Rollem's Mailstream Direct Mail Finishing System

Rollem's Dutch Cut Document Finishing System

DUTCH CUT DOCUMENT FINISHING SYSTEM: Convert large sheets into single pages – in one process. Dutch Cut is Rollem's finishing solution for high volume cutting, separation and delivery. It's dual cutting and delivery stations enable the user to take multiple page master sheets and convert them in a single process with just one operator. Impose odd or even number pages on a sheet. First direction cuts the sheet in two sections, each section is delivered into a final cutting section with dual delivery into bins. Dutch cut automates document finishing for off the charts efficiency. Learn more at <https://www.rollemusa.com/automation-integrations/>.

INSIGNIA DIE CUTTERS: The Insignia Series of die cutter is a new class of sheet-fed rotary die cutter, ideal for producing labels, packaging, and unique mail applications. The machine is capable of die-cutting, kiss-cutting, perforating, scoring, and cut-scoring on a range of papers, plastics, magnetic material, PVC, styrene and polypropylenes up to 24 pt. in thickness. Key features include run speeds up to 5,000 sph, ease of operation and quick changeover. Insignia is available in two sizes, Insignia5 handles digital sheet sizes 20x15", and Insignia7 handles B2 size 24x30" sheets. Insignia is ideal for promotional products, garment and industrial tags and labels, shaped direct mail, photo products, pocket folders, folded cartons, stickers, and the list goes on. The flexo-magnetic dies are a simple change over from job to job and the machine is easy to operate.

Equipment Maintenance Services

§ Bell and Howell

CATEGORY: Equipment Maintenance Services

PRODUCT: Mailroom Equipment Servicing

COMPANY: Bell and Howell, 3791 S. Alston Avenue, Durham, NC 27713. Visit bellhowell.net, Phone: 800-961-7282

BH MAILROOM EQUIPMENT MAINTENANCE SERVICES: Our Automation Services keep your entire mailroom

operation running smoothly-regardless of equipment manufacturer. With a nationwide team of expert mechatronic service engineers, onsite or on-call, and our powerful Integrated 360™ platform, we deliver remote diagnostics, auto-

mated SmartOps Dispatch,™ and 24/7/365 technical support. From inserters and folders to printers, sealers and sorters, we maximize productivity across your full operation.

EQUIPMENT SERVICED: Service expertise extends to mailing equipment of all types including, but not limited to: inserters, folders, sorters, pressure sealers, cutters, printers, feeders, laminators.

FAST SERVICE AND PARTS: You'll never wait long for repairs or parts with our extensive nationwide network of technicians and part stocking stores, plus our fast delivery options.

QUALIFIED TECHNICIANS: Your equipment is as important to us as it is to you. That's why we only dispatch fully trained technicians to work on your machines. If there's ever a problem our techs can't resolve, we have technical service engineers on standby for assistance.

SMARTER SERVICE THROUGH REMOTE TECHNOLOGY: Our Remote 360™ and Service Console(tm) platforms are key components of our intelligent mail equipment ecosystem. These tools enable systems to detect when performance deviates from normal parameters and automatically self-report issues to our service team within minutes for rapid triage and resolution. Leveraging predictive analytics, potential failure points can be identified before they occur and fixes can be applied remotely without any need for on-site contact.

COVERING THE ENTIRE PRODUCTION MAIL PIPELINE: Our service solutions span mail production, distribution, and sorting. Our preventive and ongoing maintenance services for mail production equipment, mail distribution equipment, and mail sorting equipment keep things running efficiently - including the implementation of production mail data collection, audit verification, and reporting solutions.
