

§ Crawford Technologies

CATEGORY: Document Automation Management

PRODUCT: Crawford Workflow Solutions and Enterprise Output Management

COMPANY: Crawford Technologies USA, 4715 Innovation Drive, Suite 110, Fort Collins, CO 80525. Tele: 1-866-679-0864 Web: www.crawfordtech.com

DESCRIPTION: For nearly 20 years, Crawford technologies products have been the driving force behind high-value, high-volume documents for many of the world's top organizations. Companies look to us for our platform-independent approach, leading system performance and superior innovation. The products reflect the extensive expertise in the technologies surrounding enterprise output and document processing, as well as our deep understanding of the business implications of information management.

WORKFLOW AUTOMATION SOLUTIONS

IntelliMerge PRO: IntelliMerge PRO is a workflow automation solution designed to consolidate and orchestrate fragmented document processes into a single, intelligent path.

PRO Conductor: PRO Conductor is an integration platform to automate and orchestrate every step of your Customer Communications Management (CCM) environment.

AccessibilityNow® Dashboard: This is a high-end workflow solution which includes a web-based dashboard that provides tracking of all activities.

PRO Reprint Server: Crawford Technologies PRO Reprint Server gives organizations a highly flexible, automated reprint solution for documents, bills, and statements.

PRO InkJet Express: PRO Inkjet Express provides you with a comprehensive set of tools to effortlessly establish an automated workflow for your inkjet.

PRO Workflow Connector: PRO WorkFlow Connector leverages open, ISO standards-based communication protocols to seamlessly transfer print-ready data streams and metadata.

PRO WorkFlow JES: PRO WorkFlow JES is an integrated set of spool management products for z/OS and OS/390.

PRO Workflow Server: PRO WorkFlow Server is the ultimate tool for automating your data manipulation, application transformations, and print stream re-engineering needs.

PRO Production Manager: PRO Production Manager is a powerful software solution designed to help businesses streamline their printing operations, improve productivity, and reduce costs.

Smart MailHub: Smart MailHub allows organizations to eliminate the costs, complexities and compliance risks of producing ad hoc and small batch business.

DataPrep: DataPrep orchestrates the flow of data throughout an enterprise.

ENTERPRISE OUTPUT MANAGEMENT SOLUTIONS

PRO Transforms: PRO Transforms delivers lightning-fast, seamless and accurate print stream conversions across all industry-standard formats, boosting efficiency and flexibility.

IntelliMerge PRO: IntelliMerge PRO is a workflow automation solution designed to consolidate and orchestrate fragmented document processes into a single, intelligent path.

SmartSetup: SmartSetup is a document & application onboarding tool built for Enterprise Communications Processing (ECP), an efficient no-code software.

Operations Express: Operations Express is an advanced post composition solution for re-engineering and enhancing existing high volume print streams.

PDF Accelerator: PDF Accelerator is an industry proven solution used to streamline and optimize PDFs for print, archival and e-delivery, ensuring increased productivity.

PRO Designer Product Family: PRO Designer is a powerful Graphical User Interface (GUI) design tool to quickly configure actions and parameters.

PRO Concatenator: A small approach to merging print and PDF documents, PRO Concatenator improves workflow and reduces processing costs by concatenating, merging, commingling and/or re-sequencing selected files into one optimized file.

PRO Print Manager: PRO Print Manager provides print operations that process either transactional or marketing communications, a flexible and robust output management solution.

TurboFlow: CrawfordTech's TurboFlow delivers new levels of performance and flexibility to accelerate high volume complex processing for all print formats.

PRO Office: PRO Office is a powerful web service that enables organizations to convert and merge Microsoft Office and image files.

Smart MailHub: Smart MailHub allows organizations to eliminate the costs, complexities and compliance risks of producing ad hoc and small batch business.

PRO Lockdown: PRO Lockdown is the ideal solution for communication providers that need to manage and control access to customer communications.

PRO Viewer: PRO Viewer provides organizations with a high fidelity, multi-format PDL print stream viewer for the fast, flexible, and accurate viewing
