

Digital Mail Systems

Tritek Compact Elite

Tritek sorting machine is designed to read the address of all mail pieces regardless of what direction they are fed into our machine. Tritetek has the only mail processing equipment that can read envelopes, magazines, newspapers, poly-wrapped pieces in any direction in a 12" x 17" viewing area, without adjustments, even on the front and backside of the mail piece! The recognition software captures an image of the entire document in grayscale (other reading applications can be integrated if desired). The image can then be stored and tracked.

NOMAD - HIGH RESOLUTION PORTABLE DOCUMENT SCANNER: The Nomad is portable, plugs into 120V AC receptacles, and can read any type of document or envelope. It handles odd shapes such as handwritten notes, forms, or letters and any thickness ranging from single sheets to magazines. The high resolution 300 dpi imaging creates TIFF, PEG or PDF files in black & white or color. The workflow of all Tritetek document scanning machines is highly configurable and integrates well with third-party software applications. While Tritetek includes Doc-U-Search – our own leading-edge storage and retrieval software - the operator can select alternate applications to perform image capture, post-scan processing or document indexing and storage.

DIGITAL EMAIL DELIVERY: An ideal solution for when you are out of the office and need to retrieve your mail. The Tritetek Digital Email System is designed to deliver email notification of inbound mail to its recipients, as it is received each day, for internal company-mail distribution. You can also use the Tritetek Digital Email System to deliver by email scanned images of contents of any mail piece.

FEATURES: The Tritetek Digital Email System: 1) Scans and captures images of both sides of an incoming mail piece; 2) Stores each image in a TIFF, JPEG, or PDF file; 3) Labels each
