

Mail Carts & Accessories

NEW Secure TrayTrucker and Secure Tray Rack for mail-in ballots

§ Mail Automation, Inc.

CATEGORY: Mail Carts & Accessories

PRODUCT: TubTrucker and TrayTrucker

COMPANY: Mail Automation, Inc., 310 Baltimore-Somerset Rd, Baltimore, OH 43105. Key Contact: Bob Dersham Phone: 844-808-5454 Email: Bob@MailAutomationInc.com

The TubTrucker (top) and TrayTrucker (bottom) from Mail Automation, Inc.

TUBTRUKER: TubTrucker is versatile and can be used for all typical mail room functions. It stages materials that must be moved between operations and efficiently stores mail during inserting, metering or presorting. Easy to use and durable. Available in your choice of colors. Stores 9 tubs; durable steel construction; small footprint -- 48" long x 58" high and 20# wide.

TRAYTRUKER: The new TrayTrucker is an efficient means of transporting trays in the mail processing operations. It holds 60 one foot trays or 30 two foot trays. Accessible from either side. Durable steel construction. It measures 46" long x 71" high x 25" wide. Use different colors to differentiate mail.

Mail Monitoring/Visioning

§ Bell and Howell

CATEGORY: Mail Monitoring/Visioning

PRODUCTS: IQ Software Suite; JETVision

COMPANY: Bell and Howell, 3791 S. Alston Avenue, Durham, NC 27713. Web: bellhowell.net. Phone: 800-961-7282.

JETVision FACTORY INTELLIGENCE ENABLER: The JETVision machine vision system combines hardware and software solutions. Vision and sensing hardware attach to a production line, collecting data in

Bell and Howell JETVision

real time. These data points help control processes by validating with an external file source or reporting to operation management. JETVision's robust inspection software reads, interprets and normalizes production control marks. These include features such as barcodes, serial numbers, or colors, and it mines data from virtually any document or object. Featured technologies enable both manufacturing and distribution supply chains to capture

data at extreme speeds, with 100 percent integrity. This dynamic system combined with our next-generation Automated Document Factory platform provides the complete solution.

IQ FACTORY PRODUCTION INTELLIGENCE: IQ is a comprehensive software suite that provides workflow management and real-time tracking of your entire production environment's data, from across multiple facilities and down to an individual item. IQ is a modular and scalable solution that securely tracks data and job efficiency anywhere across your organization. Three major components completely eliminate the need for the tedious process of data collection, instead providing invaluable real-time visibility that allows for streamlined production mail environments and improved operational decisions.

NAVIGATOR(tm) INTELLIGENT SYSTEM INTERFACE: Bell and Howell's Navigator™ Intelligent System Interface is a powerful, operator-friendly control platform used on their inserter systems. It centralizes machine control, real-time diagnostics, and job management into one intuitive interface - streamlining setup, reducing downtime, and improving productivity. Navigator is scalable, integrates with vision systems and reporting tools, and supports a wide range of mail piece formats - making it a key driver of efficiency, accuracy, and throughput in high-volume mail operations.
