

Inserters Mailing Systems

Bell and Howell Smartmailer

the end-of-process JETVision® camera system to ensure 100% integrity.

SMARTMAILER: Evolve your mail and fulfillment operations from the labor-intensive process of manually packing merchandise mailers with the SmartMailer package inserter from Bell and Howell. Accurately and automatically process as many as 2,500 merchandise packages per hour. Thanks to its modular configuration, SmartMailer can be customized to insert a variety of products through use of catalog feeders, shuttle feeders and manual feeding areas for non-standard contents.

FEATURES: The SmartMailer is a compact, continuous motion inserter with flexibility to work with rigid mailers or padded envelopes. These packages can be automatically printed in-line, tracked and sorted to simplify the outgoing shipments. To eliminate packaging and labeling errors, the SmartMailer delivers high-integrity data during the packing process with real time product tracking controls, barcode matching through optical readers or cameras, and a final daily report of all production runs.

PAPER-PRO: The Paper-PRO combines decades of wrapping technology with the latest in logistics automation. It is designed to streamline fulfillment by creating right-sized, ready-to-ship paper bags for single or multiple products. The system can process kraft paper, single-faced corrugated, and bubble paper, providing the same durability and protection as standard polybags or padded mailers. Each order is scanned for size, ensuring bags are customized to the length and height of the products, which reduces both material usage and shipping volume.

FEATURES: Paper-PRO also offers options to enhance performance, including invoice printing and insertion, check-weighing with data capture, and flexible sortation features. The system integrates seamlessly with warehouse management and control systems, while also enabling full-color bag personalization to support branding initiatives.

Relay® 5000 Folder Inserter

§ Pitney Bowes Inc.

CATEGORY: Inserter Mailing Systems

PRODUCT: Relay® Folder Inserters

COMPANY: Pitney Bowes Inc., 27 Waterview Drive, Shelton CT 06484. Contact: PitneyBowes.com/omg.

RELAY® 2500/3500 LOW-TO-MID VOLUME FOLDER INSERTERS: The Relay 2500/3500 inserters bring a fast, reliable tabletop folding and inserting platform to low-to-mid volume mailers, so you can process mail faster and more accurately than doing it by hand. It's intuitive user experience and easy-to-load feeders make it simple for even casual users to fold, insert, and seal up to 3,000 envelopes per hour, without intensive training requirements. This enhanced ease-of-use saves time and money, allowing employees to focus their time on more important business tasks. The dedicated insert feeder makes it easy to add reply envelopes or marketing inserts along with document pages. The flexible solution can handle various envelope and paper sizes, complete with the speed and capacity to minimize stoppages.

Relay® 3500 Folder Inserter

RELAY® 4500 MID VOLUME FOLDER INSERTER: The Relay 4500 tabletop inserter makes it easy to automatically fold and insert important recurring mailings. The Relay 4500 is fast and reliable, capable of folding, inserting, and sealing up to 3,500 envelopes per hour. The Relay 4500 offers a number of folding options including C, Z, half or even double fold for legal-size paper. The dedicated insert feeder makes it easy to add reply envelopes or marketing inserts along with documents being folded. Add accuracy and further automation with our Relay Integrity Express software, which makes it easy to add barcodes to your documents. The Relay 4500 reads the barcodes to automatically sort and collate variable page-counts to ensure the right documents reach the right recipients.

RELAY® 5000 MID VOLUME FOLDER INSERTER: The Relay 5000 brings our flagship tabletop inserting platform

Inserters Mailing Systems

Relay® 8000 Folder Inserter

to mid volume mailers to bring you increased speed, flexibility and precision. This inserter folds, inserts and seals up to 62,500 a month with throughput of 4,000 envelopes per hour. We know your customers' privacy and security is critical. The optional file control is a proven Pitney Bowes technology version of file-based processing that goes beyond traditional OMR or 1D and 2D barcodes scanning by using a Reference File to control the folding and inserting process. You can track not only what pages are being folded and inserted, but also which specific pages are intended for each individual customer, giving you the capability to recreate a mailing event at a personalized recipient level. Achieve greater levels of accuracy, security and speed with the Relay 5000 inserting system.

RELAY® 7000 MID TO HIGH VOLUME TABLETOP FOLDER INSERTER:

The Relay 7000 can fold, insert and seal up to 5,400 pieces per hour with a monthly throughput of up to 120,000 envelopes per month. It brings a standard load-on-the-fly high capacity envelope feeder which can hold up to 500 envelopes. Letters and flats can be processed in the same job with counts of up to 25 pages inserted into flat envelopes. Higher volume mailers can add up to 2 high capacity sheet feeders, each with a capacity of up to 2,000 pages. The Relay 7000's optional file control integrity is the proven Pitney Bowes file-based processing technology that goes beyond traditional OMR or 1D and 2D barcodes scanning by using a Reference File to control the folding and inserting process. You can track not only what pages are being folded and inserted, but also which specific pages are intended for each individual customer.

RELAY® 8000 HIGH VOLUME TABLETOP FOLDER INSERTER:

The Relay 8000 is our flagship tabletop folder inserter. Its enhanced chassis gives you monthly throughput of up to 200,000 envelopes per month. This inserting system can process letters and flats in the same mailing run with speeds of up to 5,400 envelopes per hour. You get peace of mind knowing your mail is completed accurately with a reliable system. Higher volume mailings are handled with ease by adding up to 2 optional high capacity sheet feeders, each with a capacity of up to 2,000 pages. The Relay 8000's optional file control integrity is the proven Pitney Bowes file-based processing technology that goes beyond traditional OMR or 1D and 2D barcode scanning by using a Reference File to control the folding and inserting process.
