

printer or any number of Tritek sort bins or optional features. The standard machine has two sort bins for sorting processed items or rejected pieces.

**DIGITAL EMAIL DELIVERY:** An ideal solution for when you are out of the office and need to retrieve your mail. The Tritek Digital Email System is designed to deliver email notification of inbound mail to its recipients, as it is received each

*Tritek Compact Sorting System*

day, for internal company-mail distribution.

You can also use the Tritek Digital Email System to deliver by email scanned images of contents of any mail piece.

**DIGITAL EMAIL DELIVERY FEATURES:**

The Tritek Digital Email System: 1) Scans and captures images of both sides of an incoming mail piece; 2) Stores each image in a TIFF, JPEG, or PDF file; 3) Labels each image with the time and date received; 4) Labels each image with a unique identification

number. The Tritek Digital Email System is available in various configurations and depending on the configuration, a Tritek Digital Email System can either sort the mail into a holding tub for future mail piece scanning or automatically sort the mail for in-house mail carrier delivery.

**TRITEK ACE PARCEL/FLATS/ LETTER PROCESSING:**

The Tritek ACE workstation is designed to process parcels, flats and letters. ACE Work Station operation is simple, fast, and reliable. Operators place an item on the platform while an overhead camera reads the mail piece which is displayed on the touch screen computer. After the item is read the operator touches the red print button and a label is printed for that mail item. The weight and postage rate is calculated as the manifest data is stored for USPS discount reporting.

**INCOMING MAIL/PARCELS:** 1) Database match and look-up; 2) Label printing with delivery information; 3)

Barcoding for tracking of mail pieces or parcels; 4) Return mail processing; 5) Mail forwarding; 6) Research mail for generically addressed mail pieces; 7) Touch screen computer for easy operation.

**TRITEK RULE EDITOR SOFTWARE:** Tritek software allows many options to sort incoming mail. This software allows for greater customization of sort plan and OCR reading priorities. When processing by names only, the Tritek system will locate an address (in any orientation), and search for all names in the names database.

**CORRECT ELECT VOTE-BY-MAIL:** Tritek Correct Elect Vote-by-Mail Equipment is the solution for the processing of Vote-by-Mail ballots envelopes. Voters' signatures are detected and using barcodes are verified against a database of registered voters. Tritek offers its Correct Elect Vote-by-Mail Processing Systems in three configurations: 1) An inbound sorter to support up to 1024 bins, optional overhead mail tray racks and other sorting options; 2) A portable system; 3) A desktop unit. These machines include real-time imaging, storing, printing of time and date in addition to properly sorting votes into correct precincts. Patented feeder technology allows smooth operations over a variety of envelope types.

## § Eastman Kodak Company

**CATEGORY:** Ink

**PRODUCT:** Kodak Proprietary Inks:

**COMPANY:** Eastman Kodak Company, 3000 Research Blvd, Dayton, OH 45420. Email: [randy.vandagriff@kodak.com](mailto:randy.vandagriff@kodak.com) Tele: 937-259-3000.

**DESCRIPTION:** Versamark Systems deliver a complete imprinting solution, which includes Kodak's proprietary inkjet

*Kodak Proprietary Inks*

inks that drive a low cost of ownership. The water-based, eco-friendly dye formulations produce strong print quality and are available in black, a range of spot colors, and specialty varieties for security applications. For digital printing, KODACHROME Inks produce sharp text, images and graphics, and uniform area

fills with 100% variable data content at full press speed. To further improve quality, nano-particulate pigment KODAK EKTACOLOR Inks are matched to the press's imaging system. The result is print quality that approaches offset on a wide range of substrates, with the unique flexibility and value of variable printing—all at high throughput speeds.
