality Compliance Rules

Mailers are assessed Package Quality Noncompliance fees on commercial competitive products when noncompliant pieces exceed the threshold for one of the Package Quality Noncompliance categories. The Package Quality Noncompliance Categories are: Address Quality, Manifest Quality and Barcode Quality.

Package Quality Noncompliance for the Address and Manifest categories is based on the data provided in the Shipping Services File and is measured at the time of the first Arrival at Post Office (AAU) scan. The Shipping Services File and address information must be transmitted timely and received by the Postal Service before the AAU scan event. The Shipping Services file must include an accurate destination delivery address and/or 11-digit DPV ZIP Code.

Package Quality Noncompliance for the Barcode category is measured based on the first physical scan event or receipt of the Shipping Services File manifest record. For non-eVS customers (Manifest Mailing Solution) who tender shipments at the BMEU, compliance is assessed at the time of mailing.

Package Quality Noncompliance thresholds and fees apply to competitive products only: Priority Mail, Priority Mail Express, USPS Ground Advantage, Parcel Select and Parcel Return Service. The Package Quality Noncompliance fee is currently \$0.25 for each non-compliant item that falls below the threshold. Metered users must meet compliance requirements to retain Commercial Pricing or pay retail prices. A unique, trackable barcode is required for all metered parcels regardless of the price paid. Certified Mail, Registered Mail and trackable Extra Services must meet IMPb requirements.

The current Package Quality Noncompliance thresholds are listed below:

Package Quality Compliance Type	Threshold	Package Quality Noncompliance Category
Address Quality - Checks for a timely address that validates to a unique 11 Digit DPV	90%	AQ
Manifest Quality – Checks for a timely Manifest File that passes 4 critical validation criteria	94%	MQ
Barcode Quality – Checks the Barcode in the manifest and passes critical validations	98%	BQ

*PostalOne!* & eVS customers will also see PC (16) & OK (20) Report codes in their Event Extract Files that generate when a mailpiece has passed Package Quality Noncompliance validations. A “PC” is stored for a mailpiece when the tracking label is compliant at the creation of the tracking number in PTR. An “OK” is stored for a mailpiece when the tracking label was corrected by the mailer prior to the Arrival at Unit (AAU) and has been found compliant. “PC” and “OK” do not affect a mailer’s Package Quality Noncompliance score.

Package Quality Noncompliance Code	Report Code Description
<p style="text-align: center;">PC</p> <p style="text-align: center;">“Package is Compliant”</p>	<p>A “PC” is stored for a mailpiece when the Tracking Label is compliant from the creation of the tracking number, a PC does not affect a mailers Package Quality Noncompliance score.</p>
<p style="text-align: center;">OK</p> <p style="text-align: center;">“Compliance Code Was Updated by Mailer”</p>	<p>An “OK” is stored for a mailpiece when the Tracking Label was corrected by the mailer prior to the AAU to make the mailpiece pass IMpb Compliance. An OK does not affect a mailer’s Package Quality Noncompliance score.</p>

The three quality categories will be assessed against performance thresholds. Package Quality Noncompliance fees will be applied only once for packages and mailpieces that fall below the threshold percentages currently in place. Noncompliance fees are assessed at either the mail class level or blended level, depending on the lowest financial impact of the three thresholds yield the greatest number of noncompliant pieces. The category that yields the greatest count of noncompliant pieces will be used to determine the Package Quality Noncompliance fees. For Electronic Payment System mailers, final noncompliance is measured on the date and at the time of the first AAU scan for the package. The Arrival at Post Office event code is “07” which is provided in Scan Event Extract Files. If the address is included in the Shipping Partner File, manifest compliance is assessed at midnight (23:59:59) local time of the Arrival at Post Office event “07.”

For mailers receiving Version 1.6 or 2.0 of the Scan Event Extract file, the IMpb Compliance Report code will be populated for the Manifest Acceptance (MA), and each physical scan event. Mailers can also view their Package Quality Noncompliance triggers in their Shipping Services Confirmation/Error/Warning Report.

For customers who tender shipments at the BMEU, compliance is assessed at the time of mailing. All non-Electronic Payment System mailers will continue to be measured at the time PTR receives the Shipping Services File manifest record. Mailers/Shippers may enter the fees prior to verification on line S23 of the postage statement, in the Extra Service section.

The following Competitive Products are subject to the Package Quality Noncompliance Fees:

- USPS Ground Advantage
- Priority Mail Express
- Priority Mail
- Parcel Select
- Parcel Return Service

### 1.2.1.1 Barcode Quality

Barcodes are validated for readability as well as their proper construction in the SSF. Package labels are validated for proper content and use. Barcode data and package label contents that fail validation will be assigned a non-compliance code of “BQ” (Barcode Quality). The SSF validations are also documented the customer’s Confirmation Error Warning (CEW) Report, which is produced for all manifest files submitted to USPS. SSF barcode and package label validations that affect the barcode quality can be found in Table 1 below.

**Table 1 – Barcode Quality (BQ) Validations**

PTR Error/Warning/Event Message	PTR Indicator	Validations	Internal PTR Warning #
REUSED TRKNG NUM - TRKNG NUM HAS BEEN PREV MANIFESTED	BQ	120 Days Uniqueness, occurs when PTR receives a mailpiece with the same tracking number, with a different EFN, Destination ZIP Code, or weight within 120 days of receiving the tracking number	66
INVALID MAILER ID IN PIC	BQ	Valid and Certified Mailer ID in the label that’s in Program Registration/Online Enrollment	50
USPS PRODUCT/SERVICES WILL BE RETIRED AS OF DD/MM/YYYY	BQ	Verify that the service type code in the barcode is a valid, active service type code	9
GRND ADVTG SERVICE ICON NO MATCHING STC	BQ	Verify the label has the correct service type code for the service icon	10
GRND ADVTG STC NO MATCHING SERVICE ICON	BQ	Verify the label has the correct service icon for the service type code	11
GRND ADVTG SERVICE BANNER NO MATCHING STC	BQ	Verify the label has the correct service banner for the service type code	12
GRND ADVTG INDICIA NO MATCHING STC	BQ	Verify the label has the correct indicia for the service type code	13
WEIGHT OF ITEM REQUIRES DIFFERENT SERVICE TYPE CODE	BQ	Verify that the mailer provided weight of the item being shipped falls within the range of weights for the service type code.	99218
DESTN RATE IND REQUIRES DIFFERENT SERVICE TYPE CODE	BQ	Verify that the Parcel Select item will be dropped at a destination facility. Origin entered items should not be Mail Class Parcel Select	99219

PTR Error/Warning/Event Message	PTR Indicator	Validations	Internal PTR Warning #
FCPS PERMIT IMPRINT	BQ	Verify that the Permit Imprint does not contain First-Class Package Service language	14
FIRST-CLASS PACKAGE RETURN SERVICE BANNER	BQ	Verify that the Service Banner does not contain First-Class Package Return Service language	15
GROUND RETURNS SERVICE BANNER	BQ	Verify that the Service Banner does not contain Ground Returns language	16
PARCEL RETURN SERVICE BANNER	BQ	Verify the label has the correct service type code for Parcel Return Service	17
INCORRECT SERVICE BANNER FOR USPS GROUND ADVANTAGE RETURN	BQ	Verify the label has the correct service banner for a USPS Ground Advantage Return	18
PME INDICATOR AND NON-PME STC	BQ	Verify the label has the correct service icon for the non-Priority Mail Express service type code	20
NON-PME INDICATOR AND PME STC	BQ	Verify the label has the correct service icon for the Priority Mail Express service type code	21
PME PERMIT IMPRINT AND NON-PME STC	BQ	Verify the label has the correct indicia for the non-Priority Mail Express service type code	22
INCORRECT SERVICE BANNER FOR PME RETURN	BQ	Verify the label has the correct service banner for a Priority Mail Express Return	23
PM INDICATOR AND NON-PM STC	BQ	Verify the label has the correct service icon for the non-Priority Mail service type code	25
NON-PM INDICATOR AND PM STC	BQ	Verify the label has the correct service icon for the Priority Mail service type code	26
PM PERMIT IMPRINT AND NON-PM STC	BQ	Verify the label has the correct indicia for the non-Priority Mail service type code	27
INCORRECT SERVICE BANNER FOR PM RETURN	BQ	Verify the label has the correct service banner for a Priority Mail Return	28
HAZMAT SYMBOL AND NON-HAZMAT STC	BQ	Verify the label has the correct service type code for a HAZMAT item	30
HAZMAT INDICATOR AND NON-HAZMAT STC	BQ	Verify the label has the correct service icon code for a non-HAZMAT item	31

PTR Error/Warning/Event Message	PTR Indicator	Validations	Internal PTR Warning #
MISSING OR MISMATCHED 2D (IMMB) ON HAZMAT ITEM	BQ	Verify the HAZMAT label has a valid 2D IMmb	32
HAZMAT SYMBOL AND MISSING IMMB	BQ	Verify the label has a valid 2D IMmb	33
PARCEL SELECT LIGHTWEIGHT STC	BQ	Verify the label has the correct service type code - Parcel Select Lightweight is retired	35
PARCEL SELECT LIGHTWEIGHT BANNER	BQ	Verify the Service Banner on the label does not contain Parcel Select Lightweight	36
PARCEL SELECT LIGHTWEIGHT PERMIT IMPRINT	BQ	Verify the Permit Imprint on the label does not contain Parcel Select Lightweight	37
MISSING OR MISMATCHED 2D (IMMB) ON NON-HAZMAT ITEM	BQ	Verify the NON-HAZMAT label has a valid 2D IMmb	38
HAZMAT STC ON MILITARY/PTFAS	BQ	Verify that the Service Type Code is not HAZMAT for Military/PTFAS Destination	39
HAZMAT SERVICE ICON ON MILITARY/PTFAS	BQ	Verify that the Service Icon is not H for Military/PTFAS Destination	40

### 1.2.1.2 Manifest Quality

In addition to barcode quality validations, SSF field validations will be included in the evaluation of IMpb compliance for manifest file quality. SSF records failing these validations will be assigned a non-compliance code of “MQ.” A list of the SSF manifest validations that will affect the manifest quality assessment can be found in the Table 2. These validations include the following:

- Entry location ZIP Code
- Post Office of account ZIP Code
- Payment Account Number
- Method of Payment
- Unmanifested Mailpiece

The Event ZIP Code from the first physical scan is matched to the Entry Facility ZIP Code provided in the Manifest Header Record. When there is a mismatch, PTR will generate a MQ indicator to identify when a package was entered at the incorrect entry facility.

The correct Processing Category field also needs to be explicitly included in the SSF for the record to be considered compliant for non-eVS customers.

Table 2 – Manifest Quality (MQ) Validations

PTR Error/Warning Message	PTR Indicator	Validations	Internal PTR Warning #
MQ ENTRY FACILITY MISMATCH – ENTRY FACILITY DOES NOT MATCH MANIFEST FILE	MQ	When the Destination Rate Indicator is equal “D” (Destination Delivery Unit) then PTR compares the first 3 digits of the Event ZIP Code from the first Arrival-At-Unit (07 Event) to the first 3 digits of the Entry Facility ZIP Code provided in the Manifest Header Record from the mailer	1
INVALID PO OF ACCOUNT ZIP CODE	MQ	The PO of Account ZIP Code is a valid combination and is registered with eVS or <i>PostalOne!</i> as valid information	136
INVALID PAYMENT ACCOUNT NUMBER	MQ	The Payment Account Number is a valid combination and is registered with eVS or <i>PostalOne!</i> as valid information	1535
INVALID METHOD OF PAYMENT	MQ	The Method of Payment the mailer provides must be a valid value when validating against the PTR reference data, when the mailer provides an invalid method of payment they will receive this warning.	193
IMPB: MAIL PIECE WAS UNMANIFESTED AT THE TIME OF AAU	MQ	The Mail Piece was Unmanifested at the time of Arrival-At-Unit (07 event) occurred. This will generate a MQ compliance code with a 799 Reason Code.	799

### 1.2.1.3 Address Quality

When destination delivery address information is included in the Shipping Services File or Shipping Partner Event File to meet IMpb requirements, the address elements must be complete and have sufficient quality to yield a unique 11-digit ZIP Code valid for the delivery point. Destination delivery addresses will be compared against the USPS address database for accuracy and ability to be validated to an 11-digit ZIP Code that is unique to the finest depth for the delivery point (including secondary information such as the apartment or suite number).

Each delivery address will be validated for each mailpiece. An AQ non-compliance indicator will be assigned to packages and mailpieces with address information that does not validate to unique 11-digit delivery point ZIP Codes.

Street addresses included in the Shipping Services File in lieu of an 11-digit ZIP Code will be verified to ensure they are unique for a delivery address. A list of the Delivery Point Validation footnote codes returned from the address validations process can be found in Table 3.

**Table 3 – Address Quality (AQ) Validations**

The following codes will be validated for address quality (AQ):

Validation Codes Measured for AQ
A1 - ZIP+4 NOT MATCHED
N1 - HSA_DPV confirmed a hi-rise address w/o secondary information*
M1 - PRIMARY NUMBER MISSING
DZ – No Destination Delivery Address and/or 11-digit Delivery Point Validated (DPV) ZIP Code Prior to the AAU

### 1.2.2 ACS for Parcels

Intelligent Mail package barcode (IMpb) ACS (Address Change Service) with SPS (Shipper Paid Services) is available for parcels that include an IMpb. IMpb ACS is a process that provides change-of-address and undeliverable parcel information to parcel shippers. IMpb ACS with SPS is an ACS option that provides a consistent and more efficient method of collecting forwarding and return charges for undeliverable as addressed (UAA) parcels. Parcel shipper participation enhances the parcel return process and improves the efficiency of handling UAA parcels and provides service consistency. The goal is to increase IMpb ACS and IMpb ACS with SPS participation and therefore, increase consistency in the collection of forwarding and return charges and any fees associated.

- ACS Forwarding adds Extra Service code 451- "IMpb ACS with Shipper Paid Forward/Return" which will identify the event Forward/Return when parcel is processed as "Undeliverable As Addressed" (UAA)
- Allowed to be used by the following classes of mail: Parcel Select, Media Mail, Bound Printed Matter, and Library Mail
- Supported by Shipping Services File (Version 1.7 and higher) and when ancillary services endorsement field (Flag J or K) Position 675-677 is used
- Detail records are extracted and sent to ACS
- The package disposition status is stored when package is processed as UAA and the ACS notice is generated.

The USPS also supports Electronic Data Interchange (EDI) transmissions with customers. The following message types are supported:

- 215 – Shipping Services File - Version 1.6 and Version 1.7
- 214 – Scan Event Extract (CDE) – Version 1.5 and Version 1.6
- 210E – Postage Payment File – Version 1.0
- 210R – Reconciliation Extract – Version 1.0
- 240 – Shipping Partner Event File – Version 3.0, Version 4.0
- 864 – Confirmation/Error/Warning File (CEW) – Version 1.3 and Version 1.5

The EDI Implementation guides for these transaction messages (215, 214, 210E, 210R, 240 and 864) are located on USPS PostalPro site: <https://postalpro.usps.com/shipping/impb>.

For additional information or questions on Intelligent Mail package barcode or the Shipping Services File, contact us at [IMpb@usps.gov](mailto:IMpb@usps.gov).

### 1.4 Mailer ID (MID) and Mail Ownership

All mailers utilizing the new Intelligent Mail package barcode are required to use a conforming Mailer ID (MID).

A conforming MID is defined as follows:

- A six-digit MID must begin with 0–8
- A nine-digit MID must begin with 9

Mailers are required to include information that identifies the mailing agent and mail owner (i.e., by/for mailing relationship). When mailing agents make mailings on behalf of one or more clients (mail owners), they must request a unique Mailer ID (MID) for each client to designate package ownership. All mailing agents must assign a unique MID for each client. This MID will be used exclusively for that client, for mailings with that particular mailing agent. Both Shipping Services File versions 1.6, 1.7/2.0 and Mail.dat contain fields for this information.

If you have questions please contact the Package Services Customer Support Team by email at [delivery.confirmation@usps.gov](mailto:delivery.confirmation@usps.gov) or by phone at 877-264-9693, Option 1.

#### 1.4.1 Assignment of MID

##### 1.4.1.1 USPS Program Registration

Within the Business Customer Gateway (BCG), users may access Program Registration via the Online Enrollment service. Users may request access to Online Enrollment from the Shipping Services page on the BCG if they currently do not have access to the service. This service assists the user in signing up for a number of shipping programs, including USPS Tracking and Electronic Payment Systems (eVS, USPS Ship), and registering a six- or nine-digit MID, according to the product they are mailing, the type and volume of service they require and the payment type.

Mailers may not use a MID in their tracking barcodes for the Shipping Services File or in an IMpb until certification is complete and the MID is registered.

##### 1.4.1.2 Nine-digit MID

A nine-digit MID will support most customers; however, at certain volume levels a six-digit MID will be required to ensure the serial number remains unique for 120 days. Additionally, under some operational scenarios a six-digit MID may be required. Customers can obtain a nine-digit MID via Program Registration found on the Business Customer Gateway. Navigate to <https://gateway.usps.com/eAdmin/view/signin> and logon as an existing user or register for a business account as a new user to gain access to the Business Customer Gateway. Once logged in, users should navigate to the Shipping Services page on the BCG where they will find the Online Enrollment service to access Program Registration. Customers may also request access from that page if necessary.

##### 1.4.1.3 Six-digit MID

High volume customers and customers who require longer serial numbers may request a six-digit MID. PC Postage or Online customers whose volume is 100,000 pieces or more within a six-month period must use a six- digit MID to ensure uniqueness and accurate tracking information. Assignment of a six-digit MID can only be used for IMpbs and file formats and will be provided on a case-by-case basis. For more information, please contact the Package Services Customer Support Team by email at [delivery.confirmation@usps.gov](mailto:delivery.confirmation@usps.gov) or by phone at 877-264-9693, Option 1.

## 1.5 Test Environment for Mailers (TEM)

The Postal Service offers a Test Environment for Mailers (TEM) to support new and existing USPS customers who require testing of their electronic files as part of the file/label certification process or upgrading to new file versions for Shipping Services.

Software and database changes made to the production environment are also applied to TEM. TEM includes all database tables used by the production manifest and extract processes. The database tables included in TEM do not contain production data. They are loaded by the mailer test processes.

Customers will be able to use the same MID and Login ID in both the TEM and Production environments. Secure FTP and EDI customers must have their TEM accounts set up. The TEM environment provides mailers with the capability to test existing and new functionality. The following files can be processed in the TEM environment: shipping services files, shipping partner event files, confirmation error/warning reports, scan event files, delivery partner files and eVS postage payment file. For additional information on sending and receiving files from the PTR and eVS TEM see Chapter 6, Communications.

## 1.6 Facility Access and Shipment Tracking (FAST) and Facility ZIP Codes

Mailers are required to provide the Entry Facility ZIP Code in the Header Record of the shipping services file. The ZIP Code must be the Facility ZIP Code, which represents the USPS facility where the mail is entered. The recommended source for obtaining a Facility ZIP Code is [FAST system](#).

## 1.7 Customer Services

Mailers can receive technical support for all processes described in this publication by contacting the Package Services Customer Support Team by email at [delivery.confirmation@usps.gov](mailto:delivery.confirmation@usps.gov) or by phone at 877-264-9693, Option 1.

## 2 Getting Started

The Postal Service requires the use of the Intelligent Mail package barcode for all tracking and extra services for domestic packages and letter and flats mailings with extra services. The three-digit service type code (STC) represents both the mail class and any extra service(s) for a package or item being shipped. The 5-digit ZIP Code is required on all packages, either as part of the concatenated barcode or as a separate routing destinations barcode. New customers and customers transitioning from Shipping Services File Versions 1.3 or 1.4 must use Shipping Services File Versions 1.7 or higher. All customers are required to use the IMpb, Shipping Services File Version 1.6 or higher, and include either the Destination Delivery Address and/or Delivery Point Validated 11-digit ZIP Code for the Destination Address-in the file. Customers must complete label and file certification to upgrade to the IMpb.

To meet current IMpb requirements all customers must provide the Destination Delivery Address and/or Delivery Point validated 11-digit ZIP Code electronically for each package/item in the Shipping Services or Shipping Partner Event file. See File layout specifications in Appendices A, B, and C for details on which to populate in each file and record type.

### 2.1 New and Existing Customer Certification Processes

Checklists (located in Appendices N, O, and P) are available to assist our customers through the implementation of the IMpb label and Shipping Services File Version 1.6 (minimum) and 1.7/2.0 (preferred).

This section also provides information for existing Shipping Services customers who are transitioning from Shipping Services File Version 1.3 or 1.4 to Shipping Services File Version 1.6, 1.7 and 2.0. Customers making this transition must complete the Shipping Services certification process again. Checklists are available to assist both new and existing customers through the process:

- [Appendix N](#) : Confirmation Services Customer Checklist documents the steps for Confirmation Service customers
- [Appendix O: Electronic Verification System \(eVS\) Customer Checklist](#) documents the steps for eVS customers
- [Appendix P: Parcel Return Service \(PRS\) Customer Checklist](#) documents the steps for PRS customers

#### 2.1.1 Transitioning from Shipping Services File Version 1.6 to Version 1.7/2.0

The Postal Service strongly encourages customers to upgrade from Shipping Services version 1.6 to version 1.7/2.0. The new file formats provide the infrastructure to leverage the newest features and processing efficiencies. The changes include the addition of three new detail records: the Container Record, for associating groups of individual packages/items to a group of containers for a manifest. Changes also include Detail Records 3 and 4 and Global Records 1 and 2, which are used for international and customs information to meet export compliance requirements. Additionally, the Destination Delivery Address has been added to the D1 record, which, when used, allows the mailer to skip the D2 record entirely for many shipments. Shipping Services File versions 1.7 and 2.0 have the same layout and content rules except version 1.7 contains fixed-length fields and version 2.0 uses pipe-delimiters to separate fields.

## 2.2 Confirmation Services Customer Certification Process

The Confirmation Services Customer Checklist included in Appendix N is for both new customers (those who are interested in using PTR to receive tracking information) and existing customers (those who wish to convert to the IMpb or add an additional mail class and/or extra service(s)). See [Appendix N](#) for the certification checklist for a Confirmation Service Customer.

## 2.3 Electronic Verification System (eVS)

The Electronic Verification System (eVS) enables parcel mailers to submit documentation and pay postage by transmitting electronic manifest files to the eVS database, which is part of the *PostalOne!* system. Because eVS integrates with other systems and business processes for data collection and performance measurement, eVS makes it easy for customers to prepare and induct parcel mailings, streamlining their internal business processes as well as those with the Postal Service. The eVS Customer Checklist included in Appendix O is for both existing customers who wish to convert to the IMpb and new customers who are interested in paying postage by transmitting electronic manifest files to the eVS database. See [Appendix O](#) for the certification checklist for an eVS customer. eVS will be retiring on February 1, 2025. All mailers will need to migrate to USPS Ship. Technical support will be provided to resolve any issues during migration.

## 2.4 USPS Ship

USPS has introduced a new payment and verification platform for outbound packages and current Electronic Verification System (eVS®) customers, called USPS Ship. This new platform will provide upgrades to reporting, pricing and visibility as packages move through the mail stream.

USPS Ship will leverage upgrades to existing Mail Processing Equipment (MPE) to provide detailed package attributes and the ability to price each package individually. This will eliminate manual sampling of packages and other manual processes which will expedite processing. Integration with Informed Visibility® Mail Tracking & Reporting (IV®-MTR) will provide enhanced reporting capability utilizing package attributes captured through processing.

USPS Ship uses the Postal Service's Enterprise Payment System. An Enterprise Payment Account (EPA) will be required for mailers enrolled in USPS Ship.

## 2.5 Parcel Return Service (PRS) Customers

Parcel Return Service (PRS) is a national program that enables return parcel business with the Postal Service using electronic technology. PRS mailers may pick up return parcels from agreed-upon locations. [DMM Section 505.4: Mailer Service, Parcel Return Service](#) explains PRS and the requirements to participate in the program. The Parcel Return Service (PRS) Customer checklist included in Appendix P is for PRS customers who are interested in paying postage by transmitting electronic manifest files to the eVS database. See [Appendix P](#) for the certification checklist for a PRS customer.

## 2.6 Forms

### 2.6.1 Certification Forms

Certification forms can be found at <http://about.usps.com/forms/all-forms.htm>. If you have any questions concerning any of the forms, please contact the Package Services Customer Support Team by email at [delivery.confirmation@usps.gov](mailto:delivery.confirmation@usps.gov) or by phone at 877-264-9693.

CERTIFICATION FORMS				
Form Name	Description	Confirmation Services Applicable	eVS applicable	PRS applicable
<a href="#"><u>PS Form 3615. Mailing Permit Application and Customer Profile</u></a>	<input type="checkbox"/> Use PS Form 3615 to establish the new permit account.	N/A	<input type="checkbox"/>	<input type="checkbox"/>
<a href="#"><u>PS Form 5052. Printer Certification Submission</u></a>	<input type="checkbox"/> Customers printing their own barcoded labels, which will require testing and certification prior to using Confirmation Services or eVS. <input type="checkbox"/> Use PS Form 5052 to accompany the sample labels you will send for testing. PS Form 5052 provides instructions on the quantity of labels, printer information, and other documentation you will need to provide	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## 2.7 Enterprise Payment System

### 2.7.1 General Information

The Enterprise Payment System or EPS allows customers to pay for products and services through an Enterprise Payment Account (EPA) funded as an Automated Clearing House (ACH) Debit or Trust Account. The EPS payment account management provides enhanced security features, centralized balance and account management, and a self-service customer experience.

EPS supports commercial, domestic and international products and services which includes First-Class Mail®, USPS Marketing Mail™, Periodicals, PO Boxes, Caller Services and Reserve Services (EPOBOL) and Address Quality Products, (ACS, AEC, AECII). For additional information on EPS go to <https://postalpro.usps.com/EPS>.

**This Page Intentionally Left Blank**

## 3 Shipping Services File

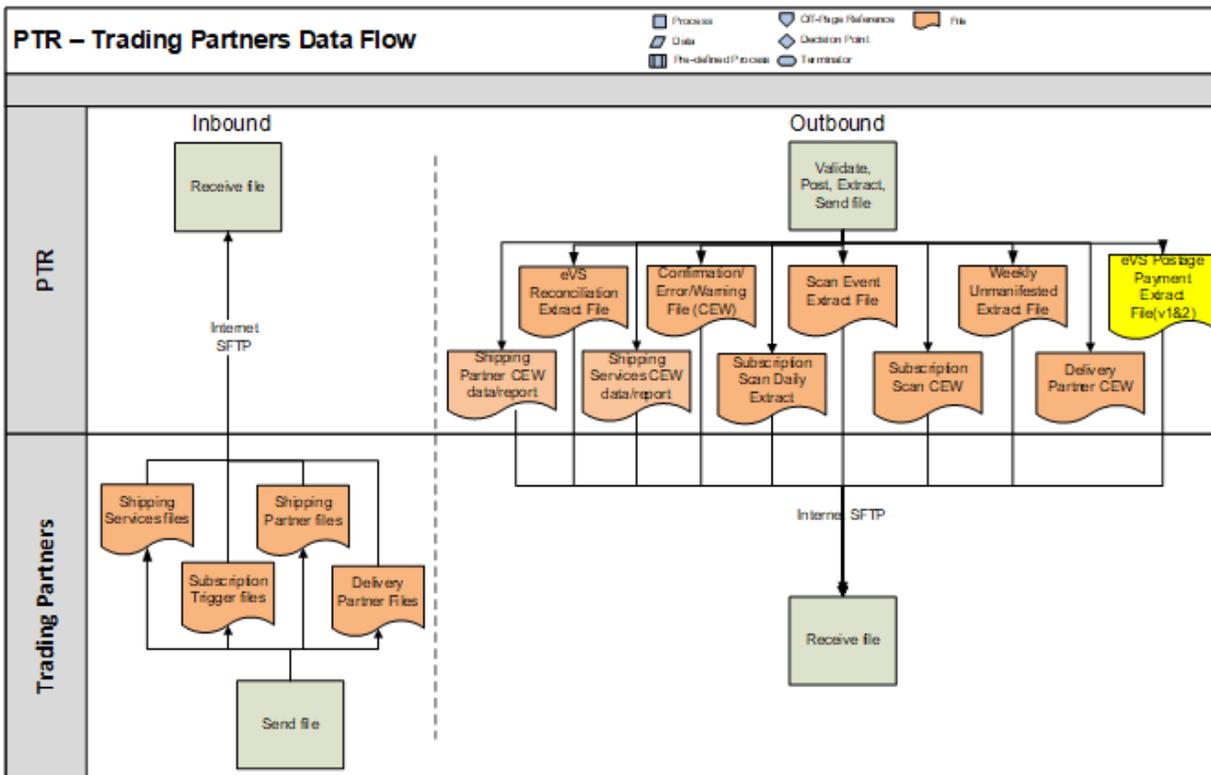

---

### 3.1 Process

USPS requires the mailer to send a Shipping Services File containing specific data records for each item being tendered with a given shipment and organized into electronic manifests. Each manifest within the file corresponds to a header record for each destination entry or origin entry facility, with data records for the items grouped under the header record.

Mailers transmit the Shipping Services Files to the Product Tracking and Reporting system (PTR). File and record validations occur in both PTR and in the Electronic Payment Systems. PTR will send the confirmation/error/warning report listing any errors or warnings associated with the Shipping Services File. For eVS customers, PTR forwards Shipping Services Files to the eVS database to process payment information. USPS Ship consumes shipping services files directly. Records with errors in eVS will appear in the manifest error report in *PostalOne!*. eVS uses the successfully accepted records to generate electronic postage statements and to automatically debit the mailer's postage payment account.

Exhibit 1: Shipping Services File Data Flow

### 3.1.1 Things to Know About the Shipping Services File

1. The Shipping Services file name cannot contain embedded spaces. A file name with embedded spaces cannot be processed and will be rejected.
2. The Shipping Services file **cannot** contain multiple Shipping Services File versions (i.e. cannot transmit one file with both the 1.6 and 2.0 versions).
3. The file should be encoded using American Standard Code for Information Interchange (ASCII text).
4. Line feed and carriage return characters are needed at the end of every record except the last record of the Shipping Services file.
5. Customers shipping packages containing confirmation services or any extra services barcodes must transmit package-level data to USPS via a Shipping Services File. The files must be transmitted **TIMELY**. This means that the files must arrive before the first Arrival at Post Office scan event (07) to avoid Package Quality Noncompliance fees (applies to eVS customers **ONLY**). For package quality compliance information, please see the section in this publication entitled: Package Quality Compliance Rules. For non-eVS customer (Manifest mailing solution) shippers must present the SSF at the time of mailing.
6. Shipping Services File versions 1.6 and 1.7 are fixed-length. Version 2.0 is pipe-delimited. Data fields must not include a pipe character when using version 2.0 as it will result in processing errors.
7. A Shipping Services File must contain accurate, electronic information that represents the physical package traveling in the Postal Services network. Packages and mailpieces will be subject to a Package Quality Noncompliance fee. Please see additional details in the Package Quality Compliance section above.
8. The Detail Record 1 (D1) must be immediately followed by Detail Record 2 (D2), Customs Detail Records D3, D4 or G1 and G2 if needed, ensuring they are adjacent and in sequential ascending numeric order within the Shipping Services File. The only detail records that may be repeated for a single tracking number are the D4 and G2 detail records. These contain information for customs about the contents of a package and may be repeated for each unique item in a package.
9. Electronic Signature Online™ (eSOL) service allows customers to use a previously provided electronic signature to allow delivery of items for which the sender chose Priority Mail Express®, Signature Confirmation™, or Insurance over \$500. These services require a signature at the time of delivery. With eSOL, the Informed Delivery account holder for the delivery address can opt to use a previously provided electronic signature via their Informed Delivery® Packages Dashboard. By default, certain packages are automatically opted in and eligible for eSOL. Mailers requiring a physical signature at the time of delivery, rather than accepting a previously provided electronic signature, can opt out of Electronic Signature Online (eSOL). To opt out, mailers must populate a value code of '3' in the Waiver of Signature/Carrier Release/Merchant Override/Customer Delivery Preference field (see Section 8.15.2) in the Shipping Services File.

#### File Types

Shipping Services File	Electronic File Type	Comments
Electronic Payment Systems	"1"	"Tracking and Postage File" for original eVS file
Tracking	"2"	"Tracking File" for original confirmation services file
PRS	"3"	"Return Service" for original PRS file
Corrections	"4"	"Corrections" for submitting a correction to original file

Since customers are required to provide more piece-level detail information, the Postal Service has standardized the rules for completing Types 1 (Tracking and Postage) and 2 (Tracking Only) files. The complete rules (e.g., required vs. optional, defaults and content values) for populating these files are the same. In the File Layout description columns of the Shipping Services Files (Appendices listed below), the separate file designations have been updated to reflect the changes. In those cases where a Type 2 (Tracking Only) is missing the required data, a Warning message will appear in the Confirmation/Error/Warning report. Please see the Shipping Services File Layout Specifications in the Appendices below for specific information.

The following Appendices provide the Shipping Services File specifications, including examples and content rules and limitations:

- [Appendix A-1: Shipping Services File Version 1.6 File Layout Specification](#)
- [Appendix B: Shipping Services File Version 1.7 File Layout Specification](#)
- [Appendix C: Shipping Services File Version 2.0 File Layout Specification](#)
- [Appendix J: Reference Tables](#)

### 3.1.2 Printed Manifest Forms Used When Entering Mail

#### 3.1.2.1 PS Form 3152, Confirmation Services Certification

[PS Form 3152](#) is a Postal Service document provided upon certification of a mailer's files and barcode samples. When presented with each mailing, an additional scan event is provided in PTR for each item. Mailers must present a PS Form 3152 for Priority Mail Express manifesting, and Open and Distribute Services: Priority Mail Open and Distribute and Priority Mail Express Open and Distribute (PMOD and PMEOD).

Optionally, the Electronic File Number may be written by hand in lieu of a barcode, ensuring the complete number is used.

**NOTE:** Use Service Type Code "750" in the electronic file number on a PS Form 3152.

#### 3.1.2.2 PS Form 5630, Shipment Confirmation Acceptance Notice (SCAN)

Online/PC Postage/meter mailers who submit a Shipping Services File are strongly encouraged to create a [PS Form 5630](#) that is linked to a group of prepaid packages. PS Form 5630 includes a barcode that is the representation of the Electronic File Number from the Shipping Services File. PC Postage mailers must complete the certification process for PS Form 5630, Shipping Services file format before tendering mailings under this program, and the Postal Service will reject any files submitted by unregistered users. As with other Shipping Services files, the Postal Service creates a Manifest Acknowledgement (MA) event for each mailpiece contained in the file after the mailer makes the successful transmission to the Postal Service. Mailers using PS Form 5630 are reminded to enter the correct entry location ZIP Code in the Entry Facility ZIP Code field, if different from the ZIP Code where their account is located.

Use the following Service Type Codes as applicable in the Shipping Services file electronic file number (EFN) for PS Forms 5630:

- **STC 757: for SCAN Form manifest without extra features**
- **STC 758: for Pick Up request manifest**
- **STC 759: for integrated SCAN Form/ Pick Up request manifest**

#### 3.1.2.3 PS Form 8125, Plant-Verified Drop Shipment (PVDS) — Verification and Clearance

A [PS Form 8125](#) with a barcode containing an Electronic File Number must accompany all non-eVS Plant Verified Drop Shipments presented for distribution at a postal facility. The barcode label must include the text

“USPS SCAN AT ACCEPTANCE” above the barcode and bold bars above and below the barcode. The “Comment” section in the lower right-hand corner of PS Form 8125 is designated as the location for this barcode; no other barcode may be placed here. The Postal Service facility will scan the barcode at the time the drop shipment is accepted. This electronic acceptance is shown in the mailer’s extract files as event code “TM – Shipment Acceptance.” If a mailpiece in this shipment is queried on the USPS Tracking web site or through the USPS mobile application, this electronic acceptance will be displayed as “acceptance” with the date, time, city, state, and ZIP Code where the PS Form 8125 barcode was scanned. This electronic acceptance links the actual date/time of mail entry to the electronic records the mailer sent in the Confirmation Services Shipping Services file.

***This process is applicable to all variations of PS Form 8125, which include the following:***

- [PS Form 8125](#), *Plant-Verified Drop Shipment (PVDS) — Verification and Clearance*
- [PS Form 8125-C](#), *Plant-Verified Drop Shipment (PVDS) — Consolidated Verification and Clearance*
- PS Form 8125-CD, *Plant-Verified Drop Shipment (PVDS) — Consolidated Verification and Clearance — DSMS*

**NOTE:** Use Service Type Code “750” in the electronic file number on a PS Form 8125.

### 3.1.3 International

The Shipping Services File is used for both domestic and international shipments. International mail items can now be included and paid for using the eVS mailing system under versions 1.7/2.0. For international mail items, in the Shipping Services File, provide the 24-character Mailer Label Barcode Convention in the Customer Reference Number and the 13-character Customs Barcode in the Tracking Number. Refer to Export Compliance Data Requirements document <https://postalpro.usps.com/node/2710>, Section 2.3, Table 1 for the complete list of Customs Barcode requirements and examples and Section 3.3 for the complete list of Mailer Barcode requirements and examples.

### 3.1.4 Additional Products and Services Requirements

Certain products and services require different qualifications and onboarding processes. In addition, some fields designated as optional for tracking services may be required for these products. Contact USPS Business Mailer Support at USPS HQ, or the Business Service Network (BSN) for more information.

### 3.2 File, Manifest and Record

The Shipping Services File (SSF) consists of eight distinct records: the Header Record (H1), Detail Records 1 and 2 (D1) and (D2) used through SSF version 1.6, and Detail Records 3 and 4 (D3), (D4), Global Detail Records 1 (G1) and 2 (G2), and Container Record (C1), which are added in version 1.7 and higher. Detail Record 2 (D2), Detail Record 3 (D3), and Detail Record 4 (D4) must immediately follow their respective Detail Record 1 (D1), ensuring they are adjacent and in sequential ascending numeric order within the Shipping Services File. The G1 and G2 records contain expanded international shipment information and can be used in place of the D3 and D4 records.

Definitions of terms used:

<b>File</b>	<ul style="list-style-type: none"> <li>An electronic file, at a minimum, must contain at least one manifest.</li> </ul>
<b>Manifest</b>	<ul style="list-style-type: none"> <li>A manifest consists of one Header Record and one or more D1 Records. D2, D3, D4 Records may be used as applicable. The G1 record may be substituted for the D3 record and the G2 record may be substituted for the D4 record in order to provide expanded information for international shipments.</li> </ul>
<b>Record</b>	<ul style="list-style-type: none"> <li>A D1 Record represents a single mailpiece. D2, D3/G1, and D4/G2 provide additional information about that mailpiece. C1 record provides container information.</li> </ul>

#### 3.2.1 Customs Detail Records 3 and 4/Global Detail Records 1 and 2

The Shipping Services File includes Detail Record 3 and Detail Record 4 to support data required by US Customs for international shipments. Global detail records G1 and G2 include the same fields as D3 and D4 and also include expanded field lengths for the HS Tariff Code and Customs Descriptions fields. Additionally the G1 and G2 records contain fields to support future enhanced data on Total Landed Costs and Delivery Duties Paid. Detail Record 3 (D3) and Detail Record 4 (D4) or Global Detail Record 1 G1 and G2 must immediately follow their respective Detail Record 1 (D1) and Detail Record 2 (D2), ensuring they are adjacent and in sequential ascending numeric order within the Shipping Services File.

### 3.3 Key Fields

#### 3.3.1 Header Record Key Fields

The Header Record contains general information about the mailer and specific information about the mailing, such as date and time of mailing and place of deposit for destination entry items or place of mailing for origin entry items. The Header Record contains the Transaction ID and Mailer’s MID (confirmation services) or mailer’s master MID (eVS/USPS Ship). The Header Record also shows the total number of records in the manifest, which consists of one Header Record and all Detail Records under the Header Record. An individual Detail Record 1 under the Header Record represents each item.

**NOTE:** Mailers creating electronic manifests need to be especially careful to observe the following data elements for each Header Record.

## Exhibit 2: Shipping Services File Version 1.6 Header Record Key Fields

Field Name	Field Position	Comments
Electronic File Type	003-003	<ul style="list-style-type: none"> <li>• The Electronic File Type indicates which type of file the customer is transmitting to USPS.</li> <li>• The Electronic File Type will be the same in every Header Record in the transmission file.</li> <li>• There are four Electronic File Types:               <ol style="list-style-type: none"> <li>a) Type “1” (Tracking and Postage File) for original eVS file</li> <li>b) Type “2” (Tracking File) for original confirmation services file</li> <li>c) Type “3” (Return Service) for original PRS file</li> <li>d) Type “4” (Corrections) for submitting a correction to original file</li> </ol> </li> </ul>
Electronic File Number	004-037	<ul style="list-style-type: none"> <li>• This unique number identifies the electronic manifest file with one of the following two-digit application identifiers “92” or “93” for commercial mailers and “94” for online/PC Postage/meter mailers.</li> <li>• The electronic file number (EFN) for packages included in the Header record will also use one of the new valid constructs for the IMpb.               <ul style="list-style-type: none"> <li>➤ Use Service Type Code “750” when either a PS Form 3152 or PS Form 8125 will be printed. Service Type Code “750” replaces the former Service Type Code “50” to denote the electronic file number.</li> <li>➤ Use Service Type Code “757” when a PS Form 5630 (SCAN form) will be printed. To be used by Online shippers who offer use of the Shipment Confirmation Acceptance Notice (SCAN) form.</li> </ul> </li> <li>• The length of the EFN serial number follows the same rules for the length used in the PIC barcode construct.</li> <li>• For eVS, the only valid barcode constructs for the EFN are C04, C08, C09 and C10.</li> <li>• The EFN must remain unique for 120 days from date of first use.</li> <li>• AI 91 and STC 50 are not acceptable in the EFN field.</li> </ul>

Field Name	Field Position	Comments
Entry Facility ZIP Code	053-057	<ul style="list-style-type: none"> <li>• Mailers are required to provide the Entry Facility ZIP Code identifying the USPS facility where the mail is being entered.</li> <li>• This is the 5-digit ZIP Code of the Post Office where mail is presented by the mailer.</li> <li>• The Entry Facility ZIP Code can vary for each Header Record in the transmission file, but more than one Header Record may have the same Entry Facility ZIP Code.</li> <li>• The ZIP Code must be validated against the Facility Access and Shipment Tracking (FAST) Mail Direction File.</li> <li>• The recommended source for obtaining a Facility ZIP Code is <u>Facility Access and Shipment Tracking (FAST) system</u>.</li> </ul>
Transaction ID	078-089	<ul style="list-style-type: none"> <li>• This field is required for all mailers</li> <li>• This field is used to group files together that are submitted with the Transaction ID in reports in eVS and on Postage Statements for Manifest mailers (non-eVS).</li> <li>• This field allows mailers with multiple mailing sites or multiple daily files to group files together that may be submitted independently (by site or file) for easier reconciliation. Also allows mailers to group and organize their daily file transmissions to effectively manage postage payment.</li> <li>• This field must follow the format of year, date, month and sequence number to be valid. The format YYYYMMDD#### of the Transaction ID includes a four-digit number "####" which is to be sequential for the date.</li> <li>• This unique 12-digit number creates a new tier in the mailers' data hierarchy.</li> </ul>
Software Vendor Code	090-093	<ul style="list-style-type: none"> <li>• The four-character designation will be provided to each software vendor upon successfully completing the Postal Service file certification process.</li> <li>• The <i>Software Vendor Code</i> (formerly the Unique Developer ID Code) will be the same for every Header Record in the transmission file.</li> <li>• If you will be using your own proprietary software, please use the following information within the header record of the Shipping Services file: <ul style="list-style-type: none"> <li>• Software Vendor Code: 0850</li> </ul> </li> <li>• If you will be using a vendor's system, the vendor will provide you the Software Vendor Code using commercial software for your shipping.</li> </ul>

Field Name	Field Position	Comments
Software Vendor Product Version Number	094-101	<ul style="list-style-type: none"> <li>• The eight-character designation provided by the software developer. Changes made to approved Product Versions must be reported to the Postal Service and may require recertification.</li> <li>• The Software Vendor Product Version Number (formerly the Shipping/Manifesting Software's Product Version Number) will be the same for every Header Record in the transmission file.</li> <li>• If you will be using your own proprietary software, please use the following information within the header record of the Shipping Services file:                             <ul style="list-style-type: none"> <li>• Software Vendor Product Version Number: 1.0.</li> </ul> </li> <li>• If you will be using a vendor's system, the vendor will provide you the Software Vendor Product Version Number using commercial software for your shipping.</li> <li>• This field is required for Vendors. The field is left justified with trailing spaces.</li> </ul>

### 3.3.2 Detail 1 Record Key Fields

The Shipping Services File Detail Record 1 is required for all domestic and international items. Each package in the mailing requires a Detail Record 1 to provide information about the class and service of the item, as well as any fees and postage. This record also specifies the destination ZIP Code for the item. Detail Record 1 may also contain information related to nesting and containers.

**NOTE:** Mailers creating manifests need to be especially careful to observe the following data elements for each Detail Record.

## Exhibit 3: Detail 1 Record Key Fields

Field Name	Field Length	Field Position	Comments
Tracking Number		003-036	<p>This field can contain either the legacy confirmation service barcode and/or the IMpb.</p> <ul style="list-style-type: none"> <li>The legacy confirmation services barcode and the IMpb use the same barcode symbology (GS1-128).</li> <li>L01 barcode construct is the only valid barcode construct that can be used when manifesting legacy confirmation service barcodes with eVS.</li> <li>Tracking number must be unique for 120 days from date of first use for domestic, 365 days for international.</li> <li>Must use a 9-digit ZIP Code in the IMpb for Hold for Pickup.</li> <li>MRS piece (any piece with extra service 980 must use a Barcode Construct of C01, C05, N02 or N05 (a 9-digit ZIP Code).</li> </ul>
Class of Mail		037-038	<ul style="list-style-type: none"> <li><a href="#">Appendix I</a> provides the associated classes of mail for each service type code.</li> <li><a href="#">Appendix J</a>, Reference Table 8 provides the valid codes for mail class or subclass.</li> </ul>
Service Type Code (STC)		039-042	<p>This field can contain either a two-digit STC (legacy confirmation service barcode) or a three-digit STC (IMpb).</p> <ul style="list-style-type: none"> <li>The service type codes represent the extra services defined in the DMM Section 503 with the exception of Money Orders.</li> <li>Both the service type code and the associated extra services codes must be included when a mailer submits Shipping Services File Version 1.6 or higher, Detail Record 1.</li> <li>Domestic Mailing - See <a href="#">Appendix I</a> for a list of the valid three-digit STC to use with the IMpb.</li> <li>International Mailing - The STC must be blank spaces.</li> <li><a href="#">Appendix J</a>, Reference Table 7-1 provides the valid extra services codes to use with three-digit STC.</li> <li><a href="#">Appendix J</a>, Reference Table 7-2 provides the valid extra services codes to use with the two-digit STC.</li> </ul>

Field Name	Field Length	Field Position	Comments
Barcode Construct Code		043-046	<ul style="list-style-type: none"> <li>Domestic Mailing - This three-digit alphanumeric code identifies which combination of ZIP, MID and serial number are used in the IMpb.</li> <li>International Mailing - The barcode construct code must be blank spaces.</li> <li>L01 barcode construct is the only valid barcode construct that can be used when manifesting legacy confirmation service barcodes with eVS.</li> </ul>
Destination ZIP+4		052-055	<ul style="list-style-type: none"> <li>Important Option: The destination delivery address information may be provided in the D2 record in lieu of Destination ZIP+4 and Destination Delivery Point information (version 1.6 only)</li> </ul>
Logistic Manager Mailer ID		075-083	<ul style="list-style-type: none"> <li>The logistics manager may receive the scan event extract if the logistics manager MID are populated in the Logistics Manager Mailer ID field in the Shipping Services file.</li> <li>This MID must be registered in the Business Customer Gateway.                             <ol style="list-style-type: none"> <li>Customers that are considered Mail Owners must complete certification processes to obtain a MID for inclusion in a Shipping Services file.</li> <li>Customers that are considered Logistic Managers must obtain and register a MID for inclusion in a Shipping Services file.</li> </ol> </li> </ul>
Mail Owner Mailer ID		084-092	<ul style="list-style-type: none"> <li>This field is the same as the Client Mailer ID in Shipping Services File Version 1.3 and Version 1.4.</li> <li>The MID must be registered in Business Customer Gateway.                             <ol style="list-style-type: none"> <li>Customers that are considered Mail Owners must complete certification processes to obtain a MID for inclusion in a Shipping Services file.</li> </ol> </li> </ul>

Field Name	Field Length	Field Position	Comments
Container ID 1 Container ID 2 Container ID 3		093-126 129-162 165-198	<ul style="list-style-type: none"> <li>This is the barcode on the container, which can be used to associate the mailpieces within a tray, pallet or a truck.</li> <li>Required for Open and Distribute only when the contents in the container are also manifested.</li> <li>Population of these fields will allow the nesting of the mailpieces within PTR, which will allow scan events of all the containers to be propagated for all the mailpieces within that container.</li> <li>The corresponding Container Type field must be populated when the Container ID field is populated.</li> <li>Container IDs containing alpha characters should be upper case only.</li> <li>For more information on the Intelligent Mail Tray label and barcode click on the following link  <a href="https://postalpro.usps.com/mailing/intelligent-mail-tray-label">https://postalpro.usps.com/mailing/intelligent-mail-tray-label</a></li> <li>For more information on the Intelligent Mail Container label and barcode click on the following link  <a href="https://postalpro.usps.com/mailing/intelligent-mail-container-barcode">https://postalpro.usps.com/mailing/intelligent-mail-container-barcode</a>.</li> </ul>
Container Type 1 Container Type 2 Container Type 3		127-128 163-164 199-200	<ul style="list-style-type: none"> <li>This is a two-digit alphanumeric code that describes the type of container used (i.e.; bedload, sack, tray etc.)</li> <li>Refer to <a href="#">Appendix J</a>, Table 3 for the complete list of the Container Type Indicator Codes.</li> <li>This field must be populated if the corresponding Container ID field is used.</li> </ul>
Post Office of Account ZIP Code		287-291	<ul style="list-style-type: none"> <li>This 5-digit number is the 5-digit ZIP Code of the Post Office that maintains the permit account linked to the mailer's postage payment account.</li> </ul>

Field Name	Field Length	Field Position	Comments
Extra Service Code – 1 <sup>st</sup> Service		399-401	<ul style="list-style-type: none"> <li>This field can contain a two-digit (legacy) extra service code or three-digit (IMpb) extra service code.</li> <li>Both the Service Type Code and the associated extra services codes must be included in the Shipping Services File Detail Record 1.</li> <li>USPS requires this information to confirm that appropriate fees are being noted for each extra service code.</li> <li>Refer to Appendix I for the complete list of Service Type Codes.</li> <li>Refer to Appendix J, Table 7-1 for the complete list of the extra services codes to use with the three-digit STC</li> <li>Refer to Appendix J, Table 7-2 for the complete list of the extra services codes to use with the two-digit STC.</li> </ul>
Extra Service Code – 2 <sup>nd</sup> Service		408-410	
Extra Service Code – 3 <sup>rd</sup> Service		417-419	
Extra Service Code – 4 <sup>th</sup> Service		426-428	
Extra Service Code – 5 <sup>th</sup> Service		435-437	
Extra Service Code – 1 <sup>st</sup> Fee		402-407	<ul style="list-style-type: none"> <li>Each field is required for each extra service code entered.</li> </ul>
Extra Service Code – 2 <sup>nd</sup> Fee		411-416	
Extra Service Code – 3 <sup>rd</sup> Fee		420-425	
Extra Service Code – 4 <sup>th</sup> Fee		429-434	
Extra Service Code – 5 <sup>th</sup> Fee		438-443	
Destination Delivery Point		506-507 (V1.6 and higher)	<ul style="list-style-type: none"> <li>Destination Delivery Point is available in Shipping Services File Version 1.6 and higher. It consists of an additional two digits placed at the end of the ZIP+4 Code.</li> <li>Important Note: Either the destination delivery address or the Destination Delivery Point must be provided effective January 25, 2015.</li> </ul>

### 3.3.3 Detail 2 Record Key Field

The Shipping Services File Detail Record 2 contains fields needed for specific products (such as Hold for Pickup), and must be used for domestic packages when applicable. This record is for “special products”. Today, this would be primarily Priority Mail Express or Hold for Pickup but may be used for other products in the future. For additional information on required fields for Hold for Pickup, see [Section 8.4](#). Detail Record 2 (D2), must immediately follow its respective Detail Record 1 (D1), ensuring they are adjacent and in sequential ascending numeric order within the Shipping Services File.

**Exhibit 4: Detail 2 Record Key Fields**

Field Name	Field Position	Comments
Tracking Number	003-036	<p>This field can contain either the legacy confirmation service barcode or the Intelligent Mail package barcode.</p> <ul style="list-style-type: none"> <li>• The legacy confirmation services barcode and the IMpb use the same barcode symbology (GS1-128).</li> <li>• L01 barcode construct is the only valid barcode construct that can be used when manifesting legacy Confirmation service barcodes with eVS.</li> <li>• Tracking number must be unique for 120 days from date of first use for domestic, 365 days for international.</li> <li>• Must use a 9-digit ZIP Code in the IMpb for Hold for Pickup.</li> </ul>

**3.3.4 Customs Detail Records 3 and 4/Global Detail Records 1 and 2**

Detail Record 3 and Detail Record 4 are required by US Customs for international shipments and mailers completing this information should be aware that Customs information submitted in these records will be electronically transmitted to US Customs. Global detail records G1 and G2 include the same fields as D3 and D4 and also include expanded field lengths for the HS Tariff Code and Customs Descriptions fields. Additionally the G1 and G2 records contain fields to support future enhanced data on Total Landed Costs and Delivery Duties Paid. Detail Record 3 (D3) and Detail Record 4 (D4) or Global Detail Record 1 (G1) and Global Detail Record 2 (G2) must immediately follow their respective Detail Record 1 (D1) and Detail Record 2 (D2), ensuring they are adjacent and in sequential ascending numeric order within the Shipping Services File.

**3.4 Shipping Partner Event File**

Shipping Partner Event Codes can be added that allow shipping partners and other mailers to provide their customers with additional visibility before the Postal Service receives the packages or the Shipping Services file. The Shipping Partner Event file layouts are in [Appendix D-1 and D-2, Shipping Partner Event File Versions 4.0, and 5.0 File Layout Specification](#). An EDI version of the Shipping Partner File has been deployed for customers who want to use the EDI 240 Map to send Shipping Partner Events to the Postal Service. Contact your Sales representative for more information.

**NOTE:** The shipping partner event codes (except for the GX event) are not returned in the scan extract files. The Event Codes and their descriptions are as follows:

- Event Code GX: Label Created
- Event Code 80: Picked up by shipping partner
- Event Code 81: Arrived shipping partner facility
- Event Code 82: Departed shipping partner facility
- Event Code 83: Tendered to Postal Service
- Event Code 84: Arrived agent facility
- Event Code 85: Departed agent facility
- Event Code 86: Delivered by Agent to Merchant
- Event Code 87: Final Disposition by Agent
- Event Code 89: Pre-Shipment Notification, Order Received by Merchant

Events 84-87 are for use with Parcel Returns Service only.

## Shipping Services File

---

Commercial software vendors or mailers who plan to incorporate the Shipping Partner Event Codes into their shipping/manifesting software must have their Shipping Partner Event Code files certified by Confirmation Services Support. We recommend, but do not require, that mailers elect to use Shipping Partner Event Codes during their initial certification process. While its use is optional, it must be properly configured.

The Shipping Partner Event file requires the mailer to be specifically configured for this file type.

# 4 Barcode Requirements

---

The USPS requires the use of an Intelligent Mail package barcode (IMpb) that enhances the automation compatibility of packages on mail processing equipment and adds visibility.

Features include:

1. Concatenated barcode data constructs across all USPS channels that allow for destination routing information (i.e., ZIP Code) and package identification code (PIC) data in a single barcode
2. Channel-specific Application Identifier (AI) that matches a package to a specific payment channel, supporting revenue assurance and analysis
3. Support for six-digit and nine-digit Mailer IDs (MIDs)
4. Three-digit Service Type Codes (STCs) that identify mail class and service combinations. The table of STCs can be found in [Appendix I](#).

The IMpb consists of a data string encoded in a GS1-128 format, subset C.

The Barcode, Package, Intelligent Mail Specification, [USPS2000508](#), provides the specifications for generating and printing the IMpb. Barcodes must meet quality requirements to avoid Package Quality Noncompliance fees.

## 4.1 Barcode Element Differences

Listed below are some of the elements of the IMpb. The use and length of these elements depend on the specific barcode construct or layout.

1. Postal Code Application Identifier (AI): A specific three-digit GS1 Application Identifier used to designate the presence of a Destination Delivery ZIP Code. This field must always be “420” and precedes the Destination ZIP Code.  
**NOTE:** The AI (420) and the ZIP Code (5- or 9-digit) are suppressed in the human-readable representation.
2. Destination ZIP Code: This field may be five- or nine-digits in length.
3. Channel Application Identifier: 92, 93, and 94. The channel application identifier must always be included, and is required to make the barcode unique. Customers must include the channel application identifier as part of the tracking number.
4. Service Type Code (STC): This three-digit field identifies the mail class, product, and/or extra service(s) combination. **NOTE:** Service Type Codes (STCs) for the IMpb differ from the Service Type IDs (STIDs) that are part of the Intelligent Mail barcode (IMb) used for letters and flats.
5. Source Identifier: This two-digit field identifies the type of online source: PC Postage vendor, postage meter, or an internal USPS system such as Click-N-Ship. The source identifier is used only with Channel Application Identifier “94”. Source identifiers are assigned by the Postal Service and are unique to each PC Postage or Meter Vendor. Customers using both six- and nine-digit MIDs will have a unique source identifier for each type.
6. Mailer ID (MID): This field may be six- or nine-digits in length. See additional information in Section 1.4.
7. Serial Number: Every barcode shall contain a serial number. Commercial mailers may use a 7-, 10-, 11-, or 14-digit serial number, depending upon length of their MID. Online mailers/systems may use a 5- or 8-digit serial number, depending upon volume. The serial number is required to remain unique for 120 days.

## 4.2 Tracking Number

The tracking number contains all of the following data elements: Channel Application Identifier, Service Type Code, MID, serial number and MOD10 check digit. The full tracking number, including the Channel Application Identifier (AI), must be provided to your customer on all communications (i.e. email, receipts, or invoices) so that they can track their packages on the USPS Tracking web site, through the USPS mobile application, or the USPS Tracking API.

### 4.3 Channel-Specific Barcode Construct

There are ten constructs for commercial mailers and ten constructs for online/PC postage/postage meter shippers. Each barcode construct is identified by a three-digit code (e.g., "C01"). Commercial mailers' constructs begin with "C", while online/PC postage/postage meter mailers' constructs begin with "N". The barcode construct code must be included in the D1 (position 043-046) record of Shipping Services File. Appendix J, Table 1, describes available constructs more fully. The complete IMpb specifications are located at:

<http://postalpro.usps.com/node/780>. The total length of the barcode will depend on the elements that the shipper includes as part of a valid barcode construct. For example, a 5-digit, 9-digit, or no routing ZIP Code are options for the barcode constructs. The serial number can also be of varied lengths depending on the barcode construct selected.

**4.3.1 Sample Commercial Mailer Construct**

The IMpb for Commercial Mailers can contain up to 34 digits containing the below elements. Not every barcode construct will use every field:

**Exhibit 5: Elements of a Package Barcode for Commercial Mailers**

Type	Field	Field Length	Comments
Overhead	Function one		<ul style="list-style-type: none"> <li>Part of the symbology overhead</li> <li>Used to concatenate successive barcode symbols and must precede an Application Identifier</li> <li>Not shown as part of the human-readable barcode representation, nor is it manually keyed or transmitted as data.</li> </ul>
Routing Information	Postal Routing Code Application Identifier	3	<ul style="list-style-type: none"> <li>Designates a destination ZIP Code. Field is always "420."</li> <li>Will be suppressed from human-readable text</li> </ul>
	Destination ZIP Code	5 or 9	<ul style="list-style-type: none"> <li>May be five- or nine-digits in length. Some products may require this information.</li> <li>Some rates or discounts may require this information.</li> <li>Will be suppressed from human-readable text</li> </ul>
Tracking Information	Channel Application Identifier	2	<ul style="list-style-type: none"> <li>"92" - used with Commercial Mailer (Nine-digit MID)</li> <li>"93" - used with Commercial Mailer (Six-digit MID)</li> </ul>
	Service Type Code	3	<ul style="list-style-type: none"> <li>Identifies the mail class, product, and any extra services.</li> <li>See Appendix I – Valid IMpb Service Type Code.</li> </ul>
Mailer ID	Mailer ID	6 or 9	<ul style="list-style-type: none"> <li>Mailer ID                             <ul style="list-style-type: none"> <li>Nine-digit used with AI "92"</li> <li>Six-digit used with AI "93"</li> </ul> </li> <li>The nine-digit MID must start with a '9'. See Section 1.4 for more information on Mailer IDs.</li> <li>Customers must obtain and register their MIDs via Business Customer Gateway for the products and services they will be using. Go to <a href="https://gateway.usps.com/eAdmin/view/signin">https://gateway.usps.com/eAdmin/view/signin</a></li> </ul>
	Serial Number	7 or 14	<ul style="list-style-type: none"> <li>Use a 7- or 11-digit number with a nine-digit MID.</li> <li>Use a 10- or 14-digit number with a six-digit MID.</li> </ul>
	MOD10 Check Digit	1	<ul style="list-style-type: none"> <li>A MOD10 Check Digit is the final digit in the barcode data string. Calculate the check digit using the PIC portion of the data, which does not include the Postal Routing Code Application Identifier and Destination ZIP Code if included. See section 4.6 for more information on calculating the MOD10 Check Digit.</li> </ul>

## Barcode Requirements

Below is an example of a Commercial Mailer IMpb construct. The example below describes a construct for a customer using a 9-digit MID and a 9-digit ZIP Code in the label ID.

### Exhibit 6: Commercial Mail Construct – C01 Barcode Construct

Format C01	Format for Commercial Mail (Nine-digit Mailer ID, 9-digit ZIP Code)	
	<i>Data Field</i>	<i>Field Length</i>
	Start Code	Symbology Overhead Count
	FNC1	
	“420” Postal Routing Code Application Identifier	3 digits
	Nine-digit Destination ZIP	9 digits
	FNC 1	Symbology Overhead Count
	“92” Channel Application Identifier	2 digits
	Service Type Code	3 digits
	Mailer ID	9 digits
	Serial #	7 digits
	Mod 10 Check Digit	1 digit
	Mod103	Symbology Overhead Count
	Stop Code	
	<b>TOTAL</b>	<b>34 digits</b>

Exhibit 9: Elements of a Package Barcode for Online/PC Postage/Meter Mailers

Type	Field	Field Length	Comments
Overhead	Function one		<ul style="list-style-type: none"> <li>Part of the symbology overhead</li> <li>Used to concatenate successive barcode symbols and must precede an Application Identifier</li> <li>Not shown as part of the human-readable barcode representation, nor is it manually keyed or transmitted as data.</li> </ul>
Routing Information	Postal Routing Code Application Identifier	3	<ul style="list-style-type: none"> <li>Designates the presence of a destination ZIP Code. Field is always "420."</li> <li>Will be suppressed from human- readable text.</li> </ul>
	Destination ZIP Code	5 or 9	<ul style="list-style-type: none"> <li>May be five or nine digits in length. Some products may require this information</li> <li>Some rates or discounts may require this information.</li> <li>Will be suppressed from human- readable text</li> </ul>
Tracking Information	Channel Application Identifier	2	<ul style="list-style-type: none"> <li>"94" (used by Online/PC Postage and Meter Mailers)</li> </ul>
	Service Type Code	3	<ul style="list-style-type: none"> <li>Identifies the mail class, product, and any extra services.</li> <li>See Appendix I – Valid IMpb Service Type Code.</li> </ul>
	Source Identifier	2	<ul style="list-style-type: none"> <li>Used with Channel Application Identifier "94" – Online/PC Postage/Postage Meter Mailers Only.</li> <li>Indicates type of online source/platform that generated the barcode.</li> <li>Customers using both six- and nine-digit MIDs will have a unique source identifier for each type.</li> <li>Each Online Mailer has unique Source Identifiers. Contact the Confirmation Services Support Team at 877-264-9693 to obtain your specific information.</li> </ul>
	Mailer ID	6 or 9	<ul style="list-style-type: none"> <li>Mailer ID                             <ul style="list-style-type: none"> <li>Nine-digit used with AI "92"</li> <li>Six-digit used with AI "93"</li> </ul> </li> <li>The nine-digit MID must start with a '9'. See Section 1.4 for more information on Mailer IDs.</li> <li>Customers must obtain and register their MIDs via Business Customer Gateway for the products and services they will be using. Go to <a href="https://gateway.usps.com/eAdmin/view/signin">https://gateway.usps.com/eAdmin/view/signin</a></li> </ul>
	Serial Number	12 or 13	<ul style="list-style-type: none"> <li>Use a 5, 9, or 13-digit serial number with a nine-digit MID.</li> <li>Use an 8 or 12-digit serial number with a six-digit MID.</li> </ul>
	MOD10 Check Digit	1	<ul style="list-style-type: none"> <li>A MOD10 Check Digit is the final digit in the barcode data string. Calculate the check digit using the PIC portion of the data, which does not include the Postal Routing Code Application Identifier and Destination ZIP Code if included. See section 4.6 for more information on calculating the MOD10 Check Digit.</li> </ul>

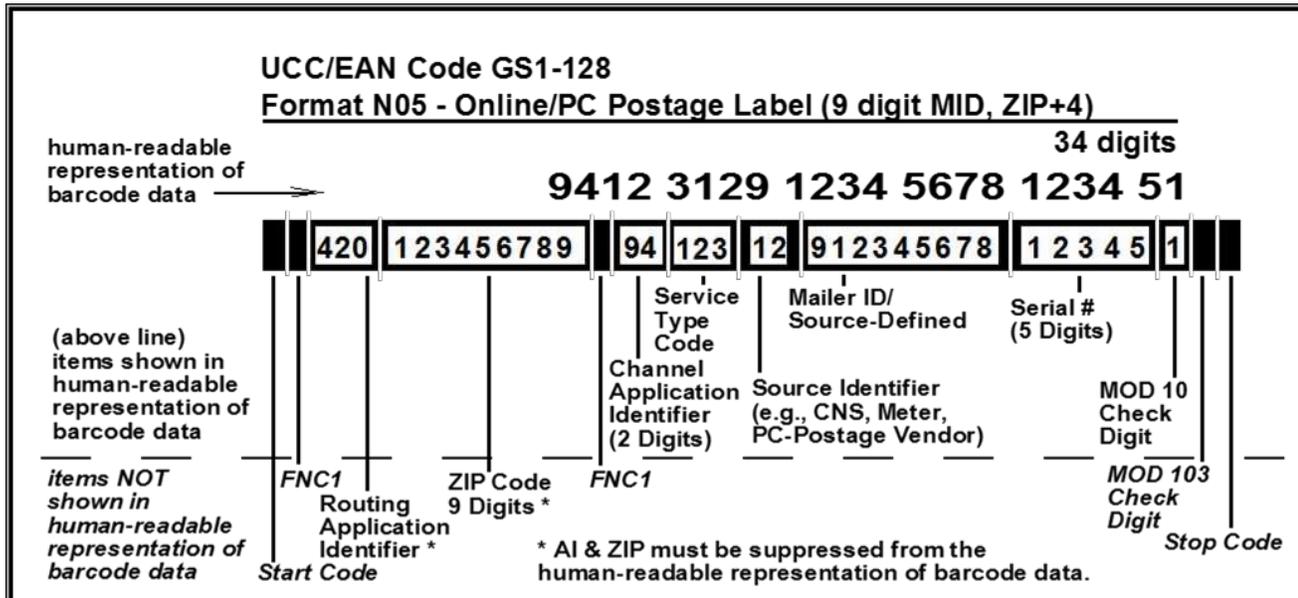

## Barcode Requirements

Below is an example of an Online Mailer IMpb construct. The example below describes a construct for a customer using a 9-digit MID and a 9-digit ZIP Code in the label ID.

### Exhibit 10: Online/PC Postage/Meter Construct – N05 Barcode Construct

Format N05	Online/PC Postage/Meter Label (9-digit Mailer ID, 9-digit ZIP Code)
Data Field	Field Length
Start Code	Symbology Overhead Count
FNC1	
“420” Postal Routing Code Application Identifier	3 digits
Nine-digit Destination ZIP	9 digits
FNC1	Symbology Overhead Count
“94” Channel Application Identifier	2 digits
Service Type Code	3 digits
Source Identifier (ex. CNS, PC Postage Vendor, Meter)	2 digits
Mailer ID / Source Defined	9 digits
Serial #	5 digits
Mod 10 Check Digit	1 digit
Mod103	Symbology Overhead Count
Stop Code	
<b>TOTAL</b>	<b>34 digits</b>

Exhibit 11: Visible and Non-Visible (Encoded/Overhead) Elements – N05 Barcode Construct

## Barcode Requirements

**NOTE:** Concatenated barcodes containing both the standard Package Identification Code used for tracking and the Postal Service routing code should **omit** the word “ZIP” in the human-readable text (Barcode Banner Text) printed above the barcode.

### 4.6 Calculate MOD 10 Check Digit for the Package Identification Code (PIC) / Electronic File Number (EFN)

This process is used to calculate the check digit in the Package Identification Code and the Electronic File Number. Example: assume the PIC is **9212 3912 3456 7812 3456 70**

Description	Number of Digits	Numbers
Application Identifier	2	92
Service Type Code	3	123
Nine-digit MID	9	912345678
Sequential Package ID	7	1234567
MOD 10 check digit	1	0
<b>Total Number of Digits</b>	<b>22</b>	

**The MOD 10 check digit is calculated using the following steps:**

**Step 1:** Set up a two-row matrix, labeled 1 through 22 (or up to 26); 1 being the most significant position in the matrix (i.e., the right-most position). Starting from the least significant position of the matrix (position 22 up to 26), copy each digit of the PIC all the way to position 2 (excluding the position of the check digit shown in the example below by a “?”).

Position	22	21	20	19	18	17	16	15	14	13	12	11	10	9	8	7	6	5	4	3	2	1
PIC	9	2	1	2	3	9	1	2	3	4	5	6	7	8	1	2	3	4	5	6	7	?

**Step 2:** Starting from position 2 of the matrix, add the values (shaded) in the even-numbered boxes.

Position	22	21	20	19	18	17	16	15	14	13	12	11	10	9	8	7	6	5	4	3	2	1
PIC	9	2	1	2	3	9	1	2	3	4	5	6	7	8	1	2	3	4	5	6	7	?

For the example:  $7+5+3+1+7+5+3+1+3+1+9 = 45$

**Step 3:** Multiply the result of step 2 by 3. For the example:  $45 \times 3 = 135$

**Step 4:** Starting from position 3 of the matrix, add up the values (shaded) in the odd-numbered boxes.

Position	22	21	20	19	18	17	16	15	14	13	12	11	10	9	8	7	6	5	4	3	2	1
PIC	9	2	1	2	3	9	1	2	3	4	5	6	7	8	1	2	3	4	5	6	7	?

For the example:  $6+4+2+8+6+4+2+9+2+2 = 45$

**Step 5:** Add up the results for steps 3 and 4. For the example:  $135 + 45 = 180$

**Step 6:** The check digit is the smallest number which, when added to the result obtained through step 5, gives a number that is a multiple of 10.

For example:  $180 + X = 180$ ;  $X = 0$

## Barcode Requirements

**NOTE:** The dimension of the matrix (the number of cells) will vary depending on the length of the Sequential Package ID. In this example, the Sequential Package ID is eight digits long (00000001), requiring a matrix with 22 cells (including the cell for the check digit).

### 4.7 Print Quality Requirements

4.7.1 Printer Resolution	
<input type="checkbox"/>	<ul style="list-style-type: none"><li>The USPS recommends a printer with a minimum resolution of 203 dots per inch (dpi) for printing the Barcode.</li><li>Dots per inch is a measure of a printer's resolution. It is the number of individual dots that can be produced within a linear 1-inch (2.54 cm) space.</li></ul>
4.7.2 Reflectance/Symbol Contrast	
<input type="checkbox"/>	<ul style="list-style-type: none"><li>The mailer must print the barcode on a substrate (e.g., shipping label) which is uniform in color.</li><li>Barcode scanning equipment responds to differences between light reflected from the darkest bar and lightest space within barcode symbols, including quiet zones.</li><li>Reflectance is measured on an USPS-specified reflectance meter or barcode verifier.</li></ul>
<input type="checkbox"/>	<ul style="list-style-type: none"><li>When measured in the red spectral range between 630 nanometers and 675 nanometers, the minimum white bar (space) reflectance (<math>R_s</math>) must be greater than 50 percent, and the maximum bar reflectance (<math>R_b</math>) must be less than 25 percent.</li></ul>
<input type="checkbox"/>	<ul style="list-style-type: none"><li>The minimum print reflectance difference (<math>R_s - R_b</math>) is 40 percent.</li><li>The measurements will be made using a Postal Service-specified reflectance meter or a Postal Service-approved barcode verifier.</li></ul>
4.7.3 Barcode Quality	
<input type="checkbox"/>	<ul style="list-style-type: none"><li>At least 70 percent of the barcodes in each mailing shall have an overall symbol grade of "B" or better when measured with the appropriate aperture size in the red spectral range between 630 nanometers (nm) and 675 nm.</li><li>The remainder shall measure no less than a Symbol Grade of "C".</li><li>Specified symbol grades are based upon the ISO/IEC 15416 Barcode Print Quality Guideline (formerly INCITS 182) which recommends a method of measuring the quality parameters of printed barcode symbols.</li></ul>
<input type="checkbox"/>	<ul style="list-style-type: none"><li>The different symbol grades indicate print quality. Only the use of the appropriate aperture for the specific X-dimension of the barcode symbol under consideration will guarantee that the grade obtained from measurement of this symbol is the correct grade according to the ISO/IEC 15416 specified methodology.</li><li>The mailer shall use a 10-mil aperture (0.250 mm) when measuring barcodes printed with X-dimensions between 0.013 and 0.021 inches (13 – 21 mils).</li></ul>

## 4.8 Physical Barcode Requirements

4.8.1 Dimension	
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>A barcode's X-dimension is the nominal width of the narrowest bar or space element within the barcode. X-dimensions are typically measured in mils. One mil is equal to 1/1,000 of an inch.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>The mailer shall print the barcode with an X-dimension measuring between 0.013 inch (13.0 mils) and 0.021 inch (21.0 mils).</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>X-dimensions ranging from 0.015 to 0.017 inch inclusive are preferred.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>The X-dimension shall remain constant throughout the barcode symbol and not vary.</li> </ul>
4.8.2 Barcode Length	
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>The overall length of the barcode is a function of the number of characters encoded and the X-dimension used.</li> </ul>
4.8.3 Barcode Height	
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>The overall minimum height of the barcode shall measure at least 0.75 inch, unless allowed by exception.</li> </ul> <p><b>NOTE:</b> The Postal Service is also providing an exception process, for mailers of small USPS Ground Advantage (formerly First-Class Package Service) and USPS Marketing Mail parcels lacking sufficient label space to apply an IMpb or extra services barcode meeting the ¾ inch height requirement, to submit barcodes of at least ½ inch in height for USPS testing and approval.</p>

## 4.9 Barcode Identification and Layout Requirements

4.9.1 Human-readable Text	
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>USPS has simplified the Barcode Banner Text to read "USPS TRACKING #" for items that do not require signatures or "USPS SIGNATURE TRACKING #" for items that do require signature. This Barcode banner text is not used for Certified Mail, Registered Mail, Adult Signature, Parcel Return Service (PRS), Priority Mail Open and Distribute or Priority Mail Express.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Text height minimum of 0.09 inch.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Bold, Sans serif type (e.g., Helvetica or Arial)</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Centered horizontally above the barcode.</li> <li>Human-readable text cannot extend beyond the length of the identification bars.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>All uppercase using standard spacing.</li> </ul>

## Barcode Requirements

<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Printed at a minimum 0.125 inch above the barcode, but not more than 0.25 inch above the barcode.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Printed at a minimum 0.031 inch below the identification bar.</li> </ul>
<b>4.9.2 Human-readable Number</b>	
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Text height minimum of 0.09 inch.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Bold, Sans serif type (e.g., Helvetica or Arial)</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Centered horizontally below the barcode.</li> <li>Human-readable numbers cannot extend beyond the length of the identification bars.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Printed at a minimum 0.125 inch below the barcode, but not more than 0.25 inch below the barcode.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Printed at a minimum 0.031 inch above the identification bar.</li> </ul>
<b>4.9.3 Parsing</b>	
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>For all labels (non-concatenated and concatenated), the human-readable representation of the barcode must be parsed in groups of four with any remaining digits grouped at the end.</li> <li>The Postal Routing Code AI (420) and Destination ZIP Code should be suppressed and not printed as part of the human-readable number.</li> <li>The IMpb requires all mailers to include a routing ZIP Code on their package labels and prefers the use of a concatenated barcode format.</li> </ul> <p>Examples: 9205 52 39 1234 56 78 12 34 5671  9305 5123 1234 561 2 3456 6789 01  9405 52 31 2123 4561 234567 81 or 9405 5079 1234 45678 1234 51</p>
<b>4.9.4 Identification Bars</b>	
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>A minimum clear space of 0.031 inch above the human-readable text of the barcode to distinguish the IMpb from other information on the shipping label.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>A minimum clear space of 0.031 inch below the human-readable representation of the barcode to distinguish the IMpb from other information on the shipping label</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>Must be centered horizontally above/below the barcode.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>The line length at a minimum can extend to the barcode and horizontal clearance.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>The line length at a maximum can be the entire width of the label.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>At a minimum 0.031 inch thick.</li> </ul>
<input type="checkbox"/>	<ul style="list-style-type: none"> <li>At a maximum 0.063 inch thick.</li> </ul>

## 4.10 Quiet/Clear Zone Requirements

4.10.1 Horizontal Barcode Quiet/Clear Zone	
☐	<ul style="list-style-type: none"> <li>A clear space measuring at least 10 times the X dimension must be maintained immediately to the left and right of the barcode. No text, images, or other markings may appear in this area.</li> </ul>
☐	<ul style="list-style-type: none"> <li>A minimum left/right clear zone of 0.25 inch is recommended.</li> </ul>
4.10.2 Vertical Barcode Quiet/Clear Zone	
☐	<ul style="list-style-type: none"> <li>A clear zone measuring at least 0.125 inch must be maintained directly above the barcode. No text, images, or other markings may appear in this area.</li> </ul>
☐	<ul style="list-style-type: none"> <li>A clear zone measuring at least 0.125 inch must be maintained directly below the barcode. No text, images, or other markings may appear in this area.</li> </ul>

## 4.11 IMmb Intelligent Mail Matrix Barcode

Due to the risks from certain packaging for curvature, fold-overs and creased shipping labels that distort the current GS1-128 IMpb barcode such that the barcode becomes unreadable the Postal Service implemented the Intelligent Mail Matrix Barcode (IMmb) technology in 2023. The Postal Service is requiring mailers to add one supplemental GS1-DataMatrix (2D) IMmb to domestic shipping labels to improve package visibility. The IMmb should be placed in the address block to the left of the Delivery Address. This requirement is effective January 19, 2025. The Postal Service is also recommending a second IMmb in the lower right corner of the shipping label. The addition of two (2) supplemental GS1-DataMatrix IMmbs to shipping labels will provide a total of three opportunities for the package to be scanned and tracked.

The Postal Service is updating its systems and processes to detect the absence of the Intelligent Mail Matrix Barcode (IMmb) on all shipping labels. This includes packages mailed using USPS Ground Advantage, Priority Mail, Priority Mail Express, Parcel Select, Media Mail, Library Mail, USPS Marketing Mail, Parcel Return Service and USPS Return. Package Quality Noncompliance assessments for Hazardous Materials (HAZMAT) packages with missing or mismatched IMmb will begin January 19, 2025. Package Quality Noncompliance assessments for non-HAZMAT packages with missing or mismatched IMmb will begin April 1, 2025.

## **4.12 Documentation**

Copies of ANSI documents may be obtained by visiting their website at: <https://global.ihs.com> or by writing to:

GLOBAL ENGINEERING DOCUMENTS

## 5 Customer Interface Files

### 5.1 File Retention

The Postal Service retains extract files on its servers for 30 days for each customer’s account. Customers may choose to delete the files from the Postal Service servers prior to the 30-day expiry period. The Postal Service will automatically delete the oldest copy of each file type on the 31<sup>st</sup> day.

### 5.2 Shipping Services File Confirmation/Error/Warning Reports

Each time a mailer submits a Shipping Services File, PTR processes and edits the file. When data does not meet USPS specifications, PTR generates an error or a warning. Single records or the entire file may be rejected and/or certain records may receive warnings for minor problems. A message line that starts with an “E” indicates this is an Error message. If the message text does not start with the word ‘FAIL’ then record will be rejected. If the message text starts with the word ‘FAIL’ then the record will be loaded and a corrections file will be required to ensure successful downstream processing of customs related data. A message line that starts with a “W” indicates this is a Warning Message and the record will be posted. Mailers must review their error/warning files to determine if there are errors or warnings that need to be addressed. Corrections may be sent to address errors, see Section 7.2 Corrections Process and Section 7.3 File Retransmission. The confirmation/error/warning file is available as a “report” format (human-readable file) or a “data” format.

#### 5.2.1 Shipping Services File Confirmation/Error/Warning Report - Version 1.5

The processing of the Shipping Services file version 1.6 will generate the Shipping Services Confirmation Error/Warning report version 1.5.

[Appendix E-1.1](#) Provides the Confirmation/Error/Warning Report “Data” File Version 1.5 File Layout Specification

[Appendix E-1.2](#) Provides the Confirmation/Error/Warning “Report” File Version 1.5 File Format

[Appendix E-3](#) Provides Error/Warning Messages

File Transmission Method	Naming Standard
SFTP	ERRWRN0.V15.RPT.MMDDhhmmss

MMDDhhmm signifies the following:

MM = numeric representation of the month.

DD = day of the month.

hhmm = the hour and minute that the file or report was generated.

### 5.2.2 Shipping Services File Confirmation/Error/Warning Report - Version 1.7

The processing of the Shipping Services file version 1.7 or file version 2.0 will generate the Shipping Services Confirmation Error/Warning report version 1.7.

[Appendix E-1.3](#) Provides the Confirmation/Error/Warning “Data” Version 1.7 File Layout Specification

[Appendix E-1.4](#) Provides the Confirmation/Error/Warning “Report” Version 1.7 Format

[Appendix E-3](#) Provides the Confirmation/Error/Warning Messages List

### 5.3 Shipping Partner Event File Confirmation/Error/Warning Report – Version 2.0

Each time a mailer submits a Shipping Partner Event File, PTR processes and edits the file. When data does not meet USPS specifications, PTR generates an error or a warning. Single records or the entire file may be rejected and/or certain records may receive warnings for minor problems. Mailers must review their error/warning files to determine if there are errors or warnings that need to be addressed.

[Appendix E-2.1](#) Provides the Shipping Partner Event File Confirmation/Error/Warning “Data” File Version 2.0 File Layout Specification

[Appendix E-2.2](#) Provides the Shipping Partner Event File Confirmation/Error/Warning “Report” File Version 2.0 File Layout Specification

[Appendix E-3](#) Provides the Confirmation/Error/Warning Messages List

File Transmission Method	Naming Standard
SFTP	Version 2.0 - ERRWRNO1.V20.RPT.MMDDhhmmss

MMDDhhmm signifies the following:

MM = numeric representation of the month.

DD = day of the month.

hhmm = the hour and minute that the file or report was generated.

### 5.4 eVS Postage Payment Extract File - Version 1.1/2.0

The eVS Postage Payment Extract file contains all of the header records submitted by the eVS mailer along with the associated detail records. Multiple header records may be combined in a single extract file. A partial group of detail records associated with a single header record may also be sent in multiple extract files. This grouping may not match the consolidated manifest files submitted by the mailer due to the timing and processing of the manifest data by the tracking and payment systems.

Mailers may indicate their preference to receive:

1. No payment extract
2. Complete payment extract
3. Partial payment extract (without any postage fields)

**NOTES:**

1. eVS Mailers should contact the Confirmation Services Support Team at 877-264-9693 to have the Postage Extract Format Indicator set.
2. eVS Mailers should contact the eVS program office if they would like to receive version 2 of the eVS postage payment extract file.
3. eVS mailer now have the option to receive their eVS postage payment file every 15 minutes. eVS Mailers should contact the eVS program office if they would like this new “batch” feature turned on.

The eVS Postage Payment Extract files will contain all rate ingredients reflecting any updates or changes made by eVS along with the postage rate calculated and charged by eVS for each item. The payment life cycle in eVS typically processes the payment for all manifest data received as a one-step process. Hence, a single payment extract reflecting the payment status of “PROCESSED” will be generated by eVS. However, in some cases, the payment process may involve multiple or interim steps (i.e. ERROR, PENDING, CLOSED). In these scenarios, multiple payment extracts may be generated by eVS any time a change in status occurs for payment of specific item.

***Appendix F-1 Provides the eVS Postage Payment Extract File Version 1.1 File Layout Specifications***

***Appendix F-2 provides the eVS Postage Payment Extract File Version 2.0 File Layout Specifications***

**5.4.1 File Naming Convention**

The payment system (eVS) will generate the payment extract files using the following naming convention. These files will be sent to the Product Tracking and Reporting system (PTR) to be forwarded on to the appropriate mailers. The file names received by the mailers may not match this convention depending on the data exchange interface (SFTP, EDI, etc.) used for the transfer.

File Type v1.1 and 2.0	Naming Standard/Example	Corresponding PTR Manifest file
eVS Postage Extract - Complete	eVSPaymentComplete-MID-YYYYMMDD#####.pse  example: eVSPaymentComplete-010101010-20091028123456.pse	PTSManifest-20091028123456.raw PTSManifest-20091028123456.cew

YYYYMMDD##### signifies the following: YYYY = numeric representation of the year.  
 MM = numeric representation of the month  
 DD = day of the month.  
 ##### = sequence number that the file was generated.

**5.5 Reconciliation Extract File – Version 1**

The reconciliation extract file provides status and payment information to eVS/PRS mailers for proposed and actual monthly adjustments. Customers must request both the payment extract and reconciliation extract files.

***Appendix H provides the Reconciliation Extract File Version 1.0 File Layout Specifications***

### 5.5.1 File Naming Convention

The payment system (eVS) will generate the reconciliation extract files using the following naming convention. These files will be sent to PTR to be forwarded on to the appropriate mailers. The file names received by the mailers may not match this convention depending on the data exchange interface (SFTP, EDI, etc.) used for the transfer.

File Type v1.0	Naming Standard/Example
eVS Reconciliation Extract-	eVSReconciliationExtract-MID-YYYYMMDD#####.rxt  example: eVSReconciliationExtract--010101010-20091028123456.rxt

YYYYMMDD##### signifies the following:  
 YYYY = numeric representation of the year.  
 MM = numeric representation of the month  
 DD = day of the month.  
 ##### = sequence number that the file was generated.

### 5.6 Scan Event Extract File – Versions 1.5, 1.6, and 2.0

When mailers communicate electronically with USPS by transmitting a Shipping Services File, they receive — up to 16 times daily — a scan event extract file. (Customers may request Premium Extract service, which is sent 96 times daily, through Program Registration). This file contains every scan event that occurs on every package that the mailer included in the Shipping Services file. A mailer must successfully transmit the Shipping Services File—and the Detail Records must be processed and posted—in order for USPS to send the mailer scan event extracts.

**NOTE:** 1. eVS customers will receive their file extracts before their Shipping Services file extracts are provided. 2. The default format for the scan event file is version 1.5. To request version 1.6 or version 2.0 customer must contact the Confirmation Services Support Team at 877-264-9693 to have the scan version number set.

In addition, the event information will then be available to customers on the USPS Tracking Web site, through the USPS mobile application or the USPS Tracking API.

- Appendix G-1 Provides the Scan Event File Version 1.5 File Layout Specifications***
- Appendix G-2 Provides the Scan Event File Version 1.6 File Layout Specifications***
- Appendix G-3 Provides the Scan Event File Version 2.0 File Layout Specifications***
- Appendix G-4 Provides the Scan Event Codes***

File Transmission Method	Naming Standard
SFTP	DETEXTRO.V15.RPT.MMDDhhmmss
Internet	detextro1.V15.rpt.MMDDhhmm

**NOTE:** To improve visibility, eVS customers will receive scan events in extract files when events are captured prior to receipt of the Shipping Services file.

MMDDhhmm signifies the following:

MM = numeric representation of the month.

DD = day of the month.

hhmm = the hour and minute that the file or report was generated.

MMDDhhmmss signifies the following:

MM = numeric representation of the month.

DD = day of the month.

hhmmss = the hour, minute and second that the file or report was generated.

**This Page Intentionally Left Blank**

## 6 Communications

---

### 6.1 Transmission Methods

Customers must transmit their Shipping Services Files to PTR using one of the following communication protocols:

1. Secure File Transfer Protocol (SFTP)
2. Electronic Data Interchange Internet Applicability Standard 2 (EDIINT AS2)
3. Parcel Data Exchange (PDX)

New customers are required to establish secure connectivity during the onboarding process to protect their networks and data.

#### 1. Secure File Transfer Protocol (SFTP)

SFTP is a secure connectivity option available to exchange files between USPS server and customer server. Steps to complete SFTP setup:

1. Work with the Technical team in your organization to gather following information
  - Username
  - Postal SFTP server name
  - GET or PUT
  - Frequency/schedule of file transfer
  - Outward Facing IP Address
  - MMC#
  - MID
  - Filename(s) with directory path
  - Contact details - Name, Email, Phone number of the Technical Team Liaison in your organization
  - Schedule by when you plan to complete migration
2. Send an email to [DELIVERY.CONFIRMATION@usps.gov](mailto:DELIVERY.CONFIRMATION@usps.gov) in the following format listed below:

Subject: [SFTP] Request – [Mailer ID(s)]

Email body:

[Customer/Company Name] is interested in transitioning to secure protocol SFTP for [Mailer ID(s)].

The following contacts will be:

Business Contact:	Title:
Phone:	Email:
Technical Contact:	Title:
Phone:	Email:

3. Contact USPS Confirmation Services Support Team at 877-264-9693 if you have any questions.
4. USPS Data Transfer Services team will get in touch with your technical team Liaison within 1-2 weeks to schedule connectivity testing and confirm the schedule for the conversion in Production environment.
5. Refer to the SFTP Transition factsheet for additional information.

**2. Electronic Data Interchange Internet Applicability Standard 2 (EDIINT AS2)**

This secure connectivity option requires that the Business Partner use an EDIINT AS2 capable software product. Steps to complete SFTP setup:

1. Send an email to DELIVERY.CONFIRMATION@usps.gov in the following format listed below.

Subject: [EDIINT AS2] Request – [Mailer ID(s)]

Email body:

[Customer/Company Name] is interested in transitioning to [EDIINT AS2] for [Mailer ID(s)].

The following contacts will be:

Business Contact:	Title:
Phone:	Email:
Technical Contact:	Title:
Phone:	Email:

2. Contact USPS Confirmation Services Support Team at 877-264-9693 if you have any questions.
3. USPS Data Transfer Services team will get in touch with your technical team Liaison within 1-2 weeks to schedule connectivity testing and confirm the schedule for the conversion in Production environment.
4. Refer SFTP Transition factsheet for additional information.

**3. Parcel Data Exchange (PDX)**

PDX is a web based interface that allows customers to upload and/or download files between USPS server and customer server. This connectivity option offers quick and easy setup that allows mailers to start uploading shipping files on the same day.

1. Refer PDX Web Application User Guide and follow the steps as listed in the guide: <https://postalpro.usps.com/node/3481>
2. Refer PDX API User Guide and follow the steps as listed in the guide: <https://postalpro.usps.com/shipping/parcel-data-exchange-pdx-api>
3. Contact USPS Confirmation Services Support Team at 877-264-9693 if you have any questions.
4. Refer SFTP Transition factsheet for additional information.

### 6.1.1 Things to Know about File Transmissions

1. eVS mailers are required to utilize a secure file transfer method when transmitting manifest files to the Postal Service and when retrieving Bulk Proof of Delivery (BPOD) signature information.
2. Mailers may choose from one of the connectivity options listed above for sending and receiving data from the Postal Service. However only one method can be used after certification. Mailers needing to change the transmission method must contact USPS Confirmation Services Support Team at 877-264-9693 for technical assistance.
3. Mailers must have a LogonID and Password, obtainable in the application process described in Section 2, Getting Started, before attempting to transmit Shipping Services files to the Postal Service for Confirmation Services. If you choose PDX connectivity option then use your BCG User Name and Password.
4. Multiple Shipping Services files may be combined (concatenated) and sent together in one transmission. There is no limit to the number of Shipping Services files that may be sent in any single file transmission. A Shipping Services file is defined as one Header Record with any number of Detail Records tendered at one physical location.
5. A separate Shipping Services file is required for mail tendered to each different Postal Service entry facility. For eVS customers, in the Header Record of the Shipping Services file, the entry facility ZIP Code Field must contain the ZIP Code represented by the Postal Service facility where the mail is tendered.
6. The Shipping Services file for Confirmation Services should be transmitted to the Postal Service before or at the time which mail is tendered to the Postal Service.

## 6.2 Production Sending/Retrieving File Instructions

### 6.2.1 Secure Protocol Options

Secure Protocol Options			
Communications Method	Communications Products	Transport/ Protocol	Encryption/ Key Management
<p><b><u>EDI/INT AS2 (preferred solution)</u></b></p> <p>The "Internet Engineering Task Force Working Group for Electronic Data Interchange – Internet Integration" is an open standards group that defines how to move standard EDI data over the Internet (charter and standards available at <a href="http://www.ietf.org/html.charters/ediint-charter.html">http://www.ietf.org/html.charters/ediint-charter.html</a>). The USPS is equipped to leverage these existing standards to connect with remote business partners. This option requires that the Business Partner also use an EDIINT capable software product.</p>	<p>There are more than 20 interoperable EDIINT certified software products currently available; for further information consult The Drummond Group. <a href="http://www.drummondgroup.com">www.drummondgroup.com</a></p> <p>Product currently utilized by USPS is Gateway Interchange supporting AS.2 communications.</p>		<p>Transaction data is generally signed, with the keys provided in X.509v3 certificates. The Secure Hash Algorithm (SHA2) is used to provide an integrity check against tampering. Body encryption is performed with AES 256 bit encryption. Receipts or acknowledgements may be signed and are generally sent and expected for both the transport and application layers to provide non-repudiation of receipt.</p>
<p><b><u>SFTP/PGP</u></b></p> <p>USPS provides an SFTP solution to allow direct transmissions of files to USPS and for delivery of files to business partner SFTP servers. USPS also provides a solution for business partners that do not have SFTP server to use SFTP to PUT/deposit and GET/pick-up files.</p> <p>While SSH secures the authentication and transport of files, USPS still requests that all files transmitted are PGP encrypted so that data at rest is still protected and data integrity can be assured.</p>	<p><b><u>SFTP</u></b> is part of the SSH suite. More information may be found at: <a href="http://en.wikipedia.org/wiki/SSH">http://en.wikipedia.org/wiki/SSH</a></p> <p>Users may implement the full SSH suite or use programs which implement SFTP. A list of products, both commercial and open source, may be requested from USPS.</p> <p>PGP and GPG are implementations of a popular encryption package.</p> <p><b><u>PGP</u></b> PGP Corporation <a href="http://www.pgp.com">www.pgp.com</a></p> <p><b><u>GnuPG</u></b> Freeware</p>	<p><b><u>SSH</u></b> is used as a secure, encrypted transport layer for SFTP over port 22.</p>	<p>SSH automatically negotiates a secure encrypted link per RFC 4253 which handles encryption, compression and integrity verification automatically.</p> <p>Our standard SFTP implementation also prefers payload encryption:</p> <p>Current USPS PGP public key is RSA algorithm and 2048 bit key length. For partner keys.</p> <p>Supported body encryption algorithms include 256 bit AES and 128 bit Triple-DES</p>

Secure Protocol Options			
Communications Method	Communications Products	Transport/ Protocol	Encryption/ Key Management
<p>This option prefers that the Business Partner also use SFTP and PGP capable software products.</p>	<p><a href="http://www.gnu.org">www.gnu.org</a></p>		
<p><b><u>Provisioning using EDIINT AS2</u></b></p> <p>Because the setup and maintenance of AS2 software can be costly, USPS can provide a preconfigured software package, called Gateway Interchange or Activator, which you download and install on your server. The software uses the AS2 protocol over HTTPS to transfer files securely with USPS. With this software, you have the option of using the Secure web mailbox configuration which ensures that all file transfers are initiated on the partner's end (USPS does not connect to your server directly). USPS and Axway provide all support and updates to the software. For more information on AS2, see the detailed description under our preferred solution section.</p>	<p>Gateway Interchange Activator client, limited license version. (see USPS Provisioning Services Prerequisites Guide for supported OS versions for this client)</p>	<p><b><u>AS2: S/MIME over HTTP(S)</u></b></p> <p>Server ports may be placed outside of the canonical 80/443 set for technical or architectural reasons.</p>	<p>Transaction data is generally signed, with the keys provided in X.509v3 certificates. The Secure Hash Algorithm (SHA2) is used to provide an integrity check against tampering. Body encryption is performed with AES 256 bit encryption. Receipts or acknowledgements may be signed and are generally sent and expected for both the transport and application.</p>
<p><b><u>Connect: Direct</u></b></p> <p>Peer to Peer communication solution</p> <p>Every new connect direct implementation requires the 28 day NCRB approval and NPEG implementation process. Each setup requires complete analysis,</p>		<p>Used for external data transfer using</p> <p>IP</p> <p>Frame Relay</p>	<p>With Secure+ enabled the product supports session key negotiation for TLSv1.2 via RSA with body encryption by AES-256 in Cipher Block Chain mode and signing by SHA-2 certificates. Key verification during initial connection configuration should occur by phone.</p>

Secure Protocol Options			
Communications Method	Communications Products	Transport/ Protocol	Encryption/ Key Management
<p>data flow setup, and integration that does not exist.</p> <p>All implementations require trading partner and application cooperation and testing in order to meet timelines.</p> <p>The 5 day SLA does not apply to Connect Direct.</p>			

**6.2.1.1 Test Environment for Mailers (TEM) Sending/Retrieving File Instructions**

PTR and *PostalOne!* maintain separate test environments that duplicate the current functionality of their production environments. During the file certification process, mailers should submit their manifest files to the PTR TEM environment (see section 6.4.2 for Sending Shipping Services Files). eVS manifest files received in the PTR TEM are processed and routed to the *PostalOne!* TEM where eVS generates postage statements and all corresponding reports. See section 6.4 for Access the eVS TEM environment.

Customers will be able to use the same MID and Login ID in both the TEM and Production environments. The TEM extract processes will begin 1 hour after successful completion of the TEM manifest processes.

All mailers are encouraged to continue their TEM use after they have begun live mailings; TEM allows mailers to validate internal software changes as needed without a formal testing schedule.

**6.2.2 Communication Using Internet Server SFTP for TEM**

**6.2.2.1 Internet SFTP - Sending Shipping Services Files to PTR TEM**

Throughout these instructions, the term “**server name**” refers to the server name and the term “**logonid**” refers to the mailer’s Postal Service LogonID; for example, mmc001.

When either the “**server name**” or “**logonid**” term is used, the appropriate server name and LogonID should be substituted in the commands. For security purposes, the Internet connection must have forward/reverse lookup enabled. All file names, directories, *logonid* and *password* are **case sensitive**.

## Communications

The servers use standard SFTP commands and can be accessed using any standard GUI or the command line. The example commands used here are typical for use with command line SFTP client software. Please refer to the software's documentation for specific information on using a GUI software application.

Step	Notes
Connect to the Internet, using SFTP client software. <i>pts-ftp-in-cat.usps.gov</i> using your <i>logonid</i> and <i>password</i> .	<i>Example: pts-sftp-in-cat.usps.gov</i> using <i>logonid</i> and <i>password</i>
Change the directory to <i>/home/delconf/incoming</i> (all lowercase)	This is the directory where the user will be placing Shipping Services files.
Set the transmission mode to ASCII. Files sent to the Postal Service Internet server must not be compressed.	
Files must be sent using the following naming convention: <i>&lt;logonid&gt;.manifest</i>	<i>Example: mmcw93.manifest</i>
If sending multiple separate files, <i>in one session or in multiple sessions within a few minutes of each other</i> , use the following naming convention for subsequent files to avoid overwriting previous file(s): <i>&lt;logonid&gt;&lt;seq&gt;.manifest</i>	<i>Example: mmcw93a.manifest</i>  Begin with the letter a for the sequence identifier and continue with b, c, etc. for subsequent files.
Use the <i>put</i> command to transfer the file to the directory: <i>/home/delconf/incoming</i>	<i>Example: put &lt;localfilename&gt;</i> <i>&lt;logonid&gt;.manifest</i>
When sending <i>Shipping Partner Event Code Files</i> , use the following naming convention: <i>&lt;logonid&gt;.consolid</i>	
If sending multiple <i>Shipping Partner Event Code Files</i> , <i>in one session or in multiple sessions within a few minutes of each other</i> , use the following naming convention for subsequent files to avoid overwriting previous file(s): <i>&lt;logonid&gt;&lt;seq&gt;.consolid</i>	<i>Example: mmcw93a.consolid</i>
When sending <b>Shipping Partner Event Code Files</b> , use the following naming convention: <b>&lt;logonid&gt;.consolid</b>	
If sending multiple <b>Shipping Partner Event Code Files</b> , <i>in one session or in multiple sessions within a few minutes of each other</i> , use the following naming convention for subsequent files to avoid overwriting your previous file(s): <b>&lt;logonid&gt;&lt;seq&gt;.consolid</b>	<i>Example: mmcw93a.consolid</i>

### 6.2.2.2 Retrieving Shipping Services files from PTR TEM

Step	Notes
Connect to the Internet, using FTP client software. <b><i>pts-sftp-out-cat.usps.gov</i></b> using <b><i>logonid</i></b> and <b><i>password</i></b> .	<i>Example: pts-sftp-out-cat.usps.gov</i> using <b><i>logonid</i></b> and <b><i>password</i></b>
Change the directory to <b><i>/red/logonid/incoming</i></b> (all lowercase).	This is the directory where the user will be retrieving Shipping Services files.
To see what files are available for pickup, use the directory list command. The command is: <b><i>dir</i></b> .	
Use the get command to retrieve the file from the directory: <b><i>/red/logonid/incoming</i></b>	<i>Example: get errwrno.rpt.11203520</i>
Copy the files to local computer.	
<p>The Postal Service maintains 30 days' worth of files on the server. User may choose to delete the files from the Postal Service server. If the user does not delete the files, the Postal Service will automatically delete the oldest copy of each file type on the 31<sup>st</sup> day.</p> <p>To delete the file, use the <b><i>del</i></b> command.</p>	<i>Example: del errwrno.rpt.MMddhhmm</i>

### 6.3 Accessing eVS TEM

Step
Log into the Business Customer Gateway.
Click the Electronic Data Exchange ( <i>PostalOne!</i> ) link under the Mail & Transport heading. Select Mailing Reports from the “Manage Mailing Activity” menu.
For eVS: click the “Electronic Verification Activity (EVS)” link.
For PRS: click the “Electronic Return Activity (PRS)” link.

## 7 Manifest Error Process

### 7.1 Duplicate Records

Customers must not repeat (duplicate) serial numbers for Electronic File Numbers used in Header Records or Package Identification Codes (PICs) used in D1 Records for 120 days from date of first use.

Duplicate records for eVS shipments that are created and transmitted to eVS are handled as follows:

- a. *Header Records* – Duplicate Header Records with the associated Detail Records 1 that are successfully processed by PTR will be forwarded to eVS. eVS, however, will reject these duplicate Header Records and all their associated Detail Records 1.
- b. *Detail Records 1* -- Duplicate Detail Records 1 processed by PTR, whether duplicated within the same file, same manifest or previously manifested within the past 120 days, are forwarded to eVS. eVS will process the duplicate Detail Records 1 and charge for these duplicates as part of the normal automatic postage debiting process.

### 7.2 Corrections Process

The Shipping Services File is edited according to the “Contents Rules and Limitations” listed in the Shipping Services File format version 1.6 or 1.7/2.0 File Layout Specifications. Records that fail the edits for a required field are rejected as errors. Records that fail the edits for non-required fields are listed as warnings but are processed and stored. All errors and warnings as well as the field(s) in error are provided in the Confirmation/Error/Warning file.

Any record that is rejected as an error can be corrected and re-sent to the USPS. All corrected records must be sent in a Shipping Services File version 1.6 or 1.7/2.0 with the Electronic File Type of “4 – Corrections”. The Electronic File Number of the original file containing the records in error **must be used** in the “corrections” file.

Corrections should be resubmitted within 24 hours, to ensure receipt of all delivery information.

eVS customers should submit correction files before the end of the reconciliation period (the 10th of the subsequent month) to avoid being charged twice for the same mail piece.

The following fields can be corrected in the D1 Record:

- Class of Mail\*
- Payment Account Number
- Rate Indicator
- Processing Category Code
- Zone Number
- Destination Rate Indicator
- Postal Routing Barcode Indicator
- Weight
- Dimensional Weight
- Length
- Width
- Height
- Extra Services Codes 1 through 5
- Extra Services Fees 1 through 5
- Value of Article
- COD Amount Due Sender
- Surcharge Type
- Surcharge Fee
- Discount Type
- Discount Fee
- Destination ZIP Code\*
- Destination ZIP+4\*

The following fields can be corrected in the D3/G1 Record:

- Customs Barcode Number
- Sender Last Name
- Sender First Name
- Sender Business Name
- Sender Address
- Sender City Name
- Sender State
- Sender Zip Code
- Sender Country Code
- Recipient Last Name
- Recipient First Name
- Recipient Business Name
- Recipient Delivery Address
- Recipient City Name
- Delivery Country Code
- Total Weight
- Package Value
- Description of Package
- Content Comments

The following fields can be corrected in the D4/G2 Record:

- Customs Item Detail Number
- Customs Description
- Quantity of Article
- Value of Article

The Corrections file is edited and updated in PTR and provided to eVS if applicable.

\* The Class of Mail, Destination ZIP and Destination ZIP+4 are only updated if the manifest event (MA) is the highest precedence event at the time of the correction.

### 7.3 Unused Labels

Unused Labels are labels that were manifested but packages with these labels were not mailed. There are two methods for submitting an unused label refund: the online interface in *PostalOne!* and a Type 4 Shipping Services File (SSF) also known as a corrections file. See Publication [205](#) 4.3.15 for additional information on submitting unused label refund request.

- Submit the same detail record and same header record, set the file type in the Header to type 4 and the removal indicator in the detail record to Y.
- The Header Record must be identical to the original Manifest, except for setting the Electronic File Type to 4.
- The detail record should be identical to the original manifest, except for setting the removal indicator to Y.
- The correction file should only contain the records for which a refund is requested, not the entire original manifest.

For example:

If the original manifest had 5 Header Records each with 100 Detail records and you wanted to request refunds on 2 different detail records under 2 different headers then prepare two corrections files; each correction file (file type 4) should contain one header row (H1) with an EFN previously submitted and one detail row (D1) with a label previously submitted for which a refund is needed.

### 7.4 File Retransmission

Files may be rejected during processing for the following reasons:

1. PTR or eVS may reject a file if there is an error in the header record
  - a. If the date of mailing is within the last 30 days, the file can be retransmitted.
  - b. If resubmitting eVS files during the eVS reconciliation period, use the last day of the previous month for the date of mailing within the manifest file.
  - c. If entire file was accepted, do not resubmit entire file, or eVS will charge postage for all parcels in the file. Resubmit only those records that must be corrected. If eVS calculated the postage of the piece from the original record, it will mark the record as a warning to indicate the correction was processed.
2. eVS may reject a file if the EFN was duplicated within the last 120 days
  - a. Use the same EFN but change the file type to "Corrections" <Electronic File Type 4>. eVS will not accept the same EFN as a Tracking & Postage file type within 120 days
3. eVS may reject a file if the control number is duplicated within the last 60 days
  - a. Resubmit the file, using a control number that has not been used within the last 60 days
4. To submit a record that has been rejected:
  - a. If the record was rejected by PTR:
    - i. Make sure that rate ingredients have been corrected that caused the error.
    - ii. Use the same EFN, but make sure that the file type is changed to "Corrections" <Electronic File Type 4> to prevent the file from being rejected as invalid.
  - b. If the record was rejected by eVS:
    - i. Rejected records should appear in the manifest errors report.
    - ii. Use the same EFN, but make sure that the file type is changed to "Corrections" <Electronic File Type 4>, because eVS will not accept the same EFN as a Tracking & Postage file type within a 120-day period.
    - iii. As a reminder all unmanifested parcels, sampled parcels with missing manifests, and manifest errors must be manifested by the 10th of the subsequent month to prevent adjustments to the eVS account for additional postage.

**IMPORTANT NOTE:** Since customers are required to provide more piece-level detail information, the Postal Service has standardized the rules for completing Types 1 (Tracking and Postage) and 2 (Tracking only) files. Therefore, the rules (e.g., required vs. optional, defaults and content values) for populating these files will be the same. In the File Layout description columns of the Shipping Services Files, the separate file designations have been updated to reflect the changes. In those cases where a Type 2 (tracking only) is missing the required data, a Warning message will appear in the Confirmation/Error/Warning report. Please see the Shipping Services File Layout Specifications in the Appendices below for specific information.

**This Page Intentionally Left Blank**

## 8 Product Specific Information

### 8.1 Adult Signature Required and Adult Signature Restricted Delivery

Adult Signature Required and Adult Signature Restricted Delivery are extra services available for an additional fee:

1. Adult Signature Required requires the signature of anyone 21 years of age or older.
2. Adult Signature Restricted Delivery requires the signature of the addressee or designee, 21 years of age or older.

Both options are offered only to commercial customers (including online customers). The person signing for the package must show government-issued photo identification.

Adult Signature Required and Adult Signature Restricted Delivery are available with Priority Mail Express, Priority Mail, USPS Ground Advantage and Parcel Select. Barcoded Nonpresort Bulk Proof of Delivery is also available with these services.

All pieces in the Shipping Services File must bear an IMpb with the applicable three-digit Service Type Code (found in Appendix I).

After delivery, the mailer will be provided with the date, time, name (first initial and last name) and signature of the recipient.

#### 8.1.1 File Specification Information

Version 1.6 Detail Record 1 Required Fields

Record Position	Field Name	Content Rules and Limitations
399-401	Extra Service Code 1st Service	Extra Service Code: 922 – Adult Signature Required 923 – Adult Signature Restricted Delivery
402-407	Extra Service Fee 1st Service	Must include the appropriate fee.

## 8.1.2 Adult Signature Label Examples

Exhibit 14: Adult Signature Required and Adult Signature Required/Restricted Delivery Labels

**NOTE:** The barcode label depicted above is for illustration purposes only.

## 8.2 Certified Mail

### 8.2.1 General Information

Certified Mail for letters/flats should contain a **non-concatenated** Intelligent Mail package barcode (IMpb). The barcode construct must designate no routing information. Certified Mail for parcels must contain a **concatenated** IMpb where the physical characteristics of the parcel permit it. When a **non-concatenated** IMpb is used, a postal routing barcode must also be present.

Certified Mail items must use the existing service-specific CERTIFIED MAIL, or USPS CERTIFIED MAIL banner text above the barcode. All other label and endorsement requirements for Certified Mail must be met when the IMpb is used.

Certified Mail service provides the sender with a mailing receipt and, upon request, electronic verification that an article was delivered or that a delivery attempt was made. The recipient signs a delivery receipt — PS Form 3849, *Delivery Notice/Reminder/Receipt or sign-on screen (MDD)* — and the Postal Service stores the delivery information, including the recipient's signature. Customers can retrieve the delivery status in three ways:

1. Over the Internet at [www.usps.com](http://www.usps.com) by entering the article number shown on the mailing receipt
2. By telephone at 1-800-222-1811
3. By bulk electronic file transfer for mailers who provide an electronic manifest to the USPS

## Product Specific Information

Certified Mail is dispatched and handled in transit as ordinary mail. No insurance coverage is provided. Only mailable matter prepaid with postage at First-Class Mail or Priority Mail prices may be sent as Certified Mail. See DMM section 503.3.0 for detailed information.

Commercial customers can pay for Certified Mail by metered or PC Postage indicia, or permit imprint. Customers will send a Shipping Services File v 1.6 or higher, with any form of Certified Mail, with or without the following extra services:

- Return Receipt electronic or hardcopy (PS Form 3811) (electronic option not available in combination with Adult Signature services)
- Certified Mail Restricted Delivery (not available in combination with Adult Signature services separately)
- Certified Mail Adult Signature Required
- Certified Mail Adult Signature Restricted Delivery

### 8.2.2 File Specification Information

Version 1.6, 1.7/2.0 Detail Record 1 Required Fields

Record Position	Field Name	Content Rules and Limitations
003-036	Intelligent Mail package barcode (IMpb)	Only non-concatenated barcodes can be used on letters and flats Mailers using COx barcode constructs must use concatenated barcodes on parcels
037-038	Mail Class	Class of Mail: FC or PM
039-042	Service Type Code	Service Type Codes: See STC table Appendix I (insert link here)
043-046	Barcode Construct Code	The following commercial barcode constructs can be used for letters and flats: C04, C08, C09, C10 The following online barcode constructs can be used with letters and flats: N03, N06, N09, N10 The following commercial barcode constructs can be used with parcels: C01, C02, C03, C05, C06, C07 The following online barcode constructs can be used with parcels: N01, N02, N04, N05, N07, N08 .
399-401	Extra Service Code	910 refers to Certified Mail only, regardless of mail class
402-407	Extra Service Fee – 1 <sup>st</sup> Service	Default is zeroes, required when Extra Service Code, 1 <sup>st</sup> Service is populated
408-410	2 <sup>nd</sup> Extra Service Code	Additional services require additional extra service codes. See Appendix I for the specific combination and Appendix J for the extra service codes

## Product Specific Information

Record Position	Field Name	Content Rules and Limitations
417-419	3 <sup>rd</sup> Extra Service Code	Additional services require additional extra service codes. See Appendix I for the specific combination
426-428	4 <sup>th</sup> Extra Service Code	Additional services require additional extra service codes. See Appendix I for the specific combination

**NOTE:** Use of Fields 408-443 is optional (including fields for fees), depending on the number of Extra Services requested by the mailer after the first Extra Service Code is used.

### 8.2.3 Barcoded Form

A Certified Mail item must bear a barcoded green PS Form 3800, Certified Mail Receipt using the IMpb format. Customers may use a non-barcoded green Label 3800-N when a mailer-generated shipping label bearing the accurate IMpb is also affixed on the same mailpiece. Human-readable numbers corresponding to the barcode must appear below it, arranged in groups of four digits.

Customers who print their own barcoded labels can receive delivery status information, which includes the date and time of delivery in bulk. Customers can also receive proof of delivery including date and time of delivery as well as name, address and signature of the recipient, electronically in bulk by participating in the Bulk Proof of Delivery (BPOD) program [Bulk Proof of Delivery Program | PostalPro](#).

## 8.2.4 Private Printing Instructions

### 8.2.4.1 Authorization

A mail owner must receive authorization from the Postal Service to use a privately printed PS Form 3800. The privately printed form must be nearly identical in design and color to the Postal Service form. The barcode and human-readable numbers must meet the Postal Service specifications in Chapter 4, Barcode Requirements. Samples must be submitted to the National Customer Support Center at the address shown below:

**ATTN: CONFIRMATION SERVICES  
SUPPORT NATIONAL CUSTOMER  
SUPPORT CENTER UNITED STATES  
POSTAL SERVICE  
225 N HUMPHREYS BLVD STE 501  
MEMPHIS TN 38188-1001**

### 8.2.4.2 Dimensions

The Certified Mail barcoded label is the detachable portion of PS Form 3800 that affixes to a mailpiece. It must have a length of 3 inches to 3-1/2 inches and a height of 1-3/4 inches to 2-11/32 inches. This size includes the fold-over flap placed over the top of the envelope to identify Certified Mail items when placed in trays.

The Certified Mail receipt is the detachable portion of PS Form 3800 that must be completed by the mail owner and the origin Post Office. If the mail owner requires a receipt to be completed at the retail window, the imprint area for a privately printed Certified Mail receipt must be nearly identical in design to PS Form 3800 as specified below:

- a. "Official Use": 3/4 inch down from the top; left edge of the box is 3-3/8 inches from the right edge of the form; 1/4-inch-high; 3-1/4 inches long.
- b. "Postage": 1 inch down from the top; left edge of the box is 2-3/8 inches from the right edge of the form; 1/4-inch-high; 1-inch long.
- c. "Certified Fee": 1-1/4 inches down from the top; left edge of the box is 2-3/8 inches from the right edge of the form; 1/4 inch high; 1 inch long.
- d. "Return Receipt Fee": 1-1/2 inches down from the top; left edge of the box is 2-3/8 inches from the right edge of the form; 1/4 inch high; 1 inch long.
- e. "Restricted Delivery Fee": 1-3/4 inches down from the top; left edge of the box is 2-3/8 inches from the right edge of the form; 1/4 inch high; 1 inch long.
- f. "Total Postage & Fees": 2 inches down from the top; left edge of the box is 2-3/8 inches from the right edge of the form; 1/4 inch high; 1 inch long.
- g. "Postmark Here": 1 inch down from top; left edge of the area is 1-3/8 inches from the right edge of the form; 1-5/16 inches high; 1-3/8 inches long.

### 8.2.4.3 Stock

PS Form 3800 must be printed on white OCR bond, 20-pound basis weight (17 inches x 22 inches, 500 sheets), equal to Joint Committee on Printing (JCP) Code O-25, with no more than a trace of fluorescence in the paper.

### 8.2.4.4 Printing

PS Form 3800 must be printed in reverse in a match of PANTONE® Matching System (PMS) 347 (green). Ink must be unreadable (“blind”) to the scanning wands used with Postal Service automated recordkeeping systems for accountable mail and have a print contrast signal of less than 10 percent as measured by a Postal Service envelope reflectance meter. Numbers must be printed in non-reflective black ink. Black ink must have a minimum print contrast signal of 50 percent.

### 8.2.4.5 Label Adhesive

A privately printed PS Form 3800 that will be affixed to a mailpiece must use a permanent adhesive or have another form of glue to affix the detachable barcoded label portion of the form securely to the mailpiece. The label must be easy to affix but able to withstand normal handling by the Postal Service. It must be coated on the back (within 1/16 inch of the outside edges of the piece) with a permanent-type, pressure-sensitive adhesive or another form of glue with similar strength. The adhesive must adhere immediately and firmly to various paper-type surfaces (e.g., kraft, sulfite, bond, spun-bonded olefin, and other manufactured materials). The adhesive must be such that any attempt to remove the label must destroy either the label or part of the paper surface to which it is adhered.

A privately printed PS Form 3800 that is printed directly onto the mailpiece does not need a pressure-sensitive adhesive or any other form of glue.

## 8.3 Commercial Cubic

### PRIORITY MAIL

Commercial cubic prices are available to Priority Mail. Each mailpiece must measure .50 cubic feet or less, weigh 20 pounds or less, and the longest dimension may not exceed 18 inches. Cubic-priced mailpieces may not be rolls or tubes.

Cubic prices consist of the following five tiers:

- Tier 1 - mailpieces measuring up to .10 cubic foot
- Tier 2 - mailpieces measuring more than .10 up to .20 cubic foot
- Tier 3 - mailpieces measuring more than .20 up to .30 cubic foot
- Tier 4 - mailpieces measuring more than .30 up to .40 cubic foot
- Tier 5 - mailpieces measuring more than .40 up to .50 cubic foot

Mailers should follow these steps to determine the cubic tier measurement for rectangular and nonrectangular parcels:

- a. Measure the length, width, and height in inches. Round down each measurement to the nearest  $\frac{1}{4}$  -inch. For example, 6- $\frac{1}{8}$ " x 5- $\frac{7}{8}$ " x 6- $\frac{3}{8}$ " is rounded down to 6" x 5- $\frac{3}{4}$ " x 6- $\frac{1}{4}$ ".
- b. Multiply the length by the width by the height and divide by 1728. For example: 6" x 5- $\frac{3}{4}$ " x 6- $\frac{1}{4}$ " = 215.6 divided by 1728 = 0.125 (This piece exceeds 0.10 - Tier 1 threshold). It is calculated at Tier 2 - 0.101 to 0.20.

## Product Specific Information

Mailers should follow these steps to determine cubic tier measurement for soft pack and padded envelopes. Cubic tier measurements for soft pack and padded envelopes are based on the outside dimensions of length plus width, in inches, of the original packaging material. Mailpieces that are pleated (e.g., expandable) must follow the measurement guidelines in 8.3 items a. and b. to be eligible for cubic pricing. Determine cubic tier measurements as follows:

- a. Measure the length and width separately in inches.
- b. Round down (see DMM 604.7.0) each measurement to the nearest 1/4 inch. For example, 10-1/8 inches is rounded down to 10 inches.
- c. Add the two measurements together. The maximum total of length plus width cannot exceed 36 inches. See below corresponding price tiers.

CUBIC PRICE TIERS	Cubic price tiers	LENGTH PLUS WIDTH
Tier 1 - 0.10	Mailpieces measuring from	0" up to 21"
Tier 2 - 0.20	Mailpieces measuring more than	21" up to 27"
Tier 3 - 0.30	Mailpieces measuring more than	27" up to 31"
Tier 4 - 0.40	Mailpieces measuring more than	31" up to 34"
Tier 5 - 0.50	Mailpieces measuring more than	34" up to 36"

### 8.3.1 Commercial Cubic Priority Mail - File Specification Information

Version 1.6, 1.7/2.0 Detail Record 1 Required Fields

Record Position	Field Name	Content Rules and Limitations
373-374	Rate Indicator	Rate Indicator: CP – Cubic Tier Pricing (eVS only) P5 – Tier 1 P6 – Tier 2 P7 – Tier 3 P8 – Tier 4 P9 – Tier 5
378-382	Length	Required when rate indicator is "CP".
383-387	Width	Required when rate indicator is "CP".
388-392	Height	Required when rate indicator is "CP".
393-398	Dimensional Weight	Required when rate indicator is "CP".

### USPS GROUND ADVANTAGE

Commercial cubic prices are available to eligible USPS Ground Advantage customers. Each mailpiece must measure 1 cubic foot or less, weigh 20 pounds or less, and the longest dimension may not exceed 18 inches. Rolls and tubes do not qualify for mailpiece cubic prices.

Cubic prices consist of the following ten tiers:

- Tier 1 - mailpieces measuring up to .10 cubic foot
- Tier 2 - mailpieces measuring more than .10 up to .20 cubic foot
- Tier 3 - mailpieces measuring more than .20 up to .30 cubic foot
- Tier 4 - mailpieces measuring more than .30 up to .40 cubic foot
- Tier 5 - mailpieces measuring more than .40 up to .50 cubic foot
- Tier 6 - mailpieces measuring more than .50 up to .60 cubic foot
- Tier 7 - mailpieces measuring more than .60 up to .70 cubic foot
- Tier 8 - mailpieces measuring more than .70 up to .80 cubic foot
- Tier 9 - mailpieces measuring more than .80 up to .90 cubic foot
- Tier 10 - mailpieces measuring more than .90 up to 1.00 cubic foot

Mailers should follow these steps to determine the cubic tier measurement for rectangular and nonrectangular parcels:

- c. Measure the length, width, and height in inches. Round down each measurement to the nearest  $\frac{1}{4}$  -inch. For example, 6- $\frac{1}{8}$ " x 5- $\frac{7}{8}$ " x 6- $\frac{3}{8}$ " is rounded down to 6" x 5- $\frac{3}{4}$ " x 6- $\frac{1}{4}$ ".
- d. Multiply the length by the width by the height and divide by 1728. For example: 6" x 5- $\frac{3}{4}$ " x 6- $\frac{1}{4}$ " = 215.6 divided by 1728 = 0.125 (This piece exceeds 0.10 - Tier 1 threshold). It is calculated at Tier 2 - 0.101 to 0.20.

Mailers should follow these steps to determine cubic tier measurement for soft pack and padded envelopes.

Cubic tier measurements for soft pack and padded envelopes are based on the outside dimensions of length plus width, in inches, of the original packaging material. Mailpieces that are pleated (e.g., expandable) must follow the measurement guidelines in 8.3 items a. and b. to be eligible for cubic pricing. Determine cubic tier measurements as follows:

- d. Measure the length and width separately in inches.
- e. Round down (see DMM 604.7.0) each measurement to the nearest  $\frac{1}{4}$  inch. For example, 10- $\frac{1}{8}$  inches is rounded down to 10 inches.
- f. Add the two measurements together. The maximum total of length plus width cannot exceed 36 inches. See below corresponding price tiers.

CUBIC PRICE TIERS	Cubic price tiers	LENGTH PLUS WIDTH
Tier 1 - 0.10	Mailpieces measuring from	0" up to 16"
Tier 2 - 0.20	Mailpieces measuring more than	16" up to 21"
Tier 3 - 0.30	Mailpieces measuring more than	21" up to 24"
Tier 4 - 0.40	Mailpieces measuring more than	24" up to 26"
Tier 5 - 0.50	Mailpieces measuring more than	26" up to 28"
Tier 6 - 0.60	Mailpieces measuring more than	28" up to 30"
Tier 7 - 0.70	Mailpieces measuring more than	30" up to 32"
Tier 8 - 0.80	Mailpieces measuring more than	32" up to 34"
Tier 9 - 0.90	Mailpieces measuring more than	34" up to 35"
Tier 10 - 1.00	Mailpieces measuring more than	35" up to 36"

### 8.3.2 Commercial Cubic USPS Ground Advantage - File Specification Information

388-392	Height	Required when rate indicator is "CP".
393-398	Dimensional Weight	Required when rate indicator is "CP".

## 8.4 Hold For Pickup

Hold For Pickup service allows packages to be held at a designated Post Office to be picked up by a specified addressee or designee. For Collect on Delivery Hold For Pickup, see Section 8.6.4.

Hold For Pickup service is currently available for Priority Mail Express, Priority Mail, USPS Ground Advantage and Bound Printed Matter parcels.

This service allows shipments to be picked up at designated Hold For Pickup locations by the recipient or their designee. Upon arrival of the package at the destination Post Office pickup location, the customer or the addressee will receive an email notification or SMS text message from the Postal Service (if contact detail is provided). If the package has not been picked up within 5 days (3 days for Priority Mail Express), the Post Office will make a second attempt to notify the addressee. If the package has not been picked up within 15 days (5 days for Priority Mail Express), the package will be returned to the sender.

There are two options for Hold For Pickup service:

1. Retail option: Available at Post Office pickup locations for Priority Mail Express only at the time of mailing.
2. Electronic option: Available for Priority Mail Express, Priority Mail, USPS Ground Advantage and Bound Printed Matter parcels. Except for Priority Mail Express, mailers must establish an electronic link with USPS to exchange acceptance and delivery data. No mailing receipt is provided with this option.

Requirements for using Priority Mail, USPS Ground Advantage and Bound Printed Matter parcels Hold For Pickup:

1. Shipping Services File v 1.7/2.0
2. All mailpieces must bear the "Hold For Pickup" label with an IMpb, except Priority Mail Express not paid through eVS.
3. 9-digit ZIP Code in the IMpb.

### 8.4.1 Labeling and Data Reporting Requirements

The current multi-ply PS Form 3816 should not be used for Hold For Pickup. Instead, the PS Form 3816 is replaced by required elements on the standard Hold For Pickup label and in the Shipping Services File (SSF). Please note that version 1.7 or higher of the SSF is required.

The following fields are required in the SSF:

Recipient's Name (D1| Recipient Name).

Amount of total postage paid (D1| Postage Paid).

COD fee amount (D1| Extra Service Fee nth Service).

COD amount to be collected (D1| COD Amount Due Sender).

Sender's Return Address (D1| Return Address, Return Address City, Return Address State, and Return Address ZIP Code).

Sender's Name (D2| Sender Name).

Recipient's e-mail (preferred) or SMS/Text (D2| Recipient E-mail Address or D2| Recipient SMS Number).

The required format for a SMS number in the SSF no longer includes the carrier URL (e.g. 6035550323@wirelesscarrier.com).

The following elements are required on the Hold For Pickup Label:

## Product Specific Information

---

- The return address is required and must be the address to which non-EFT payments are remitted.
- The Hold For Pickup labels require a HOLD FOR PICKUP banner directly below the return address and above the delivery (Pickup Location) address.
- The delivery address should contain the recipient name and the address of the post office at which the mailpiece will be held.

For more information on formatting a shipping label, please also reference the USPS Parcel Labeling Guide located at <https://postalpro.usps.com/parcellabelingguide>.

Figure 1: Hold For Pickup

412 - 475	Sender SMS/text Number	Information is required for Hold For Pickup for the customer to receive the Hold for Pickup notification.
476 - 498	Filler	Must be spaces

## 8.5 Insured Mail

Insured Mail — PS Form 3813 and PS Form 3813-P

### 8.5.1 General Information

Retail insured mail service provides up to \$5,000 indemnity coverage for a lost, missing, or damaged article, subject to the standards for the service and payment of the applicable fee. Depending on the eligibility, Priority Mail and USPS Ground Advantage outbound and return items will have \$100 of insurance automatically included (restrictions apply).

To qualify for included insurance, a shipment must meet certain requirements, such as having an applicable bar code. For details, visit <https://www.usps.com/ship/priority-mail.htm>. Insurance does not cover certain items. For details regarding claim exclusions, see sections 609.4.3 (Non-payable Claims), 609 (Filing Indemnity Claims for Loss or Damage), and 503.4.0 (Insured Mail) of the DMM at <http://pe.usps.com>.

Bulk insurance is available for USPS Marketing Mail (including nonprofit) parcels entered by USPS authorized mail owners who meet the criteria (as defined in DMM 503.4.4). Insured mail service provides the sender with a mailing receipt. Commercial mailers will use either the PS Form 3877 or electronic shipment services file in lieu of an insurance receipt. In order to be eligible for insurance indemnity, a mailpiece must have received at least one USPS processing scan following an electronic shipment acceptance scan, or the customer must provide proof of insurance (see DMM 609.3.1). Postage and fees must be uniquely identified.

For mail insured for more than \$500, the USPS maintains a delivery record (which includes the recipient's signature) for a specified period of time. The service includes an electronic copy of the recipient's signature. Insured mailpieces are dispatched and handled in transit as ordinary mail. In addition, the mail must bear the complete names and addresses of both the sender and the addressee. The Postal Service strongly recommends the recipient's name and contact information (email and/or phone number) is included in the Shipping Services file.

Electronic Signature Online™ (eSOL) service allows customers to use a previously provided electronic signature to allow delivery of items for which the sender chose Priority Mail Express®, Signature Confirmation™, or Insurance over \$500. These services until now have required a signature at the time of delivery. With eSOL, the Informed Delivery account holder for the delivery address can opt to use the previously provided electronic signature, using their Informed Delivery® Packages Dashboard. By default, certain packages are automatically opted in and eligible for eSOL. Mailers requiring a physical signature at the time of delivery rather than accepting a previously provided electronic signature, can opt out of Electronic Signature Online (eSOL). To opt out, mailers must populate a value code of '3' in the Waiver of Signature/Carrier Release/Merchant Override/Customer Delivery Preference field (see Section 8.15.2) in the Shipping Services File.

For information on filing domestic insurance claims, please go to <http://www.usps.com/domestic-claims> or DMM Section 609.

### 8.5.2 Barcoded Form

Insured mail of any value must bear a barcoded PS Form 3813 or PS Form 3813-P, Insured Mail Receipt using the IMpb format, as shown below except for Priority Mail when insurance is automatically included. Human-readable numbers corresponding to the barcode must appear below it, arranged in groups of four digits.

POSTAL SERVICE  
225 N HUMPHREYS BLVD STE 501  
MEMPHIS TN 38188-1001**

**8.5.3.2 Dimensions**

The insured mail barcoded label is the detachable portion of PS Form 3813 or PS Form 3813-P that affixes to a mailpiece. It must have a length of 3 inches to 3-1/2 inches and a height of 1-3/4 inches to 2-11/32 inches.

The insured mail receipt is the portion of PS Form 3813 or PS Form 3813-P that must be completed by the mail owner and the origin Post Office. If the mail owner requires a receipt to be completed at the retail window, the imprint area for a privately printed insured mail receipt must be nearly identical in design to PS Form 3813 or PS Form 3813-P as specified below:

- a. "Official Use": 3/4 inch down from the top; left edge of the box is 3-1/8 inches from the right edge of the form; 1/4 inch high; 3-1/16 inches long.
- b. The postage and fees calculation section begins 1 inch from the top and is 1-5/8 inch high, separated into 8 sections.

## Product Specific Information

---

- c. Section one contains text and two check boxes in PMS 286 or NCS 12 blue font as follows: “Special Handling. No Fee (check box)” “Perishable”, “Hazardous Material Transportation”: 1 inch down from the top; left edge of the box is 3-1/16- inches from the right edge of the form; 1/4 inch high; 1-1/2 inch long.
- d. Section two contains text, two check boxes and \$ in PMS or NCS 12 blue font as follows: “Special Handling. With Fee (check box)”, “~~Fragile~~-\$”, “Live Animal Transportation \$” : 1 inches down from the top; left edge of the box is 1 5/8 inches from the right edge of the form; 1/4 inch high; 1-1/2 inch long.
- e. Section three contains text and \$ in PMS 286 or NCS 12 blue font as follows: “Insurance Fee”: 1-1/4 inches down from the top; left edge of the box is 2-1/4 inches from the right edge of the form; 1/4 inch high; 1 inch long.
- f. Section four contains text and \$ in PMS 286 or NCS 12 blue font as follows: “Insurance Coverage”: 1-1/4 inches down from the top; left edge of the box is 2-5/16 inches from the right edge of the form; 1/4 inch high; 1 inch long.
- g. Section five contains text and \$ in PMS 286 or NCS blue font as follows: “Special Confirmation TM Fee”: 1-1/2 inches down from the top; left edge of the box is 3-1/16 inches from the right edge of the form; 1/4 inch high; 1-7/8 inch long.
- h. Section six contains text and \$ in PMS 286 or NCS blue font as follows: “Signature Confirmation TM Restricted Delivery Fee: 1-3/4 inches down from the top; left edge of the box is 2-1/4 inches from the right edge of the form; 1/4 inch high; 1-7/8 inch long.
- i. Section seven contains text and \$ in PMS 286 or NCS blue font as follow: “Postage”: 2 inches down from the top; left edge of the box is 2-1/4 inches from the right edge of the form; 1/4 inch high; 1-7/8 inch long.
- j. Section eight contains text and \$ in PMS 286 or NCS blue font as follow: “Total Postage and Fee”: 2-3/8 inches down from the top; left edge of the box is 2-1/4 inches from the right edge of the form; 1/4 inch high; 1-7/8 inch long.
- k. The postmark area is positioned in between the section 2 “Special Handling, With Fee” and the addressee block. “Postmark Here”: 1-1/4 inches down from top; left edge of the area is 1-1/4 inches from the right edge of the form; 1-1/4 inches high; 1-1/4 inches long.

### 8.5.3.3 Stock

PS Form 3813 or PS Form 3813-P must be printed on white OCR bond, 20-pound basis weight (17 inches x 22 inches, 500 sheets), equal to Joint Committee on Printing (JCP) Code O-25, with no more than a trace of fluorescence in the paper.

### 8.5.3.4 Printing

PS Form 3813-P must be printed in reverse in a match of PANTONE® Matching System (PMS) 286 (blue) or the Natural Color System (NCS) Medium Blue #12. PS Form 3813 must be printed in reverse in black. Ink must be unreadable (“blind”) to the scanning wands used with Postal Service automated recordkeeping systems for accountable mail and have a print contrast signal of less than 10 percent as measured by a Postal Service envelope reflectance meter. Numbers must be printed in non-reflective black ink. Black ink must have a minimum print contrast signal of 50 percent.

### 8.5.3.5 Label Adhesive

A privately printed PS Form 3813 or PS Form 3813-P that will be affixed to a mailpiece must use a permanent adhesive to securely affix the detachable barcoded label portion of the form to the mailpiece. The label must be easy to affix but able to withstand normal handling by the Postal Service. It must be coated on the back (within 1/16 inch of the outside edges of the piece) with a permanent-type, pressure-sensitive adhesive or another form of glue of similar strength. The adhesive must adhere immediately and firmly to various paper-type surfaces (e.g., kraft, sulfite, bond, spun-bonded olefin, and other manufactured materials). The adhesive must be such that any attempt to remove the label must destroy either the label or part of the paper surface to which it is adhered.

A privately printed PS Form 3813 or PS Form 3813-P that is printed directly onto the mailpiece does not need a pressure-sensitive adhesive or any other form of glue.

## 8.6 Collect on Delivery (COD) — PS Form 3816

### 8.6.1 General Information

Any domestic mailer may use Collect on Delivery (COD) service to mail an article for which the mailer has not been paid and have its price and the cost of the postage collected from the recipient.

The recipient can pay the COD charges using cash, personal check, or money order made payable to the sender. Only one form of payment may be used for a single mailpiece. The amount collected from the recipient may not exceed \$1,000. The mailer may not stipulate the method of payment (such as “cash only”) on the COD label. If the recipient pays the amount due by check or money order, the USPS forwards the check or money order to the mailer. If payment is made by cash, a money order fee is included in the amount collected from the recipient in addition to the COD amount. The money order fee is not collected for cash payments when the mailer is participating in COD electronic funds transfer (EFT) option and the recipient’s pickup location is an USPS retail location with Retail Software System (RSS). Mailers may be authorized to participate in COD EFT for the remittance by contacting the National Customer Support Center (NCSC) (see DMM section 608.8.0 for NCSC contact information).

The Postal Service cannot intervene in disputes between mailers and recipients of COD mail after postal records indicate payment was returned to the mailer. COD service provides the mailer with a mailing receipt and delivery status.

USPS maintains a record of delivery, including the recipient’s signature, for a specified period of time, which customers may obtain by purchasing a return receipt (PS Form 3811), electronic return receipt service, or Signature Confirmation service. Bulk proof of delivery is available only to mailers purchasing electronic return receipt service at the time of mailing. Customers participating in bulk proof of delivery may obtain signature data in signature extract file formats. See DMM section 503.8.0 for detailed information.

### 8.6.2 Barcoded Form

Mailers must complete barcoded Form 3816 and attach it, either above the delivery address and to the right of the return address, or to the left of the delivery address on parcels. If more than three articles are sent at a time, the mailer may use Form 3877 in duplicate in lieu of Copy 3 and Copy 4 of the PS Form 3816-

Date Returned		DELIVERY EMPLOYEE - Remove Copies 1 & 2 at Time of Delivery

DO NOT deliver this article until payment is collected.    4. Have customer sign PS Form 3849. ♦ Follow proper scanning procedures for COD delivery and clearance.				

Exhibit 18: PS Form 3816 – COD Label and Delivery Receipt \*Artwork not to scale

### 8.6.3 Private Printing Instructions

#### 1. Authorization

A mail owner must receive authorization from the Postal Service to use a privately printed PS Form 3816. The privately printed form must be nearly identical in design and color to the Postal Service form. The barcode and human-readable numbers must meet the Postal Service specifications in Chapter 4, Barcode Requirements.

Once approved, the mailer is provided a block of COD numbers to be used. Samples must be submitted to the National Customer Support Center at the address shown below:

**ATTN: CONFIRMATION SERVICES  
 SUPPORT NATIONAL CUSTOMER  
 SUPPORT CENTER UNITED STATES  
 POSTAL SERVICE  
 225 N HUMPHREYS BLVD STE 501  
 MEMPHIS TN 38188-1001**

#### 1. Use of Separate Shipping Label

A separate shipping label containing the name, address, ZIP+4, Return Address, USPS postage indicia, **and the same IMpb that appears on the PS Form 3816** must also be placed on the mailpiece. A 4" x 6" label, such as those used with other, non-COD parcels, is recommended and should follow the same layout.

#### 2. Dimensions

The privately printed 5-ply Form 3816 must be nearly identical in design and color to postal-provided forms, with COD article numbers that can be read by automated postal equipment. Privately printed COD forms must include an Intelligent Mail package barcode prepared under DMM section [708.5.0](#), and must retain the human-readable text, label design elements and color, consistent with USPS PS Form 3816.

## Product Specific Information

---

A minimum of 10 preproduction samples (from each printer to be used) must be submitted to the National Customer Support Center (NCSC) for certification.

Copy 1: 6-7/8 - 7-X 4-1/4 - 4-1/2" Detached 6-3/8 - 3-3/8"  
Copy 2: 6-5/8 - 7" X 3-3/8" Detached 5-15/16" X 3-3/8"  
Copy 3: 7-3/8" - 7-1/2" X 3-3/8" Detached 6-7/8" - 7" X 3-3/8"  
Copy 4: 6-3/4" - 6-7/8" X 3-3/8" Detached 6-1/4" X 3-3/8"  
Copy 5: 7-3/8 - 7-1/2" X 4-1/4 - 4-1/2"(Backing Sheet)

**NOTE:** Detached size of Copy 2 MUST be 5-15/16" X 3-3/8". Copy 2 when detached MUST fit into furnished envelope. Contractors may place stubs as needed for production provided that the detached sizes stated above are obtained when the copy is detached.

When mailers present three or more COD pieces at one time, they have the option to use USPS-approved privately printed PS Form 3816 in a 5-ply or 3-ply format. When using the 3-ply version, mailers also use PS Form 3877 (firm sheet), or a USPS-approved facsimile, in duplicate, to serve as both the mailing receipt and the Post Office copy. By using the PS Form 3816 in conjunction with the PS Form 3877, mailers can meet the standards for the privately printed forms, which are considered nearly identical to the postal provided forms (PS Form 3816); otherwise, they do not and mailers would not be able to provide adequate proof of mailing in the event an indemnity claim is filed for loss or damage of the article.

Privately printed 3-ply Form 3816 must be nearly identical in design and color to the USPS provided form, with COD article numbers that can be read by automated postal equipment. Privately printed COD forms must include an Intelligent Mail package barcode prepared under DMM section [708.5.0](#) and must retain the human-readable text, label design elements and color consistent with USPS PS Form 3816. A minimum of 10 preproduction samples (from each printer to be used) must be submitted to the National Customer Support Center (NCSC) for certification, as stated above.

Copy 1: 6-7/8 - 7-X 4-1/4 - 4-1/2" Detached 6-3/8 - 3-3/8"  
Copy 2: 6-5/8 - 7" X 3-3/8" Detached 5-15/16" X 3-3/8"  
Copy 5: 7-3/8 - 7-1/2" X 4-1/4 - 4-1/2"(Backing Sheet)

**NOTE:** Detached size of Copy 2 MUST be 5-15/16" X 3-3/8". Copy 2 when detached MUST fit into furnished envelope. Contractors may place stubs as needed for production provided that the detached sizes stated above are obtained when copy is detached. Customers using the 3-ply privately printed label must use PS Form 3877 in duplicate, in lieu of copy 3 and copy 4 of the USPS provided PS Form 3816.

### 3. Stock

Use of recycled paper is preferred where economically possible. Contractor must submit brand names of papers being used to produce PS 3816. As part of the new 1995 EPA requirement that USPS report the values of recycled stock, the contractor will submit a total dollar value of any (Minimum 50/10) recycled stocks used (including paper, chipboard, & corrugated paperboard), e.g., cartons.

1. Copy 1 - 16-17# White Chemical Transfer Bond, or 16-17# White C.W. Bond, or White Offset Book.
2. Copy 2 through 4 - 15 to 18# White Chemical Transfer Bond, or 15 to 18# White C.W. Bond, or 45-50# White Offset Book.
3. Copy 5 - 20# White Chemical Transfer Bond, or 20# White C. W. Bond, or 50# White EDP Face Stock with suitable backing sheet.

**NOTE:** Chemical Transfer Bond must be equal to or better than Liquid OPAS on all parts. (Liquid OPAS is a registered trademark of MEAD Corporation).

Blue transfer image on all parts. See Quality Control for more information concerning minimum standards of transfer image.

Copy 1 is coated back only, Copy 2, 3, and 4 are coated front and back, Copy 5 is coated front only.

### 4. Construction

Contractors may alter construction to meet their own capabilities as long as all the parameters and Specifications, as set forth including the size limitations above are met. Copy 1 and 5 must remain intact, at least on the top, bottom and left edges by suitable method to insure that they do not separate prior to being separated by the carrier upon delivery of the package, throughout the complete processing of the form along with usage and processing through the mail stream. Part 1 must have perforations top, bottom and left to create a detached size of 6-3/8" x 3-3/8".

Part 2 is secured firmly to Part 1 on the left and remains with Parts 1 and 5. Part 1 is held at the top and bottom of Part 5 by spot glue for easy removal by the carrier upon delivery of the package. Parts 3 and 4 must remain within the form set until removal by Postal Service acceptance personnel. Part 4 must have a right stub of 3/8 – 1/2" and the stub must be firmly glued to the back of Part 3. Part 5 must be die-cut approximately 1/16" from top and bottom and 1/2" left and/or right if stubs are used and all waste removed and coated in its entirety with a permanent pressure sensitive adhesive meeting all the requirements as stated below. The backing sheet must be easily removable with one motion - back slit in two sections is not acceptable. No marginal holes are required, but are acceptable as long as they do not interfere with the use of the form in any fashion.

Coating of chemical transfer is dependent on each section reading through each part as indicated below. All parts must read as well as Part 1. All parts must register to each section. There are copy changes on all parts. There are sections that must have information transfer between all parts of the form and there are sections that **MUST** have information transfer between selected parts of the form. Sample copy available upon request.

## 5. Label Adhesive

A privately printed PS Form 3816 that will be affixed to a mailpiece must use a permanent adhesive or have another form of glue to securely affix the detachable barcoded label portion of the form to the mailpiece. The label must be easy to affix but able to withstand normal handling by the Postal Service. It must be coated on the back with a permanent-type, pressure-sensitive adhesive or another form of glue with similar strength. The adhesive must adhere immediately and firmly to various paper-type surfaces (e.g., kraft, sulfite, bond, spun-bonded olefin, and other manufactured materials). The adhesive must be such that any attempt to remove the label must destroy either the label or part of the paper surface to which it is adhered.

A privately printed PS Form 3816 that is printed directly onto the mailpiece does not need a pressure-sensitive adhesive or any other form of glue.

### 8.6.4 Collect on Delivery (COD) Hold For Pickup Label

A single-ply COD Hold For Pickup label may be used only when both Collect on Delivery and Hold For Pickup are desired for the same mailpiece. There is no change to the COD service itself, and COD street delivery is still available to customers using a PS Form 3816, *COD Label and Mailing Receipt*, (or a USPS-approved privately printed version) and who meet the applicable standards. However, street delivery is not available using the single-ply COD Hold For Pickup label. Additional information for this service must be included on the COD Hold For Pickup label and in the associated files provided in this section.

Collect on Delivery (COD) Hold For Pickup is available as COD Hold For Pickup, or in conjunction with Restricted Delivery: COD Hold For Pickup Restricted Delivery. It is available for the following classes of mail:

- Priority Mail Express®
- Priority Mail®
- USPS Ground Advantage (Commercial Only)
- USPS Ground Advantage – Retail (Retail Only)
- Bound Printed Matter Parcels (Commercial Only)
- Parcel Select Ground® (Commercial Only)
- Media Mail (Retail Only)
- Library Mail (Retail Only)

#### 1. Labeling and Data Reporting Requirements

The current multi-ply PS Form 3816 should not be used for COD Hold For Pickup. Instead, the PS Form 3816 is replaced by required elements on the standard Hold For Pickup label and in the Shipping Services File (SSF). Please note that version 1.7 or higher of the SSF is required.

The following fields are required in the SSF:

- Recipient's Name (D1| Recipient Name).
- Amount of total postage paid (D1| Postage Paid). COD fee amount (D1| Extra Service Fee nth Service).
- COD amount to be collected (D1| COD Amount Due Sender).
- Sender's Return Address (D1| Return Address, Return Address City, Return Address State, and Return Address ZIP Code).
- Sender's Name (D2| Sender Name).

## Product Specific Information

Recipient's e-mail (preferred) or SMS/Text address in email format (D2| Recipient E-mail Address or D2| Recipient SMS Number). The required format for a SMS number in the SSF no longer includes the carrier URL (e.g. 6035550323@wirelesscarrier.com).

- **The following elements are required on the COD Hold For Pickup Label:**
  - The return address is required and must be the address to which non-EFT payments are remitted.
  - The Hold For Pickup banner text should be modified to read “COLLECT ON DELIVERY HOLD FOR PICKUP” (in white letters on a black background).
  - A new line: “Collect \$xxx from recipient before delivery” should be added below the Hold For Pickup banner indicating the COD amount to be collected from the recipient (where xxx represents the dollar amount to be collected).

For more information on formatting a shipping label, please also reference the USPS Parcel Labeling Guide located at <https://postalpro.usps.com/parcellabelingguide>.

## 2 Selecting a Hold For Pickup Location

Most USPS retail locations will serve as a Hold For Pickup location. Hold For Pickup locations for any specific ZIP Code can be determined using:

- USPS Web Tools Hold For Pickup Facility API
- USPS Automated Transit Files (ATF)

For more information on integration with the API or ATF contact the USPS Product Innovation - Vendor Team at [tech@usps.gov](mailto:tech@usps.gov).

## 3 Service Type Code Changes

Appendix A provides a list of Service Type Codes (STC) which can be used to support COD Hold For Pickup and COD Hold For Pickup Restricted Delivery. In many cases, a unique STC has been created for COD Hold For Pickup. However, if a supported mail class / extra service combination is not explicitly defined, the Hold For Pickup Extra Service Code (ESC 985) can be added to an existing STC.

For mail insured for more than \$500, the USPS maintains a delivery record (which includes the recipient's signature) for a specified period of time. The service includes an electronic copy of the recipient's signature. Insured mailpieces are dispatched and handled in transit as ordinary mail. In addition, the mail must bear the complete names and addresses of both the sender and the addressee. The Postal Service strongly recommends the recipient's name and contact information (email and/or phone number) is included in the Shipping Services file.

## **8.7 Registered Mail — Label 200**

### **8.7.1 General Information**

Registered Mail service is the most secure service that the Postal Service offers. It utilizes a system of receipts to monitor the movement of the mail from the point of acceptance to the point of delivery. See DMM section 503.2.0 for detailed information.

Registered Mail must be entered at a Post Office, station or branch (including any contractor-operated unit). A postmaster may require that an article of unusually high value be presented only at the main office or at designated stations or branches. Regardless of any insurance that may cover the article; the mailer must always declare its full value to the USPS when presenting it for registration and mailing. The mailer must tell the USPS Retail Associate (or enter on the Firm Sheet if a firm mailer) the full value of mail matter presented for registration.

Domestic claims for loss or damage for Registered Mail may be filed online at [www.usps.com/domestic-claims](http://www.usps.com/domestic-claims).

### **8.7.2 Barcoded Label**

A Registered Mail item must bear a barcoded red Label 200, Registered Mail using the IMpb format. Additionally, customers may use a non-barcoded red Label 200-N when a mailer-generated shipping label bearing an IMpb, is also affixed on the same mailpiece, as shown below. See the Parcel Labeling Guide on PostalPro for creating mailer-generated barcoded shipping labels. Human-readable numbers corresponding to the barcode must appear below it, arranged in groups of four digits.

Exhibit 8.9.2a, Label 200

Exhibit 8.9.b, Label 200-N

### 8.7.3 Private Printing Instructions

#### 8.7.3.1 Authorization

A mail owner must receive authorization from the Postal Service to use a privately printed Label 200 for domestic mail only. The privately printed label must be nearly identical in design and color to the Postal Service label. The barcode and human-readable numbers must meet the Postal Service specifications in Chapter 4, Barcode Requirements. Samples must be submitted to the National Customer Support Center at the address shown below:

**ATTN: CONFIRMATION SERVICES  
SUPPORT NATIONAL CUSTOMER  
SUPPORT CENTER  
UNITED STATES POSTAL SERVICE  
225 N HUMPHREYS BLVD STE 501  
MEMPHIS TN 38188-1001**

#### 8.7.3.2 Dimensions

A Registered Mail barcoded label must have a length of 3 inches to 3-1/2 inches and a height of 1-3/4 inches to 2-11/32 inches.

### 8.7.3.3 Stock

Label 200 must be printed on one of the following stocks:

- a. White OCR bond, 20-pound basis weight (17 inches x 22 inches, 500 sheets), equal to Joint Committee on Printing (JCP) Code O-25, with no more than a trace of fluorescence in the paper.
- b. Smudge proof Litho Label, 50-pound basis weight (17 inches x 22 inches, 500 sheets), with general-purpose, permanent-type, pressure-sensitive adhesive coating on the back.

### 8.7.3.4 Printing

Label 200 must be printed in reverse in a match of PANTONE® Matching System (PMS) 185 (red). Ink must be unreadable (“blind”) to the scanning wands used with Postal Service automated recordkeeping systems for accountable mail and have a print contrast signal of less than 10 percent as measured by a Postal Service envelope reflectance meter. Numbers must be printed in non-reflective black ink. Black ink must have a minimum print contrast signal of 50 percent.

### 8.7.3.5 Label Adhesive

A privately printed Label 200 that will be affixed to a mailpiece must use a permanent adhesive to securely affix the label to the mailpiece. The label must be easy to affix but able to withstand normal handling by the Postal Service. It must be coated on the back (within 1/16 inch of the outside edges of the piece) with a permanent-type, pressure-sensitive adhesive or another form of glue with similar strength. The adhesive must adhere immediately and firmly to various paper-type surfaces (e.g., kraft, sulfite, bond, spun-bonded olefin, and other manufactured materials). The adhesive must be such that any attempt to remove the label must destroy either the label or part of the paper surface to which it is adhered.

A privately printed Label 200 that is printed directly onto the mailpiece does not need a pressure-sensitive adhesive or any other form of glue.

## 8.8 Return Receipt — PS Form 3811

### 8.8.1 General Information

Return receipt service is available for purchase at the time of mailing and provides a mailer with evidence of delivery (to whom the mail was delivered and date of delivery), along with information about the recipient's actual delivery address. See DMM section 503.6.0 for detailed information.

Return receipt service requires use of one of the following classes or domestic services:

- a. Certified Mail
- b. Certified Mail Restricted Delivery
- c. Certified Mail Adult Signature Required (hardcopy PS Form 3811 only)
- d. Certified Mail Adult Signature Restricted Delivery (hardcopy PS Form 3811 only)
- e. Collect on Delivery (COD)
- f. COD Restricted Delivery
- g. Priority Mail Express (hardcopy PS Form 3811 only)
- h. Insurance (if insured for more than \$500 then hardcopy PS Form 3811 only)
- i. Insurance Restricted Delivery (hardcopy PS Form 3811 only)
- j. Registered Mail
- k. Registered Mail Restricted Delivery
- l. Signature Confirmation (hardcopy PS Form 3811 only)
- m. Signature Confirmation Restricted Delivery (hardcopy PS Form 3811 only)
- n. Adult Signature Required (hardcopy PS Form 3811 only)

**Product Specific Information**

- o. Adult Signature Restricted Delivery (hardcopy PS Form 3811 only)

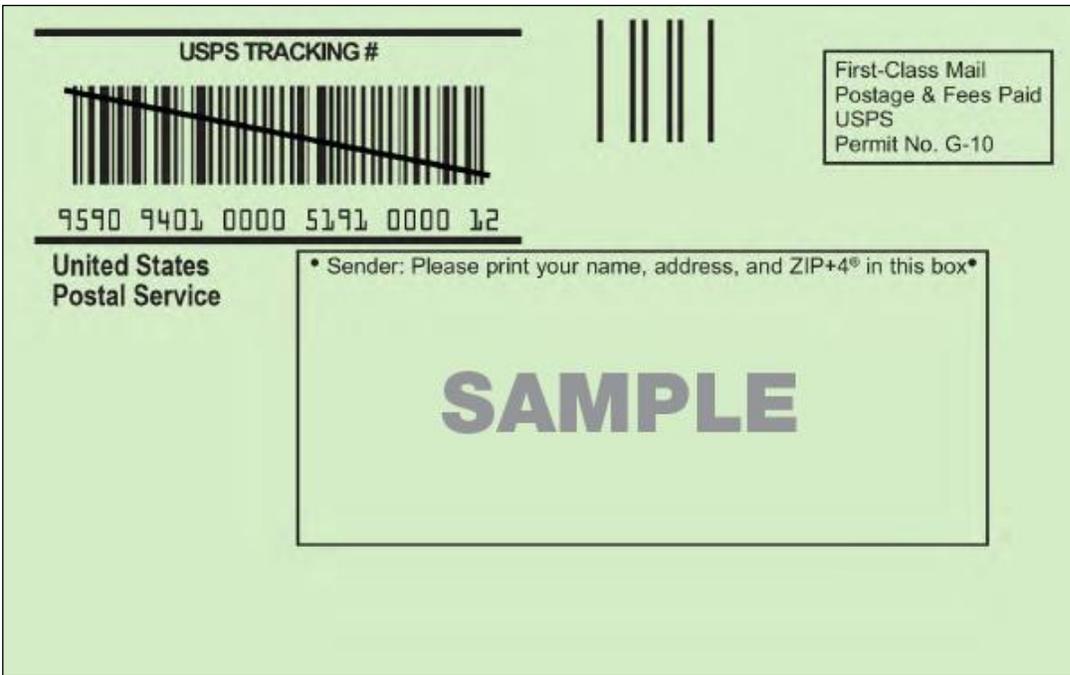

**8.8.2 Form**

To obtain a hardcopy return receipt by mail, the associated mailpiece must bear a green barcoded PS Form 3811, Domestic Return Receipt, as shown below using the IMpb format. A mailer must complete the mailer’s entries on the form (front and back), including the article identification number; attach the form; and place the completed form on the article. The name and address of the person or organization to which the return receipt is to be returned must be that of the mailer or the mailer’s agent. The mailpiece must bear the return address of either the mailer or mailer’s agent.

Return Receipts must use Service Type Code (STC) 909 in the barcode. The Return Receipt barcode must be linked in the SSF to the companion/host mailpiece. Link the barcode by placing the Return Receipt IMpb in the Original Tracking Number field in the detail 1 record of the SSF. Populate the Overlabel Indicator field with the value “02.” SSF version 1.7/2.0 is required for Return Receipt.

### 8.8.3 Private Printing Instructions

#### 8.8.3.1 Authorization

A mail owner must receive authorization from the Postal Service to use a privately printed green barcoded PS Form 3811. The privately printed form must be nearly identical in design and color to the Postal Service form. A minimum of 10 privately printed preproduction samples must be submitted to the National Customer Support Center for review and approval at the address shown below:

**ATTN: CONFIRMATION SERVICES  
SUPPORT NATIONAL CUSTOMER  
SUPPORT CENTER UNITED STATES  
POSTAL SERVICE  
225 N HUMPHREYS BLVD STE 501  
MEMPHIS TN 38188-1001**

#### 8.8.3.2 Dimensions

- a. A return receipt must have an overall length of 7 inches to 7-1/8 inches and an overall height of 3-1/2 inches to 3-2/3 inches.
- b. The detachable portion must have a length of 5 inches to 5-1/2 inches and a height of 3-1/2 inches to 3-2/3 inches. Any form less than 5 inches in length or 3-1/2 inches high is non-mailable.
- c. A privately printed PS Form 3811 must use a permanent adhesive to affix the form securely to the mailpiece so that the signature side is visible when affixed. The form must be easy to affix but able to withstand normal handling by the Postal Service.
- d. PS Form 3811 must be perforated along the entire height, 3/4 inch from the left and right edges. The areas between the perforations and the outside edges must be coated with a 5/8-inch-wide solid strip of permanent pressure-sensitive adhesive suitable for adhering to paper, wood, metal, unprinted and unprinted spun-bonded olefin, and corrugated fiberboard products.

## Product Specific Information

---

- e. The Return Receipt barcode section is located 2-1/8 inches from the top of the form in the left column. The barcode section including the human-readable representation barcode is 3/8" high. The barcode must fit in this section.
- f. On the reverse (Sender's address side) of the Return Receipt form, there is a barcode section that is located in the upper left corner. The section is 7/8 inches tall by 2-1/2 inches wide. The barcode must fit in this area.

### 8.8.3.3 Stock

PS Form 3811 must be printed on stock that complies with the following specifications:

- a. Thickness: The stock must have a minimum thickness of 0.007 inch and a maximum thickness of 0.016 inch.
- b. Weight: The stock must be 89-pound U.S. postal card stock, 90-pound index, 100-pound tag, or similar quality stocks. Bristol or high-bulk stock is unacceptable. Another stock might be acceptable if it passes testing for machinability in Postal Service automation equipment.
- c. Color: The color of the stock must meet one of the following requirements:
  7. The color of the stock must be a close match of PANTONE® Matching System (PMS) 9561 (green). In lieu of matching PMS 9561, the green background reflectance values, as measured by a Postal Service envelope reflectance meter, must be a minimum of 60 percent in the red portions and 64 percent in the green portions of the optical spectrum.
  8. The mail owner or printer may use white stock with a surface tint of PMS 9561 (green). If this option is used, the address block area may remain white. However, the green ink must remain uniform on the rest of the form, and the background reflectance values, as measured by a Postal Service envelope reflectance meter, must be a minimum of 60 percent in the red portions and 64 percent in the green portions of the optical spectrum.
  9. Bar Code printed in black ink. The Return Receipt contains a **non-concatenated** Intelligent Mail package (IMpb). The barcode construct must designate no routing information.

### 8.8.3.4 Printing

PS Form 3811 must be printed using black ink on both sides, head-to-head. Facing Identification Mark (FIM) bars on the face must be within 1/16 inch from the top edge and 2-1/8 inches from the right-side perforation. If the address is preprinted on the face of the form, it must include a complete delivery address, including the ZIP+4, and a correct delivery point barcode. As required by DMM 708.9.0, if the address and delivery point barcode are preprinted, FIM C must be used on the face of PS Form 3811, and if the address and barcode are not preprinted, FIM B must be used on the face of PS Form 3811.

### 8.8.3.5 Adhesive and Perforation

A privately printed PS Form 3811 must use a permanent adhesive to affix the form securely to the mailpiece. The form must be easy to affix but able to withstand normal handling by the Postal Service.

PS Form 3811 must be perforated along the entire height, 3/4 inch from the left and right edges. The areas between the perforations and the outside edges must be coated with a 5/8-inch-wide solid strip of permanent pressure-sensitive adhesive suitable for adhering to paper, wood, metal, unprinted and unprinted spun-bonded olefin, and corrugated fiberboard products.

## 8.9 Return Receipt for Merchandise — PS Form 3804

### 8.9.1 General Information

Return receipt for merchandise was retired in July 2020.

## 8.10 Signature Confirmation— PS Form 153

### 8.10.1 General Information

Signature Confirmation service provides the mailer with information about the date and time an article was delivered and, if delivery was attempted but not successful, the date and time of the delivery attempt. A delivery record, including the recipient's signature, is maintained by the USPS and is available, via email, upon request. No acceptance record is kept at the office of mailing. Signature Confirmation service is available only at the time of mailing. Signature Confirmation service does not include insurance, but insurance may be purchased as an additional service. Some statutes and regulations governing the mailing of documents with legal significance may require the use of Certified Mail or Registered Mail rather than Signature Confirmation. Signature Confirmation Restricted Delivery permits a mailer to direct delivery only to the recipient or recipient's authorized agent. The recipient must be an individual specified by name. See DMM section 503.8.0 for detailed information.

Electronic Signature Online™ (eSOL) service allows customers to use a previously provided electronic signature to allow delivery of items for which the sender chose Priority Mail Express®, Signature Confirmation™, or Insurance over \$500. These services until now have required a signature at the time of delivery. With eSOL, the Informed Delivery account holder for the delivery address can opt to use the previously provided electronic signature, using their Informed Delivery® Packages Dashboard. By default, certain packages are automatically opted in and eligible for eSOL. Mailers requiring a physical signature, at the time of delivery, rather than accepting a previously provided electronic signature, can opt out of Electronic Signature Online (eSOL). To opt out, mailers must populate a value code of '3' in the Waiver of Signature/Carrier Release/Merchant Override/Customer Delivery Preference field (see Section 8.15.2) in the Shipping Services File.

### 8.10.2 Barcoded Labels

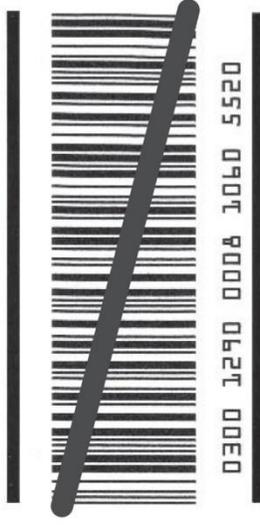

A Signature Confirmation item must bear a barcoded fuchsia PS Form 153, Signature Confirmation Receipt. Human-readable numbers corresponding to the barcode must appear below it, arranged in groups of four digits.

### 8.10.2.1 Types of Labels

Mailers must use one of the label options shown below:

Exhibit 20: PS Form 153

**United States Postal Service®  
SIGNATURE CONFIRMATION™**

SIGNATURE CONFIRMATION NUMBER:  
0300 1290 0008 1060 5520

**U.S. Postal Service® Signature Confirmation™ Receipt**

Postage and Signature Confirmation fees must be paid before mailing.

Restricted Delivery

PS Form 153, January 2016 PSN 7530-05-000-4046 See Reverse for Instructions

SAMPLE

**Instructions for Signature Confirmation Service**

**This service:**

- Provides date and time of delivery and/or attempted delivery upon inquiry.
- Provides copy of recipient signature via email upon request.
- Is available only with Priority Mail®, First-Class Mail® parcels, First-Class Package Service®, USPS Retail Ground™, and Package Services (Bound Printed Matter, Media Mail®, and Library Mail).
- Provides Signature Confirmation Restricted Delivery to a specific person for an additional fee. When used, endorse mailpiece "Restricted Delivery" above the delivery address and to the right of the return address, or see a retail associate for assistance.

A parcel is a box OR an item that is more than 3/4" thick at its thickest point. The face must be large enough for return and delivery addresses, special service label, markings or endorsements, and postage. No insurance coverage is provided. If indemnity coverage is desired, consider insurance, Registered Mail™, or another extra service that provides coverage. Contact your local postmaster for information concerning available options and limitations on coverage.

**POSTAL CUSTOMER:** Keep this receipt. For inquiries, access internet web site at [www.usps.com](http://www.usps.com)® or call 1-800-222-1811.

**HOW TO USE:**

**1. COMPLETE IN INK OR BALL POINT PEN.**

**2. ATTACH LABEL TO THE LEFT OF DELIVERY ADDRESS.**

PS Form 153, January 2016 (Reverse) PSN 7530-05-000-4046

### 8.10.3 Private Printing Instructions

#### 8.10.3.1 Authorization

A mail owner must receive authorization from the Postal Service to use a privately printed PS Form 153. The privately printed form must be nearly identical in design and color to the Postal Service form. The barcode and human-readable numbers must meet the Postal Service specifications. Label 315 is available to electronic option mailers. Labels must include an IMpb. Customers who print their own barcoded labels can receive delivery status information, which includes the date and time of delivery in bulk.

Samples must be submitted to the National Customer Support Center for review and approval at the address shown below:

**ATTN: CONFIRMATION SERVICES SUPPORT  
NATIONAL CUSTOMER SUPPORT CENTER  
UNITED STATES POSTAL SERVICE  
225 N HUMPHREYS BLVD STE 501  
MEMPHIS TN 38188-1001**

#### 8.10.3.2 Label Adhesive

A privately printed PS Form 153 and Label 315 that will be affixed to a mailpiece must use a permanent adhesive or have another form of glue to securely affix the detachable barcoded label portion of the form to the mailpiece. The label must be easy to affix but able to withstand normal handling by the Postal Service. It must be coated on the back (within 1/16 inch of the outside edges of the piece) with a permanent-type, pressure-sensitive adhesive or another form of glue with similar strength. The adhesive must adhere immediately and firmly to various paper-type surfaces (e.g., kraft, sulfite, bond, spun-bonded olefin, and other manufactured materials). The adhesive must be such that any attempt to remove the label must destroy either the label or part of the paper surface to which it is adhered.

A privately printed PS Form 153 or Label 315 that is printed directly onto the mailpiece does not need a pressure-sensitive adhesive or any other form of glue.

### 8.11 Open and Distribute

#### 8.11.1 Priority Mail Open and Distribute (PMOD) Service

Priority Mail Open and Distribute (PMOD) allows mailers to expedite the transportation of other classes of mail to delivery units and mail processing facilities using Priority Mail. Customers place mailpieces into an approved USPS Priority Mail container (sack, tray, or tub), affix a PMOD address label barcode that includes Service Type Code (STC) 123 to the container, and present the container at a Business Mail Entry Unit (BMEU) or authorized acceptance location.

The contents of the PMOD container may include any class of mail except Priority Mail Express. Postage is paid based on the weight of the contents of the PMOD container. At the destination facility, the barcode is scanned and the enclosed mail is processed according to mail class. Dimensional weight does not apply to PMOD.

##### 8.11.1.1 PMOD requirements

1. Each container must have the following:

## Product Specific Information

---

- a. An IMpb with STC 123 on the address label, with human-readable text above the barcode of “USPS Scan On Arrival”
  - b. A green Tag 161 going to mail processing facilities (NDC/RPDC, SCF/LPC/RPDC, ADC, or ASF)
  - c. A pink Tag 190 or Label 190-S (for flat-rate boxes or envelopes) for destination delivery units (DDU/S&DCs) or an Open and Distribute tray box
2. The mailer sends a Shipping Services File for the PMOD container. Mailers are not required to send files when labels are generated by the US Postal Service’s Click-N-Ship for Business or the Web Tools API.
  3. The mailer presents the container to the BMEU or authorized USPS facility with a completed PS Form 3152, Confirmation Services Certificate. If the mailing within the container is paid by permit imprint, the mailers must present the entire mailing to the BMEU where the permit is held.
  4. After contents and postage of each PMOD container are verified, the barcode on PS Form 3152 will be scanned as accepted by the BMEU or authorized acceptance location.
  5. PMOD labels that are addressed to:
    - an SCF, ASF, or ADC must reflect:
      - For the SCF address label, use SCF followed by the facility name, state, and National Air and Surface System (NASS) Code found in the Drop Entry Point View File available at the USPS FAST Web site: [fast.usps.com](https://fast.usps.com). (Click on Reports>Mail Direction Search>Drop Entry Point View.)
      - For the ASF address label, use ASF followed by the facility name, state, and NASS Code found in the Drop Entry Point View File under NDC available at the USPS FAST Web site: [fast.usps.com](https://fast.usps.com). (Click on Reports>Mail Direction Search>Drop Entry Point View.)
      - For the ADC address label, use ADC followed by the facility name, state, and NASS Code found in the Drop Entry Point View File available at the USPS FAST Web site: [fast.usps.com](https://fast.usps.com). (Click on Reports>Mail Direction Search>Drop Entry Point View.)
    - NDC
      - For the NDC address label, use NDC followed by the facility name, state, and NASS Code found in the Drop Entry Point View File available at the USPS FAST Web site: [fast.usps.com](https://fast.usps.com). (Click on Reports>Mail Direction Search>Drop Entry Point View.)
    - DDU
      - A DDU must reflect the complete address, including the ZIP+4 Code.
      - The Destination Delivery Units (DDU) addressing standards will remain the same (i.e., use the name of the DDU on the top line; the street address of the facility on the next line; and city, state, and ZIP+4® code on the last line of the address block).
  6. Must be certified for IMpb and use Shipping Services File Version v 1.6 or higher file format with Electronic File Type ‘1’ (Tracking & Postage), or ‘2’ (Tracking Only).
  7. Must use an Open and Distribute Contents indicator in the D1 Record as follows:
    - EF=Flats/Electronic Payment
    - PF=Flats/Non-Electronic Payment
    - EL=Letters/Electronic Payment
    - PL=Letters/ Non-Electronic Payment
    - EP= Parcels/Electronic Payment
    - PP=Parcels/ Non-Electronic Payment
  8. Must include the Destination Facility Type Code in the D1 Record as follows:
    - A = Distribution Area Distribution Center (DADC)
    - B = Regional Processing and Distribution Center (DNDC/RPDC)
    - D = Sorting & Distribution Center (DDU/S&DC)
    - F = Destination Auxiliary Service Facility (ASF)
    - S = Local Processing Center/Regional Processing and Distribution Center (DSCF/LPC/RPDC)
  9. Must validate the ZIP Code used in the Electronic File D1 Record using the Facility Access and Shipment Tracking (FAST) System, which is available at the Postal Service Web site at <https://fast.usps.com>.

PMOD service provides the date, time, city, state, and ZIP Code of the location where the container was received. Mailers should see a scan event, "Received at Opening Unit," for their PMOD containers.

**8.11.1.2 Priority Mail Open and Distribute (PMOD) - File Specification Information**

**Version 1.6, 1.7/2.0 Header Record Required Fields**

### 8.11.1.3 Priority Mail Open and Distribute Label Examples

Depicted below are examples of the Confirmation Services Priority Mail Open and Distribute and the Confirmation Services Priority Mail Open and Distribute eVS labels with the various addressing requirements.

#### Exhibit 21: Priority Mail Open and Distribute and Open and Distribute eVS Labels

**NOTE:** The barcode labels depicted here are for **illustration** purposes only.

### 8.11.2 Priority Mail Express Open and Distribute (PMEOD) Service

Priority Mail Express Open and Distribute (PMEOD) allows mailers to expedite the transportation of other classes of mail to delivery units and mail processing facilities using Priority Mail Express. Customers place mailpieces into an approved USPS Priority Mail Express container (sack, tray, or tub), affix a PMEOD address label barcode that includes Service Type Code (STC) 723 to the container, and present the container at a Business Mail Entry Unit (BMEU) or authorized acceptance location before the critical acceptance time (CAT) for Priority Mail Express.

The contents of the PMEOD container may include any class of mail except Priority Mail Express. Postage is paid based on the weight of the contents of the PMEOD container. At the destination facility, the barcode is scanned and the enclosed mail is processed according to mail class. Dimensional weight does not apply to PMEOD.

#### 8.11.2.1 PMEOD Requirements:

1. Each container must have the following:
  - a. An IMpb with STC 723 on the address label, with human-readable text above the barcode of "USPS Scan On Arrival"
  - b. A yellow Tag 267 going to mail processing facilities (NDC/RPDC, SCF/LPC/RPDC, ADC, or ASF)
  - c. A blue Tag 257 or Label 257-S (for flat-rate boxes or envelopes) for destination delivery units (DDU/S&DCs) or an Open and Distribute tray box

## Product Specific Information

---

2. The mailer sends a Shipping Services File for the PMEOD container. Mailers are not required to send files when labels are generated by the US Postal Service's Click-N-Ship for Business or the Web Tools API.
3. The mailer presents the container to the BMEU or authorized USPS facility with a completed PS Form 3152, Confirmation Services Certificate. If the mailing within the container is paid by permit imprint, the mailers must present the entire mailing to the BMEU where the permit is held.
4. After contents and postage of each PMEOD container are verified, the barcode on PS Form 3152 will be scanned as accepted by the BMEU or authorized acceptance location.
5. PMEOD labels addressed to:
  - an SCF, ASF, or ADC must reflect:
    - For the SCF address label, use SCF followed by the facility name, state, and National Air and Surface System (NASS) Code found in the Drop Entry Point View File available at the USPS FAST Web site: [fast.usps.com](http://fast.usps.com). (Click on Reports>Mail Direction Search>Drop Entry Point View.)
    - For the ASF address label, use ASF followed by the facility name, state, and NASS Code found in the Drop Entry Point View File under NDC available at the USPS FAST Web site: [fast.usps.com](http://fast.usps.com). (Click on Reports>Mail Direction Search>Drop Entry Point View.)
    - For the ADC address label, use ADC followed by the facility name, state, and NASS Code found in the Drop Entry Point View File available at the USPS FAST Web site: [fast.usps.com](http://fast.usps.com). (Click on Reports>Mail Direction Search>Drop Entry Point View.)
  - NDC
    - For the NDC address label, use NDC followed by the facility name, state, and NASS Code found in the Drop Entry Point View File available at the USPS FAST Web site: [fast.usps.com](http://fast.usps.com). (Click on Reports>Mail Direction Search>Drop Entry Point View.)
  - DDU
    - A DDU must reflect the complete address, including the ZIP+4 Code.
    - The Destination Delivery Units (DDU) addressing standards will remain the same (i.e., use the name of the DDU on the top line; the street address of the facility on the next line; and city, state, and ZIP+4® code on the last line of the address block).
6. Must be certified for IMpb and use Shipping Services File Version v 1.6 or higher file format with Electronic File Type '1' (Tracking & Postage), or '2' (Tracking Only).
7. Must use an Open and Distribute Contents indicator in the D1 Record as follows:
  - EF=Flats/Electronic Payment
  - PF=Flats/Non-Electronic Payment
  - EL=Letters/Electronic Payment
  - PL=Letters/ Non-Electronic Payment
  - EP= Parcels/Electronic Payment
  - PP=Parcels/ Non-Electronic Payment
8. Must include the Destination Facility Type Code in the Detail 1 Record that represents the destination location:
  - A = Distribution Area Distribution Center (DADC)
  - B = Regional Processing and Distribution Center (DNDC/RPDC)
  - D = Sorting & Distribution Center (DDU/S&DC)
  - F = Destination Auxiliary Service Facility (ASF)
  - S = Local Processing Center/Regional Processing and Distribution Center (DSCF/LPC/RPDC)
9. Must use a Delivery Option Indicator to indicate End of Day delivery option:
  - E=Scheduled End of Day

## Product Specific Information

10. Must validate the ZIP Code used in the Shipping Services File Detail 1 Record using the Facility Access and Shipment Tracking (FAST) System, which is available at the Postal Service Web site at <https://fast.usps.com>.

PMEOD service provides the date, time, city, state, and ZIP Code of the location where the container was received. Mailers should see a scan event, "Received at Opening Unit," for their PMEOD containers.

## 8.12 USPS Returns

### 8.12.1 Description

USPS Returns allows merchants to provide a pre-printed, postage paid return label for their customers to return merchandise. DMM section 505.3.0 has detailed instructions on the unique requirements to participate in USPS Returns.

The key distinct features of the USPS Returns label are:

- The USPS return label is addressed directly to the permit holder's address
- Items are charged an average uniform price based on sampling, usually at the point of origin
- The average uniform price is adjusted monthly
- Postage is collected based on number of pieces receiving a physical scan in PTR

In order to qualify, merchants must meet the following requirements:

- Receive a minimum of 10,000 returns per year. Any combination of eligible classes of mail may be combined to meet this threshold.
- To be eligible for Commercial Plus pricing, the mailer must meet the volume thresholds defined in DMM section 505.3.7.3 or have a Commercial Plus pricing (CPP) returns agreement.
- Must establish a MRS permit and pay applicable account maintenance fees annually.
- Postage must be paid via Enterprise Payment System (EPS) account.
- An Intelligent Mail package barcode (IMpb) must be printed on each shipping label along with the merchant's Mailer Identification (MID).
- Shipping Services File version 1.6 or higher may be required to transmit a manifest to Product Tracking and Reporting System (PTR) if stated in the Negotiated Service Agreement (NSA) or if the permit holder wants to include insurance above the levels offered for free or other allowed extra services.

### 8.12.2 Barcoded label

The standard sizes for return shipping labels are 4x6, 4x4 and 3x6 inches. The shipping label must include the following:

- A complete destination delivery address
- A service banner which indicates the requested service based on the STC list (Appendix I)
- The carrier route number is suggested. The Address Management System (AMS) Carrier Route product provides mailers the reference information needed to apply carrier route codes to addresses. For more information, prices and order form, go to: <http://postalpro.usps.com/node/633>
- Additionally, if insurance above the amount included in the class of mail or other extra services are requested, a Shipping Services File must be transmitted.

Exhibit 23: USPS Returns (Scan Based Payment) Label

### 8.12.3 Private Printing Instructions

#### 8.12.3.1 Authorization

A SBP Returns permit holder must receive authorization from the Postal Service to privately print SBP Returns labels. The privately printed SBP Returns labels must be nearly identical in design to the Postal Service format shown above. Note: SBP Returns labels created using a USPS API do not need to submit examples.

The barcode and human-readable numbers must meet the Postal Service specifications in Chapter 4, Barcode Requirements. Samples must be submitted to the National Customer Support Center at the address shown below:

**ATTN: CONFIRMATION SERVICES SUPPORT  
NATIONAL CUSTOMER SUPPORT CENTER  
UNITED STATES POSTAL SERVICE  
225 N HUMPHREYS BLVD STE 501  
MEMPHIS TN 38188-1001**

#### 8.12.4 Instructions

Written instructions must be provided with the label that, at a minimum, directs the customer to do the following:

1. "If your name and address are not already preprinted in the return address area, print them neatly in that area or attach a return address label there."
2. "Attach the label squarely onto the largest side of the mailpiece, centered if possible. Place the label so that it does not fold over to another side. Do not place tape over any barcodes on the label or any part of the label where postage and fee information will be recorded."
3. "Obliterate any other addresses and barcodes on the outside of the parcel."
4. "Mail the labeled parcel at a Post Office, drop it in a collection box, leave it with your letter carrier, or schedule a package pickup at [usps.com](https://usps.com)."

### 8.13 Cremated Remains

#### 8.13.1 General Information

There are specific requirements for shipping human or animal cremated remains. Customers providing a shipping services file must include the appropriate cremated remains three-digit Extra Service Code (Refer to Appendix J, Table 7-1 for the complete list of 3-digit Extra Services Codes) for domestic and international shipments.

#### 8.13.2 Barcoded Cremated Remains Label

An Intelligent Mail package barcode (IMpb) shipping label with the appropriate service type code and the banner text above the barcode (Refer to Appendix I for the complete list of Service Type Codes) must be used for cremated remains domestic shipments.

#### Exhibit 24: Cremated Remains Labels

## Product Specific Information

## 8.14 Merchant Override USPS Electronic Signature Online (eSOL)

### 8.14.1 General Information

Electronic Signature Online™ (eSOL) service allows customers to use a previously provided electronic signature to allow delivery of items for which the sender chose Priority Mail Express®, Signature Confirmation™, or Insurance over \$500. These services until now have required a signature at the time of delivery. With eSOL, the Informed Delivery account holder for the delivery address can opt to use the previously provided electronic signature, using their Informed Delivery® Packages Dashboard. By default, certain packages are automatically opted in and eligible for eSOL. Mailers requiring a physical signature, at the time of delivery, rather than accepting a previously provided electronic signature, can opt out of Electronic Signature Online (eSOL). To opt out, mailers must populate a value code of '3' in the Waiver of Signature/Carrier Release/Merchant Override/Customer Delivery Preference field (see Section 8.15.2) in the Shipping Services File.

### 8.14.2 Shipping Service File Specifications

Mailers requiring a physical signature, at the time of delivery, rather than accepting a previously provided electronic signature, can opt out of Electronic Signature Online (eSOL). To opt out, mailers must populate a value code of '3' in the Waiver of Signature/Carrier Release/Merchant Override/Customer Delivery Preference field in the Shipping Services File.

## 8.15 USPS Tracking Plus™

### 8.15.1 General Information

USPS Tracking Plus™ service allows customers to retain scan data, or scan and signature data, beyond the Postal Service's standard data retention period, for an additional 6 months up to 10 years for a small fee. Below is the complete list of available products:

Priority Mail Express  
Priority Mail  
USPS Ground Advantage  
Parcel Select  
Library Mail  
Media Mail  
Bound Printed Matter  
First-Class Mail® (Letters and Flats) \*  
USPS Marketing Mail® Parcels\*  
USPS Marketing Mail® Nonprofit Parcels\*  
*\*with the purchase of a trackable extra service*

Priority Mail Express International  
Priority Mail International  
First-Class Package International Service (where Electronic USPS Delivery Confirmation® International Service is available)

For Scan and Signature Retention on products other than Priority Mail Express, the customer must have purchased an underlying signature service, such as Signature Confirmation service (see Notice 123—Price List). Customers can request USPS Tracking Plus™ service online at [usps.com](https://usps.com) or in a Shipping Services File.

### 8.15.2 Shipping Services File Specifications

Mailers interested in purchasing USPS Tracking Plus via a shipping services file should contact us for more information at [IMpb@usps.gov](mailto:IMpb@usps.gov).

### 8.15.3 Prices (per package)

Eligible parcels are subject to the USPS Tracking Plus™ fee (see [Notice 123—Price List](#))

## 8.16 Hazardous Materials

### 8.16.1 General Information

[Publication 52](#), *Hazardous, Restricted, and Perishable Mail*, provides important information to help mailers determine what may be mailed and how certain items must be packaged to keep the mail safe. It also provides guidance to Postal Service™ employees accepting this mail. The information in this section is intended to supplement Publication 52 with specific information about the electronic indicators that are to be used with hazardous materials. It is recommended that mailers refer to [Publication 52](#) for information and guidance when mailing potentially hazardous, restricted, or perishable matter prior to preparing electronic data and items for shipment.

To enhance its ability to make knowledgeable decisions regarding the handling and disposition of hazardous materials shipments in its networks the Postal Service is requiring mailers to identify and categorize their hazardous materials shipments using specified electronic indicators. The Postal Service uses these indicators to provide details on the categories, volume and weight of the hazardous materials contained in packages tendered.

The Postal Service has defined unique Service Type Codes (STCs) for hazardous materials outbound shipments via Priority Mail, Priority Mail Express, USPS Ground Advantage and Parcel Select. The Postal Service has also defined unique STCs to correspond to hazardous materials return services shipments via the Parcel Return Service (PRS), Priority Mail Return, Priority Mail Express Return and USPS Ground Advantage Return as well as unique STCs to explicitly identify Division 6.2, Infectious Substances returned through Postal Service Networks. The Postal Service has defined unique STCs to identify Division 6.2 Infectious Substances because it believes this category of material is the most commonly shipped hazardous material in Postal Service networks via a return service and the additional visibility into these shipments is beneficial to Postal Operations. See the list of HAZMAT Outbound and Returns Service Type Codes starting on pg 130. See Appendix I for a complete list of Service Type Codes.

The Postal Service has also defined Extra Service Codes (ESCs) to identify the category of hazardous material that is associated with specific quantity restrictions, packaging and markings requirements, and for some ESCs, restrictions in air transportation. See the list of HAZMAT Extra Service Codes starting on pg 135. See Appendix J Table 7 for a complete list of Extra Service Codes.

Items destined to military or PTFAS locations are excluded from using HAZMAT Service Type codes and the 'H' service icon on the package label. HAZMAT mailed to, from and between APO/FPO/DPO and PTFAS locations must follow international rules for mailing. When shipping HAZMAT internationally mailers must use extra service codes to identify that the package contains HAZMAT (857) along with the extra service code indicating the specific type of HAZMAT. Only three (3) types of HAZMAT are allowed in international shipments as follows:

- 813 Class 7 – Radioactive Materials Package
- 820 – HAZMAT Class 9 – Lithium batteries, unmarked package
- 826 – Division 6.2 Hazardous Materials

## **8.16.2 Barcoded Hazardous Materials Label**

### **Service Icon Change**

An Intelligent Mail package barcode (IMpb) shipping label with the appropriate service type code and the banner text above the barcode must be used for HAZMAT domestic shipments. The Postal Service strongly recommends the use of a service icon of 'H' in the upper left corner when the package being shipped domestically contains an item that is hazardous material to further improve visual identification.

### **IMmb Intelligent Mail Matrix Barcode**

Due to the risks from certain packaging for curvature, fold-overs and creased shipping labels that distort the current GS1-128 IMpb barcode such that the barcode becomes unreadable the USPS is recommending the addition of two (2) supplemental GS1-DataMatrix IMmbs to shipping labels. The addition of the two 2D barcodes will provide a total of three opportunities for the package to be scanned and tracked.

The Postal Service requires mailers to add one supplemental GS1-DataMatrix (2D) IMpb to domestic shipping labels in the address block to the left of the Delivery Address. The Postal Service recommends one supplemental GS1-DataMatrix (2D) IMpb in the lower right corner of the shipping label.

Examples of labels for Priority Mail and USPS Ground Advantage with the 'H' service icon and the two 2D barcodes is shown in Exhibit 28 below.

### 8.16.3 Service Type Codes

HAZMAT items must meet the standards for mailability as outlined in Publication 52. The chart below contains the list of service type codes that are required when shipping domestic hazardous materials. An extra service code representing general HAZMAT shipment is required. It is strongly recommended that an additional extra service that identifies the specific category of HAZMAT is also used.

#### STCs Domestic Outbound (Required)

The following STCs are required when shipping domestic hazardous materials, unless an STC from the “Optional” table is used in combination with the applicable ESC (table further below). Only the ESCs shown are required when using an STC from the following list.

HAZMAT SERVICE TYPE CODES FOR OUTBOUND DOMESTIC – REQUIRED							
STC	Description	Banner Text	Extra Service Code 1	Extra Service Code 2	Extra Service Code 3	Extra Service Code 4	Extra Service Code 5
760	Priority Mail Express Signature Waived - Hazardous Materials	USPS TRACKING # HAZMAT	986	857	ESC for the Specific HAZMAT Category

348-411	File Types 1 and 2 (see rules)	Sender E-mail Address	Alphanumeric (64)	E-mail address of sender.	janedoe@usps.gov	Information is required for Hold For Pickup for the customer to receive the Hold for Pickup notification.  Default is spaces.
412-475	File Types 1 and 2 (see rules)	Sender SMS Number	Alphanumeric (64)	Phone number at which sender will receive text messages.	5555551235	Information is required for Hold For Pickup for the customer to receive the Hold for Pickup notification.  Default is spaces.
476-498	All File Types (see rules)	Filler	Alphanumeric (23)	For future use.		Must be spaces

## Appendix B: Shipping Services File Version 1.7

HEADER RECORD 1 - Shipping Services File Version 1.7 Layout						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
001 - 002	All File Types (see rules)	Header Record ID	Alphanumeric (2)	A 2-character system constant that identifies a header record.	H1	'H1' is required.
003 - 036	All File Types (see rules)	Electronic File Number	Alphanumeric (34)	<p>Unique number assigned to identify the electronic file.</p> <p>Commercial Mailer                      2-digits - AI (92 or 93)                      3-digits - '750'                      6- or 9-digits - MID                      If six-digit MID, 10- or 14-digit serial #                      If nine-digit MID, 7- or 11-digit serial #                      1-digit - check digit</p> <p>Online Mailer                      2-digits - AI 94                      3-digits - '750', '757', or '759'                      2-digits - source identifier for your system                      6- or 9-digits - MID                      5 or 8-digits, serial number depending on construct used                      1-digit - check digit</p>	9275012345678 912345678	<p>Mailer ID must be that of the company transmitting the file. (all file types)</p> <p>Must be unique for 120 days from first use.</p> <p>Left justified trailing spaces.</p> <p>Commercial Mailers must use the following valid barcode constructs: C04, C08, C09 or C10.</p> <p>Online Mailers must use the following valid barcode constructs: N01 – N10.</p> <p>AI 91 and STC 50 are not acceptable in this field.</p> <p>Use Service Type Code "750" when either a PS Form 3152 or PS Form 8125 will be printed.</p> <p>Use Service Type Code "757" when a PS Form 5630 (SCAN form) will be printed. To be used by Online shippers who offer use of the Shipment Confirmation Acceptance Notice (SCAN) form</p> <p>Use 759 when the user has requested the integrated SCAN form / carrier pickup form.</p>

Appendix B – Shipping Services File 1.7

HEADER RECORD 1 - Shipping Services File Version 1.7 Layout						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
037 – 037	All File Types (see rules)	Electronic File Type	Numeric(1)	'1' - Postage & Tracking File '2' - Tracking File '3' - Returns Service '4' - Corrections	1	'1' - used for electronic Verification System (eVS).  '2' - used for Delivery/ Signature Confirmation, Scan-Based Payment customers and other Extra Services.  '3' - used for Parcel Returns Services.  '4' - used for Corrections.
038 - 045	All File Types (see rules)	Date of Mailing	Numeric(8)	Date mail is tendered to USPS	2008-01-27 Entered as: 20080127	YYYYMMDD format.  Numeric values (0-9) only.
046 - 051	All File Types (see rules)	Time of Mailing	Numeric(6)	Time mail is tendered to USPS (estimated)	13:15:00 Entered as: 131500	HHMMSS, military format and time shall be valid.  Numeric values (0-9) only.
052 - 052	All File Types (see rules)	Entry Facility Type	Alphanumeric(1)	Type of USPS facility where mail is tendered 'A' – ADC 'B' – NDC/RPDC 'D' – DDU/S&DC 'F' – ASF 'H' – HUB 'I' - ISC 'S' – SCF/LPC/RPDC	A	For origin or destination entry facilities.  Required for Drop Ship Mailers.  Required for Parcel Return Service mailers to note pick-up facility type.  Required only for Destination Entry.  Enter space for Origin Entry
053 - 057	All File Types (see rules)	Entry Facility ZIP Code	Numeric(5)	5-digit ZIP Code of postal facility where the mail is tendered	22201	Numeric only (0-9).  Required for Commercial USPS Ground Advantage (formerly First-Class Package Service)
058 - 061	All File Types (see rules)	Entry Facility ZIP +4	Numeric(4)	ZIP +4 Code of postal facility where mail is tendered	4313	Numeric only (0-9).

Appendix B – Shipping Services File 1.7

HEADER RECORD 1 - Shipping Services File Version 1.7 Layout						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
062 - 063	File Types 1 and 2 (see rules)	Direct Entry Origin Country Code	Alphanumeric(2)	Two character standardized IMM International country code where Direct Entry Mail originated	CN	Required for Direct Entry Mailings. Default is spaces.
064 - 066	File Types 1 and 2 (see rules)	Shipment Fee Code	Alphanumeric(3)	Code for a fee that applies to the entire shipment such as Pickup on Demand fee	PKF	Currently used for Pickup on Demand fee Default is spaces.
067 - 072	File Types 1 and 2 (see rules)	Extra Fee for Shipment	Numeric(6)  Define as : 9999V99	Fee for entire shipment, such as Pickup on Demand fee	\$13.40  Entered as: 001340	Currently used for Pickup on Demand fee Default is zeroes.
073 - 074	All File Types (see rules)	Containerization Indicator	Alphanumeric(2)	Containerization Indicator	01	Containerization Values: '01' = a 5 Digit Containerization (No DE Captured)  '02', '03' both represent a 3 Digit Containerization - to be used for either NDC ('03') entry or SCF ('02') entry – but these mailpieces are expected to be worked at the Destination Processing facility and a DE captured.
075 - 077	All File Types (see rules)	USPS Electronic File Version Number		USPS Electronic File Version Number	1.7  Entered as: 017	Shall be 017

HEADER RECORD 1 - Shipping Services File Version 1.7 Layout						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
078 - 089	All File Types (see rules)	Transaction ID	Alphanumeric(12)	Unique 12-digit number assigned to associate manifests to file transmissions within a 24-hour period	200806010001	<p>Required field for commercial mailers (AI 92 or 93). Not required for online mailers (AI 94).</p> <p>Transaction ID is a field that is used to group files together that are submitted with the Transaction ID in reports. This allows mailers with multiple mailing sites or multiple daily files to group files together that may be submitted independently (by site or file) for easier reconciliation.</p> <p>This field shall follow the format of year, date, month and a numeric sequence number to be valid.</p> <p>Valid format: YYYYMMDD####</p>
090 - 093	All File Types (see rules)	Software Vendor Code	Alphanumeric(4)	Code from vendor software to identify the developer of the shipping/manifesting system	1234	<p>Required for manifests generated by vendor-provided software.</p> <p>Code provided by vendor software.</p> <p>Default is spaces for non-vendor's solutions.</p>
094 - 101	All File Types (see rules)	Software Vendor Product Version Number	Alphanumeric(8)	Shipping/manifesting software's product version number	5.02.3A	<p>Required for manifests generated by vendor-provided software.</p> <p>Default is spaces for non-vendor's solutions.</p> <p>Left-justified, trailing spaces.</p> <p>Provided by vendor software.</p>

Appendix B – Shipping Services File 1.7

HEADER RECORD 1 - Shipping Services File Version 1.7 Layout						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
102 - 110	All File Types (see rules)	File Record Count	Numeric(9)	Total number of all records in electronic file to include Header Record, Container Record(s) and all Detail Records	000001517	Leading zeroes required.  Sum of H1 record, C1 record(s), D1 record(s), D2 record(s), D3 record(s) and D4 record(s)
111-119	All File Types (see rules)	Mailer ID	Alphanumeric(9)	Mailer ID shall be that of the MID certified for tile transmission  (All file types)	969001726	Mailer ID contained in the Electronic File Number,  6 or 9 digit MID.  6 digit MID, left justified, trailing spaces.
120 - 130	All File Types (see rules)	Filler	Alphanumeric(11)	Filler for future use		Spaces are required.

Appendix B – Shipping Services File 1.7

CONTAINER RECORD 1 - Shipping Services File Version 1.7 Layout						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
001 - 002	All File Types (see rules)	Container Record ID	Alphanumeric(2)	A 2-character system constant that identifies a header record.	C1	'C1' is required if a Container Record is being included.
003 - 036	All File Types (see rules)	Container ID	Alphanumeric(34)	Barcode on container.	2220101271234 56789912345	This may be a valid IM Container Barcode, IM Tray Barcode, or a Trailer Placard Barcode.  Container IDs containing alpha characters should be upper case only.
037 - 038	All File Types (see rules)	Container Type	Alphanumeric(2)	Describes type of container for Container ID 1.	SK	Refer to Appendix J, Table 3 for the complete list of Container Type IDs.
039 - 072	All File Types (see rules)	Electronic File Number	Alphanumeric(34)	Unique number assigned to identify the electronic file.	9275012345678 912345678	The same EFN from the H1 record associated with the packages in this container.
073 - 077	All File Types (see rules)	Destination ZIP Code	Numeric(5)	Destination 5-digit ZIP Code.	22201	Should identify the USPS facility where the container will be dropped / presented for shipping. Shall be 5 digits.  Numeric values (0-9) only.
078-100	All File Types (see rules)	Filler	Alphanumeric(22)	Filler for future use.		Spaces are required.

DETAIL RECORD D1 - Shipping Services File Version 1.7 Layout						
TRACKING INFORMATION						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
001 - 002	All File Types (see rules)	Detail Record ID	Alphanumeric(2)	A 2-character system constant that identifies a detail record.	D1	'D1' is required.
003 - 036	All File Types (see rules)	Tracking Number	Alphanumeric(34)	<p>For Domestic files provide IMpb Tracking number used on package. May include routing information and Package Identification Code (PIC).</p> <p>Commercial Mailer</p> <p>3-digits - '420'</p> <p>5-digits - Routing ZIP Code</p> <p>4-digits - Routing +4</p> <p>2-digits - AI (92 or 93)</p> <p>3-digits - STC</p> <p>6- or 9-digits - MID</p> <p>If six-digit MID, 10- or 14-digit serial #</p> <p>If nine-digit MID, 7- or 11-digit serial #</p> <p>1-digit - check digit</p> <p>Online Mailer</p> <p>3-digits - '420'</p> <p>5-digits - Routing ZIP Code</p> <p>4-digits - Routing +4</p> <p>2-digits - AI 94</p> <p>3-digits - STC</p> <p>2-digits - source identifier for your system</p> <p>6- or 9-digits - MID</p> <p>5 or 8-digits, serial number depending on construct used</p> <p>1-digit - check digit</p>	<p>Refer to Appendix J, Table 1 for the complete list of label examples.</p> <p>Refer to Export Compliance Data Requirements document, Section 2.3, Table 1 for the complete list of Customs Barcode requirements and examples</p>	<p>Tracking number must be unique for 120 days from first use for domestic, 365 days for international.</p> <p>Over Labeling Rules: This tracking number represents the tracking number of the label that was placed over the original tracking number. The original tracking number should be included in positions 515-548.</p> <p>3-digits '420' are the routing application identifier. Used only when including a Routing ZIP Code.</p> <p>5-digits Routing ZIP Code and 4-digits Routing +4 are optional.</p> <p>Left justified trailing spaces.</p> <p>Must use a 9-digit ZIP Code in the IMpb for Hold for Pickup.</p>

DETAIL RECORD D1 - Shipping Services File Version 1.7 Layout						
TRACKING INFORMATION						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
003 – 036 (continued)	All File Types (see rules)	Tracking Number	Alphanumeric(34)	<p>Legacy Tracking number use on package</p> <p>2-digits - "91" AI</p> <p>2-digits - STC</p> <p>9-digits - MID</p> <p>8-digits - Variable length serial number from 2 to 8-digits.</p> <p>1-digit - check digit</p> <p>For International files, provide the 13-character Customs Barcode in the Tracking Number. See below for barcode format. 13-character barcode includes:</p> <p>2 character Service Indicator *A-Z*</p> <p>8-digit Package Sequence Number</p> <p>1-digit - Check digit</p> <p>2 character origin country code</p>		
037 - 038	All File Types (see rules)	Class of Mail	Alphanumeric(2)	A 2-character code for Class of Mail.	PM	Refer to Appendix J, Table 8 for the complete list of Mail Class codes.
039 - 042	All File Types (see rules) / International Rule Not for File Type 3	Service Type Code	Alphanumeric(4)	Refer to Appendix I for the complete list of 3- digit Service Type Codes.	IMPB: 055  Legacy: 01	For International labels, the STC field will be spaces.

DETAIL RECORD D1 - Shipping Services File Version 1.7 Layout						
TRACKING INFORMATION						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
043 - 046	All File Types (see rules)	Barcode Construct Code	Alphanumeric(4)	A 3-character code to identify the construct of the Tracking Number.  Refer to Appendix J, Table 1 for the complete list of Barcode Construct codes	C06	Constructs available to be used by commercial customers begin with "C". C01 - C10.  Constructs available to be used by online customers begin with "N". N01- N10.  Left justified, trailing spaces.  For International labels, the barcode construct field will be spaces or I01. For GXG G01.  File Type 1 and 3 – Legacy Barcode Code Construct – L01 only.  File Type2 – Legacy Barcode Constructs – L01 through L04.
047 - 051	All File Types (see rules)	Destination ZIP Code	Alphanumeric(5)	Destination 5-digit ZIP Code.	22201	Shall be 5 digits.  Numeric values (0-9) only.  If International, all zeroes.  NOTE: Either the Destination Delivery address or the 11-digit delivery point validated ZIP Code for the delivery address must be included in the D1 record.  When the 11-digit validated ZIP Code is provided this ZIP+4 must match the +4 in the 11-digit validated ZIP. Code  Required for Commercial USPS Ground Advantage (formerly First-Class Package Service)

See below for barcode format. 13-character barcode includes: <ul style="list-style-type: none"> <li>• 2 character Service Indicator *A-Z*</li> <li>• 8-digit Package Sequence Number</li> <li>• 1-digit - Check digit</li> <li>• 2 character origin country code</li> </ul>		
037 – 039	All (see rules)	Customs Item Detail Number	Numeric(3)	A sequential number of each unique item enclosed in the package.	001	Required  Right justified, leading zeroes  Start with 001
040 – 051	None	Filler	Alphanumeric(12)			Filler field, for future use  Default is spaces
052 – 081	None	Filler	Alphanumeric(30)			Filler field, for future use  Default is spaces

Appendix B – Shipping Services File 1.7

DETAIL RECORD G2 - Shipping Services File Record Version 1.7 Layout						
INTERNATIONAL CUSTOMS INFORMATION ( <i>more than one G2 record may exist per mail piece (D1) record</i> )						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
082 – 085	All (see rules)	Quantity	Numeric(4)	Total number of articles in package of this customs category.	0020	Required  Value shall be greater than zero.
086 – 093	All (see rules)	Value	Numeric(8)  Defined as: 999999v99	Total value of articles in package of this customs category. In units of dollars and rounded to nearest cent.	\$100.00  Entered as: 00010000	Required  Value shall be greater than zero.
094 – 098	All (see rules)	Pounds	Numeric(5)	Net weight of articles in package of this customs category.	1.75 lbs. Entered as 00175	Required total weight of all items before package tare weight.  Either pounds or ounces shall be greater than zero.  Pounds can be expressed as a fraction (eg. 0.75 lbs)
099 - 100	All (see rules)	Ounces	Numeric(2)	Net weight of articles in package of this customs category.	2 oz.  Entered as 02	Either pounds or ounces shall be greater than zero.  Ounces should not exceed 15.
101 – 102	None (see rules)	Country of Origin of Goods	Alphanumeric(2)	Two character standardized 2-digit ISO International country code.  Required for International pieces.	JP	Default is spaces

Appendix B – Shipping Services File 1.7

DETAIL RECORD G2 - Shipping Services File Record Version 1.7 Layout						
INTERNATIONAL CUSTOMS INFORMATION ( <i>more than one G2 record may exist per mail piece (D1) record</i> )						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
103 - 121	None	Filler	Alphanumeric(19)			Filler field, for future use  Default is spaces
122 - 155	None	Customs Label Barcode Number	Alphanumeric(34)			Same as G1 Customs Label Barcode Number
156 - 172	All (see rules)	Customs Category Article	Alphanumeric(17)	Harmonization Schedule (HS) tariff number, which shall be based on the Harmonized Commodity Description and Coding System developed by the World Customs Organization.		For commercial senders only.  Sample of actual HS code: 6110.20 (6 digit level) & 6110.20.1010, 6110.20.1023, 6110.20.2005, etc. (10 digit level) – the periods are needed to determine the level of identification
173 – 428	All (see rules)	Customs Description	Alphanumeric(256)	Description of article in package.		Required  Detailed Description of each article. The words "Food", "Clothing", "Clothes", "Medicine" or "Toys" are not permitted as a stand alone entry. Instead enter a type of each item such as "men's shirts", "prescription drugs" or "model airplane".
429 – 434	All (see rules)	Duty Data	Numeric(6)	Individual duties to particular customs category article - amount of duty collected for the article	\$1.56 entered as 000156	Set to null if not numeric,  Leading zeros dropped if length exceeds 6

Appendix B – Shipping Services File 1.7

DETAIL RECORD G2 - Shipping Services File Record Version 1.7 Layout						
INTERNATIONAL CUSTOMS INFORMATION (more than one G2 record may exist per mail piece (D1) record)						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
435 – 440	All (see rules)	Tax Data	Numeric(6)	Taxes on particular customs category article - amount of taxes collected for the article	\$1.56 entered as 000156	Default is zeroes
441 – 446	All (see rules)	Tax Data 2	Numeric(6)	Individual tax to be used as needed if a country has multiple import taxes	\$1.56 entered as 000156	Default is zeroes
447 – 452	All (see rules)	Tax Sum Data	Numeric(6)	Summation of Tax 1 and Tax 2 for the total amount of taxes for a particular customs category article	\$1.56 entered as 000156	Default is zeroes
453 – 460	All (see rules)	Total Value Data	Numeric(8)	Combination of duty and tax data elements along with the total package value.	\$1.56 entered as 00000156	Default is zeroes

COMING SOON – Changes to the G2 record to add the ECCN field will modify the record as follows:

453 – 460	All (see rules)	Total Value Data	Numeric(8)	Combination of duty and tax data elements along with the total package value.	\$1.56 entered as 00000156	Default is zeroes
461-465	None	ECCN	Alphanumeric(5)	Export Control Classification Number		Default is spaces

To be used by Online shippers who offer use of the Shipment Confirmation Acceptance Notice (SCAN) form.</p> <p>Use Service Type Code "759" when the user has requested the integrated SCAN form/carrier pickup form</p>

HEADER RECORD 1 - Shipping Services File Record Version 2.0 Layout						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
3	All (see rules)	Electronic File Type	Numeric(1)	'1' - Postage & Tracking File '2' - Tracking File '3' - Returns Service '4' - Corrections	1	'1' - used for electronic Verification System (eVS).  '2' - used for Delivery / Signature Confirmation and other Extra Services or Scan Base Payment File.  '3' - used for Parcel Returns Services  '4' - used for Corrections
4	All (see rules)	Date of Mailing	Numeric(8)	Date mail is tendered to USPS.	2008-01-27 Entered as: 20080127	YYYYMMDD, date shall be valid.  Numeric values (0-9) only.
5	All (see rules)	Time of Mailing	Numeric(6)	Time mail is tendered to USPS (estimated).	13:15:00 Entered as: 131500	HHMMSS, military format and time shall be valid.  Numeric values (0-9) only.
6	All (see rules)	Entry Facility Type	Alphanumeric(1)	Type of USPS facility where mail is tendered. 'A' – ADC 'B' – NDC/RPDC 'D' – DDU/S&DC 'F' – ASF 'H' – HUB 'I' - ISC 'S' – SCF/LPC/RPDC	A	For origin or destination entry facilities.  Required for Drop Ship Mailers.  Required for Parcel Return Service mailers to note pick-up facility type.  Space or Null indicates origin entry
7	All (see rules)	Entry Facility ZIP Code	Numeric(5)	5-digit ZIP Code of postal facility where the mail is tendered.	22201	Numeric only (0-9).

HEADER RECORD 1 - Shipping Services File Record Version 2.0 Layout						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
8	None (see rules)	Entry Facility ZIP +4	Numeric(4)	ZIP +4 Code of postal facility where mail is tendered.	4313	Numeric only (0-9).
9	File types 1 and 2 (see rules)	Direct Entry Origin Country Code	Alphanumeric(2)	Two character standardized ISO International country code where Direct Entry Mail originated.	CN	Required for Direct Entry Mailings.
10	File type 1 (see rules)	Shipment Fee Code	Alphanumeric(3)	Code for a fee that applies to the entire shipment such as Pickup on Demand fee.	PKF	Currently used for Pickup on Demand fee.
11	File type 1 (see rules)	Extra Fee for Shipment	Numeric(6)  Define as : 9999V99	Fee for entire shipment, such as Pickup on Demand fee	\$13.40  Entered as: 001340	Currently used for Pickup on Demand fee.  Use leading zeroes
12	None	Containerization Indicator	Alphanumeric(2)	Is shipment containerized		Containerization Values: '01' = a 5-Digit Containerization (No DE Captured)  '02', '03' both represent a 3-Digit Containerization - to be used for either SCF ('02') or NDC ('03') entry  These items are expected to be worked at the Destination Processing facility and a DE captured.
13	All (see rules)	USPS Electronic File Version Number	Numeric(3)  Defined as: 99V9	USPS Electronic File Version Number.	2.0  Entered as: 020	Shall be 020.

HEADER RECORD 1 - Shipping Services File Record Version 2.0 Layout						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
14	File types 1 and 3 (see rules)	Transaction ID	Alphanumeric(12)	Unique 12-digit number assigned to associate manifests to file transmissions within a 24-hour period.	200806010001	File Type 1 and 3 required for eVS and Parcel Return Service mailers.  Transaction ID is a field that is used to group files together that are submitted with the transaction ID in reports in eVS. This allows mailers with multiple mailing sites or multiple daily files to group files together that may be submitted independently (by site or file) for easier reconciliation.  This field shall follow the format of year, date, month and a numeric sequence number to be valid.  Valid format: YYYYMMDD####
15	All (see rules)	Software Vendor Code	Alphanumeric(4)	Code from vendor software to identify the developer of the shipping/manifesting system.	1234	Required for manifests generated by vendor-provided software  Code provided by vendor software.
16	All (see rules)	Software Vendor Product Version Number	Alphanumeric(8)	Shipping/manifesting software's product version number.	5.02.3A_	Required for manifests generated by vendor-provided software  Provided by vendor software.
17	All (see rules)	File Record Count	Numeric(9)	Total number of all records in electronic file to include Header Record, Container Record(s) and all Detail Records.	000001517	Leading zeroes required.  Sum of H1 record, C1 record(s), D1 record(s), D2 record(s), D3 record(s) and D4 record(s).
18	All (see rules)	Mailer ID	Numeric(9)	Mailer ID shall be that of the MID certified for tile transmission.  (All file types)	969001726	Mailer ID contained in the Electronic File Number. 6 or 9-digit MID
19	All	CRLF	Alphanumeric(2)	Carriage Return Line Feed		

CONTAINER RECORD 1 - Shipping Services File Record Version 2.0 Layout						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
1	All (see rules)	Container Record ID	Alphanumeric(2)	A 2-character system constant that identifies a header record.	C1	'C1' is required if a Container Record is being included.
2	All (see rules)	Container ID	Alphanumeric(34)	Barcode on container.	222010127123456789 912345	This may be a valid IM Container Barcode, IM Tray Barcode, or a Trailer Placard Barcode.  Container IDs containing alpha characters should be upper case only.
3	All (see rules)	Container Type	Alphanumeric(2)	Describes type of container for Container ID 1.	SK	Refer to Appendix J, Table 3 for the complete list of Container Type IDs.
4	All (see rules)	Electronic File Number	Alphanumeric(34)	Unique number assigned to identify the electronic file.	927501234567891234 5678	The same EFN from the H1 record associated with the packages in this container
5	All (see rules)	Destination ZIP Code	Numeric(5)	Destination 5-digit ZIP Code.	22201	Should identify the USPS facility where the container will be dropped / presented for shipping.  Shall be 5 digits.  Numeric values (0-9) only.
6	All	CRLF	Alphanumeric(2)	Carriage Return Line Feed		

DETAIL RECORD D1 - Shipping Services File Record Version 2.0 Layout						
TRACKING INFORMATION						
Record Position	Required Field	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
1	All (see rules)	Detail Record ID	Alphanumeric(2)	A 2-character system constant that identifies a detail record.	D1	'D1' is required.
2	All (see rules)	Tracking Number	Alphanumeric(34)	<p>For Domestic files provide IMpb Tracking number used on package. May include routing information and Package Identification Code (PIC).</p> <p>Commercial Mailer                      3-digits - '420'                      5-digits - Routing ZIP Code                      4-digits - Routing +4                      2-digits - AI (92 or 93)                      3-digits - STC                      6- or 9-digits - MID                      If six-digit MID, 10- or 14-digit serial #                      If nine-digit MID, 7- or 11-digit serial #                      1-digit - check digit</p> <p>Online Mailer                      3-digits - '420'                      5-digits - Routing ZIP Code                      4-digits - Routing +4                      2-digits - AI 94                      3-digits - STC                      2-digits - source identifier for your system                      6- or 9-digits - MID                      5 or 8-digits, serial number depending on construct used                      1-digit - check digit</p>	Refer to Appendix J, Table 1 for the complete list of label examples.	<p>Tracking number shall be unique for 120 days from first use for domestic, 365 days for international.</p> <p>Over Labeling Rules: This tracking number represents the tracking number of the label that was placed over the original tracking number. The original tracking number should be included in positions 515-548.</p> <p>3-digit '420' is the Routing Application Identifier. Used only when including a Routing ZIP Code.</p> <p>5-digit Routing ZIP Code and 4-digit Routing +4 are optional.</p> <p>Must use a 9-digit ZIP Code in the IMPB Tracking Number for Hold for Pickup.</p>

003–036	Tracking Number	A(34)	<p>IMpb Tracking number used on package. May include routing information and Package Identification Code (PIC).</p> <p>Commercial Mailer 3-digits - '420' 5-digits - Routing ZIP Code 4-digits - Routing +4 2-digits - AI (92 or 93) 3-digits - STC 6- or 9-digits - MID If six-digit MID, 10- or 14-digit serial # If nine-digit MID, 7- or 11-digit serial # 1-digit - check digit Online Mailer 3-digits - '420' 5-digits - Routing ZIP Code 4-digits - Routing +4 2-digits - AI 94 3-digits - STC 2-digits - source identifier for your system 6- or 9-digits - MID 5 or 8-digits, serial number depending on construct used 1-digit - check digit</p> <p><b>Legacy Tracking number use on package.</b> 2-digits - "91" AI 2-digits - STC 9-digits - MID 8-digits - Variable- length serial number from 2 to 8-digits. 1-digit - check digit</p>	<p>9232123456789123456780</p> <p>Refer to Publication 199, Appendix J, Table 1 for the complete list of label examples.</p>	<p>Tracking number must be unique for 120 days from first use for domestic, 365 days for international.</p> <p>3-digits '420' are the routing application identifier. Used only when including a Routing ZIP Code.</p> <p>5-digits Routing ZIP Code and 4-digits Routing +4 are optional.</p> <p>Left justified trailing spaces.</p> <p>Must use a 9-digit ZIP Code in the IMpb for Hold for Pickup.</p> <p>MRS piece (any piece with extra service 980) must use a Barcode Construct of C01, C05, N02 or N05 – a 9-digit ZIP code.</p> <p>IMpb required for domestic shipments, but "S10" type barcode is allowed for international shipments</p>

**Shipping Partner Event File Version 5.0 - File Layout Specification  
Detail Record(Fixed Length Record - 800 Bytes)**

Record Position	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
037–038	Event Code	A(2)	Event Code	81	Valid values for inbound are 'AL','GX','80','81','82','83', and '89'Valid values for outbound are '84','85','86', and '87' – Mailer ID must be a Certified PRS customer.
039–043	Event ZIP Code	N(5)	5-digit ZIP Code of event location.	22201	
044–047	Event ZIP +4	N(4)	ZIP + 4 add on of domestic ZIP Code.	2804	Default is spaces, if not available.
048–055	Event Date	A(8)	Date associated with movement of shipments by shipping partner.	20160131	Format is YYYYMMDD
056–061	Event Time	A(6)	Time associated with movement of shipments by shipping partner.	131500	Format is HHMMSS (24-hour time format.)
062–070	Mail Owner Mailer ID	A(9)	Client Mailer ID	912345678 or 612345	This field is the same as the Client Mailer ID in Shipping Services file Version 1.3 and Version 1.4. The MID must be registered in Business Customer Gateway. 1. Customers that are considered Mail Owners must complete certification processes to obtain a MID for inclusion in a Shipping Services file. The mail owner will also receive the scan event extract if the Mail Owner Mailer ID is populated in the corresponding Mail Owner Mailer ID field in the Shipping Services file.

**Shipping Partner Event File Version 5.0 - File Layout Specification  
Detail Record(Fixed Length Record - 800 Bytes)**

Record Position	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
071-085	Mail Owner Customer Registration ID (CRID)	A (15)	CRID of Mail Owner		Used by mailing agent to identify mail owner.  Default is spaces.
086-133	Recipient Name	A (48)	Ship to name of Recipient.	JOHN DOE	Required for all signature products. Recommended for all products. Default is spaces.
134-181	Destination Delivery Address	A(48)	Delivery Street Address of the destination address.	123 Main Street	Delivery Point Validated Destination Delivery Address and/or the 11-digit Destination Delivery Point are required. May be provided in Shipping Partner File. Required for Accountable mail and international mail. (May contain secondary unit designator, such as APT or SUITE, for Accountable mail.) The following Special Characters (hyphen, forward slash and period) are allowed. This field is not to be used for the city or state. Default is spaces
182-209	Destination Delivery City Name	A(28)	City Name of the destination address.	Fairfax	Default is spaces
210-211	Destination Delivery State	A(2)	Two Character state code of the destination address.	VA	Default is spaces
212-216	Destination ZIP Code	N(5)	Destination 5-digit ZIP Code for domestic shipments including APO/FPO/DPO and territories.	20540	Must be 5 digits. Numeric values (0-9)

Shipping Partner Event File Version 5.0 - File Layout Specification Detail Record(Fixed Length Record - 800 Bytes)					
Record Position	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
217-220	Destination ZIP + 4	N(4)	Destination ZIP + 4	1234	Either the Destination Delivery address or the additional 2-digit DPV must be included. Numeric value (0-9) Default is spaces if not available.
221-222	Destination address Validated Delivery Point	N(2)	Destination Delivery Point – completes the 11-digit Delivery Point ZIP Code.	02	Numeric values (0-9) only. Default is spaces if not available.
223-224	Action Code	A(2)	List of valid action codes.  'P0' – PC Postage 'S0' – Service Provider 'M0' – Mail Owner 'V1' – Cancelled Label - Only applicable for GX Event 'V2' - Package Delivered by Shipping Partner – Only applicable for GX Event	PP	Must be a valid code (spaces are not a valid code).  If Pick Up and Return address is same then use code for shipment type "PC Postage", "Mail Owner", "Service Provider". Must populate Pick Up address.  If Pick Up and Return address is different then all fields in both Pick Up and Return address must be populated.
225-232	Mailing/Tendered Date	N(8)	Date Partner or customer expects to tender the package to USPS	20140508	Format is CCYYMMDD Null value is valid.
233-240	Merchant Projected Delivery Date	N(8)	Date merchant communicated to customer to expect the delivery	20140508	Format is CCYYMMDD Null value is valid

Shipping Partner Event File Version 5.0 - File Layout Specification Detail Record(Fixed Length Record - 800 Bytes)					
Record Position	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
241-241	Entry Facility Type	A(1)	Type of USPS facility where mail is tendered:  'A' – ADC 'B' – NDC/RPDC 'S' – SCF/LPC/RPDC 'D' – DDU/S&DC 'F' – ASF 'I' – ISC 'O' – Origin Post Office 'H' - HUB	A	For origin or destination entry facilities. Required for Drop Ship Mailers. Required for Parcel Return Service mailers to note pick-up facility type. Default is spaces.
242-246	Entry Facility ZIP Code	N(5)	5-digit ZIP Code of postal facility where the mail is tendered.	22201	Numeric only (0-9)
247-248	Customer Delivery Preference	A(2)	Customer Delivery Preference	A	Default is spaces.  Future Use only.
249-278	Customer Reference Number 1	A(30)	Customer's Internal Reference Number	123456	If the "Customer Reference Number 1" is provided in Shipping Partner Event file 5.0 and later this field is provided in Shipping Services File then value from Shipping Services File will overwrite the value from Shipping Partner Event file 5.0.
279-279	Customer Type	N(1)	One digit value usage defined by USPS	2	Required for designated postage price types  Valid values are 1 through 5  Default is null.

Shipping Partner Event File Version 5.0 - File Layout Specification Detail Record(Fixed Length Record - 800 Bytes)					
Record Position	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
280-281	Transaction Type	N(2)	Two digits denotes payment vs refund	07 – Payment 99 – Refund	Required only for PC Postage. Not required if Return and Pick up address is different. 07 – Payment 97, 98, 99 – Refund. Only valid when action code ='V1' for PC Postage
282-289	Indicium Creation Record Date	N(8)	Date IBI was created	2008-01-27 Entered as: 20080127	Required for PC Postage, metered and IMI PC Compliant customers
290-291	Meter Vendor ID	N(2)	The Vendor ID is unique for each PC Postage and Meter Vendor.	05	Required. The 2 digit number USPS assigned vendor ID.  Default is spaces if not PC Postage or Meter Vendor
292-311	Meter Serial number	A(20)	Serial number of meter used for postage.	05	Required for following Payment type, system used for mailing: '04' PC Postage '05' Smart Meter '06' Other Meter
312-313	Meter Model Id	A(2)	Two digit model number of the Meter	1V	Default is spaces if not available. PC-Postage models are 1 numeric followed by 1 alpha.

Shipping Partner Event File Version 5.0 - File Layout Specification Detail Record(Fixed Length Record - 800 Bytes)					
Record Position	Field Name	Format (Size)	Description	Example	Content Rules and Limitations
314-361	Pick up Address	A(48)	Address for the pick-up point where the package is located	123 MAIN ST	Required for PC Postage and Meter Vendor  This field is not to be used for the city or state  Default is spaces if not PC Postage or Vendor
362-389	Pick up City Name	A(28)	City Name for the pick-up point address where the package is located	Fairfax	Required for PC Postage and Meter Vendor  This field is not to be used for the city or state  Default is spaces if not PC Postage or Vendor
390-391	Pick up State	A(2)	Two Character state code for the pick-up point address where the package is located	VA	Required for PC Postage and Meter Vendor  This field is not to be used for the city or state  Default is spaces if not PC Postage or Vendor

782-788	Destination Foreign Postal Code	A(7)	The foreign postal code is a 7 character field. Mailers may submit the destination foreign postal code for international shipments.	A0C 9Z9	Spaces are required.
789-800	Filler	A(12)			Spaces are required.

## Appendix E: Confirmation/Error/Warning Files

### Appendix E-1.1: Shipping Services Confirmation/Error/Warning Data Version 1.5 File Specification

#### Header Record

Variable Length Record - Maximum data content is 167 bytes. Format (size) reflects the maximum length for each field.

Shipping Services File Confirmation/Error/Warning Header Record			
Field Name	Format (Size)	Description	Example
Mailer ID	A(9)	Mailer ID from the electronic file number of the transmitted file. Six- or Nine-digit MID.	923456789 or 612345
Delimiter	A(1)	Comma Delimiter	,
Electronic File Sequence Number	A(15)	Sequential number from the Electronic File Number: If six-digit MID – 10- or 14-digit serial number. If nine-digit MID – 7- or 11-digit serial number. 1-digit – check digit	Varies see description.
Delimiter	A(1)	Comma Delimiter	,
Electronic File Receipt Date	N(8)	Date USPS PTR received the mailers Electronic File. Format: YYYYMMDD	20050615
Delimiter	A(1)	Comma Delimiter	,
Electronic File Receipt Time	N(6)	Time USPS PTR received the mailers Electronic File. Format: HHMMSS	143059
Delimiter	A(1)	Comma Delimiter	,
Entry Facility ZIP Code	N(5)	ZIP Code of the Postal Service facility where mail was tendered. This zip is the destination zip for parcels return services files.	20260
Delimiter	A(1)	Comma Delimiter	,
Mailing Date	N(8)	Date in the header record of the Electronic File provided by mailer indicating when the mail was tendered to the USPS entry facility. Format: YYYYMMDD	20050615
Delimiter	A(1)	Comma Delimiter	,
Number of Records Read	N(9)	Total number of all records in electronic file to include Header Records and all Detail Records.	3
Delimiter	A(1)	Comma Delimiter	,
Number of Records Rejected	N(9)	Number of records not posted to PTR, because of error in Header Record or individual Detail Records.	1
Delimiter	A(1)	Comma Delimiter	,
Number of Records Accepted	N(9)	Number of records posted to PTR.	2
Delimiter	A(1)	Comma Delimiter	,
Number of Electronic File D1 Record Records Accepted	N(9)	Number of Detail 1 Records posted to PTR.	1
Delimiter	A(1)	Comma Delimiter	,
Number of Electronic File D2 Record Records Accepted	N(9)	Number of Detail 2 records posted to PTR.	1
Delimiter	A(1)	Comma Delimiter	,
Summary Message	A(60)	Error message that applies to the entire electronic file.	ENTIRE ELECTRONIC FILE REJECTED DUE TO HEADER RECORD ERROR.

## Appendix E – Confirmation/Error/Warning (CEW) Files

### Detail Record

Variable Length Record - Maximum data content is 141 bytes. Format (size) reflects the maximum length for each field.

<b>Shipping Services File Confirmation/Error/Warning Detail Record</b>			
<b>Field Name</b>	<b>Format (Size)</b>	<b>Description</b>	<b>Example</b>
Error/Warning Type Code	<b>A(1)</b>	E = Error W = Warning	<b>W</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
Electronic File Line Number	<b>N(9)</b>	Line number of the electronic file containing the Detail Record in error.	<b>2</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
Package Identification Code (PIC)	<b>A(34)</b>	Tracking number used on package. May include routing information and Package Identification Code (PIC). 3-digits - '420' 5-digits - Routing ZIP Code 4-digits - Routing +4 2-digits - AI (92 or 93) 3-digits - Service Type Code 6- or 9-digits - MID If six-digit MID, 10- or 14-digit serial # If nine-digit MID, 7- or 11-digit serial # 1-digit - check digit	<b>Varies see description.</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
The description of the Field in the electronic file that contains an Error or Warning	<b>A(34)</b>	The field in the error warning files containing the error or warning.	<b>PM-02</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
Error/Warning Message	<b>A(60)</b>	Reason electronic file field is in error or warning.	<b>INVALID PRODUCTS OR CLASS OF MAIL/SERVICE TYPE CODE COMBO</b>

**Appendix E-1.2: Shipping Services Confirmation/Error/Warning Report Version 1.5  
Formatted Specification**

PTR formats the Confirmation Error/Warning Report as defined below when the entire shipping services file is accepted.

Field #	Row	Field Name	Contents	From	To	Value

## Appendix E – Confirmation/Error/Warning (CEW) Files

\*\* PTR repeats the Row 19 format until all data are written to the report. PTR begins to create the next report starting back at Row 1. The data in row 19 are sorted by Error Code/Line number.

When the entire shipping service file is rejected, PTR changes the format to include the error message "ENTIRE ELECTRONIC FILE REJECTED DUE TO HEADER RECORD ERROR" in the Summary Message field in the Confirmation Error/Warning file. PTR also includes the error message on the Confirmation Error/Warning file.

**PTR formats the Confirmation Error/Warning Report as defined below when the entire shipping service file is rejected.**

Field #	Row	Field Name	Contents	From	To	Value

Shipping Services CEW Report (rejected file) v 1.5

### Appendix E-1.3: Shipping Services Confirmation/Error/Warning Data Version 1.7 File Specification

**Header Record** - Variable Length Record - Maximum data content is 187 bytes. Format (size) reflects the maximum length for each field.

Field Name	Format (Size)	Description	Example
Mailer ID	A(9)	Mailer ID from the electronic file number of the transmitted file. Six- or Nine-digit MID.	923456789 or 612345
Delimiter	A(1)	Comma Delimiter	,
Electronic File Sequence Number	A(15)	Sequential number from the Electronic File Number: If six-digit MID - 10- or 14-digit serial number. If nine-digit MID - 7- or 11-digit serial number. 1-digit – check digit	Varies see description.
Delimiter	A(1)	Comma Delimiter	,
Electronic File Receipt Date	N(8)	Date USPS PTR received the mailers Electronic File. Format: YYYYMMDD	20050615
Delimiter	A(1)	Comma Delimiter	,
Electronic File Receipt Time	N(6)	Time USPS PTR received the mailers Electronic File. Format: HHMMSS	143059
Delimiter	A(1)	Comma Delimiter	,
Entry Facility ZIP Code	N(5)	NULL	
Delimiter	A(1)	Comma Delimiter	,
Mailing Date	N(8)	NULL	
Delimiter	A(1)	Comma Delimiter	,
Number of Records Read	N(9)	Total number of all records in electronic file to include Header Records and all Detail Records.	3
Delimiter	A(1)	Comma Delimiter	,
Number of Records Rejected	N(9)	Number of records not posted to PTR, because of error in Header Record or individual Detail Records.	1
Delimiter	A(1)	Comma Delimiter	,
Number of Records Accepted	N(9)	Number of records posted to PTR.	2
Delimiter	A(1)	Comma Delimiter	,
Number of Electronic File D1 Record Records Accepted	N(9)	Number of Detail 1 Records posted to PTR.	1
Delimiter	A(1)	Comma Delimiter	,
Number of Electronic File D2 Record Records Accepted	N(9)	Number of Detail 2 Records posted to PTR.	
Delimiter	A(1)	Comma Delimiter	,
Number of Electronic File D3 Record Records Accepted	N(9)	Number of Detail 3 Records posted to PTR.	1
Delimiter	A(1)	Comma Delimiter	,
Number of Electronic File D4 Record Records Accepted	N(9)	Number of Detail 4 Records posted to PTR.	
Delimiter	A(1)	Comma Delimiter	,
Summary Message	A(60)	Error message that applies to the entire electronic file.	ENTIRE ELECTRONIC FILE REJECTED DUE TO HEADER RECORD ERROR.

## Appendix E – Confirmation/Error/Warning (CEW) Files

### Detail Record

Variable Length Record - Maximum data content is 141 bytes. Format (size) reflects the maximum length for each field.

Field Name	Format (Size)	Description	Example
Error/Warning Type Code	<b>A(1)</b>	E = Error W = Warning	<b>W</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
Electronic File Line Number	<b>N(9)</b>	Line number of the electronic file containing the Detail Record in error.	<b>2</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
Package Identification Code (PIC)	<b>A(34)</b>	Tracking number used on package. May include routing information and Package Identification Code (PIC). 3-digits - '420' 5-digits - Routing ZIP Code 4-digits - Routing +4 2-digits - AI (92 or 93) 3-digits - Service Type Code 6- or 9-digits - MID If six-digit MID, 10- or 14-digit serial # If nine-digit MID, 7- or 11-digit serial # 1-digit - check digit	<b>Varies see description.</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
The description of the Field in the electronic file that contains an Error or Warning	<b>A(34)</b>	The field in the error warning files containing the error or warning.	<b>PM-02</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
Error/Warning Message	<b>A(60)</b>	Reason electronic file field is in error or warning.	<b>INVALID PRODUCTS OR CLASS OF MAIL/SERVICE TYPE CODE COMBO</b>

### Appendix E-1.4: Shipping Services Confirmation/Error/Warning Report Version 1.7 Formatted Specification

PTR formats the Confirmation Error/Warning Report as defined below when the entire shipping service file is accepted.

Field #	Row	Field Name	Contents	From	To	Value
1	1	FILLER	ALPHANUM	0	2	spaces
2	1	FILLER	ALPHANUM	3	6	'1USPS'
3	1	FILLER	ALPHANUM	7	42	spaces
4	1	FILLER	ALPHANUM	43	65	"PRODUCT TRACKING SYSTEM"
5	1	FILLER	ALPHANUM	66	96	spaces
6	1	FILLER	ALPHANUM	97	101	'PAGE:'
7	1	FILLER	ALPHANUM	102	104	Spaces  Note: Actual number of spaces will vary depending on the width of the page number. 3 digit page number = 1 space, 2 digit page number = 2 spaces, 1 digit page number = 3 spaces
8	1	PTR	NUMERIC	105	--	Page Number of report, right justified
1	2	FILLER	ALPHANUM	0	1	spaces

## Appendix E – Confirmation/Error/Warning (CEW) Files

Field #	Row	Field Name	Contents	From	To	Value
2	121**	PTR	ALPHANUM	2	2	"E" for Error "W" for Warning
3	21*	FILLER	ALPHANUM	3	5	spaces
4	21**	PTR	NUMERIC	6	20	Line Number data Left padded with zeroes
5	21**	FILLER	ALPHANUM	21	21	spaces
6	21**	PTR	ALPHANUM	22	55	EFN, if header or Label Number, if detail
7	21**	FILLER	ALPHANUM	56	56	spaces
8	21**	PTR	ALPHANUM	57	90	Error Content data
9	21**	FILLER	ALPHANUM	91	91	spaces
10	21**	PTR	ALPHANUM	92	--	Error Message data

\*\* PTR repeats the Row 121 format until all data are written to the report. PTR begins to create the next report starting back at Row 1. The data in row 21 are sorted by Error Code/Line Number.

When the entire shipping service file is rejected, PTR changes the format to include the error message "ENTIRE ELECTRONIC FILE REJECTED DUE TO HEADER RECORD ERROR" in the Summary Message field in the Confirmation Error/Warning file. PTR also includes the error message on the Confirmation Error/Warning file.

PTR formats the Confirmation Error/Warning Report as defined below when the entire shipping service file is rejected.

Field #	Row	Field Name	Contents	From	To	Value
1	1	FILLER	ALPHANUM	0	2	Spaces
2	1	FILLER	ALPHANUM	3	6	'USPS'

Shipping Services CEW Report (rejected file) v 1.7

## Appendix E-2.1: Shipping Partner Confirmation/Error/Warning Data Version 2.0 File Specification

### Header Record

Variable Length Record - Maximum data content is 167 bytes. Format (size) reflects the maximum length for each field.

<b>Shipping Partner File Confirmation Error/Warning Header Record</b>			
Field Name	Format (Size)	Description	Example
Mailer ID	A(9)	Mailer ID from the electronic file number of the transmitted file. Six- or Nine-digit MID.	923456789 or 612345
Delimiter	A(1)	Comma Delimiter	,
Electronic File Sequence Number	A(15)	Sequential number from the Electronic File Number: If six-digit MID - 10- or 14-digit serial number. If nine-digit MID - 7- or 11-digit serial number. 1-digit – check digit	Varies see description.
Delimiter	A(1)	Comma Delimiter	,
Electronic File Receipt Date	N(8)	Date USPS PTR received the mailers Electronic File. Format: YYYYMMDD	20050615
Delimiter	A(1)	Comma Delimiter	,
Electronic File Receipt Time	N(6)	Time USPS PTR received the mailers Electronic File. Format: HHMMSS	143059
Delimiter	A(1)	Comma Delimiter	,
Entry Facility ZIP Code	N(5)	NULL	
Delimiter	A(1)	Comma Delimiter	,
Mailing Date	N(8)	NULL	
Delimiter	A(1)	Comma Delimiter	,
Number of Records Read	N(9)	Total number of all records in electronic file to include Header Records and all Detail Records.	3
Delimiter	A(1)	Comma Delimiter	,
Number of Records Rejected	N(9)	Number of records not posted to PTR, because of error in Header Record or individual Detail Records.	1
Delimiter	A(1)	Comma Delimiter	,
Number of Records Accepted	N(9)	Number of records posted to PTR.	2
Delimiter	A(1)	Comma Delimiter	,
Number of Electronic File D1 Record Records Accepted	N(9)	Number of Detail 1 Records posted to PTR.	1
Delimiter	A(1)	Comma Delimiter	,
Number of Electronic File D2 Record Records Accepted	N(9)	NULL	
Delimiter	A(1)	Comma Delimiter	,
Summary Message	A(60)	Error message that applies to the entire electronic file.	ENTIRE ELECTRONIC FILE REJECTED DUE TO HEADER RECORD ERROR.

**Appendix E – Confirmation/Error/Warning (CEW) Files**

**Detail Record**

Variable Length Record - Maximum data content is 141 bytes. Format (size) reflects the maximum length for each field.

<b>Shipping Partner File Confirmation Error/Warning Detail Record</b>			
<b>Field Name</b>	<b>Format (Size)</b>	<b>Description</b>	<b>Example</b>
Error/Warning Type Code	<b>A(1)</b>	E = Error W = Warning	<b>W</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
Electronic File Line Number	<b>N(9)</b>	Line number of the electronic file containing the Detail Record in error.	<b>2</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
Package Identification Code (PIC)	<b>A(34)</b>	Tracking number used on package. May include routing information and Package Identification Code (PIC). 3-digits - '420' 5-digits - Routing ZIP Code 4-digits - Routing +4 2-digits - AI (92 or 93) 3-digits - Service Type Code 6- or 9-digits - MID If six-digit MID, 10- or 14-digit serial # If nine-digit MID, 7- or 11-digit serial # 1-digit - check digit	<b>Varies see description.</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
The description of the Field in the electronic file that contains an Error or Warning	<b>A(34)</b>	The field in the error warning files containing the error or warning.	<b>PM-02</b>
Delimiter	<b>A(1)</b>	Comma Delimiter	,
Error/Warning Message	<b>A(60)</b>	Reason electronic file field is in error or warning.	<b>INVALID PRODUCTS OR CLASS OF MAIL/SERVICE TYPE CODE COMBO</b>

\*\* PTR repeats the Row 18 format until all data are written to the report. PTR begins to create the next report starting back at Row 1. The data in row 18 are sorted by Error Code/Line Number.

## Appendix E – Confirmation/Error/Warning (CEW) Files

\*If the entire file was rejected, additional lines are written to the report. Refer to Exception Scenarios for more information.

### Exception Scenarios

No	Exception Scenario	Description / Business Rules
1	Entire File Rejected	This error will change the format of the report starting at row 10 (see below). After the error rows 10E-13E have been written to the report, the report will resume back at row 10 of the report where row 10 is row 14, row 11 is row 15, etc. until the report is complete.

Field #	Row	Field Name	Contents	From	To	Value
Error	10E	FILLER	ALPHANUM	0	7	spaces
Error	10E	FILLER	ALPHANUM	8	77	Asterisks (***)
Error	11E	FILLER	ALPHANUM	0	7	spaces
Error	11E	FILLER	ALPHANUM	8	71	"ENTIRE SHIPPING PARTNER FILE REJECTED DUE TO HEADER RECORD ERROR"
Error	12E	FILLER	ALPHANUM	0	7	spaces
Error	12E	FILLER	ALPHANUM	8	77	Asterisks (***)
Error	13E	FILLER	ALPHANUM	0	--	Blank Line

**Appendix E-3: Confirmation/Error/Warning Message List**

Each time a mailer submits a Shipping Services File, PTR processes and edits the file. When data does not meet USPS specifications, PTR generates an error or a warning. Single records or the entire file may be rejected and/or certain records may receive warnings for minor problems. A message line that starts with an “E” indicates this is an Error message and the record will be rejected. A message line that starts with a “W” indicates this is a Warning Message and the record will be posted.

Num	Level	Confirmation/Error/Warning Message	Additional Comments
1.	Header/Detail	CHECK DIGIT ERROR	The check digit in the label number is invalid.
2.	Header/Detail	MAILER ID IS NOT A VALID EVS MAILER ID	
3.	Header/Detail	SERIAL NUMBER NOT NUMERIC	The serial number portion of the label number is not numeric.
4.	Header	CORRECTION FILE RECEIVED WITH NO DET RECDS; HEADER DOES NOT EXIST	
5.	Header	CORRECTION MUST USE ORIGINAL ELECTRONIC FILE NUMBER, TYPE, ENTRY FACILITY, MAILING DATE AND TIME	The Shipping Services file was already posted to the database. This file is being considered a correction to the errors contained in the first manifest, but it is being rejected because it does not have the same date and time of mailing as the original manifest.
6.	Header	CORRECTION NOT ALLOWED WHEN NO PREVIOUS E- FILE POSTED	
7.	Header	CORRECTIONS NOT ALLOWED ON MANIFEST TYPE	
8.	Header	CUSTOMER DECERTIFIED FOR BULK INSURANCE	Bulk Insurance file from customer will no longer be accepted.
9.	Header	CUSTOMER DECERTIFIED FOR CERTIFIED FILE	Certified file from customer will no longer be accepted.
10.	Header	CUSTOMER DECERTIFIED FOR COD FILE	COD file from customer will no longer be accepted.
11.	Header	CUSTOMER DECERTIFIED FOR E-VERIFICATION	E Verification file from customer will no longer be accepted.
12.	Header	CUSTOMER DECERTIFIED FOR INSURED FILE	Insured file from customer will no longer be accepted.
13.	Header	CUSTOMER DECERTIFIED FOR MERCHANDISE RETURN FILE	Merchandise Return file from customer will no longer be accepted.
14.	Header	CUSTOMER DECERTIFIED FOR PARCEL RETURN SERVICE	Parcel Return Service files from customer will no longer be accepted.
15.	Header	CUSTOMER DECERTIFIED FOR PAYMENT	Payment file from customer will no longer be accepted.
16.	Header	CUSTOMER DECERTIFIED FOR PRIORITY MAIL EXPRESS	Priority Mail Express file from customer will no longer be accepted.

## Appendix E – Confirmation/Error/Warning (CEW) Files

Num	Level	Confirmation/Error/Warning Message	Additional Comments
17.	Header	CUSTOMER DECERTIFIED FOR REGISTERED FILE	Registered file from customer will no longer be accepted.
18.	Header	CUSTOMER DECERTIFIED FOR RR FOR MERCHANDISE	RR for Merchandise file from customer will no longer be accepted.
19.	Header	CUSTOMER DECERTIFIED FOR SHIPPING PARTNERS	Shipping Partner file from customer will no longer be accepted.
20.	Header	CUSTOMER DECERTIFIED FOR TRACKING	Tracking file from customer will no longer be accepted.
21.	Header	CUSTOMER NOT CONFIGURED FOR BULK INSURANCE	Customer has not been certified to send Bulk Insurance files.
22.	Header	CUSTOMER NOT CONFIGURED FOR CERTIFIED FILE	Customer has not been certified to send Certified files.
23.	Header	CUSTOMER NOT CONFIGURED FOR COD FILE	Customer has not been certified to send COD files.
24.	Header	CUSTOMER NOT CONFIGURED FOR E-VERIFICATION	Customer has not been certified to send E Verification files.
25.	Header	CUSTOMER NOT CONFIGURED FOR INSURED FILE	Customer has not been certified to send Insured files.
26.	Header	CUSTOMER NOT CONFIGURED FOR MERCHANDISE RETURN FILE	Customer has not been certified to send Merchandise Return files.
27.	Header	CUSTOMER NOT CONFIGURED FOR PARCEL RETURNS SERVICE	Customer has not been certified to send Parcel Returns Service files.
28.	Header	CUSTOMER NOT CONFIGURED FOR PAYMENT	Customer has not been certified to send Payment files.
29.	Header	CUSTOMER NOT CONFIGURED FOR PRIORITY MAIL EXPRESS	Customer has not been certified to send Priority Mail Express files.
30.	Header	CUSTOMER NOT CONFIGURED FOR REGISTERED FILE	Customer has not been certified to send Registered files.
31.	Header	CUSTOMER NOT CONFIGURED FOR RR FOR MERCHANDISE	Customer has not been certified to send RR for Merchandise files.
32.	Header	CUSTOMER NOT CONFIGURED FOR SHIPPING PARTNERS	Customer has not been certified to send Shipping Partner files.
33.	Header	CUSTOMER NOT CONFIGURED FOR TRACKING	Customer has not been certified to send Tracking files.
34.	Header	CUSTOMER PENDING FOR BULK INSURANCE	The Mailer ID found in your header record has not been certified to send a Bulk Insurance file.
35.	Header	CUSTOMER PENDING FOR CERTIFIED FILE	The Mailer ID found in your header record has not been certified to send a Certified file.
36.	Header	CUSTOMER PENDING FOR COD FILE	The Mailer ID found in your header record has not been certified to send a COD file.
37.	Header	CUSTOMER PENDING FOR E VERIFICATION	The Mailer ID found in your header record has not been certified to send an E Verification file.
38.	Header	CUSTOMER PENDING FOR INSURED FILE	The Mailer ID found in your header record has not been certified to send an Insured file.

## Appendix E – Confirmation/Error/Warning (CEW) Files

Num	Level	Confirmation/Error/Warning Message	Additional Comments
39.	Header	CUSTOMER PENDING FOR MERCHANDISE RETURN FILE	The Mailer ID found in your header record has not been certified to send a Merchandise Return file.
40.	Header	CUSTOMER PENDING FOR PARCEL PAYMENT	The Mailer ID found in your header record has not been certified to send a Parcel Payment file.
41.	Header	CUSTOMER PENDING FOR PARCEL TRACKING	The Mailer ID found in your header record has not been certified to send a Parcel Tracking file.
42.	Header	CUSTOMER PENDING FOR PRIORITY MAIL EXPRESS	The Mailer ID found in your header record has not been certified to send a Priority Mail Express file.
43.	Header	CUSTOMER PENDING FOR REGISTERED FILE	The Mailer ID found in your header record has not been certified to send a Registered file.
44.	Header	CUSTOMER PENDING FOR RR FOR MERCHANDISE	The Mailer ID found in your header record has not been certified to send a RR for Merchandise file.
45.	Header	CUSTOMER PENDING FOR SHIPPING PARTNERS	The Mailer ID found in your header record has not been certified to send a shipping partner file.
46.	Header	CUSTOMER PENDING PARCEL RETURNS SERVICE	The Mailer ID found in your header record has not been certified to send a Parcel Returns Service file.
47.	Header	D1 - DETAIL RECORD(S) MISSING	There were no Detail Records sent with the Header Record.
48.	Header	DUPLICATE E-FILE; CORRECTIONS MUST BE W/IN 30 DAYS	The Shipping Services file was already posted to the database. This file is being considered a correction to the errors contained in the first manifest, but it is being rejected because it is outside the window for making corrections.
49.	Header	EH HEADER RECORD TYPE MISSING	The header record is missing from the Shipping Partner file.
50.	Header	ELECTRONIC FILE SEQUENCE NUMBER NOT NUMERIC	The sequential digits in the Electronic File Number field of the Header Record are not numeric (all spaces).
51.	Header	ELECTRONIC FILE SERVICE TYPE CODE NOT = 50	The first two characters of the Electronic File Number in the Header Record must be Service Type Code 50.
52.	Header	ELECTRONIC FILE SERVICE TYPE CODE NOT EQUAL TO 50	
53.	Header	ENTRY FACILITY ZIP/DEST ZIP IS RESTRICTED FOR PMG	
54.	Header	ENTRY FACILITY NOT NDC, SCF OR DDU	
55.	Header	H1 HEADER RECORD TYPE MISSING	Header Record is missing.

## Appendix E – Confirmation/Error/Warning (CEW) Files

Num	Level	Confirmation/Error/Warning Message	Additional Comments
56.	Header	H1/D1 HEADER / DETAIL RECORD TYPES MISSING	The Shipping Services File Header Record Identifier of H1 and the Shipping Services File Detail Record Identifier of D1 are missing.
57.	Header	INVALID DEVELOPER ID CODE	The Developer ID Code found in your Header Record is not in our database. Please contact the Confirmation Services Support to receive a valid Developer ID Code.
58.	Header	INVALID EFN SERVICE TYPE CODE AND CHANNEL AI COMBINATION	
59.	Header	INVALID ELECTRONIC FILE NUMBER FORMAT	Electronic file number is not a valid format of application identifier (if applicable) service type code, Mailer ID, seq number and check digit.
60.	Header	INVALID ELECTRONIC FILE NUMBER IN HEADER	Not a valid barcode for an Electronic File Header Record.
61.	Header	INVALID ELECTRONIC FILE TYPE	
62.	Header	INVALID ENTRY FACILITY	The Entry Facility field in the Header Record is not a valid 5-digit ZIP Code of a Postal Service facility that can accept this type of mailing.
63.	Header	INVALID ENTRY FACILITY TYPE	
64.	Header	INVALID ENTRY FACILITY TYPE ZIP	
65.	Header	INVALID ENTRY FACILITY TYPE/ZIP COMBINATION	
66.	Header	INVALID ENTRY FACILITY TYPE/ZIP; DEFAULT TO SPACE	
67.	Header	INVALID MAILER ID	The Mailer ID in the Electronic File Number field of the Header Record is not a certified customer Mailer ID.
68.	Header	INVALID MAILING DATE	The Mailing Date field in the Header Record must be a valid numeric date.
69.	Header	INVALID MAILING TIME	The Mailing Time field in the Header Record is not a valid time.
70.	Header	INVALID METHOD OF PAYMENT	
71.	Header	INVALID METHOD OF PAYMENT - METHOD OF PAYMENT MUST BE 01	
72.	Header	INVALID METHOD OF PAYMENT; DEFAULT TO PAYMENT TYPE 02	

## Appendix E – Confirmation/Error/Warning (CEW) Files

Num	Level	Confirmation/Error/Warning Message	Additional Comments
73.	Header	INVALID METHOD OF PAYMENT; DEFAULT TO PAYMENT TYPE 04	
74.	Header	INVALID METHOD OF PAYMENT; DEFAULT TO TYPE 01	
75.	Header	INVALID PAYMENT ACCOUNT NUMBER	
76.	Header	INVALID PAYMENT METHOD; DEFAULT TO PAYMENT TYPE 04	
77.	Header	INVALID POST OFFICE OF ACCOUNT ZIP CODE	
78.	Header	INVALID PRODUCT VERSION NUMBER	The Product Version Number found in your Header Record is not in our database.
79.	Header	INVALID SEQUENCE NUMBER IN ELECTRONIC FILE-NUMBER	The sequential digits in the Electronic File Number field of the Header Record are not numeric.
80.	Header	INVALID SERVICE TYPE CODE	The service type code in the PIC is not a valid service type code.
81.	Header	INVALID USPS ELECTRONIC FILE VERSION NUMBER	The Postal Service Electronic File Version Number field in the Header Record is not a valid number.
82.	Header	MAILER ID NOT NUMERIC	The Mailer ID in Electronic File Number field of the Header Record is not a numeric value.
83.	Header	MAILING DATE NOT NUMERIC	The Mailing Date field in the Header Record is not a numeric value (no hyphens, slash symbols, etc.).
84.	Header	MAILING TIME IS NOT NUMERIC	The Mailing Time field in the Header Record is not a numeric value >0 and <=2400.
85.	Header	PERMIT PAYMENT METHOD WITH NO PO ACCOUNT ZIP	
86.	Header	USPS ELECTRONIC FILE VERSION NUMBER NOT NUMERIC	The Postal Service Electronic File Version Number field in the Header Record is not a numeric value.
87.	Header	V1.5/1.6 DUPLICATE EFILE NOT PERMITTED	
88.	Header	V1.5/1.6 DUPLICATE EFN ON H1 RECORD NOT PERMITTED	
89.	Header	VALID PAYMENT ACCOUNT NUMBER AND NO VALID PAYMENT METHOD	
90.	Header	VALID PAYMENT METHOD INDICATOR AND NO PAYMENT ACCOUNT NUMBER	
91.	Detail	3-DIGIT ZIP NOT VALID FOR 02 METHOD OF PAYMENT

## Appendix F: eVS Postage Payment Extract Files

---

### Appendix F-1: Version 1.1 File Layout Specification

This section and the next describe the process and file format specifications for the postage payment extract files created to provide status and payment information feedback to the eVS/PRS mailers.

#### Payment Extract Data Record Formats

eVS will provide **an** extract file containing all header records submitted by the mailer along with the associated detail records. Multiple header records may be combined in a single extract file. A partial group of detail records associated with a single header record may also be sent in multiple extract files. This grouping may not match the consolidated manifest files submitted by the mailer due to the timing and processing of the manifest data by the tracking and payment systems. Mailers may indicate their preference (set in Program Registration) to receive:

1. No payment extract
2. Complete payment extract
3. Partial payment extract (without any postage fields)

**NOTES:** 1. eVS Mailers should contact the Confirmation Services Support Team at 877-264-9693 to have the

Postage Extract Format Indicator set. 2. eVS Mailers should contact the eVS program office if they would like to receive version 2 of the eVS postage payment extract file, 3. eVS Mailers now have the option to receive their eVS postage payment file every 15 minutes. 4. eVS Mailers should contact the eVS program office if they would like this new “batch” feature turned on.

The payment extract files will contain all rate ingredients reflecting any updates or changes made by eVS along with the postage rate calculated and charged by eVS. The payment life cycle in eVS typically processes the payment for all manifest data received as a one-step process. Hence, a single payment extract reflecting the payment status of ‘PROCESSED’ will be generated by eVS. However, in exceptional scenarios, the payment process may involve multiple or interim steps (i.e. ERROR, PENDING, CLOSED). In these exceptional scenarios, multiple payment extracts may be generated by eVS any time a change in status occurs for payment of specific detail records.

## Appendix F – eVS Postage Payment Extract Files

### Header Record

Payment Extract File Format v1.1 - Payment Extract Header Line, comma delimited				
Position #	Field Name	Format / Max Size	Description	Example
1	Record Type	Alphanumeric (2)	Record Type	H1
	Delimiter	Alphanumeric (1)	Comma	,
2	File Version Number	Alphanumeric(3)	Version Control Number	1.0
	Delimiter	Alphanumeric (1)	Comma	,
3	Transaction ID	Alphanumeric (12)	Transaction ID from the Manifest File YYYYMMDD####	200911060001
	Delimiter	Alphanumeric (1)	Comma	,
4	EFN (Main Header Record)	Alphanumeric (34)	EFN of first header record processed in the batched files	9150128212375050403731 (V1.4) 92750010101010100000000121 (V1.6 or V1.7)
	Delimiter	Alphanumeric (1)	Comma (,)	
5	EFN (Sub Header Record)	Alphanumeric (34)	EFN of header record associated with detail record	9150128212375050403731 (V1.4) 92750010101010100000000121 (V1.6 or V1.7)
	Delimiter	Alphanumeric (1)	Comma (,)	
6	Mailing Date/Time	Alphanumeric (14)	Mailing Date/Time from the Manifest File	YYYYMMDDHHMISS
	Delimiter	Alphanumeric (1)	Comma (,)	
7	Processing Date/Time	Alphanumeric (14)	Date/Time when manifest file was processed by the payment system.	YYYYMMDDHHMISS
	Delimiter	Alphanumeric (1)	Comma (,)	
8	Entry Facility ZIP	Alphanumeric (5)	Entry Facility ZIP Code from the Manifest File	22201
	Delimiter	Alphanumeric (1)	Comma (,)	
9	Entry Facility ZIP+4	Alphanumeric (4)	Entry Facility ZIP+4 Code from the Manifest File	9998

### Detail Record

Payment Extract File Format v1.1 - Payment Extract Detail Line, comma delimited

**Appendix F – eVS Postage Payment Extract Files**

<b>Payment Extract File Format v1.1 - Payment Extract Detail Line, comma delimited</b>				
Position #	Field Name	Format / Max Size	Description/	Example
	Delimiter	Alphanumeric (1)	Comma (,)	
<b>Fields 27 through 31 are not included in the partial payment extract.</b>				
27	Price Type (Commercial, Commercial Plus etc.)	Alphanumeric (3)		'P' – Published 'CB' – Commercial Base (For PM/EX) 'CP' – Commercial Plus (For PM/EX) 'CPC' – Commercial Plus Cubic (For PM) 'C' - Contract
	Delimiter	Alphanumeric (1)	Comma (,)	
28	Mailer Postage	Numeric (7)	Defined as 9999.999	\$5.69 entered as 0005690
	Delimiter	Alphanumeric (1)	Comma (,)	
29	USPS Calculated Manifest Postage	Numeric (7)	Defined as 9999.999	\$5.69 entered as 0005690
	Delimiter	Alphanumeric (1)	Comma (,)	
30	Payment Status	Alphanumeric (20)		'PROCESSED' 'PENDING' 'ERROR' 'CLOSED'
	Delimiter	Alphanumeric (1)	Comma (,)	
31	Transaction ID	Alphanumeric (19)		'2010032217250900M2'

**File naming convention:**

The payment system (eVS) will generate the payment extract files using the following naming convention. These files will be sent to the Product Tracking System (PTR) to be forwarded on to the appropriate mailers. The file names received by the mailers may not match this convention depending on the data exchange interface (SFTP, EDI, etc.) used for the transfer.

<b>File Type v1.1</b>	<b>Naming Standard/Example</b>	<b>Corresponding PTR Manifest file</b>

## Appendix F-2: Version 2.0 File Layout Specification

This section and the next describe the process and file format specifications for the postage payment extract files created to provide status and payment information feedback to the eVS/PRS mailers.

### Payment Extract Data Record Formats

eVS will provide **an** extract file containing all header records submitted by the mailer along with the associated detail records. Multiple header records may be combined in a single extract file. A partial group of detail records associated with a single header record may also be sent in multiple extract files. This grouping may not match the consolidated manifest files submitted by the mailer due to the timing and processing of the manifest data by the tracking and payment systems. Mailers may indicate their preference (set in Program Registration) to receive...

1. No payment extract
2. Complete payment extract
3. Partial payment extract (without any postage fields)

**NOTES:** 1. eVS Mailers should contact the Confirmation Services Support Team at 877-264-9693 to have the

Postage Extract Format Indicator set. 2. eVS Mailers should contact the eVS program office if they would like to receive version 2 of the eVS postage payment extract file. 3. eVS Mailers now have the option to receive their eVS postage payment file every 15 minutes. 4. eVS Mailers should contact the eVS program office if they would like this new “batch” feature turned on.

The payment extract files will contain all rate ingredients reflecting any updates or changes made by eVS along with the postage rate calculated and charged by eVS. The payment life cycle in eVS typically processes the payment for all manifest data received as a one-step process. Hence, a single payment extract reflecting the payment status of ‘PROCESSED’ will be generated by eVS. However, in exceptional scenarios, the payment process may involve multiple or interim steps (i.e. ERROR, PENDING, CLOSED). In these exceptional scenarios, multiple payment extracts may be generated by eVS any time a change in status occurs for payment of specific detail records.

**NOTE:** Fields 22 through 28 are the new fields (Extra Service Code 4th Service, Extra Service Code 4th Service Fee, Extra Service Code 5th Service, Extra Service Code 5th Service Fee, Destination Country Code, Foreign Postal Code, Customer Reference Number 2)

Header Record

Payment Extract File Format v 2.0 - Payment Extract Header Line, comma delimited				
Position #	Field Name	Format / Max Size	Description	Example
1	Record Type	Alphanumeric (2)	H1	
	Delimiter	Alphanumeric (1)	Comma (,)	
2	File Version Number	Alphanumeric (3)	Version Control Number	2.0
	Delimiter	Alphanumeric (1)	Comma (,)	
3	Transaction ID	Alphanumeric (12)	Transaction ID from the Manifest File	YYYYMMDD####, 200911060001
	Delimiter	Alphanumeric (1)	Comma (,)	
4	EFN (Main Header Record)	Alphanumeric (34)	EFN of first header record processed in the batched files	92750010101010100000000121 (V1.6 or V1.7)
	Delimiter	Alphanumeric (1)	Comma (,)	
5	EFN (Sub Header Record)	Alphanumeric (34)	EFN of header record associated with detail record	9275001010101010100000000121 (V1.6 or V1.7)
	Delimiter	Alphanumeric (1)	Comma (,)	
6	Mailing Date/Time	Alphanumeric (14)	Mailing Date/Time from the Manifest File	YYYYMMDDHHMISS
	Delimiter	Alphanumeric (1)	Comma (,)	
7	Processing Date/Time	Alphanumeric (14)	Date/Time when manifest file was processed by the payment system.	YYYYMMDDHHMISS
	Delimiter	Alphanumeric (1)	Comma (,)	
8	Entry Facility ZIP	Alphanumeric (5)	Entry Facility ZIP Code from the Manifest File	22201
	Delimiter	Alphanumeric (1)	Comma (,)	
9	Entry Facility ZIP+4	Alphanumeric (4)	Entry Facility ZIP+4 Code from the Manifest File	9998

## Appendix G: Scan Data Extract Files

### Appendix G-1: Scan Data Extract File Version 1.5 File Layout Specification

**NOTE:** This file is a quote and comma-delimited fixed length strings, Record Length = 403 bytes.

In addition to the scan events, this file also contains the daily-unmanifested scans for eVS customers. The daily unmanifested IMpb scans will be provided in the 1.5 file version as documented below and the unmanifested legacy scans will be provided in the 1.3 file version.

Record Position	Field Name	Format (Size)	Description	Example	File Content Rules Rules and Limitations
001-001	Delimiter	A(1)	Quote delimiter.	"	"
002-004	USPS Event Extract File Version	N(3)	USPS Extract Version Number	Entered as: 015	
005-007	Delimiter	A(3)	Quote, comma, quote delimiter.	","	","
008-041	Tracking Number	A(34)	The tracking number used on package.  This field can contain a legacy confirmation services barcode or IMpb.	IMpb 4202218192123912345 67812345670 or 9212391234567812345 670  Legacy 910596900872600000 002	For IMpbs, the encoded tracking number used on the package will be provided. If encoded tracking number includes the postal routing information then this information will also be included.  For legacy barcodes, the tracking number will be provided. The postal routing information will not be included for legacy barcodes.
042-044	Delimiter	A(3)	Quote, comma, quote delimiter.	","	","
045-078	Electronic File Number	A(34)	Unique number assigned to identify the electronic file.	9275012345678912345 678	Taken from the Electronic File Header Record, positions 004-037 when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.
079-081	Delimiter	A(3)	Quote, comma, quote delimiter.	","	","
082-090	Mailer ID	A(9)	Mailer ID number unique to this mailer as shown in the Postal Service database.  Six- or Nine-digit MID.	912345678 or 612345	Taken from the Electronic File Header Record, positions 009-014 or 009-017 when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.
091-093	Delimiter	A(3)	Quote, comma, quote delimiter.	","	","
094-113	Mailer Name	A(20)	Mailer name associated with MID.	ABC Company	
114-116	Delimiter	A(3)	Quote, comma, quote delimiter.	","	","
117-121	Destination ZIP Code	A(5)	Destination ZIP Code.	33511	Taken from the Electronic File Detail Record 1, positions 047-051 when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.
122-124	Delimiter	A(3)	Quote, comma, quote delimiter.	","	","

Record Position	Field Name	Format (Size)	Description	Example	File Content Rules Rules and Limitations
125-128	Destination ZIP+4	A(4)	Destination ZIP+4	1857	Taken from the Electronic File Detail Record 1, positions 052-055 when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.
129-131	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
132-136	Scanning Facility ZIP	A(5)	Scanning Facility ZIP	21201	If scanning event, 5-digit ZIP Code of facility.  If manifest event, entry facility ZIP Code.
137-139	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
140-170	Scanning Facility Name	A(31)	Name of Postal Service facility or city/state where the event occurred.	Baltimore, MD	Provided by the Postal Service.  Further defined for city/state event: 28 characters for city, 1 for comma, 2 for state alpha abbreviation.  If the Scanning Facility ZIP is invalid, the description in this field will state “UNKNOWN”.
171-173	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
174-175	Event Code	A(2)	Code for tracking event.	01	See Appendix G-4: Event Codes
176-178	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
179-218	Event Name	A(40)	Name of tracking event corresponding to Event Code.	DELIVERED  In the event of a duplicate: DUPLICATE 1 DELIVERED	See Appendix G-4: Event Codes. The event name may be preceded by “DUPLICATE nn” when information about duplicate items with the same tracking number is provided in the scan.
219-221	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
222-229	Event Date	N(8)	Date of tracking event.	20090515	YYYYMMDD
230-232	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
233-236	Event Time	N(4)	Time of tracking event.	1315	HHMM
237-239	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
240-248	Mail Owner Mailer ID	A(9)	Mail Owner Mailer ID.  Six- or Nine-digit MID.	941233312 or 612345	Taken from the Electronic File Detail Record 1, positions 84-92 when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.
249-251	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
252-281	Customer Reference Number	A(30)	Used for customer internal identification purposes.	1223ABC	Taken from the Electronic File Detail Record 1, positions 216-245 when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.

Record Position	Field Name	Format (Size)	Description	Example	File Content Rules Rules and Limitations
282-284	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
285-286	Destination Country Code	A(2)	Two-character standardized IMM International country code.	GB	International mail only. Taken from the Electronic File Detail Record 1, positions 057-058 when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.
287-289	Delimiter	A(3)	Quote, comma, quote delimiter	“,”	“,”
290-309	Recipient Name	A(20)	Name of recipient for Signature Confirmation and Priority Mail Express service.	DOE J	Last name, space, first initial when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.
310-312	Delimiter	A(3)	Quote, comma, quote delimiter	“,”	“,”
313-346	Original Label	A(34)	Label ID associated with original label created online.		Included only if an online label was re-labeled at a retail location when services were added.
347-349	Delimiter	A(3)	Quote, comma, quote delimiter	“,”	“,”
350-350	Unit of Measure Code	N(1)	Unit of measurement for mailpiece: '1' – LBS '2' – OZ '3' – KILOS	1  If not available 0	Included only when the Postal Service captures the weight of the mailpiece when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.
351-353	Delimiter	A(3)	Quote, comma, quote delimiter	“,”	“,”
354-362	Weight	N(9)	Mailpiece weight. In unit of measure and significant to 4 decimal positions.	00143250  If not available 00000000	Taken from the Electronic File Detail Record 1, positions 363 – 371 when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.
363-365	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
366-373	Guaranteed Delivery Date	N(8)	Date of tracking event.	20090515  If not available 00000000	YYYYMMDD  Field is not populated when PTR provides the Event data before the manifest has been received.
74-376	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”
377-380	Guaranteed Delivery Time	N(4)	Time of tracking event.	1315  If not available 00000000	HHMM
381-383	Delimiter	A(3)	Quote, comma, quote delimiter.	“,”	“,”

Record Position	Field Name	Format (Size)	Description	Example	File Content Rules Rules and Limitations
384-392	Logistics Manager Mailer ID	A(9)	Logistics Manager Mailer ID.	912345678 or 612345	Taken from the Electronic File Detail Record 1, positions 75-83 when the manifest file has been posted.  Field is not populated when PTR provides the Event data before the manifest has been received.
393-395	Delimiter	A(3)	Quote, comma, quote delimiter.	" , "	" , "
396-402	Filler	A(7)	Filler for future use.		Space-filled
403-403	Delimiter	A(1)	Quote delimiter	"	"

## Appendix G-2: Scan Extract File Version 1.6 File Layout Specification

### File Definitions

- File Type: Fixed Length
- Record Length: 899
- Delimiter Type: Quote, comma, quote delimiter

Detail Record - Scan Extract File Version 1.6						
Record Position	Field Name	Format	Length	Description	Example	Content Rules and Limitations
001-001	Delimiter	A	1	Quote delimiter	"	"
002-004	Version Number	A	3			Always 016
005-007	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
008-041	Tracking Barcode Number	A	34	Tracking barcode number used on package. Will include routing information and Package Identification Code (PIC) when Concatenated IMpb is printed on the label. If mailpiece is over-labeled, will contain over-labeled number.		See Appendix J, Table 1 for the barcode construct formats.
042-044	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
045-078	Electronic File Number	A	34	Unique number assigned to identify the electronic file.	'9275012345678912345678'	Taken from the Shipping Services File Header Record when the manifest file has been posted.  Field is populated with spaces when PTR provides the event data before the manifest has been received.
079-081	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
082-090	Mailer ID	A	9	Mailer ID number unique to this mailer as shown in the Postal Service database.  Six- or Nine-digit MID.	912345678 or 612345	Taken from the Electronic File Number when the manifest file has been posted.  Daily Unmanifested – Mailer ID is populated.
091-093	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
094-113	Mailer Name	A	20	Mailer name associated with Mailer ID.	'ABC Company'	Mailer Name associated with the Mailer ID in the Electronic File Number.  Daily Unmanifested – Mailer Name is populated.
114-116	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
117-121	Destination ZIP Code	N	5	Destination ZIP Code.	33511	Taken from the Shipping Services File Detail Record when the manifest file has been posted.  Field is populated with spaces when PTR provides the event data before the manifest has been received.

Detail Record - Scan Extract File Version 1.6						
Record Position	Field Name	Format	Length	Description	Example	Content Rules and Limitations
122-124	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
125-128	Destination (ZIP)+4	A	4	Destination ZIP +4	1857	Taken from the Shipping Services File Detail Record when the manifest file has been posted.  Field is populated with spaces when PTR provides the event data before the manifest has been received.
129-131	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
132-136	Scanning Facility ZIP	N	5	Scan facility ZIP Code.	21201	If scan event, 5-digit ZIP Code of facility.  If manifest event, entry facility ZIP Code.
137-139	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
140-170	Scanning Facility Name	A	31	Name of Postal Service facility or city/state where event happened.	'Baltimore, MD'	The maximum allowable bytes for city is 28. The remaining bytes are used for the comma and the 2-digit alpha abbreviation for state or country.  For domestic events, i.e., events with a Domestic Indicator of 'Y' in the Event Code Ref table, PTR defines the city/state event: 28 characters for city, 1 for comma, 2 for state alpha abbreviation. If the Scanning Facility ZIP Code is invalid, the description in this field will state "UNKNOWN". PTR-2 determines whether to display the city and/or state based on the Event Script Rule table.
	Scanning Facility Name					For international events, i.e., events with a Domestic Indicator of 'N' in the Event Code Ref table, PTR will populate the Scanning Facility Name using the below logic, deviating from Publication 91:  For each event, PTR retrieves the display attributes for city and country from the Event Script Rule table to determine if the city and/or country are displayable. If the attribute for display has a 'Y,' PTR retrieves the value for the Event City and/or Event Country for the event. The values are then concatenated into the proper format based on the below rules.  The format for international events: 'CITY, COUNTRY CODE' when city and country both have displayable values.  'CITY' when city has a displayable value, but country does not have a value or is not displayable.

Detail Record - Scan Extract File Version 1.6						
Record Position	Field Name	Format	Length	Description	Example	Content Rules and Limitations
						'COUNTRY CODE' when the country has a displayable value, but city does not have a value or is not displayable.  Spaces when no value is available for city or country or both are not displayable.
171-173	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
174-175	Event Code	A	2	Code for tracking event.	'01'	
176-178	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
179-218	Event Name	A	40	Name of tracking event corresponding to Event Code.	Event description: 'DELIVERED'  In the event of a duplicate: 'DUPLICATE 1 DELIVERED'	See Appendix G-4: Event Codes.  The event name may be preceded by "DUPLICATE nn" when information about duplicate items with the same tracking number is provided in the scan.
219-221	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
222-229	Event Date	N	8	Date of tracking event.	20090515	YYYYMMDD
230-232	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
233-236	Event Time	N	4	Time of tracking event.	1315	HHMM
237-239	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
240-248	Mail Owner Mailer ID	N	9	Mail Owner Mailer ID.	941233312	Taken from the Shipping Services File Detail Record when the manifest has been posted.  Field is populated with spaces when PTR provides the event data before the manifest has been received.
249-251	Delimiter	A	3	Quote, comma, quote delimiter	" , "	" , "
252-281	Customer Reference Number 1	A	30	Used for customer internal identification purposes.	'1223ABC'	Taken from the Shipping Services File Detail Record when the manifest has been posted.  Field is populated with spaces when PTR provides the event data before the manifest has been received.

## Appendix G-3: Scan Extract File Version 2.0 File Layout Specification

### File Definitions

- File Type: Variable Length
- Delimiter Type: '|' (pipe) delimiter

Detail Record - Scan Extract File Version 2.0						
Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
1.	Version Number	A	3	Version Number of the Extract		Always 020
2.	Delimiter	A	1	Pipe delimiter		
3.	Tracking Barcode Number	A	34	Tracking barcode number used on package. Will include routing information and Package Identification Code (PIC) when concatenated IMpb is printed on the label. If mailpiece is over-labeled, will contain over-labeled number.		See Appendix J, Table 1 for the barcode construct formats.
4.	Delimiter	A	1	Pipe delimiter		
5.	Electronic File Number	A	34	Unique number assigned to identify the electronic file.	'9275012345678912345678'	Taken from the Shipping Services File Header Record when the manifest file has been posted.  Field is populated with null when PTR provides the event data before the manifest has been received.
6.	Delimiter	A	1	Pipe delimiter		
7.	Mailer ID	A	9	Mailer ID number unique to this mailer as shown in the Postal Service database.  Six- or Nine-digit MID.	912345678 or 612345	Taken from the Electronic File Number when the manifest file has been posted.  Daily Unmanifested – Mailer ID is populated
8.	Delimiter	A	1	Pipe delimiter		
9.	Mailer Name	A	20	Mailer name associated with Mailer ID.	'ABC Company'	Mailer Name associated with the Mailer ID in the Electronic File Number.  Daily Unmanifested – Mailer Name is populated
10.	Delimiter	A	1	Pipe delimiter		
11.	Destination ZIP Code	N	5	Destination ZIP Code.	33511	Taken from the Shipping Services File Detail Record when the manifest file has been posted.  Field is populated with null when PTR provides the event data before the manifest has been received.
12.	Delimiter	A	1	Pipe delimiter		

Detail Record - Scan Extract File Version 2.0						
Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
13.	Destination (ZIP)+4	A	4	Destination ZIP +4	1857	<p>Taken from the Shipping Services File Detail Record when the manifest file has been posted.</p> <p>Field is populated with null when PTR provides the event data before the manifest has been received.</p>
14.	Delimiter	A	1	Pipe delimiter		
15.	Scanning Facility ZIP	N	5	Scan facility ZIP Code.	21201	<p>If scan event, 5-digit ZIP Code of facility.</p> <p>If manifest event, entry facility ZIP Code.</p>
16.	Delimiter	A	1	Pipe delimiter		
17.	Scanning Facility Name	A	31	Name of Postal Service facility or city/state where event happened.	'Baltimore, MD'	<p>The maximum allowable bytes for city is 28. The remaining bytes are used for the comma and the 2-digit alpha abbreviation for state or country.</p> <p>For domestic events, i.e., events with a Domestic Indicator of 'Y' in the Event Code Ref table, PTR defines the city/state event: 28 characters for city, 1 for comma, 2 for state alpha abbreviation. If the Scanning Facility ZIP Code is invalid, the description in this field will state "UNKNOWN". PTR determines whether to display the city and/or state based on the Event Script Rule table.</p> <p>For international events, i.e., events with a Domestic Indicator of 'N' in the Event Code Ref table, PTR will populate the Scanning Facility Name using the below logic, deviating from Publication 91:</p>

**Detail Record - Scan Extract File Version 2.0**

Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
	Scanning Facility Name					<p>For each event, PTR retrieves the display attributes for city and country from the Event Script Rule table to determine if the city and/or country are displayable. If the attribute for display has a 'Y,' PTR retrieves the value for the Event City and/or Event Country for the event. The values are then concatenated into the proper format based on the below rules.</p> <p>The format for international events:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> 'CITY, COUNTRY CODE' when city and country both have displayable values.</li> <li><input type="checkbox"/> 'CITY' when city has a displayable value, but country does not have a value or is not displayable.</li> <li><input type="checkbox"/> 'COUNTRY CODE' when the country has a displayable value, but city does not have a value or is not displayable.</li> <li><input type="checkbox"/> Null when no value is available for city or country or both are not displayable.</li> </ul>
18.	Delimiter	A	1	Pipe delimiter		
19.	Event Code	A	2	Code for tracking event.	'01'	
20.	Delimiter	A	1	Pipe delimiter		
21.	Event Name	A	40	Name of tracking event corresponding to Event Code.	<p>Event description: 'DELIVERED'</p> <p>In the event of a duplicate: 'DUPLICATE 1 DELIVERED'</p>	<p>See Appendix G-4: Event Codes.</p> <p>The event name may be preceded by "DUPLICATE nn" when information about duplicate items with the same tracking number is provided in the scan.</p>
22.	Delimiter	A	1	Pipe delimiter		
23.	Event Date	N	8	Date of tracking event.	20090515	<input type="checkbox"/> YYYYMMDD
24.	Delimiter	A	1	Pipe delimiter		
25.	Event Time	N	4	Time of tracking event.	1315	<input type="checkbox"/> HHMM
26.	Delimiter	A	1	Pipe delimiter		

Detail Record - Scan Extract File Version 2.0						
Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
27.	Mail Owner Mailer ID	N	9	Mail Owner Mailer ID.	941233312	Taken from the Shipping Services File Detail Record when the manifest has been posted.  Field is populated with null when PTR provides the event data before the manifest has been received.
28.	Delimiter	A	1	Pipe delimiter		
29.	Customer Reference Number 1	A	30	Used for customer internal identification purposes.	'1223ABC'	Taken from the Shipping Services File Detail Record when the manifest has been posted.  Field is populated with null when PTR provides the event data before the manifest has been received.
30.	Delimiter	A	1	Pipe delimiter		
31.	Destination Country Code	A	2	Two character standardized IMM International country code.	'GB'	International mail only.  Taken from the Shipping Services File Detail Record when the manifest has been posted.  Field is populated with null when PTR provides the event data before the manifest has been received.
32.	Delimiter	A	1	Pipe delimiter		
33.	Recipient Name	A	20	Name of Recipient for Signature Confirmation and Priority Mail Express service.	'DOE J'	Taken from the scanner/POS when mailpiece is delivered (signed for).  Field is populated with null when PTR provides the event data before the manifest has been received.
34.	Delimiter	A	1	Pipe delimiter		
35.	Original Tracking Number	A	34			Taken from the Shipping Services File Detail Record Original Tracking Number field.  Field is populated with null when PTR provides the event data before the manifest has been received.
36.	Delimiter	A	1	Pipe delimiter		

Detail Record - Scan Extract File Version 2.0						
Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
37.	Unit of Measure Code	N	1	Unit of measurement for mailpiece: 1 – LBS 2 – OZ 3 – KILOS	1	Taken from the Shipping Services File Detail Record and included only when the Postal Service captures the weight of the mailpiece, when the manifest has been posted.  Field is populated with null when PTR provides the event data before the manifest has been received.
38.	Delimiter	A	1	Pipe delimiter		
39.	Weight	N	9	Mailpiece weight. In unit of measure and significant to 4 decimal positions.	Value is 00143250 for 14.3.	Taken from the Shipping Services File Detail Record when the manifest has been posted.  Field is populated with null when PTR provides the event data before the manifest has been received.
40.	Delimiter	A	1	Pipe delimiter		
41.	Service Guarantee Delivery Date	N	8	Service Guarantee Delivery Date	20090515	Format: YYYYMMDD  The Service Guarantee Delivery Date field shall be provided for Priority Mail Express, PMG, and GXG.  The Service Guarantee Delivery Date field shall be populated for the first 'TM' (Shipping Acceptance), 'OA' (Origin Acceptance) or '03' (Accept or Pickup) event for the Priority Mail Express, PMG, and GXG mailpieces.  The Service Guarantee Delivery Date shall be updated with the best acceptance if the 'TM' (Shipping Acceptance), 'OA' (Origin Acceptance) or '03' (Accept or Pickup) event is lower than the event associated with the current Service Guarantee Delivery Date according to the order of precedence.  Field is populated with null when PTR provides the event data before the manifest has been received or the event was manually released from SDC Hold.
42.	Delimiter	A	1	Pipe delimiter		

Detail Record - Scan Extract File Version 2.0						
Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
43.	Service Guarantee Delivery Time	N	4	Service Guarantee Delivery Time	1315	<p>Format: HHMM</p> <p>The Service Guarantee Delivery Time field shall be provided for Priority Mail Express, PMG, and GXG.</p> <p>The Service Guarantee Delivery Time field shall be populated for the first 'TM' (Shipping Acceptance), 'OA' (Origin Acceptance) or '03' (Accept or Pickup) event for the Priority Mail Express, PMG, and GXG mailpieces.</p> <p>The Service Guarantee Delivery Time shall be updated with the best acceptance if the 'TM' (Shipping Acceptance), 'OA' (Origin Acceptance) or '03' (Accept or Pickup) event is lower than the event associated with the current Service Guarantee Delivery Time according to the order of precedence.</p> <p>Field is populated with null when PTR provides the event data before the manifest has been received or the event was manually released from SDC Hold.</p>
44.	Delimiter	A	1	Pipe delimiter		
45.	Logistics Manager Mailer ID	A	9	<p>MID of company that manages the mailing of this shipment.</p> <p>This would be a different company other than the consolidator.</p> <p>Six or Nine Digit Mailer ID.</p>	941233312	<p>Taken from the Shipping Services File Detail Record 1.</p> <p>Field is populated with null when PTR provides the event data before the manifest has been received.</p>
46.	Delimiter	A	1	Pipe delimiter		
47.	Expected Delivery Date	N	8	The Expected Delivery Date for the mailpiece.	20090515	Format : YYYYMMDD
48.	Delimiter	A	1	Pipe delimiter		

**Detail Record - Scan Extract File Version 2.0**

Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
49.	Delivery Date Modification Indicator	A	1	Indicates whether the Delivery Date has been modified from a previously provided date	'1'	<p>When the Expected Delivery Date field is first populated or the Expected Delivery Date is updated and the new Expected Delivery Date is the same as the original value of the Scheduled Delivery Date, the Delivery Date Modification Indicator shall store '1' (i.e., the delivery will be on time) to the Delivery Date Modification Indicator associated with the event.</p> <p>If the Expected Delivery Date is updated, and the new Expected Delivery Date is less than the original value of the Scheduled Delivery Date, the Delivery Date Modification Indicator field shall store '2' (i.e., the delivery will be early) to the Delivery Date Modification Indicator associated with the event.</p> <p>If the Expected Delivery Date is updated, and the new Scheduled Delivery Date is greater than the original value of the Scheduled Delivery</p>
						<p>Date, the Delivery Date Modification Indicator shall be store '3' (i.e., the delivery will be late) to the Delivery Date Modification Indicator associated with the event.</p> <p>Field is populated with null when PTR provides the event data before the manifest has been received or the event was manually released from SDC Hold.</p>
50.	Delimiter	A	1	Pipe delimiter		

Detail Record - Scan Extract File Version 2.0						
Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
51.	Predicted Delivery Date	N	8	Predicted date of delivery.		<p><b>FOR FUTURE USE</b></p> <p>Format : YYYYMMDD</p> <p>The Predicted Delivery Date information will only be provided if the customer's Predicted Delivery Date Indicator equals "Y" and the Predicted Delivery Date value is not equal to the Expected Delivery Date value at the mailpiece level.</p> <p><input type="checkbox"/> For instance, if both the PDD and the SDD are 09/25/13, the PDD is not included in the file. However, if the SDD is 09/24/13 and the PDD is 09/25/13, then include the PDD in the file.]</p> <p>Field is populated with zeroes when PTR provides the event data before the manifest has been received.</p>
52.	Delimiter	A	1	Pipe delimiter		
53.	Start the Clock Date	N	8	Start the clock date.		<p><b>FOR FUTURE USE</b></p> <p>Format : YYYYMMDD</p> <p>The Start the Clock Date information will only be provided if the customer's start the clock date indicator equals "Y" and the event is a start the clock event.</p> <p>Field is populated with zeroes when PTR provides the event data before the manifest has been received or the event was manually released from SDC Hold.</p>
54.	Delimiter	A	1	Pipe delimiter		
55.	Start the Clock Date Modified Indicator	A	1	Indicates if the Start the Clock Date has been modified.		<p><b>FOR FUTURE USE</b></p> <p>Value is always null</p> <p>Future Values:</p> <p><input type="checkbox"/> 'Y'</p> <p><input type="checkbox"/> 'N'</p> <p><input type="checkbox"/> space</p>
56.	Delimiter	A	1	Pipe delimiter		

Detail Record - Scan Extract File Version 2.0						
Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
57.	Container ID 1	A	34	Barcode on container. This may be a valid IMpb, IM Container Barcode, IM Tray Barcode, or a Trailer Placard Barcode.	'222010127123456789912345'	Taken from the Shipping Services File Detail Record.  Provided only for scans on customer containers (O&D, 99M, and 24-digit IMCB) and the mailpieces within those containers.  Field is populated with null when PTR provides the event data before the manifest has been received.
58.	Delimiter	A	1	Pipe delimiter		
59.	Container Type 1	A	2	Describes type of container for Container ID 1.	SK	Taken from the Shipping Services File Detail Record.  Provided only for scans on customer containers (O&D, 99M, and 24-digit IMCB) and the mailpieces within those containers.  Field is populated with null when PTR provides the event data before the manifest has been received.
60.	Delimiter	A	1	Pipe delimiter		
61.	Container ID 2	A	34	Barcode on container. This may be a valid IMpb, IM Container Barcode, IM Tray Barcode, or a Trailer Placard Barcode.	'99N123456789000012345678'	Taken from the Shipping Services File Detail Record.  Provided only for scans on customer containers (O&D, 99M, and 24-digit IMcb) and the mailpieces within those containers.  Field is populated with null when PTR provides the event data before the manifest has been received.
62.	Delimiter	A	1	Pipe delimiter		
63.	Container Type 2	A	2	Describes type of container for Container ID 2	'PT'	Taken from the Shipping Services File Detail Record.  Provided only for scans on customer containers (O&D, 99M, and 24-digit IMcb) and the mailpieces within those containers.  Field is populated with null when PTR provides the event data before the manifest has been received.
64.	Delimiter	A	1	Pipe delimiter		

Detail Record - Scan Extract File Version 2.0

65.	Container ID 3	A	34	Barcode on container. This may be a valid IMpb, IM Container Barcode, IM Tray Barcode, or a Trailer Placard Barcode.	'99T123456789123'	Taken from the Shipping Services File Detail Record.  Provided only for scans on customer containers (O&D, 99M, and 24-digit IMcb) and the mailpieces within those containers.  Field is populated with null when PTR provides the event data before the manifest has been received.
66.	Delimiter	A	1	Pipe delimiter		
67.	Container Type 3	A	2	Describes type of container for Container ID 3	'BL'	Taken from the Shipping Services File Detail Record.  Provided only for scans on customer containers (O&D, 99M, and 24-digit IMcb) and the mailpieces within those containers.  Field is populated with null when PTR provides the event data before the manifest has been received.
68.	Delimiter	A	1	Pipe delimiter		
69.	Postal Code	A	11	Foreign country postal code.	'AOA9A0'	Taken from the Shipping Services File Detail Record.  Field is populated with null when PTR provides the event data before the manifest has been received.
70.	Delimiter	A	1	Pipe delimiter		

Detail Record - Scan Extract File Version 2.0						
Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
71.	Delivery Address	A	48	Delivery address in the destination address or Standardized Address.	'123 MAIN ST'	<p>Delivery Address is not extracted if event ZIP Code is different from manifest destination ZIP Code.</p> <p>Extracted for 01 ('Delivered'), 43 ('Picked Up'), and MA ('Electronic Shipping Info Received') scan events.</p> <p>Not extracted for 01 or 43 scan events if recalled/package intercept ('44'), forwarded ('06'), refused ('04'), or returned ('09') scan events exist for the mailpiece.</p> <p>Not extracted if 31 ('Return to Sender / Not Picked Up'), 32 ('Dead Mail / Disposed by Post Office'), or 33 ('Dead Mail / Sent to Recovery Center') scan events exist for the mailpiece.</p> <p>Field is populated with null when PTR provides the event data before the manifest has been received.</p>
72.	Delimiter	A	1	Pipe delimiter		
73.	Customer Reference Number 2	A	30	Customer's internal reference number.		<p>Taken from the Shipping Services File Detail Record.</p> <p>Field is populated with null when PTR provides the event data before the manifest has been received.</p>
74.	Delimiter	A	1	Pipe delimiter		
75.	Ancillary Service Endorsement	A	3	Address correction service code and option.		<p>Taken from the Shipping Services File Detail Record.</p> <p>Field is populated with null when PTR provides the event data before the manifest has been received.</p>
76.	Delimiter	A	1	Pipe delimiter		
77.	Address Service Participant Code	A	9	6 or 9 digit Mailer ID or a 7 digit alphanumeric code.		<p>Taken from the Shipping Services File Detail Record.</p> <p>Field is populated with null when PTR provides the event data before the manifest has been received.</p>
78.	Delimiter	A	1	Pipe delimiter		

Detail Record - Scan Extract File Version 2.0						
Field Position	Field Name	Format	Max Length	Description	Example	Content Rules and Limitations
79.	Status	A	10	Package status.	eSOL	Format: eSOL  Field is populated with "eSOL" when electronic signature online has been received.
80.	Delimiter	A	1	Pipe delimiter		
81.	Facility Identifier	A	16	Identifier of facility.		<b>FOR FUTURE USE</b> Value is always null
82.	Delimiter	A	1	Pipe delimiter		
83.	Facility Type	A	20	Type of Facility.		<b>FOR FUTURE USE</b> Value is always null
84.	Delimiter	A	1	Pipe delimiter		
85.	GMT Time	A	8	GMT Time Format.	10:23:00	Format: HH:MM:SS  Field is populated with null when PTR provides the event data before the manifest has been received.
86.	Delimiter	A	1	Pipe delimiter		
87.	GMT Offset	A	8	GMT Offset.		Field is populated with null when PTR provides the event data before the manifest has been received.
88.	Delimiter	A	1	Pipe delimiter		
89.	GPS Latitude	A	12	Latitude.	+xx.xxxxxxx	<b>FOR FUTURE USE</b>  The GPS Latitude information will only be provided if the GPS Info Received Indicator equals "Y".  Defaults to null, when the information is not provided.
90.	Delimiter	A	1	Pipe delimiter		
91.	GPS Longitude	A	12	Longitude.	+xx.xxxxxxx	<b>FOR FUTURE USE</b>  The GPS Longitude information will only be provided if the GPS Info Received Indicator equals "Y".  Defaults to null, when the information is not provided.
92.	Delimiter	A	1	Pipe delimiter

## Appendix H: eVS Reconciliation Extract File

These tables define the file structure for each adjustment file that will be passed to PTR/DTS from eVS. The files will be created from the eVS batch process. All records will be in the pipe-delimited format **with a fixed number of fields**.

### Field Data Types

Each field will have one of the following data types:

1. Alpha / Numeric – variable length field containing letters, numbers, or possibly punctuation
2. Numeric (12, 4) – fixed-width field containing only numbers. Implied decimal point between 8th and 9th characters. There will be 8 digits to the left of the implied decimal point, 4 digits to the right. For example, the value 99,999,999.9999 will be written as 999999999999; the value 0.1 will be written as 000000001000.
3. Numeric (8) – fixed-width field containing only numbers. No implied decimal point.
4. Null fields – Fields with Field Name of “null” will always be empty and have no data type.

### eVS Adjustment Header Record

**Description:** Header (H1) record will be similar for all adjustment types with one per file.

Element Name: Header Record				
Position	Field Name	Data Type	Size (Bytes)	Definition
1	Record Type	Alpha/Numeric	2	H1
2	Master Mailer ID	Alpha/Numeric	9	
3	Version ID	Alpha/Numeric	3	Default to 010
4	null			
5	Document ID	Alpha/Numeric	4	210R
6	Record Position	Alpha/Numeric	2	00
7	Business Type Indicator	Alpha/Numeric	1	"N" – Notice "I" -- Interim "A" - Advice
8	Business Purpose Indicator	Alpha/Numeric	1	"S" - Supplemental
9	File Processing Date	Alpha/Numeric	8	YYYYMMDD
10	File Processing Number	Alpha/Numeric	19	<b>If notice or interim, YYYYMM of USPS fiscal year, followed by usage indicator, followed by, if applicable, mail class value. If advice, transaction ID.</b>
11	null			
12	CRID	Alpha/Numeric	15	CRID of master mailer.
13	Master Mailer ID	Alpha/Numeric	9	
14	Permit Number	Numeric (8)	8	
15	null			
16	null			
17	Net Amount Due	Numeric (12,4)	12	If notice or interim, the Total Proposed Amount for all adjustments in the file.
18	null			
19	null			
20	Permit Holder Name	Alpha/Numeric	50	
21	Permit Holder Address	Alpha/Numeric	100	

Element Name: Header Record				
Position	Field Name	Data Type	Size (Bytes)	Definition
22	Permit Holder City	Alpha/Numeric	100	
23	Permit Holder State	Alpha/Numeric	10	
24	Permit Holder ZIP	Alpha/Numeric	20	
25	Permit Holder Contact Name	Alpha/Numeric	100	
26	Permit Holder Contact Number	Alpha/Numeric	20	
27	Null			
28	Null			
29	Null			
30	Null			
31	Null			
32	Null			
33	x	Alpha/Numeric	1	'x' character at end of line.

**eVS Postage Sample Factor Adjustment Record Types**

**Description:** This summary (S1) record will describe the fields for the **Postage Sample Factor Adjustment**. There will be one per file. One mail class per file.

Element Name: S1 Record				
Position	Field Name	Data Type	Size (Bytes)	Definition
1	Record Type	Alpha/Numeric	2	S1
2	Master Mailer ID	Alpha/Numeric	9	
3	File Version ID	Alpha/Numeric	3	010
4	null	Alpha/Numeric		
5	Document ID	Alpha/Numeric	4	210
6	Record Position	Alpha/Numeric	2	00
7	Usage Indicator	Alpha/Numeric	2	"PA" - Postage Adjustment
8	Reporting Year/Month	Alpha/Numeric	6	YYYYMM (USPS fiscal year and month).
9	Transaction ID	Alpha/Numeric	19	
10	Transaction Status Code	Alpha/Numeric	10	
11	null			
12	Average Per-Piece Postage for Mail Class	Numeric (12,4)	12	
13	Mail Class Code	Alpha/Numeric	4	
14	null			
15	null			
16	Mail Class Adj Amt Actual	Numeric (12,4)	12	if business type indicator is "A", this field contains the actual amount, else zeroes
17	Mail Class Adj Amt Proposed	Numeric (12,4)	12	if business type indicator is not "A", this field contains the proposed amount, else zeroes
18	Total Pieces of Mail Class Sample for PAF	Numeric (12,4)	12	
19	Total eVS Calculate Manifest Postage	Numeric (12,4)	12	
20	Total eVS Calculated Samples' Postage	Numeric (12,4)	12	
21	null			
22	Calculated Manifest Adjustment Factor	Numeric (12,4)	12	
23	x	Alpha/Numeric	1	'x' character at end of line.

## eVS Postage Sample Factor Adjustment Record Types

**Description:** This detail (D1) record will describe the fields for the **Postage Sample Factor Adjustment**. There will be one per file. One mail class per file.

Element Name: Detail Record				
Position	Field Name	Data Type	Size (Bytes)	Definition
1	Record Type	Alpha/Numeric	2	D1
2	Master Mailer ID	Alpha/Numeric	9	
3	File Version ID	Alpha/Numeric	3	010
4	null			
5	Document ID	Alpha/Numeric	4	210

## Appendix I: Intelligent Mail Package Barcode Service Type Codes

---

The list of Service Type Codes has been moved to a separate document on Postal Pro. Click here to access the list of Service Type Codes - [Updated List: Service Type Codes for Intelligent Mail® Package Barcode \(IMpb\) | PostalPro](#)

**General Notes:**

- If mailing with eVS or USPS Ship, then “eVS” or “USPS Ship” must follow the banner text. (USPS TRACKING # eVS or USPS SIGNATURE TRACKING # USPS Ship).
- If your printer does not support printing special characters then “#” can be spelled out as “USPS TRACKING NUMBER” or “USPS SIGNATURE TRACKING NUMBER”.
- Many of the Banner Texts include a trademark or registered symbol. These symbols are recommended but not required.
- Service Type Codes that are struck through have been updated since the last version of the document.
- Change Status –Indicates Ret(Retired)/Chg(Changed)/New
- Chg Date –Indicates effective date of Retired/Changed/New

**Please Note:** All new/retired STC’s will take effect on the change date indicated.

**This Page Intentionally Left Blank**

## Appendix J: Reference Tables

**Table 1 - Barcode Construct Codes**

There are ten constructs for commercial mailers and ten constructs for online/PC postage/postage meter shippers. Each barcode construct is identified by a three-digit code (e.g., “C01”). Commercial mailers’ constructs begin with “C”, while online/PC postage/postage meter mailers’ constructs begin with “N”. The barcode construct code must be included in the D1 (position 043-046) record of Shipping Services File. Keep in mind that each barcode construct requires Function 1 codes in specific location in the barcode, see [Intelligent Mail® Package Barcode \(IMpb\) Specification | PostalPro](#) for more information.

**IMpb Constructs - Commercial Mailer**

**\*\*IMPORTANT NOTE:** C04, C08, C09 and C10 are the only valid barcode constructs for Electronic File Number.

Commercial mailers that use permit and OMAS must use application identifier “92” for barcode constructs that use 9-digit mailer ID and application identifier “93” for barcode constructs that use 6-digit mailer ID.

Code	Description	POSTAL ROUTING CODE Field Length		TRACKING NUMBER Field Length					PIC Length	Total Barcode Length
		Postal Routing AI	Dest ZIP	Channel AI	STC	MID	Serial Number	Check Digit		
C01	Commercial Mail – (Nine-digit Mailer ID, 9-digit ZIP Code)	3	9	2	3	9	7	1	22	34
C02	Commercial Mail – (Nine-digit Mailer ID, 5-digit ZIP Code)	3	5	2	3	9	11	1	26	34
C03	Commercial Mail – (Nine-digit Mailer ID, 5-digit ZIP Code)	3	5	2	3	9	7	1	22	30
**C04	Commercial Mail – (Nine-digit Mailer ID, No ZIP Code)	0	0	2	3	9	7	1	22	22
C05	Commercial Mail – (Six-digit Mailer ID, 5-digit ZIP Code)	3	9	2	3	6	10	1	22	34
C06	Commercial Mail – (Six-digit Mailer ID, 5-digit ZIP Code)	3	5	2	3	6	14	1	26	34
C07	Commercial Mail – (Six-digit Mailer ID, 5-digit ZIP Code)	3	5	2	3	6	10	1	22	30
**C08	Commercial Mail – (Six-digit Mailer ID, No ZIP Code)	0	0	2	3	6	10	1	22	22
**C09	Commercial Mail – (Six-digit Mailer ID, No ZIP Code)	0	0	2	3	6	14	1	26	26
**C10	Commercial Mail – (Nine-digit Mailer ID, No ZIP Code)	0	0	2	3	9	11	1	26	26

**IMpb Constructs - Online/PC Postage Mailer**

**\*\*IMPORTANT NOTE: eVS/PRS Mailers -** None of these barcode constructs are applicable.

PC Postage and Meter mailers (including those that use OMAS) must use application identifier “94” for all barcode constructs. These users must also include the correct 2-digit source ID to indicate whether a 9-digit or 6-digit mailer ID is used in the barcode. The Source ID’s is unique for each PC Postage and Meter Vendor.

		POSTAL ROUTING CODE Field Length		TRACKING NUMBER Field Length							
Code	Description	Postal Routing AI	Dest ZIP	Channel AI	STC	Source ID	MID	Serial Number	Check Digit	PIC Length	Total Barcode Length
**N01	Online / PC Postage Label - (Six-digit Mailer ID, 5-digit ZIP Code)	3	5	2	3	2	6	8	1	22	30
**N02	Online / PC Postage Label - (Six-digit Mailer ID, 9-digit ZIP Code)	3	9	2	3	2	6	8	1	22	34
**N03	Online / PC Postage Label - (Six-digit Mailer ID, No ZIP Code)	0	0	2	3	2	6	8	1	22	22

Customer Created '99M' Container Barcode Constructs

Code	Description	Application Identifier	"M" Identifier	MID	Serial Number	Total Barcode Length
T01	Customer Container Barcode (99M) – (Six-digit Mailer ID) Upper case alpha characters only	2	1	6	12	21
T02	Customer Container Barcode (99M) – (Nine-digit Mailer ID) Upper case alpha characters only	2	1	9	9	21

Intelligent Mail (USPS) Tray/Sack Barcode Constructs

Code	Description	ZIP Code	CIN	Processing Code	MID	Serial Number	Label Type	Total Barcode Length
T03	Intelligent Mail (USPS) Tray/Sack Barcode – (Six-digit Mailer ID)	5	3	1	6	8	1	24
T04	Intelligent Mail (USPS) Tray/Sack Barcode – (Nine-digit Mailer ID)	5	3	1	9	5	8	24

Note:

- 1) T03: Label Type – value of "1" for 6-digit MID
- 2) T04: Label Type – value of "8" for 9-digit MID.

Table 2 - Channel Application Identifier (AI)

**\*IMPORTANT NOTE:** Not applicable for the Electronic File Number (Header Record). Only applicable in the package identification number (Detail Record)

Application Identifier	Description	Confirmation Services Applicable	eVS Applicable
92	Commercial Mailer – Nine-digit MID	Y	Y
93	Commercial Mailer – Six-digit MID	Y	Y
94	For example: WebTools/USPS APIs PC Postage Vendor Postage Meters	Y	N
95	USPS Retail APC/SSK	Y	N/A

Table 3 - Container Type Indicator Codes

Detail 1 Record Position:

File Version	Record Position
Version 1.6, 1.7	127-128
	163-164
	199-200
Version 2.0	14
	16
	18
Identifier	Description
BL	Truck bedload
OA	Open & Distribute Full Postal Paks
OE	Open & Distribute EMM Tray Box
OF	Open & Distribute Full Tray Box
OH	Open & Distribute Half Tray Box
OK	Open & Distribute Half Postal Paks
OL	Open & Distribute Flat Tub Tray Box Large
OP	Open & Distribute Pallet
OS	Open & Distribute Flat Tub Tray Box Small
OT	Open & Distribute Flat Tub Tray Box
PT	Pallet
RP	Receptacle
SK	Sack

Table 4 - Delivery Option Indicator Codes

## Appendix L: Terms and Definitions

Term	Definition
<b>Detail Record</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The record within the Shipping Services File that provides payment details for each package.</li> <li><input type="checkbox"/> There must be a detail record for every package in the mailing.</li> </ul>
<b>Duplicate packages</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Multiple package(s) with the same Tracking Number used within the 120-day window.</li> </ul>
<b>Electronic File Number</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Electronic File Number uniquely identifies the transmission of an electronic manifest, and must be unique for a period of 120-days. It is located in the header record of the Shipping Services File.</li> </ul>
<b>eVS landing page</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The monthly account summary page, which is the first page, launched when a customer logs onto their eVS account.</li> </ul>
<b>Shipping Services File</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The electronic file containing all manifest and payment information. A Shipping Services File must contain a minimum of one manifest.</li> <li><input type="checkbox"/> Most files generally consist of many manifests identified by unique Header Records.</li> </ul>
<b>Function 1 character (FNC1)</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> A symbology character used in some GS1 data carriers for specific purposes. FNC1 characters typically follow the start character at the beginning of the barcode and are part of the symbology overhead. Additionally, the FNC1 character can be used to concatenate successive data strings where it would precede the Application Identifier of the subsequent data string.</li> </ul>
<b>GS1</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> GS1 is a global organization dedicated to the design and implementation of global standards and solutions to improve the efficiency and visibility of supply and demand chains globally and across multiple sectors.</li> </ul>
<b>GS1 Application Identifier</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> GS1 Application Identifiers are a specific set of defined identifiers used to connect physical and logical things to information or business messages related to them. This field of two or more characters at the beginning of an Element String uniquely defines format and meaning of the string.</li> </ul>
<b>GS1 General Specifications</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The GS1 System data and application standards related to the marking and automatic identification of trade items, locations, logistic units, assets, and more using barcode, RFID, and GS1 Identification Keys.</li> </ul>
<b>GS1-128 Barcode Symbology</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> A subset of the more general Code 128 that is utilized exclusively for GS1 System data structures.</li> </ul>
<b>Header Record</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> This is the first record in the Shipping Services File that identifies the mailer information and Electronic File Number (EFN).</li> </ul>
<b>Human-Readable Text</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The letters and numbers that represent the information encoded within a barcode.</li> </ul>
<b>Mailer ID Tool</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The Mailer ID tool is the application on the Business Customer Gateway used by customers to obtain MIDs for use in either Confirmation Services or eVS programs.</li> </ul>
<b>Mailer ID (MID)</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> MID is a unique 6- or 9-digit number that identifies the mailer or the mailer's client.</li> </ul>
<b>Manifest</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> A manifest consists of one Header Record only and one or more Detail Records.</li> </ul>
<b>Manifest Errors</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> A manifest error occurs when a file is received with detail or header records that have incorrect rate ingredients and cannot be processed. Mailers have the ability to correct these errors for proper postage payment.</li> </ul>

Appendix L – Terms and Definitions

Term	Definition
<b>Manifest Warning</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> A manifest warning contains a potential issue that will be reported to the mailer but does not fail the electronic file. The file does not need to be re-sent.</li> </ul>
<b>Master Mailer Identification (MID) Number</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The master MID is used for file transmissions from the eVS mailer and must be the MID used in the EFN submitted for all eVS files.</li> <li><input type="checkbox"/> eVS requirement - Each eVS mailer must have a single master MID and may have multiple package MIDs.</li> <li><input type="checkbox"/> eVS requirement - The MID is assigned for exclusive use on eVS packages and when used on packages requires payment of postage through eVS</li> </ul>
<b>Master Permit Imprint Account</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> This number is assigned during the application process.</li> <li><input type="checkbox"/> It is used to collect postage for any adjustments due to postage adjustment factors, unmanifested packages, mis-shipped packages, manifest errors or duplicate packages.</li> </ul>
<b>Missing Manifest</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Pieces that have been sampled for which there has not been an associated manifest file received appear on the missing manifest report and will be charged as unmanifested if no manifest files are received for these packages.</li> </ul>
<b>Permit Imprint Account</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The eVS applicant must establish a unique permit imprint account number used exclusively for eVS.</li> <li><input type="checkbox"/> This account is used for postage payment in eVS.</li> </ul>
<b>Package Identification Code (PIC)</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> A Package Identification Code or PIC is a unique data string that serves as a unique tracking number for a mailpiece. Each PIC will consist of an Application Identifier, service type code, data string that will vary based upon the specific data construct, and a MOD 10 check digit.</li> </ul>
<b>Postage Adjustment Factor (PAF)</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> This factor is calculated by dividing the actual postage of pieces sampled by the recalculated manifest postage of the pieces sampled.</li> <li><input type="checkbox"/> If this results in underpayment of more than 1.5%, a PAF will be due for the mail class that is</li> </ul>
<b>Postage Payment Extract File</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The payment extract files will contain all rate ingredients reflecting any updates or changes made by eVS along with the postage rate calculated and charged by eVS.</li> <li><input type="checkbox"/> The payment life cycle in eVS typically processes the payment for all manifest data received as a one-step process. Hence, a single payment extract reflecting the payment status of 'PROCESSED' will be generated by eVS. However, in exceptional scenarios, the payment process may involve multiple or interim steps (i.e. ERROR, PENDING, CLOSED). In these exceptional scenarios, multiple payment extracts may be generated by eVS any time a change in status occurs for payment of specific detail records.</li> <li><input type="checkbox"/></li> </ul>
<b>Quiet Zone</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> A clear space with no encoded information that precedes the Start Character of a barcode and follows the Stop Character. Formerly referred to as "Clear Area" or "Light Margin."</li> </ul>
<b>Rmax</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Highest reflectance value, normally the reflectance value of the lightest space within the barcode symbol, including the quiet zones.</li> </ul>
<b>Rmin</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Lowest reflectance value, normally the reflectance value of the darkest bar within the barcode symbol, including the quiet zones.</li> </ul>
<b>Rate Ingredients</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The details in the manifest file used to determine the price of the package; these ingredients include mail class/product, weight, processing category, dimensions and zones as needed by mail class/product.</li> </ul>

Appendix L – Terms and Definitions

Term	Definition
<b>Record</b>	<ul style="list-style-type: none"> <li>□ A record consists of a specific number of bytes representing data either about a specific entry facility (Header Record) or a specific parcel (Detail Record 1).</li> </ul>
<b>Scan Event Extract File</b>	<ul style="list-style-type: none"> <li>□ When mailers communicate electronically with USPS by transmitting a Shipping Services File, they can receive the scan event extract file either 16 times daily (regular schedule) or 96 times daily (premium) schedule.</li> <li>□ This file contains (with a few exceptions) scans that occurs on every package that the mailer included in the electronic file.</li> <li>□ A mailer must successfully transmit the Shipping Services File—and the Detail Records must be processed—in order for USPS to send the mailer Scan Event extracts. The exception to this rule is for eVS customers.</li> <li>□ <b>eVS Requirement</b> – As of January 16, 2011, eVS customers will now receive scan events regardless of whether the Shipping Services File was successfully transmitted.</li> </ul>
<b>Symbol Contrast (SC)</b>	<ul style="list-style-type: none"> <li>□ Difference between the highest reflectance value and the lowest reflectance value anywhere in the scan reflectance profile, including the quiet zones.</li> </ul>
<b>Service Type Code</b>	<ul style="list-style-type: none"> <li>□ Service Type Codes are designators used to represent USPS classes of mail in conjunction with the type of Extra Service(s) being requested.</li> </ul>
<b>Transaction ID (TID)</b>	<ul style="list-style-type: none"> <li>□ A unique 12-digit number that associates a Shipping Service File manifest to file transmissions. Must be included on each Postage Statement and may represent more than one manifest.</li> </ul>
<b>Unmanifested packages</b>	<ul style="list-style-type: none"> <li>□ Packages for which the USPS has scan events and no associated manifest are considered unmanifested.</li> <li>□ These packages are displayed in the unmanifested report and eVS mailers have the opportunity to manifest these packages.</li> </ul>
<b>X-dimension</b>	<ul style="list-style-type: none"> <li>□ The nominal width of the narrowest bar or space element within the barcode symbol is defined as the X-dimension. X-dimension is normally expressed in “mils,” corresponding to one thousand of an inch (i.e., 0.001 inch).</li> </ul>

## Appendix M: Abbreviations

Abbreviation	Description
ADC	Area Distribution Center
AI	Application Identifier
AIM	Automatic Identification Manufacturers
ANSI	American National Standards Institute
ASCII	American Standard Code for Information Interchange
ASF	Auxiliary Service Facility
AS2	Applicability Statement 2
BB	Bound Printed Matter
BCG	Business Customer Gateway
BL	Library Mail
BS	Media Mail
BSA	Business Services Administrator
CAPS	Centralized Account Processing System
CAT	Customer Acceptance Test
CP	Priority Mail International Parcels
CRID	Customer Registration ID
CSSC	Customized Shipping Services Contracts Number
DASF	Destination Auxiliary Service Facility
DDU	Destination Delivery Unit
DM	Domestic Free Matter for the Blind
DMM	Domestic Mail Manual
DNDC	Destination Network Distribution Center
DSCF	Destination Sectional Center Facility
DTS	Data Transfer Services
EDDM	Every Door Direct Mail
EDI	Electronic Data Interchange
EFN	Electronic File Number
eVS	Electronic Verification System
FAST	Facility Access & Shipment Tracking
FC	First-Class
FTP	File Transfer Protocol
GXG	Global Express Guaranteed
IE	Priority Mail Express International
IL	Priority Mail International Letters
IMb	Intelligent Mail barcode
IMcb	Intelligent Mail container barcode
IMpb	Intelligent Mail package barcode

## Appendix M - Abbreviations

Abbreviation	Description
IP	Internet Protocol
ISO/IEC	The International Organization for Standardization and the International Electrotechnical Commission
LC	First-Class Package Service International
LPC	Local Processing Center
MID	Mailer Identification Number
MMC#	Customer Login ID
MR	Priority Mail Return Service
NCSC	National Customer Support Center
NDC	Network Distribution Center
PAF	Postage Adjustment Factor
PG	Global Express Guaranteed
PIC	Package Identification Code
PM	Priority Mail
PME	Priority Mail Express
PMEM	Priority Mail Express Manifest
PMEOD	Priority Mail Express Open and Distribute
PMOD	Priority Mail Open and Distribute
PRS	Parcel Return Service
PS	Parcel Select
PTR	Product Tracking and Reporting ( <i>formerly PTS – Product Tracking System</i> )
QA	Quality Assurance
R <sub>max</sub>	Reflectance Maximum
R <sub>min</sub>	Reflectance Minimum
RDU	Return Delivery Unit
RNDC	Return Network Distribution Center
RP	Parcel Select Return Service
RPDC	Regional Processing and Distribution Center
S&DC	Sorting & Distribution Center
S2	USPS Marketing Mail Nonprofit
SA	USPS Marketing Mail

SFTP	Secure File Transfer Protocol
SN	Serial Number
SP	Standard Post
STC	Service Type Code
TEM	Test Environment for Mailers
TID	Transaction ID
URL	Uniform Resource Locator
USPS	United States Postal Service

## Appendix N: Confirmation Services Customer Checklist

Confirmation Services Customer Checklist					
Step	Description	Action	<input type="checkbox"/>	New	Existing
1	<b>Register for participation via the Business Customer Gateway</b>	<input type="checkbox"/> To register for participation in confirmation services, create a user account, company profile, a list of business locations, and establish a Business Service Administrator (BSA) in the Business Customer Gateway.	<input type="checkbox"/>	<input type="checkbox"/>	<b>N/A</b>
1a	<b>Create User Account and Company Profile</b>	<input type="checkbox"/> Customers must sign up on the Business Customer Gateway at <a href="https://gateway.usps.com/eAdmin/view/signin">https://gateway.usps.com/eAdmin/view/signin</a> <ul style="list-style-type: none"> <li><input type="checkbox"/> To create a user account.</li> <li><input type="checkbox"/> To create company profile.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<b>N/A</b>
1b	<b>Create Business Locations</b>	<input type="checkbox"/> Ensure the corporate business location for the mailing is accurately identified in the Business Customer Gateway or establish a new location as needed.	<input type="checkbox"/>	<input type="checkbox"/>	<b>N/A</b>
1c	<b>Establish Business Service Administrator (BSA)</b>	<input type="checkbox"/> The first user requesting a business location will be prompted to assume the Business Service Administrator (BSA) role. <input type="checkbox"/> The BSA approves access for multiple representatives that need access.	<input type="checkbox"/>	<input type="checkbox"/>	<b>N/A</b>
2	<b>Obtain Mailer ID (MID)</b>	<input type="checkbox"/> Obtain the MID for the corporate business location via the Business Customer Gateway. <input type="checkbox"/> Once the mailer has access to the Mailer ID System, they will select Online Enrollment to obtain a MID. Select “Confirmation Services for Package Service Products and Extra Services” as the Program Type. <input type="checkbox"/> Package Services MIDs <b>cannot</b> be used for letters/flats mailings, Electronic Verification System (eVS), or Parcel Return Services (PRS).	<input type="checkbox"/>	<input type="checkbox"/>	<b>N/A</b>
2a	<b>Add TEM access</b>	<input type="checkbox"/> Add TEM access to current profile by selecting “Manage Electronic Data Exchange ( <i>PostalOne!</i> )” under the “Mail & Transport” heading.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Appendix N – Confirmation Services Customer Checklist

Confirmation Services Customer Checklist					
Step	Description	Action	<input type="checkbox"/>	New	Existing
3	<b>Create Shipping Services Test File</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> New Customers must use Shipping Services File Format Version 1.6 or higher (See Section 3 for more information on the Shipping Services File layout).</li> <li><input type="checkbox"/> Create an electronic test file with a minimum of 10 D1 records and include in those 10 records the package identification codes (PICs), which match those from your printed labels.</li> <li><input type="checkbox"/> If you will be using your own proprietary software, please use the following information within the header record of the Shipping Services file:                             <ul style="list-style-type: none"> <li><input type="checkbox"/> Developer ID Code: 850</li> <li><input type="checkbox"/> Product Version Number: 1.0.</li> </ul> </li> <li><input type="checkbox"/> If you will be using commercial software for your shipping system, the vendor will provide you the Developer ID Code and Product Version Number.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3a	<b>Transmit Shipping Services Test File</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Transmit test files to Product Tracking and Reporting Testing Environment for Mailers (TEM) for posting in the mailer's PTR TEM account.</li> <li><input type="checkbox"/> For specific information on how to transmit the Shipping Services Test File to the TEM environment, see Section 6.3, Test Environment for Mailers (TEM) Sending/Retrieving File Instructions.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3b	<b>Review and Certification of Shipping Services Test File</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> PTR will process this file and provide a copy of a confirmation/error/warning report that you will be able to access via your PTR TEM logon account.</li> <li><input type="checkbox"/> For specific information on how to retrieve the Confirmation/Error/Warning file, see Section 6.3, Test Environment for Mailers (TEM) Sending/Retrieving File Instructions.</li> <li><input type="checkbox"/> If you have any questions concerning any error or warnings that are on the confirmation/error/warning report, please contact the Confirmation Services Support Team at 877-264-9693.</li> <li><input type="checkbox"/> The Confirmation Services Support Team will communicate to the customer via email when the file has passed certification.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4	<b>Create Shipping Services Test Labels</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Section 4 provides more information on the label requirements.</li> <li><input type="checkbox"/> Customers must print 10 test labels for each printer. Vendor must print 100 test labels for each printer.</li> <li><input type="checkbox"/> The PICs must contain your MID.</li> <li><input type="checkbox"/> The PICs for the test label must be unique.</li> <li><input type="checkbox"/> The printed barcoded labels must match the PICs in the file.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4a	<b>Complete the PS Form 5052, Confirmation Services Printer Verification</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Complete PS Form 5052, Confirmation Services Printer Verification.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Appendix N – Confirmation Services Customer Checklist

Confirmation Services Customer Checklist					
Step	Description	Action	<input type="checkbox"/>	New	Existing
4b	<b>Send Shipping Services Test Labels</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Include PS Form 5052 with the label submission.</li> <li><input type="checkbox"/> Hard copy labels must be mailed to the following address: ATTN: CONFIRMATION SERVICES SUPPORT NATIONAL CUSTOMER SUPPORT CENTER UNITED STATES POSTAL SERVICE 225 N HUMPHREYS BLVD STE 501 MEMPHIS TN 38188-1001</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4c	<b>Review and Certification of Test Shipping Services Labels</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The Confirmation Services Support Team will review the labels to determine if the labels are in compliance.</li> <li><input type="checkbox"/> The Confirmation Services Support Team will provide feedback on the label certification to the customer via email. The email will communicate any issues or concerns with the labels.</li> <li><input type="checkbox"/> The email will be sent to the Primary Point of Contact and the Technical Point of Contact.</li> <li><input type="checkbox"/> If you have any questions concerning the issues with your labels, please contact the Confirmation Services Support Team at 877-264-9693.</li> <li><input type="checkbox"/> The Confirmation Services Support Team will communicate to the customer via email when the labels have passed certification.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4d	<b>Receive authorization to mail</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> After successfully completing certification, the Confirmation Services Support Team will notify you of authorization to mail for the mail classes that were requested and tested.</li> <li><input type="checkbox"/> You will also receive PS Form 3152, Confirmation Services Certification, and an acceptance letter from U.S. Postal Service.</li> <li><input type="checkbox"/> If requested, you will need to present a copy of this form to your local Postal Service facility as proof that you are eligible for mailing at the electronic price.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## Appendix O: Electronic Verification System (eVS) Customer Checklist

Electronic Verification System (eVS) Customer Checklist					
Step	Description	Action	<input type="checkbox"/>	New	Existing
1	<b>Register for participation via the Business Customer Gateway</b>	<input type="checkbox"/> To register for participation in confirmation services, create a user account, company profile, a list of business locations, and establish a Business Service Administrator (BSA) in the Business Customer Gateway.	<input type="checkbox"/>	<input type="checkbox"/>	N/A
1a	<b>Create User Account and Company Profile</b>	<input type="checkbox"/> Customers must sign-up on the Business Customer Gateway at <a href="https://gateway.usps.com/eAdmin/view/signin">https://gateway.usps.com/eAdmin/view/signin</a> <ul style="list-style-type: none"> <li>o To create a user account.</li> <li>o To create company profile.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	N/A
1b	<b>Create Business Locations</b>	<input type="checkbox"/> Ensure the corporate business location for the eVS mailing is accurate in the Business Customer Gateway or establish a new location as needed.	<input type="checkbox"/>	<input type="checkbox"/>	N/A
1c	<b>Add PostalOne! Access</b>	<input type="checkbox"/> Add <i>PostalOne!</i> access to current profile by selecting “Manage Mailing Activity” from the Request Access” link.	<input type="checkbox"/>	<input type="checkbox"/>	N/A
1d	<b>Add eVS profile</b>	<input type="checkbox"/> Add eVS to current profile by selecting “Manage Electronic Verification Activity (eVS)” under the “Track & Report” heading.	<input type="checkbox"/>	<input type="checkbox"/>	N/A
1e	<b>Add TEM access</b>	<input type="checkbox"/> Add TEM access to current profile by selecting “Manage Electronic Data Exchange ( <i>PostalOne!</i> )” under the “Mail & Transport” heading.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
1f	<b>Establish Business Service Administrator (BSA)</b>	<input type="checkbox"/> The first user requesting eVS for a business location will be prompted to assume the Business Service Administrator (BSA) role for eVS. <input type="checkbox"/> The BSA approves access for multiple representatives that need access to eVS.	<input type="checkbox"/>	<input type="checkbox"/>	N/A
2	<b>Obtain Mailer Account Numbers</b>	<input type="checkbox"/> To participate in eVS, an applicant must first establish a new permit imprint account or use an existing permit imprint account, and obtain a master MID.	<input type="checkbox"/>	<input type="checkbox"/>	N/A
2a	<b>Obtain Permit Account</b>	<input type="checkbox"/> The eVS applicant must establish a unique permit imprint account number used exclusively for eVS. <input type="checkbox"/> If there is a permit number already being used and all mailings will convert to eVS, the permit may be able to migrate to eVS. <input type="checkbox"/> To apply for the new permit account number, Use PS Form 3615, <i>Mailing Permit Application and Customer Profile</i> submitted with application. <input type="checkbox"/> No two eVS mailers may use the same permit imprint number.	<input type="checkbox"/>	<input type="checkbox"/>	N/A
2a-1	<b>Link Permit Account</b>	<input type="checkbox"/> Link the permit to the eVS company profile in the Business Customer Gateway.	<input type="checkbox"/>	<input type="checkbox"/>	N/A

Electronic Verification System (eVS) Customer Checklist					
Step	Description	Action	<input type="checkbox"/>	New	Existing
2a-2	Application Fee	<ul style="list-style-type: none"> <li><input type="checkbox"/> Application fee applicable if new permit is opened.</li> <li><input type="checkbox"/> The mailer will be charged the application fee as an adjustment after new permit(s) for eVS are established.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	N/A
2a-3	Annual mailing fees	<ul style="list-style-type: none"> <li><input type="checkbox"/> Pay annual mailing fees (separate fees for Presorted USPS Ground Advantage (formerly First-Class Package Service), Standard Mail, Parcel Select [destination entry], Presorted Media Mail, Presorted Library Mail, Bound Printed Matter [destination entry]).</li> <li><input type="checkbox"/> Existing Customer may have additional fees depending on what mail class is being added to the certification.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2b	Establish Postage Payment Account – Centralized Account Processing System (CAPS) Account	<ul style="list-style-type: none"> <li><input type="checkbox"/> The mailer must have or establish a <i>PostalOne!</i> postage payment debit account.</li> <li><input type="checkbox"/> This account is for automatic funds withdrawal each time a postage statement is generated by eVS from the eVS mailer's transmitted manifest files.</li> <li><input type="checkbox"/> The permit account number registered in eVS is linked to the postage payment account in <i>PostalOne!</i> to enable the withdrawal of funds.</li> <li><input type="checkbox"/> A current CAPS debit account may be used.</li> <li><input type="checkbox"/> The following forms must be used to open account as needed:                             <ul style="list-style-type: none"> <li><input type="checkbox"/> PS Form 6001, <i>CAPS Account Application</i> — Application for establishing a new national CAPS account.</li> <li><input type="checkbox"/> PS Form 6002, <i>Accounts and Services to be Paid Through CAPS</i> — Form for listing the local account numbers the customer wants to link to the CAPS account.</li> <li><input type="checkbox"/> PS Form 6003, <i>CAPS Electronic Funds Transfer Authorization Agreement</i> — Form for authorizing the Postal Service to debit the customer's bank account.</li> </ul> </li> <li><input type="checkbox"/> Link accounts to eVS Washington DC 20260.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	N/A

Electronic Verification System (eVS) Customer Checklist					
Step	Description	Action	<input type="checkbox"/>	New	Existing
2c	Obtain Mailer ID (MID)	<ul style="list-style-type: none"> <li><input type="checkbox"/> The eVS applicant must have or obtain a unique master MID from the Postal Service for all manifest file transmissions and, if desired, obtain additional MIDs for parcel records in the manifest files.</li> <li><input type="checkbox"/> Obtain the MID for the corporate business location via the Business Customer Gateway.</li> <li><input type="checkbox"/> Once the mailer has access to the Mailer ID System, they will select the "Mailer ID" link to obtain a MID. Select "Electronic Verification System (eVS) for Package Products" as the Program Type.</li> <li><input type="checkbox"/> If multiple MIDs are requested, the eVS application must indicate all MIDs and designate the master MID.</li> <li><input type="checkbox"/> An eVS MID may not be used for non-eVS mail.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	N/A
3	Complete and Submit the eVS manifest mailing system application	<ul style="list-style-type: none"> <li><input type="checkbox"/> Complete and submit the comprehensive Electronic Verification System Application.</li> <li><input type="checkbox"/> Electronic Verification System Application can be mailed to the following address: ATTN: EVS HELP DESK NATIONAL CUSTOMER SUPPORT CENTER UNITED STATES POSTAL SERVICE 225 N HUMPHREYS BLVD STE 501 MEMPHIS TN 38188-1001</li> <li><input type="checkbox"/> Electronic Verification System Application can be emailed to the following address: <a href="mailto:dconfirm@usps.gov">dconfirm@usps.gov</a></li> <li><input type="checkbox"/> Electronic Verification System Application can be faxed to the following fax number: 901-821-6244</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4	Create Shipping Services Test File	<ul style="list-style-type: none"> <li><input type="checkbox"/> New Customers must use Shipping Services File Format Version 1.6 or higher (See Section 3 for more information on the Shipping Services File layout).</li> <li><input type="checkbox"/> Based on your application, the eVS Helpdesk will notify you of the requirements for the test file.</li> <li><input type="checkbox"/> Create an electronic test file based on test file requirements provided by the eVS Helpdesk.</li> <li><input type="checkbox"/> The test file must contain the PICs, which match those from your printed labels. (See Step 7).</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Electronic Verification System (eVS) Customer Checklist					
Step	Description	Action	<input type="checkbox"/>	New	Existing
4a	Transmit Shipping Services Test File	<ul style="list-style-type: none"> <li><input type="checkbox"/> <b>IMPORTANT:</b> Mailers may not submit test files for certification if they have not completed registration in the Business Customer Gateway and successfully linked their eVS permit to their eVS profile.</li> <li><input type="checkbox"/> Transmit test files to the Confirmation Services Support Team at the National Customer Support Center (NCSC) for review.</li> <li><input type="checkbox"/> Transmit test files to Product Tracking and Reporting (PTR) Testing Environment for Mailers (TEM), which will then transmit the file to the <i>PostalOne!</i> Testing Environment for Mailers (TEM) server for posting in the mailer's eVS TEM account.</li> <li><input type="checkbox"/> For specific information on how to transmit the Shipping Services Test File to the TEM environment, see Section 6.3, Test Environment for Mailers (TEM) Sending/Retrieving File Instructions.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
4b	Review and Certification of Shipping Services Test File	<ul style="list-style-type: none"> <li><input type="checkbox"/> This process will test your file content for compliance with PTR and eVS <i>PostalOne!</i></li> <li><input type="checkbox"/> PTR TEM will process this file and provide a copy of a confirmation/error/warning report that you will be able to access via your PTR TEM logon account see Section 6.3, Test Environment for Mailers (TEM) Sending/Retrieving File Instructions.</li> <li><input type="checkbox"/> eVS TEM will process this file and provide a copy of an error/warning report that you will be able to access via your PTR TEM logon account, see Section 6.3.2, Accessing eVS TEM.</li> <li><input type="checkbox"/> If you have any questions concerning any error or warnings that are on the error/warning report, please contact the Confirmation Services Support Team at 877-264-9693.</li> <li><input type="checkbox"/> The Confirmation Services Support Team will communicate to the customer via email when the file has passed certification.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5	Create Shipping Services Test Labels	<ul style="list-style-type: none"> <li><input type="checkbox"/> Based on your application, the eVS Helpdesk will notify you of the requirements for your test labels. This document will indicate the number of labels and type of labels. As a rule, you need to generate at least one label for each mail class and extra services combination you plan to use. (See Section 4, for more information on the label requirements.)</li> <li><input type="checkbox"/> The label PICs created in this step must be contained in your shipping test file. (See Step 6)</li> <li><input type="checkbox"/> The PICs must contain your MID.</li> <li><input type="checkbox"/> The PICs for the test label must be unique.</li> <li><input type="checkbox"/> The printed barcoded labels must match the PICs in the file.</li> </ul>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Electronic Verification System (eVS) Customer Checklist					
Step	Description	Action	<input type="checkbox"/>	New	Existing
5a	Complete the PS Form 5052, <b>Confirmation Services</b>	<input type="checkbox"/> Complete PS Form 5052, <i>Confirmation Services Printer Verification</i> .	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5b	Send Shipping Services Test Labels	<input type="checkbox"/> Include PS Form 5052 with the label submission. <input type="checkbox"/> Hard copy labels must be mailed to the following address: ATTN: EVS HELP DESK NATIONAL CUSTOMER SUPPORT CENTER UNITED STATES POSTAL SERVICE 225 N HUMPHREYS BLVD STE 501 MEMPHIS TN 38188-1001	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5c	Review and Certification of Shipping Labels (if applicable)	<input type="checkbox"/> The Confirmation Services Support Team will review the labels to determine if the labels are in compliance. <input type="checkbox"/> The Confirmation Services Support Team will provide feedback on the label certification to the customer via email. The email will communicate any issues or concerns with the labels. <input type="checkbox"/> The email will be sent to the Primary Point of Contact and the Technical Point of Contact. <input type="checkbox"/> If you have any questions concerning the issues with your labels, please contact the Confirmation Services Support Team at 877-264-9693. <input type="checkbox"/> The Confirmation Services Support Team will communicate to the customer via email when the labels have passed certification.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
5d	Receive authorization to mail	<input type="checkbox"/> After successfully completing certification, the Confirmation Services Support Team will notify you of authorization to mail eVS for the mail classes that were requested and tested.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6	Parallel Test - Optional	<input type="checkbox"/> USPS recommends that a mailer converting to eVS from an existing USPS manifest mailing system complete a parallel testing process. This allows the mailer an opportunity to pilot their eVS implementation, measure the impact of potential adjustments and work through start up issues without being billed through eVS for payment or adjustments. A parallel testing mailer will create eVS mailings and submit eVS files while continuing to present hard copy postage statements and manifests for payment through the local permits at existing manifest mailing locations. <input type="checkbox"/> Mailers who choose not to complete a parallel test are subject to all eVS postage adjustments due after start up.	<input type="checkbox"/>	<input type="checkbox"/>	N/A

## Appendix P: Parcel Return Service (PRS) Customer Checklist

Parcel Return Service (PRS) Customer Checklist			
Step	Description	Action	<input type="checkbox"/>
1	<b>Register for participation via the Business Customer Gateway</b>	<input type="checkbox"/> To register for participation in PRS, the applicant must create a user account, company profile, a list of business locations, add eVS profile and establish a Business Service Administrator (BSA).	<input type="checkbox"/>
1a	<b>Create User Account and Company Profile</b>	<input type="checkbox"/> Customers must sign-up on the Business Customer Gateway at <a href="https://gateway.usps.com/eAdmin/view/signin">https://gateway.usps.com/eAdmin/view/signin</a> <ul style="list-style-type: none"> <li>o To create a user account.</li> <li>o To create company profile.</li> </ul>	<input type="checkbox"/>
1b	<b>Create Business locations</b>	<input type="checkbox"/> Ensure the corporate business location for the PRS mailing is accurately identified in the Business Customer Gateway or establish a new location as needed.	<input type="checkbox"/>
1c	<b>Add PRS profile</b>	<input type="checkbox"/> Add PRS to current profile by selecting “Manage Electronic Return Activity (PRS)” under the “Track & Report” heading.	<input type="checkbox"/>
1d	<b>Add TEM access</b>	<input type="checkbox"/> Add TEM access to current profile by selecting “Manage Electronic Data Exchange ( <i>PostalOne!</i> )” under the “Mail & Transport” heading.	<input type="checkbox"/>
1e	<b>Establish Business Service Administrator (BSA)</b>	<input type="checkbox"/> The first user requesting PRS for a business location will be prompted to assume the Business Service Administrator (BSA) role for PRS. <input type="checkbox"/> The BSA approves access for multiple representatives that need access to PRS.	<input type="checkbox"/>
2	<b>Obtain Mailer Account Numbers</b>	<input type="checkbox"/> To participate in PRS, an approved applicant must first establish a new PRS permit imprint account and obtain a master MID.	<input type="checkbox"/>
2a	<b>Obtain Permit Account</b>	<input type="checkbox"/> The PRS applicant must establish a unique PRS permit account number used exclusively for PRS. <input type="checkbox"/> To apply for the new PRS permit account number, Use PS Form 3615, Mailing Permit Application and Customer Profile submitted with application. <input type="checkbox"/> No two PRS mailers may use the same PRS permit account number.	<input type="checkbox"/>
2a-1	<b>Link Permit Account</b>	<input type="checkbox"/> Link the permit to the PRS company profile in the Business Customer Gateway.	<input type="checkbox"/>

Parcel Return Service (PRS) Customer Checklist			
Step	Description	Action	<input type="checkbox"/>
2b	<b>Establish Postage Payment Account – Centralized Account Processing System (CAPS) Account</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The mailer must have or establish a <i>PostalOne!</i> Postage payment debit account.</li> <li><input type="checkbox"/> This account is used for automatic funds withdrawal each time a postage statement is generated by PRS from the PRS mailer's transmitted manifest files.</li> <li><input type="checkbox"/> The permit account number registered in PRS is linked to the postage payment account in <i>PostalOne!</i> to handle the funds withdrawal.</li> <li><input type="checkbox"/> A current CAPS debit account may be used. The following forms must be used to open account as needed:                             <ul style="list-style-type: none"> <li><input type="checkbox"/> PS Form 6001, <i>CAPS Account Application</i> — Application for establishing a new national CAPS account.</li> <li><input type="checkbox"/> PS Form 6002, <i>Accounts and Services to be Paid Through CAPS</i> — Form for listing the local account numbers the customer wants to link to the CAPS account.</li> <li><input type="checkbox"/> PS Form 6003, <i>CAPS Electronic Funds Transfer Authorization Agreement</i> — Form for authorizing the Postal Service to debit the customer's bank account.</li> </ul> </li> <li><input type="checkbox"/> Link accounts to eVS Washington DC 20260.</li> </ul>	<input type="checkbox"/>
2c	<b>Obtain Mailer ID (MID)</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> The PRS applicant must have or obtain a unique master MID from the Postal Service for all manifest file transmissions and, if desired, obtain additional MIDs for parcel records in the manifest files.</li> <li><input type="checkbox"/> Obtain the MID for the corporate business location via the Business Customer Gateway.</li> <li><input type="checkbox"/> Once the mailer has access to the Mailer ID System, they will select the "Mailer ID" link to obtain a MID. Select "Electronic Verification System (eVS) for Package Products" as the Program Type.</li> <li><input type="checkbox"/> If multiple MIDs are requested, the PRS application must indicate all MIDs and designate the master MID.</li> <li><input type="checkbox"/> A PRS MID may not be used for non-PRS mail.</li> </ul>	<input type="checkbox"/>
3	<b>Submit PRS Letter</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Submit PRS letter which needs to contain all required information as stated in DMM Section 505.5, Parcel Return Services, to the following email address: <a href="mailto:eVS@usps.gov">eVS@usps.gov</a></li> </ul>	<input type="checkbox"/>
4	<b>Create Shipping Services Test File</b>	<ul style="list-style-type: none"> <li><input type="checkbox"/> New Customers must use Shipping Services File Format Version 1.6 or higher (See Section 3 for more information on the Shipping Services File layout).</li> <li><input type="checkbox"/> Based on your application, the eVS Helpdesk will notify you of the requirements for the test file.</li> <li><input type="checkbox"/> Create an electronic test file based on test file requirements provided by the eVS Helpdesk.</li> <li><input type="checkbox"/> The PICs in the electronic test file must match those on your printed labels. (See Step 7)</li> </ul>	<input type="checkbox"/>

## Appendix Q: Publication Change Notes

---

### Date: 7/10/2025

- 1) Section 8.16 – Updated HAZMAT Service Type Code lists
- 2) Appendices B and C (Shipping Services file versions 1.7/2.0) – Added new payment methods to support third party billing
- 3) Appendix E – Add new CEW warning for O& D Containers with Hazmat
- 4) Appendices G2 and G3 (Scan Extracts Versions 1.6, 2.0) – Remove incorrect information from Expected Delivery Date field
- 5) Appendix G-4 – Domestic Scan Event List now directs to a page on Postal Pro
- 6) Appendix I – Service Type Code List now directs to a page on Postal Pro
- 7) Appendix J – Table 8 – Add two new extra service codes for Nonstandard Characteristics (879 and 886)

### Date: 2/7/2025

- 1) Appendices B and C (Shipping Services file versions 1.7/2.0) – Added future change to G2 record to include the ECCN field.
- 2) Appendices B and C (Shipping Services file versions 1.7/2.0) – Added clarification on existing uniqueness requirement of 365 days for international tracking numbers.
- 3) Appendix G-4 - Updated Domestic Scan Event list to include events F3, F4, F5 (planned for March, 2025)

### Date: 1/17/2025

- 1) Section 1 – Added new BQ reasons to support label quality detections.
- 2) Section 4.11 – Added a new section for IMmb Intelligent Mail Matrix Barcode
- 3) Section 8.16 – Added clarification on HAZMAT shipments to military/PTFAS destinations
- 4) Appendices A, B and C (all Shipping Services file versions) – Added clarification on proper use of the Carrier Release endorsement
- 5) Appendices B and C – updated references from ePostage to USPS Ship Retail Entry, removed references to Dangerous Goods from the D3/G1 records
- 6) Appendix E-3 – removed retired CEW messages from April 2021. Added new CEW message for processing category 4 retirement and for Live Animal and Perishable Handling fee. Updated CEW messages from ePostage to USPS Ship Retail Entry.
- 7) Appendix G-4 – Updated Domestic Scan Event List to include a second type of GX – Label Cancelled event that was missed.
- 8) Appendix I – Added STCs 121 and 665 for Adult Signature Restricted Delivery Hazardous Materials
- 9) Appendix J – Specified upper case alpha only in Container ID, updated Channel Application ID info
- 10) Appendix J – Table 7 – Added new extra service code 972 for Live Animal and Perishable Handling fee
- 11) Appendix J – Table 12 – Updated processing categories – 4 - irregular (retired not used) and 5 – changed nonmachinable to nonstandard
- 12) Updated all references from IMpb Noncompliance to Package Quality Noncompliance, removed references to First-Class Package Service and USPS Retail Ground

### Date: 7/12/2024

- 1) Section 4.5 – Updated to include 'USPS Ship' in barcode banner text
- 2) Section 8.4 - Updated Hold for Pickup Product List (removed Parcel Select)
- 3) Section 8.16 - Corrected a reference to Exhibit 28, added additional label (incorrectly identified as Exhibit 29)
- 4) Appendices A, B and C (all Shipping Services file versions) - Added information on Mail Owner Mailer ID, corrected barcode construct codes for international and scan form references.
- 5) Appendix G-4 – Updated Domestic Scan Event List

## Appendix Q: Publication Change Notes

---

- 6) Appendix I - Retired Parcel Select Hold for Pickup STCs (389-393,604,778-783), updated banner text for two HAZMAT STCs and updated extra service code list to remove 920 for STC 526
- 7) Appendix J – Table 3 – Added new container types OL and OS
- 8) Appendix J – Table 5 – Updated Destination Rate Indicator descriptions

### Date: 1/19/2024

- 1) Updated references from eVS to Electronic Payment Systems
- 2) Section 1.2.1.1 - Updated IMPB Non-Compliance Barcode Quality (BQ) Metrics to include fifteen new measurements
- 3) Section 8.16.3 - Updated Service Type Code 383 for HAZMAT, removed Parcel Select Lightweight STCs
- 4) Appendix I - Retired Parcel Select Lightweight STCs, removed references to previous releases

### Date: 10/10/2023

- 1) Corrected Cubic Pricing information in Section 8.3
- 2) Removed PRS STCs (NSA Only) in Appendix I
- 3) Updated IMPB Non-Compliance Barcode Quality (BQ) Metrics to include four new measurements in Section 1.2.1.1
- 4) Added Federal Register Notice on IMPB Non Compliance for Barcode Quality in Section 1.2
- 5) Added effective date when IMmb is required – January 21, 2024

### Date: 07/07/2023

- 1) Removed references to USPS Retail Ground.
- 2) Updated references to USPS Ground Advantage (formerly First-Class Package Service)
- 3) Updated IMPB Non Compliance Barcode Metrics to include two new measurements.

### Date: 06/05/2023 (draft v27)

- 1) Changed Publication title to Publication 199: Intelligent Mail Package Barcode (IMpb) Implementation Guide for Confirmation Services and Electronic Payment Systems
- 2) Updated HAZMAT Extra Service Code descriptions
- 3) Updated Service Type Code heading and contents
- 4) Modified references to USPS Ship from Package Platform Concept

### Date: 04/18/2023

- 1) Section 8.16 Updated Service Type Codes for HAZMAT, corrected reference to IMmb Intelligent Mail Matrix Barcode
- 2) Appendix B Updated Shipping Services File Layout v1.7 to add new G1/G2 records
- 3) Appendix C Updated Shipping Services File Layout v2.0 to add new G1/G2 records
- 4) Appendix I Updated Service Type Codes for HAZMAT
- 5) Removed all references to SMS Carrier

### Date: 02/15/2023

- 1) Section 1 Added New IMPB Non Compliance BQ Metric for Retired STC Use
- 2) Appendix A-C Shipping Services Record Layouts: Added Electronic Payment Systems (20) as Payment Method
- 3) Appendix G Added Event 75 to Domestic Scan Event List

## Appendix Q: Publication Change Notes

---

- 4) Appendix I Removed Returns with Sig Con Service Type Codes (820-828)
- 5) Appendix J Added Returns Processing Facility (RPF)
- 6) Appendix J Repurposed Extra Service Code 415 for USPS Label Delivery

### Date: 12/16/2022

- 1) Section 8.17 Added for Hazardous Materials
- 2) Exhibit 29 Added for sample HAZMAT shipping label
- 3) Appendix D Removed information for Shipping Partner Files v2.0 and v3.0
- 4) Appendix I Add HAZMAT Service Type Codes, Matter for the Blind Returns (526)
- 5) Appendix J Add HAZMAT Extra Service Codes 810 – 832, Removed Special Handling from ESC Descriptions, removed Scan Based Payment (450) Extra Service Code

### Date: 7/26/2022

- 1) Appendix G-4 – Corrected description for scan event 86

### Date: 7/14/2022

- 1) Section 2.4 - Added Package Platform Concept (PPC) information
- 2) Section 7.2 – Updated the list of correctable fields in a Shipping Services File.
- 3) Section 8.5.1 - Updated included insurance information for Priority Mail Outbound and Returns (changing July 10, 2022)
- 4) Section 8.12 – Removed Merchandise Return Service (MRS) - Retired
- 5) Section 8.16 - Updated list of available products for Tracking Plus – Library Mail, Media Mail®, Bound Printed Matter, First-Class Mail® (Letters and Flats), USPS Marketing Mail® Parcels and Nonprofit Parcels, Priority Mail Express International, Priority Mail International, First-Class Package International Service
- 6) Appendix B – Shipping Services File 1.7 – Updated to include Supplemental Address Information
- 7) Appendix C – Shipping Services File 2.0 – Updated to include Supplemental Address Information
- 8) Appendix D – Shipping Partner Event File 5.0 – Updated to include Supplemental Address Information and Foreign Postal Code
- 9) Appendix E-3 - Updated CEW Messages table to remove temporary column for 4/24/2021 changes, updated and new messages for 4/3/2022 for Dimensions and Non Standard Extra Service Codes
- 10) Appendix G-4 – Updated Scan Event Listing
- 11) Appendix H – Minor corrections to Update eVS Reconciliation Records (DP,PS), removed references to 'CAPS' for Transaction ID/Transaction Status Codes
- 12) Appendix I: Intelligent Mail Package Barcode Service Type Codes – Remove retired STCs, add new/updated STCs
- 13) Appendix J Table 5 – Destination Rate Indicator – Added H for Destination Service Hub (DSH)
- 14) Appendix J Table 7 - Added USPS Returns (452) and Non-Standard Fees (881,882,883), removed Return Service (455), retired Special Handling Fragile (852)
- 15) Appendix J Table 8 - Corrected mail class code for Global Express Guarantee to 'PG'
- 16) Appendix J Table 11 – Added Rate Indicators OT, SN,SR, Q6-Q0. Updated description for Rate Indicators OS, P5-P9

### Date: 01/05/2021

- 1) Appendix E-3 – Updated CEW table to correct new message effective date to 4/24/2021.

### Date:12/31/2020

- 1) Appendix B – Shipping Services File 1.7 – Updated Content Rules and Limitations for various fields to provide additional information relevant to Export Compliance for International Items
- 2) Appendix C – Shipping Services File 2.0 – Updated Content Rules and Limitations for various fields to provide additional information relevant to Export Compliance for International Items
- 3) Appendix E-3 - Updated CEW Table for New Messages to support Export Compliance for International Items

## Appendix Q: Publication Change Notes

---

- 4) Appendix I: Intelligent Mail Package Barcode Service Type Codes – Updated list of service type codes
- 5) Appendix J Table 7 Extra Service Codes – Updated extra service codes for USPS Tracking Plus™
- 6) Section 1.2.1 - Updated IMPB Non-Compliance Fee to reflect increase from .20 to .25
- 7) Section 8.9 - Remove Return Receipt for Merchandise information
- 8) Section 8.16 – Updated to reflect name change from Premium Data Retention and Retrieval to USPS Tracking Plus™

### Date 01/26/2020

1. Added Section 8.16.1 Premium Data Retention and Retrieval Service
2. Added Section 8.16.2 General Information
  - a. Added “Premium Data Retention and Retrieval service allows customers to retain scan data, or scan and signature data, beyond the Postal Service’s standard data retention period, for an additional 6 months up to 10 years for a small fee. Premium Data Retention and Retrieval service is available for packages shipped via Priority Mail Express, Priority Mail, First-Class Package Service, Parcel Select, and packages with Adult Signature Services. For Scan and Signature Retention on products other than Priority Mail Express, the customer must have purchased an underlying signature service, such as Signature Confirmation service (see [Notice 123–Price List](#)). Customers can request Premium Data Retention and Retrieval service online at usps.com or through a Shipping Services File. USPS Premium Tracking provides options to extend access to the tracking history for anywhere Shipping Service File Specifications.
3. Added Section 8.16.3 Shipping Services File Specifications
  - a. Mailers providing a shipping services file must include the appropriate Premium Data Retention and Retrieval Service three digit Extra Service Code (Refer to Appendix J, Table 7-1 for the complete list of 3-digit Extra Services Codes) and Extra Service Fee for domestic shipments. Mailer must populate shipping services file version 1.6 and 1.7, Detail Record 1 (D1)-Record Positions 399-443 (if applicable). Mailers must populate shipping services file version 2.0, Detail Record 1 (D1)-Record Position 44-5, if applicable)
4. Added Section 8.16.4 Prices
  - a. Eligible parcels are subject to the Premium Tracking and Data Retention fee (see Notice 123—Price List)
5. Updated Appendix J-Table 7-Table 7 - Extra Service Codes, Three-Digit Extra Services Codes – IMpb COMM 505
  - a. Added” New Extra Service Codes 480, 481,482,483,484,485,486, 487, 488, 489 for Premium Data Retention and Retrieval Service

### Date: 10/07/2019

1. Updated Section 3.1.1 Things to Know about the Shipping Services File
  - a. Added Line Item 9 - “Electronic Signature Online™ (eSOL) service allows customers to use a previously provided electronic signature to allow delivery of items for which the sender chose Priority Mail Express®, Signature Confirmation™, or Insurance over \$500. These services until now have required a signature at the time of delivery. With eSOL, the Informed Delivery account holder for the delivery address can opt to use the previously provided electronic signature, using their Informed Delivery® Packages Dashboard. By default, certain packages are automatically opted in and eligible for eSOL. Mailers requiring a physical signature, at the time of delivery, rather than accepting a previously provided electronic signature, can opt out of Electronic Signature Online (eSOL). To opt out, mailers must populate a value code of ‘3’ in the Waiver of Signature/Carrier Release/Merchant Override/Customer Delivery Preference field (see Section 8.15.2) in the Shipping Services File.”
2. Updated Section 8.5.1-Insurance General Information
  - a. Added new paragraph – “Electronic Signature Online™ (eSOL) service allows customers to use a previously provided electronic signature to allow delivery of items for which the sender chose Priority Mail Express®, Signature Confirmation™, or Insurance over \$500. These services until now have required a signature at the time of delivery. With eSOL, the Informed Delivery account holder for the delivery address can opt to use the previously provided electronic signature, using their Informed Delivery® Packages Dashboard. By default, certain packages are automatically opted in and eligible for eSOL. Mailers requiring a physical signature, at the time of delivery, rather than accepting a previously provided electronic signature, can opt out of Electronic Signature Online (eSOL). To opt out, mailers must populate a value code of ‘3’ in the Waiver of Signature/Carrier Release/Merchant Override/Customer Delivery Preference field (see Section 8.15.2) in the Shipping Services File.
3. Updated Section 8.10.1-Signature General Information

## Appendix Q: Publication Change Notes

---

- a. Added new paragraph – “Electronic Signature Online™ (eSOL) service allows customers to use a previously provided electronic signature to allow delivery of items for which the sender chose Priority Mail Express®, Signature Confirmation™, or Insurance over \$500. These services until now have required a signature at the time of delivery. With eSOL, the Informed Delivery account holder for the delivery address can opt to use the previously provided electronic signature, using their Informed Delivery® Packages Dashboard. By default, certain packages are automatically opted in and eligible for eSOL. Mailers requiring a physical signature, at the time of delivery, rather than accepting a previously provided electronic signature, can opt out of Electronic Signature Online (eSOL). To opt out, mailers must populate a value code of ‘3’ in the Waiver of Signature/Carrier Release/Merchant Override/Customer Delivery Preference field (see Section 8.15.2) in the Shipping Services File.”
4. Updated Section 8.15.1 Merchant Override General Information
  - a. Updated paragraph to read – “Electronic Signature Online™ (eSOL) service allows customers to use a previously provided electronic signature to allow delivery of items for which the sender chose Priority Mail Express®, Signature Confirmation™, or Insurance over \$500. These services until now have required a signature at the time of delivery. With eSOL, the Informed Delivery account holder for the delivery address can opt to use the previously provided electronic signature, using their Informed Delivery® Packages Dashboard. By default, certain packages are automatically opted in and eligible for eSOL. Mailers requiring a physical signature, at the time of delivery, rather than accepting a previously provided electronic signature, can opt out of Electronic Signature Online (eSOL). To opt out, mailers must populate a value code of ‘3’ in the Waiver of Signature/Carrier Release/Merchant Override/Customer Delivery Preference field (see Section 8.15.2) in the Shipping Services File.”
5. Updated Section 8.15.2 Merchant Override Shipping Services File Specification Information
  - a. Updated paragraph to read – “Mailers requiring a physical signature, at the time of delivery, rather than accepting a previously provided electronic signature, can opt out of Electronic Signature Online (eSOL). To opt out, mailers must populate a value code of ‘3’ in the Waiver of Signature/Carrier Release/Merchant Override/Customer Delivery Preference field (see Section 8.15.2) in the Shipping Services File.”
  - b. Added Exhibits 28, 29 and 30- Version 1.6, 1.7 and 2.0 Detailed Record 1 Required Fields to identify Merchant Override USPS Electronic Signature Online
6. Revised Appendix A Shipping Services File v1.6
  - a. Revised Content Rules and Limitations Section
    - i. Merchant Override USPS Electronic Signature Online (eSOL)
7. Revised Appendix B Shipping Services File v1.7
  - a. Revised Content Rules and Limitations Section
    - i. Merchant Override USPS Electronic Signature Online (eSOL)
8. Revised Appendix C Shipping Services File v2.0
  - a. Revised Content Rules and Limitations Section
    - i. Merchant Override USPS Electronic Signature Online (eSOL)

### Date: 09/26/2019

1. Updated Section 8.15 Merchant Override Electronic Signature Online (eSOL) Out-Out
2. Updated Appendix A Shipping Services File v1.6
  - a. Added New Field Name-Merchant Override
  - b. Added New Content Rules and Limitations Section
    - i. Merchant Override-Electronic Signature Online (eSOL) Opt-Out
    - ii. Value 3
3. Updated Appendix B-Shipping Services File v1.7
  - a. Added New Field Name-Merchant Override
  - b. Added New Content Rules and Limitations Section
    - i. Merchant Override-Electronic Signature Online (eSOL) Opt-Out
    - ii. Value 3
4. Updated Appendix C-Shipping Services File v2.0
  - a. Added New Field Name-Merchant Override
  - b. Added New Content Rules and Limitations Section
    - i. Merchant Override-Electronic Signature Online (eSOL) Opt-Out

ii. Value 3

5. Updated Appendix E-3 Confirmation Error Warning Messages
  - a. Added 817 - 'NO PRODUCTS ARE MAILABLE TO &destn\_country\_name'
  - b. Added 818 - 'MAIL CLASS &m\_cl\_code NOT AVAILABLE IN &destn\_country\_code; OTHER CLASSES AVAILABLE'
  - c. Added 819 - 'EXTRA SERVICE(S) &extra\_svc\_code NOT AVAILABLE IN &destn\_country\_name';

**Date: 09/16/2019**

1. Added Section 8.14 Cremated Remains
2. Deleted Section 8.11 USPS Electronic Signature Online (eSOL)
3. Reserved Section 8.15 for Merchant Override Electronic Signature Online (eSOL)
4. Updated Appendix J-Table 11
  - a. Removed rate indicator 5R- 5-Digit Dimensional Rectangular Price
  - b. Removed rate indicator 5N- 5-Digit Dimensional Nonrectangular Price

**Date: 08/04/2019**

1. **Updated Appendix I Intelligent Mail Package Barcode Service Type Codes**
  - a. Added New STCs 090, 091, 092 and 093 for Cremated Remains shipments

**Date: 07/25/2019**

1. Updated Section 3.2.1-Things to Know about the Shipping Services File
  - a. Added Line Item Number 8- "Detail Record 2 (D2), (Detail Record 3 (D3), and Detail Record 4 (D4) must immediately follow their respective Detail Record 1 (D1), ensuring they are adjacent and in sequential ascending numeric order within the Shipping Services File. "
2. Updated Section 3.3-File, Manifest and Record
  - a. Added "Detail Record 2 (D2), (Detail Record 3 (D3), and Detail Record 4 (D4) must immediately follow their respective Detail Record 1 (D1), ensuring they are adjacent and in sequential ascending numeric order within the Shipping Services File."
3. Updated Section 3.3.1-Detail Record 3 and 4
  - a. Added "Detail Record 3 (D3) and Detail Record 4 (D4) must immediately follow their respective Detail Record 1 (D1) and Detail Record 2 (D2), ensuring they are adjacent and in sequential ascending numeric order within the Shipping Services File."
4. Updated Section 3.4.3-Detail 2 Record Key Fields
  - a. Added "Detail Record 2 (D2) must immediately follow its respective Detail Record 1 (D1), ensuring they are adjacent and in sequential ascending numeric order within the Shipping Services File."
5. Updated Section 3.4.4-Details Records 3 and 4
  - a. Added "Detail Record 3 (D3) and Detail Record 4 (D4) must immediately follow their respective Detail Record 1 (D1) and Detail Record 2 (D2), ensuring they are adjacent and in sequential ascending numeric order within the Shipping Services File."
6. Updated Appendix J-Table 11
  - a. Removed rate indicator 'US'
7. Appendix A, Appendix B, Appendix C, Appendix D: Update Content Rules and Limitation Columns
  - a. Removed wording regarding rate indicator 'US'
8. Appendix A-Shipping Services File (SSF) v1.6 Detail Record 1
  - a. Removed language around rate indicator 'US', Record Position 373-374
9. Appendix B-Shipping Services File (SSF) v1.7 Detail Record 1
  - a. Removed language around rate indicator 'US', Record Position 373-374
10. Appendix C-Shipping Services File (SSF) v2.0, Detail Record 1
  - a. Removed language around rate indicator 'US', Record Position 37
11. Appendix D-4, Shipping Partner Event File v5.0, Record Position 546-547

- a. Removed language around rate indicator 'US'

**Date: 05/31/2019**

1. Entire Document: Updated FTP to SFTP
2. General formatting updates, grammar and spelling updates
3. Updated Section 1.2.1
  - a. Removed column referencing July 2017 IMpb Compliance Thresholds
4. Updated Section 1.5 to include Delivery Partner files as a file that can be processed in the TEM environment
5. Added Section 2.6 -Enterprise Payment System
6. Updated Section 3.1 Exhibit 1 -Shipping Services File Data Flow
