

Barcoding/Sorting Systems

Bursters/Cutters/Processors

Tritek Multi-Level Sorter

will locate an address (in any orientation), and search for all names in the names database.

OUTGOING MAIL/PARCELS: When used for presorting, ACE performs: 1) USPS manifesting / weighing; 2) Prints label for each processed mail item; 3) Automated Tritek address block OCR reader; 4) USPS U-Move Fast Forwarding; 5) DRS look-up for USPS Presort discounts; 6) IMB - Intelligent Mail barcode printed on label manually affixed to item.

RETURN MAIL: Tritek equipment expunges bad addresses from your database to save on future postage. Easily interfaces with FastForward for MOVE updates. Tritek has successfully operated a return mail facility for 15 years, processing mail for Chase, Citigroup and Morgan Stanley.

CORRECT ELECT VOTE-BY-MAIL: Tritek Correct Elect Vote-by-Mail Equipment is the solution for the processing of Vote-by-Mail ballots envelopes. Voters' signatures are detected and using barcodes are verified against a database of registered voters. Tritek offers its Correct Elect Vote-by-Mail Processing Systems in three configurations: 1) An inbound sorter to support up to 1024 bins, optional overhead mail tray racks and other sorting options; 2) A portable system; 3) A desktop unit. These machines include real-time imaging, storing, printing of time and date in addition to properly sorting votes into correct precincts. Patented feeder technology allows smooth operations over a variety of envelope types.

CORRECT ELECT VOTE-BY-MAIL FEATURES: Tritek holds the exclusive patent on ballot method and apparatus to provide full audit trail, ballot process management and status reporting. Scans can be archived in color, gray-scale or black and white. Accurate signature verification reduces labor costs of manual or semi-automatic validation and improves regulatory and security compliance. Voters' signatures are detected with barcodes and are verified against a database of registered voters. The Tritek inbound sorter can support up to 1046 bins, optional overhead mail tray racks, and other sorting options. We also offer a portable system and a desktop unit. These machines include real-time imaging, storing, printing of time and date in addition to sorting votes into correct precincts.

§ Spedo US, Inc.

CATEGORY: Bursters/Cutters/Processors

PRODUCT: SPEDO Continuous Forms Cutters

COMPANY: Spedo US, Inc., PO Box 1032, Reisterstown, MD 21136-1032 Contact: James Wroe Email: support@spedo.us. Phone: 866-773-3687 or 410-517-1690. Web: www.spedo.us

SPEDO 2200 FORMS CUTTER: This new cutter offers a simple finishing solution while maintaining Spedo's well

Spedo 2200 Forms Cutter

proven quality, reliability and flexibility. The modular design of the entry level 2200 allows each machine to be tailored to suit each application. Running at speeds of up to 90 m/min (300 ft/min), the Spedo 2200 forms cutter is the perfect solution to offline or near line finishing applications.

Spedo 2400 Forms Cutter

SPEDO 2400 FORMS CUTTER: In addition to the base model 2300, the new SPEDO 2400 Forms Cutter offers more. An intuitive touch-screen operator panel includes on screen parts catalog and gives total control over all aspects of the machine's functionality. Exact speed settings, to a tolerance of one foot per minute for easier system interface. Over lifetime total counter and language interpretation. A new infeed system improves cut accuracy and web control. The most noticeable addition is the open side for easier waste removal when running online or in system. Equally important is what hasn't changed: long-service life.

Spedo 2500 Forms Cutter

SPEDO 2500 HIGH SPEED FORMS CUTTER: The SPEDO 2500 High Speed Forms Cutter allows the user to process continuous forms at up to 125 A4 forms/minute (approximately 400ft/min). Using Spedo's well proven control system and intuitive touch screen the SPEDO 2500 offers total control and flexibility while running both off and

Spedo 2600 Forms Cutter

on-line. Store up to 30 different jobs from 64mm up to 4000mm, with or without strip cut, using various line increments. OMR recognition is fitted as standard which means viable batch sizes can be processed easily using marks issued by the printer. The SPEDO 2500 is available in single blade and double blade options to allow the operator to remove up to 7.8mm strip in one hit thus improving pro-

ductivity.

SPEDO 2600 PINLESS CUTTER: The SPEDO 2600 Pinless Forms Cutter allows the user to cut continuous forms without the need for marginal punching. Using Spedo's proven control system and intuitive touch screen the SPEDO 2600 offers total control and flexibility while running both off and on-line. Store up to 30 different jobs from

Spedo 8200 Descending Stacker

1/16th of an inch up to 13 feet, with or without strip cut, using line increments of 1/6th, 1/8th, 1/10th, 1/12th, 1/16th and metric millimetres. Easy optical mark set-up means that form registration can be done using any repeatable print area anywhere on the form, removing the need for the printer to

add specific registration marks. The SPEDO 2600 is available in single blade and double blade options to allow the operator to remove up to 7.8mm strip in one hit, thus improving productivity.

FEATURES: The 2600 Pinless Cutter is fast, precise, and versatile. Highly reliable. Simple operator controls. Excellent cutting quality. Short setup time. Minimal footprint. Minimal service needs.

SPEDO 8200 DESCENDING STACKER: The Spedo 8200 Descending Stacker has been designed to run in-line with the Spedo range of continuous forms cutters. Cut sheets are accepted from the forms cutter and shingled and stacked to produce a neat stack ready for finishing. Using the Spedo cutters boost / batch function, stacks can be taken away quickly with only a minimum delay thus increasing productivity.

SPEDO 9400 WEB BUFFER: The Spedo UK 9400 web buffer surpasses the boundaries of continuous forms processing whilst improving the flexibility, accuracy and reliability

demand by today's applications. The Spedo 9400 uses the latest generation of Spedo's well proven control system. This system has now been refined and expanded to provide spare capacity for the users every need. Our new web buffer will take control of your high speed printer and cutter to ensure the smoothest print flow possible.

SPEDO 8500 CONVEYOR STACKER: The Spedo 8500 Conveyor Stacker designed for both off and on-line applications. Operator adjustable height, for greater form control. Systems control allows the operator to pause the system from the output conveyor. Optional Down-stacking for extra capacity. Optional Boosting and Batching facility allows greater flexibility.

SPEDO 8100 CONVEYOR STACKER: The Spedo 8100 Conveyor Stacker designed for both off and on-line applications. Smaller footprint than standard conveyor stacker. Operator adjustable height. Systems control allows the operator to pause the system from the output conveyor. Optional Down-stacking for extra capacity. Optional Boosting and Batching facility allows greater flexibility. (8100E only)

See Spedo's listings in the Document Processing Systems section and the Self Mailing Systems section.
